"CHAMPION OF THE YEAR"

[New York Herald, July 16-'08]

This extract voices the opinions of the English press after the performances of the Ross Rifles at Bisley meet last year. Canadian rifle shots at the D. R. A. last year were equally successful, when, though many who used Ross Rifles were comparatively green men, 60 per cent. won places on the 1909 Bisley team.

No keen Rifle Shot can afford to do without one this season.
Write for catalogue and prices of our

ROSS RIFLE "MARK III"

The Ross Sporting Rifle, retailing at from $25.00 upwards, is worthy of the praise which those who have used it freely accord to it.

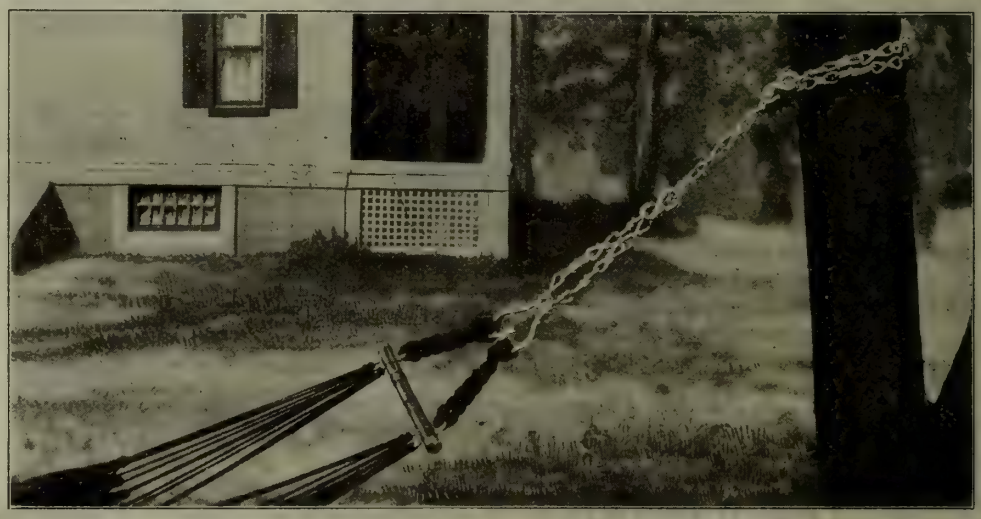
New ways to satisfy old wants Open up new opportunities for sales



THE OLD APPLE TREE SWING and ONEIDA HAMMOCK CHAINS are new ways of satisfying old wants and they do it better than old methods. They are made of "Niagara" pattern steel wire chain, galvanized, and will hold a weight of 1500 lbs.

THE OLD APPLE TREE SWING was introduced by us last year when we handled only one size. Our sales were large and our customers report they took well. This year we have two sizes to offer. No. 75 is long enough to use on a rafter or tree branch nine feet from the floor or ground, and No. 100 twelve feet. They are put up one in a box and make a neat shelf package. Screw rings, cotton hand grips and apple tree board make the swings complete and attractive. They are very reasonable in price and sell at a good profit.

The ONEIDA HAMMOCK CHAIN also sold well last season. We have two sizes, No. 3 and No. 6, three and six feet long respectively. The large illustration shows how they are used, and the box the style of package containing one pair.

Try sample lots of these two articles. You will find they will sell.

Sold throughout the Dominion by all Wholesale and Retail Hardware Merchants.

Every Little Bit Helps!!

Mr. Hardware Man,—Don't you often find that the "little sales" of the day are a big feature in the day's receipts and are often the lever to larger sales?

The Kaiser Wax Pad and Iron Cleaner

is a "little thing"—retails at 10 cent—but it is a household necessity, something entirely new on the market, a quick and big seller, with a good profit.

Every housekeeper dreads ironing day, especially so when she has a lot of shirt-waists, men's shirts, collars, cuffs, etc. to iron, she always wants to obtain a high-grade finish, equal to first-class laundries. She of course asks the dealer for advice—in return he offers her the common wax—She knows it is impossible to do good work with the common wax—So she walks away—one customer lost.

Now where she can procure an article of this merit—that reduces ironing time by half—reduces labor to a minimum—adds to the finish of clothes—and makes ironing a day of pleasure—THERE SHE IS SURE TO DO HER BUYING—AND LEAVE HER ORDER FOR OTHER THINGS.

A post card to any of our Canadian agents or direct will bring a sample of this great little business getter.

Hammer the Fact Home

THAT THE

DILLON HINGE STAY FENCE

IS THE ONE

is the best fence for the hardwareman to sell, because it will withstand rain, wind, weather and snow. It has the greatest of all principles embodied in its construction—the hinge stay, which relieves all strain on the strand wires. The fence gives at the hinges only, and when any pressure is removed, the laterals spring back immediately into place—unharmed.

It Looks Small

But there are a hundred little services a "want ad." in Hardware and Metal can perform for you cheaper, quicker, more thoroughly and more satisfactorily than can be done in any other way.

It can get a customer for you for any show cases, counters, or any other fixtures you are anxious to dispose of; it can secure for you a set of tinsmith's tools, a typewriter, a silent salesman or any other article which you are anxious to buy cheaply.

The wider your market the better the bargain you will be able to make.

Our "want ad." page will put you in touch with practically every Hardware Merchant in Canada, and out of our thousands of readers it seems reasonable to suppose that there will be some man who is looking for just such an opportunity as you have to offer.

Where SUNSHINE FURNACE is Improved for 1909

Summer Insurance. *The Gas Ring*

Owing to sweating and rusting the average furnace depreciates fifty per cent. in the summer months.

In order to make provision against this contingency Sunshine Furnace is equipped with a nickelled steam radiator and dome. All bolts and rivets are nickelled and all rods copper plated. This special treatment, besides meaning quicker and greater radiation from the radiator and dome than cold chill iron could possibly give, acts as protection for the bolts, rivets and rods from inroads of gas. When cast iron comes in contact with our nickelled steel it is coated with our special anti-rust treatment, which prevents the slightest possibility of rust commencing anywhere in Sunshine Furnace.

Then there is the semi-steel fire pot, another exclusive feature in Sunshine Furnace. This secures smoothest surface, greatest fire resisting power, minimum disintegration, and long life.

The Gas Ring. This is an entirely new idea, and will especially interest people who reside in natural gas districts. The gas ring takes the place of the lower Sunshine fire pot, thus making it possible to burn gas in the furnace without inconvenience. Such is not possible in a furnace where the ordinary gas log is inserted, for should the gas give out a coal or wood fire could not be started until gas pipes were disconnected.

With the new Sunshine special feature, not only will the sulphur in gas not affect radiation, but the change from gas to coal can be made on a second's notice.

Purpose and Method in the Selling Game

How Brewster Overcame an Early Handicap and Gained Promotion in the Firm—the "Old Man" Always Remembered His Lack of Interest in the Factory—Rounding up the Merchants of a Country Town.—Ben West in "System."

Brewster had come into the sales force via the stock room. As he sat watching the telegraph poles whiz by, with the train drawing nearer headquarters he had about made up his mind that this must be the reason why he was discriminated against. He mentally listed the men on the force who had outranked him in the push for promotion. As he checked them off one by one it seemed as though but a small number had come from inside the organization.

That was the difficulty then; only an outside man stood any chance. On this trip in, he planned to see the Old Man, state his case, and demand recognition or seek a new job. With all the instincts of a trained salesman he began arranging his data so as to make a correct approach. The most he had to guide him was hearsay. The only time the orbit of the Old Man touched the orbit of the business was on one of his customary visits through the house. These visits were usually unexpected—sometimes casual—sometimes thorough.

It was on one of these inspection tours that Brewster first saw the Old Man. It was in the stock room. An elderly, somewhat dapper, well-groomed gentleman quietly asked some casual question regarding the arrangement of the stock. He followed it up by others, each getting a little more pertinent and searching. Brewster—then a young man of seventeen—had replied to each one of the questions, "Don't know, I'm sure." With a somewhat kindly manner the visitor had shown him how to assort his stock in shorter time, then how to load it on the truck with less work and had gone on. Brewster had seen the Old Man several times since and had always been greeted with a friendly nod of recognition.

After thinking it over, Brewster decided to feel out the sales manager before he tackled the Old Man, though he knew the latter was really the court of last resort.

Talks to the Sales Manager.

"I want to be perfectly fair," Brewster was saying to the sales manager, "but it certainly does seem as though I was worth more money and a more important position. I have been with the company now nearly ten years, and have seen—without a murmur—men who I believe are no better, advanced in important positions. More than that, these men have, for the most part, been brought in from outside organizations and put over my head. It's a selling proposition, this disposition of one's services, and while I have not made any overtures to any of the other companies, yet I am satisfied that I could do better with another firm. Yet a kind of loyalty binds me to the old house that I have been with since a boy.

"Now I want your disinterested advice. You know the whole question and you know me. You have been sales manager of this company for eight of the ten years I have been with it and know my work intimately. Tell me freely and candidly what you advise."

The sales manager studied the calendar on his desk intently before replying. He was plainly weighing on his mind whether he would be justified in giving out confidential information. The circumstances certainly did seem to warrant it.

"Brewster," he said, "as one salesman speaking to another, my advice is to stick. Your sales record is not only above the average; better than that, it is a clean one. You are to be trusted. There is but one reason why you have not a better position. Here we all want to see you advanced; but there are overhead orders. You are held back by a notation, a few words penciled on the back of your employment card while you were yet in the stock room."

The sales manager turned to his cabinet and drew out Brewster's record card. This showed in concise summary the sales Brewster had made during the time he had been on the road—sales continually increasing in volume. The "percentage of collections" column also showed up well. "New business" was adequate. It was an excellent card on the whole. But on the back the Old Man's notation still remained, summarizing his interview with the young man in the stock room some ten years before. "Lacks interest. Didn't know answers to simple questions," the penciling ran.

An Early Handicap.

"Now, understand me as simply giving you facts," said the sales manager. "I am not going into the question of the right or wrong of such a handicap. Like all men who have built a business from nothing to millions, through the sheer force of their own personality, the Old Man firmly believes that every employe should have the same white hot intensity of purpose that he himself has. He tests out all men by their standard, early asking them some simple questions. If the employe then fails, he is used for the more ordinary work. The big things go to the man who is interested and enthusiastic in his work. That's the Old Man's hobby—he wants to get about him men who are strong with the same intensity of purpose that inspires him.

"Now, try the house for another year or two and put the same enthusiasm into the business as though it were your own; your opportunity should come. When it does, make the most of it. I believe that this will win for you—I am sure it will."

Brewster went back to his territory with the one idea—that of redeeming his past record. How to do it—how to make his sales of more value to the house than the mere orders turned in—was what puzzled him. He turned to the map of his territory and looked at each town. It did seem as though there should be ways of getting more business. Perhaps his lack of intensity—his negative method of getting business—had been at fault. He would try positive methods and see. But how — where to start—kept puzzling him. The man who really wants to, will find a way and for the first time in his road experience Brewster wanted — with intensity—to sell goods.

His first stop was Alden. The company had had a little business there—as he thought the situation over it had struck him that it had not been enough to pay him to make the town. There were five dealers that should handle his line, yet he had only one customer there. How should he get at the others? "If I had these men together—if I could get them to see what a line we really have—if I could only get it before them in proper shape—I believe I could sell four out of five of the bunch," he kept thinking.

The more he thought it over the more the idea grew on him. It was eleven o'clock when he got into Alden. He went to his regular hotel and looked up the proprietor.

"Frank," said he, "there are five men in town that ought to carry my line. You know them; they are all good friends of yours. Here is what I want you to do: call up this list of dealers on the 'phone and tell them that I want to meet each one of them here at lunch. Tell them that it is important—that I have an important message for each one of them—something that they cannot afford to miss."

"That looks like good business to me," said the hotel man. "I'll just do that and I'll have the chef fix you up something extra nice—make a little banquet of this." And he took the list of dealers and started to the 'phone booth.

In ten minutes the proprietor emerged from the booth, smiling. "Say, you've stirred up some excitement already. They are all coming except old man Higgins. Curiosity will probably get the better of him—he'll show up, all right."

Brewster's New Method.

That lunch at the Merchants' Hotel at Alden was an event. It was the first

time that five rival dealers in the city had sat down together in years. Each one accused the other of not daring to stay away; and even before they sat down together, a friendly footing was established. When dinner had reached the cigar stage, Brewster launched at once, heart and soul, into an enthusiastic description of what the house was doing for the coming season's trade. He spoke of the better quality of the goods secured by new processing methods, of the heavy advertising campaign that was being inaugurated, of the instructions being given the salesmen that they might act as expert sales counsel to their friends in the country.

Before he got through he found himself addressing his small audience in the convincing terms of a practised salesman who had found his field. The different conditions in which he found himself—the new surroundings under which he was laboring, incited him to his best. It was not all easy sailing, however, With the true instinct of buyers trained in long years of expert objection-making, objection after objection was hurled at him. As he answered these one by one, he still felt that he was not getting at the real reason why these men did not buy his line. Why, it was Opportunity itself that he was offering them. Finally he turned to Griggs—the department store man Griggs—who, if anyone, could tell him just how the land lay.

"Griggs," said he, "here is a little association of hard-headed business men. You men lose when you don't buy from my house—and you know it. What's the reason that your orders are placed somewhere else?"

Griggs turned in his chair with that uncertainty of movement which betrays the man who is not accustomed to speaking in company. "Well, Mr. Brewster, since you have asked me an out-and-out question, I will tell you. Your 'triple extra' line we handled for four years. Then one of my oldest customers went into the city for a visit and came back lugging a line of that stuff. Bought every bit of it, too, at a catalogue house there. You know what that means. I passed the word around among my friends here and you've practically been boycotted as far as this town is concerned, ever since."

His Opportunity Arrives.

Brewster thought rapidly—"So that is the reason why I have been practically shut out of this town. If I had only been a real salesman—and found this out years before, what a difference in trade it would have meant to the house." He was beginning to see what intensity of purpose would do.

Brewster answered diplomatically—half-sorrowfully. "I should think you would know our policy too well to have let that influence you. We sell only to dealers. Ninety-five per cent. of our sales are to country dealers like yourself. The other five per cent. of our sales is made to the city trade. But every catalogue house in the city sends out its 'pick-up wagons.' They buy the standard brands in extremely limited quantities, perhaps, in some cases, only to be able to say that they handle those lines. The customer of yours who bought any of our goods from a catalogue house bought them after we had sold them to some city dealer. They came to that customer via the pick-up wagon.

The effect of this information was electrical. One of the other dealers was on his feet immediately. "If that's the case—it's something that we have not thought of—and it puts the matter in an entirely different light. But now—" and then he, and in succession all the rest, came out with their real but hitherto unspoken objections. Explanations followed. Then when the flow of questions ceased, Griggs rose formally.

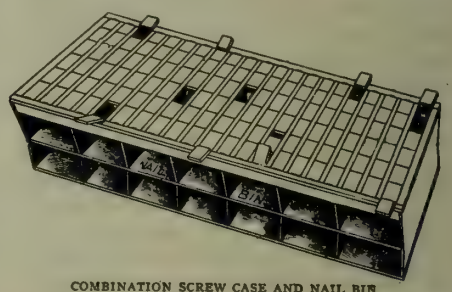
"As a vote of confidence in one of the oldest and best houses," he said, "I move we adjourn immediately to the sample room and voice our return to a good house, by filling a few order blanks."

The Promotion Followed.

Brewster was at the long distance 'phone. "I have an order from every dealer in Alden, and I want you to know just how I turned the trick. Didn't use a hackneyed method in the whole sale." He rapidly sketched the story of the dinner, the hidden objection and the final vote of confidence which his old customers had accorded him. Then he added: "This trade revival is exactly what I am going to do for every town in this territory. I've got a bunch of new schemes figured out for every town I have ever made. Where one plan won't work. I'll try another that will. We'll get the business from now on in this territory."

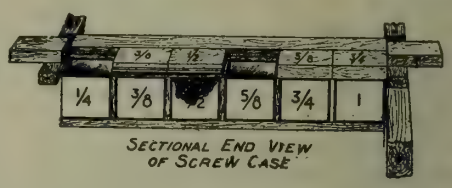
The sales manager heard him out, thanked him, then said significantly: "We are expecting a visit from the Old Man in a week or so. He likes to run over the correspondence to see how the boys are working. Suppose you write me this enthusiastic report covering the same facts that you have just told me. I'll see that your letters fall under the Old Man's eye.

"And incidentally, Brewster," the sales manager resumed, "our Western agency is going to need a district manager soon—one that has lots of ginger and new ideas. You can put two and two together, can't you?"



Brewster could—and did.

SCREW CASE AND NAIL BIN.



The screw case illustrated is unique, and, according to M. J. Shevlin, in whose store it is in use, it is extremely practical, saving much shelf room and making all sizes of screws instantly accessible. It occupies an inconspicuous position on top of the nail bins, which could not be used for display purposes to good advantage. The cost of making it is comparatively small—insignificant, in fact, when the time and labor it saves are taken into consideration. The size of this particular device is 7 feet long by 3 feet wide and 3½ feet high or thereabouts, but, of course, this will depend on how large your sales in screws are. In reducing the size of this box, it is preferable that you do so in the width rather than the length, taking, of course, into consideration the form of space you intend to reserve for it.

The nature of its function naturally calls for a little rough handling. Therefore see that it is built as solidly as possible and that it is furnished with fairly strong fittings. Of course two or three brackets can be made to take the place of the nail bins as a support, and for the sake of convenience the box should be placed shoulder high. A reference to the sketch will give a clearer idea of the complete arrangement of this screw cabinet.

Small orders for nails are supplied ready packed in pasteboard boxes, the loose stock being kept in the basement, clerks devoting their spare time to weighing out and filling these boxes in the weights liable to be called for. By this means the loose nail stock, usually

COMBINATION SCREW CASE AND NAIL BIN

somewhat of an eyesore in a well furnished hardware store, is removed from sight, and orders are filled quickly and with greater satisfaction to customers.

AGENCY AT SASKATOON.

The Enterprise Hardware Co., Saskatoon, have been appointed jobbing agents for that district for "Muresco" and other products of the Benjamin Moore Co., Toronto.

A hardware dealer says that when he makes a window display for the purpose of closing out a quantity of goods at a bargain he does not aim to make a careful display. For instance, if he were to offer a quantity of pocket knives at a low price he would dump a bushel of them in one pile in the middle of his window and stick up a card showing the price. This plan he has already tried and he says it sells more knives than an elaborately arranged display.

The Law About Revolver Sales

Present Law Provides Penalties for Selling Firearms to Persons Under Sixteen and Also for Selling Pistols or Air Guns Without Keeping Full Records of the Sales.

Little has been heard of the proposed anti-revolver legislation introduced in Parliament recently by E. N. Lewis, M. P. for Huron, and it now appears that the press of Government legislation will prevent the bill (No. 83) from being further considered this session. As the bill is likely to be re-introduced next year, however, it will be well for all hardwaremen to give the matter attention and place their views before their local M.P., so that when the matter comes up for discussion unwise legislation will not be enacted.

The recent conviction of a Toronto hardware merchant for selling firearms to a minor and the statements of other hardwaremen that they are not in the habit of keeping records of sales indicate that the present laws are not generally understood or enforced. Consequently the extracts from the Criminal Code reproduced below will be read with interest.

The Ontario Retail Hardware Association, through its executive committee, has expressed itself in favor of the enforcement of existing legislation, and opposed to the addition of any further clauses intended to prevent the sale of firearms and ammunition, properly regulated, in legitimate trade channels. Undoubtedly their sale in pawn shops and second-hand stores should be prohibited, but there is no reason for legislation intended to practically prohibit their sale.

Present Laws.

Section 119 of the Criminal Code now reads regarding the sale of firearms: "Every one is guilty of an offence and liable, on summary conviction, to a penalty not exceeding fifty dollars, who sells or gives any pistol or air gun, or any ammunition therefor, to a minor under the age of sixteen years, unless he establishes to the satisfaction of the justice before whom he is charged that he used reasonable diligence in endeavoring to ascertain the age of the minor before making such sale or gift, and that he had good reason to believe that such minor was not under the age of sixteen.

(2) "Everyone is guilty of an offence and liable, on summary conviction, to a penalty not exceeding twenty-five dollars, who sells any pistol or air gun without keeping a record of such sale, the date thereof, and the name of the purchaser and of the maker's name, or other mark by which such arm may be identified. 55-56 V., C. 29, S. 106."

The suggested bill, No. 83, attempts to provide further security, by adding a clause reading: "No revolver or pistol shall be sold to any person unless he produces to and leaves with the vendor a permit in writing from the chief of police or a police magistrate or justice of the peace allowing him to purchase a revolver or pistol."

The remainder of this proposed bill does not affect the dealer, but rather the person found carrying revolvers, pistols, sheath knives, bowie knives daggers, metal knuckles, etc., etc. It is only clause 3 of Section 119 which concerns the hardwareman.

Ottawa Dealers Interviwed.

Hardware and Metal's Ottawa correspondent has interviewed some of the hardwaremen in that city and they do not appear to be in harmony with the bill at all. There has been an impression that the other five items mentioned in the bill affected the dealer, but this is not the case. One dealer said that he did not handle firearms and would not care to, for if he sold a weapon to some one, boy or man, and they by accident or intent, caused death, he would feel partially guilty for having provided the means.

W. A. Rankin thought that the permit clause would be evaded by securing arms in the United States and that further, such a restriction would only tend to attract burglars and evil-inclined persons into the country, who would feel comparatively safe to pursue their unlawful practices knowing that very few of their intended victims would possess the means of defence. He stated further that the age limit might be increasso as to confine the sale to those who have reached the years of discretion.

Wm. Strachan stated that he did not think the bill would work at all and as far as he was concerned he contemplated getting rid of his present stock as soon as possible and refraining from handling them further. He said it was sometimes very hard to judge the age of a boy as some boys are of greater stature and older appearance than their years would indicate and in this way one could easily be deceived and thus subjected to the penalty of the law. As far as the new bill was concerned he did not consider it an impregnable safeguard by any means.

Major Currie's Views.

Major Currie, M.P. for North Simcoe, and a manufacturer of wire nails, etc., states that there is little prospect of the bill being reached this session, so that for the present those affected could rest content. However, it will be sure to come up next session and any opposition will require to be then made. The major thought that the law ought to be such that any householder could procure a revolver for his own protection, and in cases where people were unable to procure them owing to the cost, it would hardly be likely that any evil-minded person would bother their homes. Burglars knew well where to go, and those on the list should possess some means of defence. It was suggested to the major that it might be a good plan to have a clause in the bill relating to the sale of such arms by second-hand shops and such like, and in this he concurred. It is in these stores that purchases of firearms and other unlawful weapons can be made without such precautionary measures being observed and there should be legislation covering this in particular.

The Ottawa Retail Hardware Association is opposed to the bill and will cooperate with kindred associations throughout the country in bringing their objections forcibly to the front when the bill comes up for action next session.

TURPENTINE IN BRITISH COLUMBIA.

Experiments have been carried on for several years in a small plant at Vancouver with a view of obtaining turpentine from the resinous woods of British Columbia by an electrical process of distillation. Regarding this a correspondent writes that while only about two cords of wood or mill refuse have been treated daily, it is claimed that the results have been eminently satisfactory. The turpentine, after tests by chemists and painters, who have used the product both for inside and outside work, pronounce it to be equal to the turpentine distilled from the long-leaf pine of the south. From one cord of the resinous wood treated it is claimed that the tar, oil, rosin, pitch and charcoal (the by-products), more than pay the cost of the distillation of the turpentine, thereby making this process a valuable one.

It is claimed that from one cord of pitchy wood costing $5 there can be extracted chemically pure turpentine, tar oil, rosin, charcoal and pitch to the aggregate of $24.70, the present market value of these commodities, at an expense of $12, giving returns of $12.70 per cord.

The amounts of by-products said to be obtained from one cord of wood (amount of turpentine secured not being stated) are as follows: Rosin, 60 pounds; tar oil, 20 gallons; charcoal, 1,200 pounds. The oil is used for wood preservative, and is also manufactured into shingle stain. The charcoal, having been coked and cooled in a can out of contact with the air, is very valuable for making powder.

The resinous woods necessary are accessible in large quantities at cheap rates in Vancouver and vicinity. The plant has recently been increased to treat 40 cords of wood per day.

RETAILERS GETTING ALARMED.

Retailers throughout Ontario are becoming keenly interested in the school book contract which has fallen into the hands of the T. Eaton Co.

It would be surprising indeed, were the retail merchants of this country to remain silent and inactive under the circumstances.

The fact that the T. Eaton Company have practically been given a monopoly of the school book trade of Ontario is, perhaps, of very little importance directly to the retailers, but when its far-reaching significance is taken into account it is a matter that should very much interest every one of them.

It is estimated that during the first year some 700,000 books will be required from the T. Eaton Company. This means that something like 700,000 children throughout Ontario will send to the Toronto departmental store for the necessary readers.

The significance of this should make every retailer sit up and think, and think seriously, for not only will it be books that the parents will send to the T. Eaton Company for, but with the catalogue of that firm in their possession they will naturally, when they have to send for books, purchase other things.

While this menacing state of affairs is, for the present, confined to Ontario, business men in other parts of Canada cannot afford to remain disinterested spectators.

The T. Eaton Company can print the same books for other provinces, the only condition being that they shall not charge a higher price than that in Ontario.

What does this mean? This and nothing else: if the Governments of the other provinces become possessed of the idea of getting books at less than cost, they may be led into the temptation of making a similar contract. The retail merchants all over the country would then find themselves in a similar position to that of their confreres in Ontario. It behooves them, therefore, to be on the alert.

It is not our intention for one moment to blame the Government of Ontario. Its first thought was no doubt to get cheap books for the school children throughout that province. But in its desire for this it doubtless overlooked the fact that it was giving a monopoly to an institution which has already done a great deal of damage to the retail trade throughout the country.

Before tenders were sought the Government experts no doubt ascertained the approximate cost of printing the books. They must have known, therefore, when the tenders were received that the figures of the T, Eaton Company were below the cost of production. Knowing this, it is unfortunate that they did not realize that the T. Eaton Company, not being a publishing house in the ordinary sense, must have had some ulterior motive in quoting the figures they did.

This ulterior motive is now obvious to everyone. As we pointed out in a previous issue, every book will bear the imprint of the T. Eaton Company and every book that goes out will probably carry advertising literature, not only regarding books, but merchandise in general. As far as the retail trade throughout the country is concerned, it is here that the heaviest blow is struck.

It is not yet too late for the Government to deprive the T. Eaton Company of this trade menacing evil. It has the power to have the imprint of the educational department put on the books and the books delivered to the educational department and through that department distributed among the purchasers.

Self-interest demands that the retail merchants of Ontario stir up both their local members in the Ontario Legislature and the local press, with a view to bringing about the necessary modifications in the contract.

FIRES DUE TO CARELESSNESS.

Out of about 11,000 fires in the United States last year twenty-three per cent. were caused by carelessness, and of this number more than one-half was attributed to carelessness with matches. He is a wise merchant who requires of his employes the utmost caution, with the object of minimizing the danger from fire. It is advisable to have a well-understood rule on this matter, and have notices posted up for the clerks and other employes to read.

SELLING NAILS AT COST.

Toronto builders' hardware firms have set a good example in deciding this week that they will discontinue the foolish policy of selling (or rather handling) nails as a leader in order to secure other business from probable customers.

In the past practically all these concerns have been losing money on their nail business, selling at cost and being out the expense of handling the heavy goods. The new arrangement, however, provides that the cutting shall cease and the reasonable price of $2.30 base with two per cent. off, be maintained.

Where one firm sells nails at cost as a leader and is followed by competitors all suffer a loss with no compensating gain. The loss, too, must be made up on other lines of goods.

Selling goods on this basis is not good salesmanship nor good business and the decision to discontinue the destructive warfare indicates sound reason on the part of the Toronto firms who have learned a lesson by bitter experience.

Hardwaremen in other towns and cities can profit by the Toronto example and dealers in places where nails white lead, or other leaders are sold at cost while a reasonable profit is secured on the same lines in other nearby towns, should ask themselves if they are not as intelligent and progressive business men as those who make every line of goods carry itself and show a margin of profit.

METAL ROOFING QUESTION AGAIN.

In Hardware and Metal of April 24, a letter written by the representative of a metal roofing company was published and commented upon, space being offered for the publication of any specific information supplied by readers in support of charges made by the writer of the letter referred to.

It is not the province of Hardware and Metal to investigate charges made by one concern against another competitor but rather to guard the interests of the trade by giving publicity to authentic statements submitted by reputable hardwaremen. An exception, however, was made in the present case and Hardware and Metal, both by letter and by personal calls on the firms mentioned in Mr. Ramsay's letter, endeavored to verify the charges he made. We desired to be absolutely fair and went out of our way in this instance to show beyond a doubt that we bore no ill-will towards any manufacturer.

Absolutely nothing beyond hearsay evidence, however, was procurable to verify the charges of selling to consumers at less than trade prices and Hardware and Metal, therefore, does

not give space to the unverified verbal statements of those interviewed. Unless definite instances are named, in future Hardware and Metal cannot pay attention to charges such as referred to. The publication of definite statements will help in correcting trade evils whereas attention paid to idle talk will prove injurious to the trade.

One of the Montreal dealers called upon, stated that he had heard that a certain metal roofing company was selling to consumers at cut prices and he had, in consequence, asked for and received a lower price from the manufacturer he does business with. The talk may have been all bluff but it had the result of causing one manufacturer to cut prices. The same game has been worked times without number by farmers beating down one hardwareman as a result of a story that the dealer down street had quoted a lower price. Retailers are criticized for giving in to such talk but apparently some manufacturers are equally susceptible to the bluffs made by price cutters.

Retailers and manufacturers alike should have more confidence in their competitors and where statements are made that lower prices are offered, an effort should be made to find out if the story is true or false. The dealer who is ever ready to believe ill of his competitor and accepts statements of bargain hunters without seeking to verify them is usually the one most responsible for unprofitable selling.

Conditions are far from satisfactory in the metal roofing business, but if hardware dealers make a canvass of their district for business and demand proof of any cut prices quoted, the result should soon be that the roofing business will be continued in the hands of those most competent to handle it—the hardware merchant and tinsmith.

CLEANLINESS IS VITAL.

Consumers of paints would hardly think of patronizing the hardware store with a dirty front entirely out of keeping with the cleanliness which is so intimate with the thought of paint. When a customer starts out to buy paints it is the thought of cleanliness that is in his mind and the sight of a dirty, ill-kept store would undoubtedly deter him from purchasing there.

Therefore, it is up to the hardwareman who features paints to keep his store clean. It should be clean and tidy anyway, but if he is pushing paints it should be even more so. Above all, he should practice what he preaches and see that his own store front has a neat coat of paint.

Begin with the store front. Put on a new coat. Go heavy with the window washer. Varnish the shelves or paint them white. Treat the counters the same. They are often forgotten, and are most important.

Varnish the floor of the window. Don't paint it. Paint looks cheap. The best make-up is hardware, but if you don't want to put that in, varnish what you have. But very few articles in the window also come under the head of neatness. Retint the walls and scrub the floor twice. If you've got wall paper on the walls, tear it off. A wall-papered store looks too much like home. Kalsomine it and see that the color harmonizes with the woodwork.

If you have glass cases, they should shine all the time. The tops of the show cases are good places for can displays. Not more than three or four cans should comprise one of these groups, and they should be small cans, preferably the specialties, like enamels and stains. But brush up, and at once, or else you are going to keep on losing those critical ones, those that only give you a look and then pass on.

A DEAD ISSUE.

Canadians are disposed to view with amused indifference the resolution passed at the Detroit convention recently asking the Government of the United States to at once open negotiations with Canada for a reciprocity treaty. Fifteen to twenty years ago their attitude would have been quite different. They would have hailed it with joy and have taken immediate steps to secure the concurrence of the home Government.

When in October, 1890, the McKinley tariff went into force in the United States, there were a good many in Canada who took a decidedly pessimistic view of the situation. They thought that Canada's future was blasted. It did, of course, for a time, look serious.

We had become impregnated with the idea that the development of our natural resources depended largely upon the good-will of the United States.

But the blow, instead of permanently injuring us, stirred up within us a degree of energy which we had not hitherto possessed.

Instead, therefore, of looking to the south for succor Canadians began to look across the Atlantic and not only to look, but to act. They began to realize, particularly in view of the commercial unfriendliness of the United States, that the British market offered a steadier and more attractive field for their enterprise.

The result of the development of this enterprise has not been by any means discouraging. Our total export trade when the McKinley Act went into force was less than $97,000,000. During the last fiscal year it amounted to over $280,000,000. The United States, in spite of the McKinley and subsequent hostile tariffs, now buys $73,000,000 more of products from us than they did in 1890.

But, of course, it has been with Great Britain that our largest increase has been. When the McKinley tariff went into force our exports to Great Britain only amounted to a little over $48,000,000. Last year they reached $134,488,000.

We do not court or desire any more McKinley tariffs, but that which bears the late President's name was by no means an unmixed evil. It did more than anything else up to that time to make Canadians realize their possibilities and inspire their nationhood.

The convention at Detroit showed two things. One was that the business men of the United States are repenting of their unkind commercial treatment of this country; and the other is that they are realizing the importance of the future of Canada and are disposed to do everything in their power to get a larger share of the trade which must necessarily be developed as the country grows.

But unfortunately for them, repentance comes rather late. The shoe is now on the other foot. Canada 20 years ago wanted reciprocity with the United States and wanted it bad. Now there is a growing desire in the United States for reciprocity with Canada, while in this country the matter is practically outside the range of practical politics.

It is a dead issue and the McKinley tariff was the cause of its death.

WHERE PERSONALITY COUNTS.

No class of men are keener for business than commercial travelers. In season and out of season, rough weather and mild weather, early in the morning and late at night, they are eager to do business and to take orders.

There are, unfortunately, exceptions to this rule. The other day a commercial traveler reached a certain town during a storm. As he did not like stormy weather he utilized the telephone in his efforts to get orders. He represented a firm that manufactured a line of goods in which there is a great deal of competition and did not get any orders. He did not deserve to get them. A lazy man never deserves success of any kind.

A telephone is useful in many ways, but is a poor order-getting medium. It eliminates personality, and personality counts for a great deal in salesmanship. It doesn't pay to be a "telephone" traveler.

CANADIAN METAL MARKETS

See Itemized Market Quotations on Page 74.

Montreal.

Spelter—Unchanged.
Copper—Slightly stronger.
Tin—Same quotations.

Toronto.

Tin—Now 32c.
Turpentine—Down 1c.

THE METAL SITUATION.

No improvement is to be noted in the primary markets. Tin has continued to decline, although the consumption in New York has been reported very good. Apparently there is more metal in sight than was anticipated at one time, and this has off-set in the English market the improved orders from New York. It is evident that the bull operators do not think the time yet ripe for operations. Copper has been a little stronger in the English market, and this has tended to firm New York quotations, but the home consumption is still as quiet as ever. Unfortunately, exports to Europe have now fallen off, and this, combined with the rate of consumption, is distinctly unfavorable to the future prospects of the metal. Spelter continues to advance steadily in the English market, and holds the best position of any metal. Consumption is good, and stocks are held in firm hands. The St. Louis market is also firm with an advancing tendency. Lead continues to decline, and with poor consumption and plenty of metal in sight the market is in a weak state. Cleveland warrants are now quoted at 47s 10d, an increase of 4d on last figures. Exportations of pig iron and finished steel have improved and the market conditions look very promising. The iron and steel situation in the States continues to improve. There has been much better buying of pig iron, and more inquiry, while the bookings in finished steel orders show stimulation. In fact, prices in some instances have increased.

MONTREAL.

May 7.—Trade has received splendid stimulation during the week, heavy lots going out on the various freight boats. Not only have the number of orders increased, but the individual bulk has improved. This does not mean that users are commencing to look any further ahead, but that their present requirements are increasing. Industrial activity has developed within the last few weeks, and the demand for metal has naturally been stimulated. May has undoubtedly opened out well, and judging from inquiries it should be a very fine month indeed. The arrival of the ocean steamers carrying spring consignments has made merchants very busy, and great quantities of ingots, galvanized sheets, etc., are being reshipped on the wharves to different parts of the country. All the metal seems to be contracted for, and the quantity moving shows the extent of the orders that were placed some time back. First hands are already expecting renewed orders, and in every direction a busy season is expected. If the primary markets were to show real stability, an exceptional time would be experienced, as stocks in jobbers' and users' hands are light, and the additional stimulation of buying ahead would make orders extremely heavy.

With the good trade the markets are naturally on the firm side. There is no change in tin despite the state of the English market, while copper is a little firmer. Spelter quotations are the same although the English prices are exceptionally firm. There has been a reduction of 20c in boiler plates and black sheets.

PIG IRON—Orders are increasing in pig iron, and it is evident that heavy consignments will come up the St. Lawrence this season. Users are already commencing to repeat orders although first lots in many cases have not yet been received. Boats will be coming in weekly now, and the demands should be easily met. Firmer prices characterize Canadian furnaces, and fair orders are swinging in. We quote imported pig, Clarence, $16.75 to $17; Middlesboro No. 3, $16.50 to $16.75; Summerlee No. 1, $18.75 to $19; No. 2, $18.25 to $18.50.

TIN—There has been a decided improvement in orders this week, and some heavy consignments have gone out by boat delivery. Users do not seem any more anxious to accumulate stock, but apparently their immediate requirements are heavier. Inquiries are active, and the market seems in good shape. Jobbing prices despite the weakness in the primary markets are maintained at 32½c. There is not much tin in sight locally, and the demand is, as we have said, very good. With stronger figures in London the market would be in very firm state.

COPPER—The jobbing quotation of 14c for ordinary size lots is maintained. The demand in common with the other metals has shown great improvement this week. Orders have not only increased in numbers, but in individual bulk as well. Inquiries are more numerous, and a healthy call seems springing up. The slight stiffening in the London and New York markets has tended to stop the shading that has been noticed for larger sized lots. The copper situation will always be uncertain, however, so long as the production exceeds the consumption as at present.

SPELTER—Exceedingly good orders have been received for spelter, and the metal is continuing to prove one of the best sellers. The market is firm and unchanged at $5.75. The London and St. Louis markets are very firm and higher prices seem probable.

LEAD—Orders have improved, the cut last week having apparently stimulated the demand. The market is unchanged at $3.65, Trail $3.55. The English market continues to decline, and the metal seems in bad shape altogether.

BOILER PLATES AND BLACK SHEETS—A 20c reduction is noted in boiler plates and black sheets, making plates $2.20 per 100 lbs.; heads $2.45; tank plates, $2.30; black sheets, 10, 12 and 13 gauge, $2.30, $2.30 and $2.20 respectively. Trade in these lines is fairly brisk, and the lower prices stimulate orders.

TORONTO.

May 7.—Continued strength is shown in the metal market this week, and unlike the condition prevailing for more than a year past, the recent weeks have shown that at last metals are on the up grade. The primaries have advanced the prices of all metals, but locally the quotations of this week are those prevailing a week ago. There is, however, a firmness about all metal lines which does not augur well for lower prices.

There is a better call for pig iron, and steel prices are advancing. The building trade is active both here in Ontario and in the west, and demand for structural beams and material generally is expected to be great this whole year. Trade experts are somewhat more cheerful when speaking of passing trade and say the prospects are highly encouraging. All metals have held the price advances they made during the past several weeks. Even lead is now making a better showing, and tin is holding its own.

PIG IRON—Canadian foundry is $19.50; No. 3 Middlesboro is $20, and Cleveland is $21.50. English advices note an advance in Middlesboro pig, but it is a slight one and Toronto metal men do not think it will affect quotations in this country.

TIN—This metal has become very firm during the week. While the price remains at 32c, there is a tendency toward higher quotations, especially as demand has become more free.

COPPER—Firm but quiet has been the copper market this week. There was one unusual circumstance connected with the red metal which speaks well for it, and it is the fact that it has held its price without any decline whatsoever. The local quotation is still 14c.

LEAD—Stronger and active with light stocks being carried about covers the lead situation at present. After the easy feeling and the decline in price of two weeks ago lead has recovered itself and is firming up steadily, if slowly. The local quotation is yet $3.65, but this figure is regarded as too low by men who handle large quantities of the white metal.

SPELTER—Very firm and active at unchanged prices is spelter just now. It is showing itself to be about the steadiest metal on the market, and of late has shown none of the fluctuations participated in by other metals.

SHEETS AND PLATES—Advices state that the first consignment of plates and sheets for Toronto and Western Ontario houses has reached Montreal. None of these, however, will be offered here before the middle of next week. In the meantime demand is still good for the stocks on hand at unchanged prices. It is expected that supplies being free this line will show a decline in price before another week goes by.

OLD MATERIALS—Prices are unchanged. With the impetus given to new metal lines all scrap metals show better in the turn over.

HARDWARE MARKETS

MONTREAL.

May 7—The unseasonable weather has continued to hold back trade somewhat, although in the aggregate good bulk is moving. The stimulation noticed in the bookings ahead some weeks back has not been maintained, and there is no doubt that the climatic conditions are responsible for this. The season for harvest tools seems a long way off when snow looks likely to fall at any moment. The last day or two has seen a great improvement in the weather, however, and with the roads in much better shape, trade is getting more brisk again. Reports from the Northwest are not laying too much stress upon the lateness of the seeding, but there is no doubt that business will have a brighter tone when all doubts as to the seeding are set at rest.

Most spring lines have been moving well, and repeat orders are coming in for hose, nozzles, couplings, lawn sprinklers, spades and spading forks. Builders' hardware is going well particularly in and around Montreal. Some prices have shown a little irregularity, yet on the whole they are firm. Refrigerators and ice cream freezers have felt the weather somewhat, but the last few days a decided improvement has been noticed. Miners' supplies are not very brisk, but fuse and powder have shown stimulation. Bolts continue firm, and wire is in good demand. There are no important changes annouced, and the markets generally are firm.

BUILDERS' HARDWARE—The demand in and around Montreal is brisk and while other parts of the country are not showing much improvement, the aggregate trade is very good. A little irregularity has been noticed in the markets, yet no important change in price has been announced. We continue to quote: Door sets and escutcheons, 50 and 10; escutcheon pins, steel, 50; brass, 55. Spring hinges, No. 20, $9 per gross.

SPRING LINES—Gardening utensils are moving well and repeat orders are coming in for hose, nozzles, lawn sprinklers, spading forks and spades. Lawn mowers are also in improved demand. Screen door trimmings, green wire cloth and poultry netting are moving steadily and well. We continue to quote: Screen doors, stained, $7.80; grained, $8.10; screen hinges, $9 a gross; poultry netting, 60 and 2½; green wire cloth, $1.70 in 100 feet rolls.

HARVEST TOOLS—The cold weather has affected the bookings for harvest tools, and the call has been quiet. Warmer weather will improve things in this respect. There are no changes in prices, and we quote: Hay fork pulleys, $1.60 to $8.50 a dozen; hay carriers, hay rakes, etc., 55 off.

MINERS' SUPPLIES—Business is steady although not so brisk as it was. There has been, however, a strong demade in fuse and powder. We continue to quote: Miners' picks, 17c a pound; prospectors' hammers, 20c; pick handles, $1.85 a dozen; drilling hammers, 6c a pound; crowbars, 3½c; drill steel, 8c.

BOLTS AND NUTS—The market continues very firm, the demand being good and improving. There is also a strong demand for nails at unchanged prices, the good building prospects encouraging dealers to stock up better. in prices, and we quote: discounts at carriage bolts, ⅝ and smaller, 70; machine bolts, ⅝ and less, 60, 10 and 10; coach screws, 75; stove bolts, 80 and 7½.

SCREWS—The building prospects are undoubtedly influencing the demand for screws, and good orders are coming in for assorted sizes. There is no change in prices, and we quote discounts at 85 and 10 off for flat head bright; 80 and 10 off for round head bright; 75 and 10 for flat head brass, and 70 and 10 for round head, brass.

WIRE—Orders are coming in well for wire products, and there is a decided improvement in the bulk moving. The markets are unchanged and firm and we quote: Barb wire, car lots and mixed, $2.65; small lots, $2.70; plain, twist, car lots, $2.95; small, $3; plain wire, $2.30 base; barb wire, $2.65 in straight and mixed car lots, and $2.70 in small lots. Galvanized wire No. 9, $2.35 in straight and mixed car lots, and $2.40 small lots, f.o.b. Montreal. Coiled spring fencing, $2.65, straight and mixed car lots, and $2.75 small lots.

BRIGHT WIRE GOODS—The demand is brisk, especially for screw eyes. There are no changes in prices and we quote: Gate hooks and eyes, and screw hooks at 60 and 20 per cent.; stove pipe eyes, screw eyes, and square hooks, 60 per cent. Wire hat and coat hooks, 40c a gross.

TORONTO.

May 7.—The hardware jobbing trade report excellent business being done. The shipping rooms are crowded with goods ready for delivery, and the expectation is that if the warm weather continues uninterruptedly for a few days trading will reach a new high water mark. One house reports the months of March and April as being the best they have had since starting in business, which certainly speaks well for the revival in the hardware trade.

Prices are unchanged. In fact there is a firmness in the market that was not so evident earlier in the year. Seasonable lines—spring goods, builders' hardware, nails and shelf goods are moving best, although fair trading is being done in nearly all lines. Prospectors' tools and outfits are again going out to the north country, and the older sections of the province are placing large orders for sporting goods.

There was a tendency toward lower values in wire nails across the border, and for car lots some concessions were made, but the firming up of manufactured steel lines in the eastern U. S. cities has offset to some extent this tendency before any effect could be felt in Canada. Undoubtedly but for this prices here in Ontario would have declined. With the better understanding among manufacturers, and the advance of the building trades there does not appear to be at present any likelihood of lower prices.

SPRING LINES—Demand continues active, and a spurt is expected now that the recent warm weather has given a first taste of summer. Lawn and verandah chairs are asked for frequently, but garden and farm goods are the leaders. Refrigerators and ice cream freezers since the opening of May, are moving more freely.

SPORTING GOODS—Baseball articles lead in the demand for sporting goods, though lacrosse lines, fishing outfits and guns and ammunition show great improvement over the past few weeks. Possibly more than ever before are hardwaremen handling this line, and evidently with good profit.

BUILDERS' HARDWARE—There is no let up at all in the demand for builders' hardware. The city trade is particularly good, though the large towns in Western Ontario are coming rapidly to the front. Locks, hinges, screws, door sets and things of that sort are more than active.

HEAVY GOODS—The tendency towards lower prices for wire nails has not materially altered the situation. With the great demand for all nail lines owing to the boom in building the present does not seem to be an opportune time to bring prices down. Prices have been cut for quantities in the U. S., but as yet no effect has been felt here. Bar iron is getting firmer and the demand for heavy building material is increasing.

LOW WIRE PRICES.

New York, May 6.—The Iron Age says: The reduction in the prices of wire, which came somewhat earlier and was more radical than expected, seems to have been made to clarify the situation. Prices had been drifting off for some weeks and had reached a point about midway between the old schedule and that now announced. It is intimated that it will not be in force long and that the course taken will be that pursued in the bar trade, where the low prices have been withdrawn, and in the plate and structural branches where a higher level of prices is being aimed at. Bookings are expanding in quantity and are sound in character.

The markets for finished iron and steel are firmer, but have not yet endured the test of any serious withdrawal of consumers, which may or may not come.

There has been further activity in the pig iron markets and a number of large interests have placed additional orders, these including agricultural implement makers, pump builders and general founders.

The long continued shutdown of the Niagara power plants has so cut down production of ferrosilicon that there is a sharp scarcity, and prices have advanced materially.

METAL NOTES.

The biggest month's output in the history of the Algoma Steel Co. was that for March.

The sheet steel and tin mills of the United States are fast increasing their production, 95 per cent. of the plants are now active in supplying canners with material.

The Carnegie Steel Co. this week advanced the price of merchant bars, steel plates and structural shapes $1 a ton. Some of the other U. S. steel companies have done likewise.

HARDWARE TRADE GOSSIP

Ontario.

The West Lorne Wagon Co. has increased its capital from $50,000 to $100,000.

The Delany and Pettit Sand Paper Co., Toronto, has increased its capital from $50,000 to $100,000.

The Lufkin Rule Company, of Canada, has begun work on the new 100 foot extension to their factory at Windsor.

W. J. Robinson, clerk with M. S. Madole, Napanee, is on a holiday trip to Edmonton and other western points.

Wm. Vokes, carriage builder, Toronto, intends to establish a carriage hardware business on Adelaide Street, Toronto.

W. H. Gerke, and J. L. Conover, of the Martin Senour Co., paint manufacturers, Montreal, were visitors in Toronto on Monday.

Miss Jennie Horne, the 22-year old daughter of Robert Horne, hardware merchant, Sudbury, died last week after an illness of considerable time.

W. G. Colville, northern Ontario traveling representative for Wood, Vallace & Co., Hamilton, is back again in his territory after a severe illness.

Dan Leary, long connected with A. W. Moore's hardware store, St. Catharines, has gone to Syracuse, N.Y., to take a position with a hardware firm there.

Marmaduke Wardlow and Son, of S. & C. Wardlow, proprietors of the Portobello Steel Works, Sheffield, Eng., were callers at the Toronto office of Hardware and Metal last Saturday.

Fire did considerable damage to George W. Ecclestone's hardware store at Bracebridge on May 6, the building being badly gutted. The stock was valued at $25,000 with insurance of $14,000. Mr. Ecclestone had left for California on May 5.

The Boeckh Bros. Company, Limited, Toronto, announce having resumed the business formerly carried on by Boeckh Bros. & Co. at Toronto and Montreal, and more recently as the United Factories, Limited, as manufacturers of brushes, brooms and woodenware. The business is now under the same management as formerly carried on by Boeckh Bros & Co., several years ago. The company will continue to manufacture brushes and brooms and will act as selling agents for Cane's Woodenware and other lines.

Quebec.

J. A. Paquin, of St. Eustache, Que., has been visiting Montreal.

Fred Leslie, of P. Leslie & Son, Alexandria, Ont., has been visiting Montreal hardware circles.

Among those who attended the funeral of John Watson, Montreal, on Saturday, was Godfrey S. Pelton.

A. C. Thompson, of North Sydney, N.S., stopped in Montreal for a few days on his return from a three months trip to California.

J. R. Kinghorn, of the Montreal Rolling Mills, has returned from a five weeks' visit to the Pacific Coast. There has been a very appreciable improvement in business, and everybody is optimistic.

J. R. McLeod, who formerly traveled for Wm. Stairs, Son & Morrow, Halifax, in Prince Edward Island, has joined the staff of Frothingham & Workman, Montreal, and will cover the island in their interests.

C. R. Bloxam, representing Hobbies of Dereham, England, the fretwork people, paid a visit to the Montreal office of Hardware and Metal. Mr. Bloxam is on his way west, and he is very satisfied with the business he has done so far.

M. D. Tillman, of the Honeywell Heating Specialty Co., Wabash, Ind., has suffered a bereavement in the death of his father, and has been away from Montreal attending the funeral at Wabash. Mr. Tillman hopes to be back in Montreal shortly.

Western Canada.

G. O. Edwards, Sedley, Sask., is succeded in the hardware business by Johnsten & Wheeler.

Gordon R. Howden has purchased the tinsmithing department of R. M. McKay's hardware store at Melita, Man.

Harry Gargett, of the Brandon Hardware Co., left that place last week for Vancouver, where he will reside in future.

Maritime Provinces.

O. C. Layton & Co., hardwaremen and stove dealers, Springhill, N.S. have dissolved.

A $100,000 fire at Halifax on May 6 destroyed several buildings including H. H. Fuller's hardware store.

D. Higginson and T. A. McKay, have formed a partnership to engage in the hardware business at Pictou, N.S.

The contract for rails for the first hundred miles of the G. T. P. east from Prince Rupert has been let to the Dominion Iron & Steel Company, laying will begin not later than August.

AN EXCELLENT OTTAWA HOTEL.

Walter Walby is still making improvments in the fine hotel he opened a couple of years ago in Ottawa, the Cecil. The large new wing was opened a few months ago, but many little things are being done to further improve the accommodation and the service. The Cecil Hotel caters particularly to commercial travelers and knows this class of patronage to be such as can appreciate A1 service and first-class accommodation. The cuisine has never been better, plenty of plain and fancy food, and variety. The rooms are now clean, fresh and modern in every respect. Running water; comfortable beds with the latest springs and mattresses; sanitary hardwood floors—these are a few features worth having for the sake of comfort. All in all, the Cecil Hotel strikes one as being about as modern an hotel as there is in Canada. The attractive commercial rate, and the courteous attention which travelin~ salesmen are accorded impress the knight of the grip most favorably. The majority of the salesmen going into Ottawa stop at the Cecil one time or another. After the first trip the Cecil is willing to take chances on the patron coming back.—Advt.

Hardware Letter Box

Any questions on trade subjects will be answered by the editor in this department. Do you want any address, any special line of goods, anything relating to the hardware trade? Ask us. Letters from manufacturers, jobbers, travelers, retailers or clerks are solicited. Suggestions for trade improvement or discussions on trade evils are invited.

Gas Stove Ovens.—G. C. Wilson, M.P. P., Dundas, asks: "What is the duty on gas stove ovens. We formerly paid 25, but this year are asked to pay 30 per cent., and did not know of any change in duty."

Importers pay 25 on gas stoves and 30 on gas stove ovens, the ovens, as well as other parts of stoves, being dutiable at the same rate as the material of which they are manufactured. The ruling on this point was made on Dec. 20, 1907. —Editor.

Paper for Catalogues.—E. C. Ricard, Verner, Ont., asks where he can buy paper similar to that used in Hardware and Metal. He wants to have circulars printed.

The MacLean Publishing Co. takes the product of one paper mill, but any paper manufacturer can supply 45-lb. paper similar to the quality we use. Your local printer can secure it from his jobbing house. If there is a printer in your town have him do your work. Patronize him and expect him to patronize you. The MacLean Publishing Co. has a job printing department, but does not solicit work in competition with country newspapers.—Editor.

Dry Goods House Selling Hardware.—Christensen & Cove, MacLennan, Ont., write that a wholesale dry goods firm in Toronto catalogues hardware, supplying their book to dry goods firms, but refusing to send a copy to hardware concerns.

If a dry goods firm stocks hardware and maintains prices a hardware firm cannot do more than point out the unwisdom of forcing him to stock dry goods in competition. If the dry goods dealer uses his hardware as a leader for price-cutting the best policy for the hardwareman to adopt would be to use dry goods lines as leaders if the competitor will not listen to other arguments. No intelligent hardwareman will encourage a dry goods jobber who sells hardware to dry goods merchants, nor will he push the goods of manufacturers who sell through such channels.—Editor.

DEPARTMENT STORE CHANGE POSSIBLE.

There has been a persistent rumor circulated in Toronto of late to the effect that Marshall Field & Co., Chicago, were feeling their way towards establishing a branch of their house in Toronto. The most recent rumor coupled their name with The Robert Simpson Co. Interviewed by Hardware and Metal one of the officials of the Simpson Co. said the information was news to him and he did not think there was any foundation for the rumor.

Trade News From Atlantic to Pacific

Maritime Provinces

Montreal Firm Holds Social Gathering of Its Employes—Hardware Trade With the Bahama Islands.

MONTREAL.

May 5.—The Syracuse Smelting Works of Canada, William St., Montreal, is being wound up by order of Justice Davidson on the demand of Gaston T. Charlebois, with a claim of $225 on a promissory note. No statement of the assets of the company has yet been filed, and all the liabilities not made up, but it is stated that the liabilities will total about $50 000. The creditors include the Staveley Coal and Iron Company, Chesterfield, Eng.; McKinnon Dash and Metal Works, and the Structural Steel Company.

Although May is upon us very few retail merchants are showing essentially spring lines. Windows have not yet been given the brightening up effect that is usually associated with this time of the year. The James Walker Hardware Co. have been showing a good line of gardening utensils, but most dealers are still clinging to the assorted windows that are employed between seasons. As A. Ledger, of Lacroix & Ledger, pointed out, the weather is yet too cold for the spring demand. The consumer cannot associate gardening or housecleaning with snowstorms and furnaces. The demand is backward, and trade on the quiet side. Things in this respect should improve next week. Warmer weather will induce the merchants to give the customary spring appearance to their windows.

A splendid increase in customs collections in Montreal is reported for the month of April, showing a gain of over $300,000 compared with the same month last year. This constitutes a record for the period of the year. This increase is expected to be kept up as the heavier bulk attending the opening of the St. Lawrence River will be felt in a day or two. Manufacturers' agents representing Old Country hardware, etc., firms, report that much heavier exportations will take place this season owing to the developing of the demand and as probably the same will be the case in other industries, a good season seems in store for the custom authorities.

T. H. Newman, of Caverhill, Learmont & Co., has returned from the Bahama Islands, greatly benefitted in health by a three months sojourn there. It was with the greatest difficulty that Mr. Newman could be induced to leave his business in January, and it is unnecessary to say that although he enjoyed himself amid the beautiful scenery of the islands he is very glad to get back into harness again, although, as he explains, he is not yet himself, and must act with caution. Naturally Mr. Newman was interested in the hardware trade of the Bahamas, and he states that nearly all the hardware used in the islands is of American make, which is only to be expected considering that Florida lies so close. The total revenue of the islands is only $440,000 and taking this into consideration, and the long ocean route, there is clearly not much field for Canadian makers. Much of the revenue of the islands is derived from visitors, while sisal, a large quantity of which is raised, and sponges are the principal items of export. The population being composed chiefly of natives, the resources are not cultivated as they should be. Mr. Newman believes that in time the racial question there, as in the States, will be a grave one.

One of the many social evenings which have helped to make the long winter pass so pleasantly for the staff of Lariviere Incorporated, was held last week in the handsomely fitted up recreation rooms extending over the spacious premises on St. Lawrence Boulevard. An excellent programme had been provided starting with progressive euchre for valuable prizes given by Mr. Lariviere, and concluding with an excellent selection of music, songs and recitations—a selection that showed the firm possess artistic performers as well as capable employes—and to end all refreshments. There was a large attendance of employes with their wives relatives and friends, and no one could listen to the merry ring of the voices, and observe the happy expression on all faces, without acknowledging that Mr. Lariviere in his thoughtful care for his staff, has effaced that spirit of purely self-interest, which usually characterizes the relations between employe and employer, and induced a feeling of comradeship and good will that cannot but prove beneficial to all concerned. Mr. Lariviere seems to have solved the problem of how to make a staff happy and comfortable. He has provided reading rooms, with billiard table and library, and the staff have their own committee to look after the regulation of the club, and it is their delight to return on occasions Mr. Lariviere's hospitality, by inviting him to a social of their own. Lectures are also given in the reading rooms, so that the science of salesmanship is not overlooked.

The "Home Week" scheme for Montreal is going ahead steadily and well, and it looks as if the various arrangements would be carried through without a hitch. Hardware merchants, along with the other merchants of the city, are taking an interest in the project, for it is realized that such a celebration will bring trade with it. "Home Weeks" across the border are very popular, and the merchants combine to make the event a successful one. The Montreal subscription committee is now setting to work to solicit the necessary financial aid, and no doubt their efforts will be worthily supported, for the project will bring money into the city. The publicity committee are engaged on a plan of campaign to secure the greatest publicity at home and abroad.

Ontario Trade News

New Hardware Industry at Hamilton—Ottawa Foundry Changes Hands—Kingston Hardware Merchant to Secure Good Appointment—Ridgetown Store Remodelled — Live Window Dressing at Guelph.

OTTAWA.

May 4.—A very fine catalogue of steel ceilings and side-walls has been issued by McFarlane & Douglas. The designs are artistic to a degree. This firm has also secured the contract for supplying fireproof windows, of which there will be between three and four hundred, for the G.T.P. elevator at Fort William.

The foundry of Butterworth & Co., Limited, erected in 1874, has been sold to Fleming Grate Bar Co., an organization composed of Ottawa men who will continue the foundry under the name of The Butterworth Foundry Co., for the manufacture of stoves, ranges and Fleming Grate Bars. For this purpose the factory will be enlarged. The Fleming Grate Bar people are applying to increase their capitalization from $40,000 to $89,000. The officers of the company are: H. W. Chamberlain,, president; A. F. Chamberlain, secretary-treasurer; Jas. A. Gardner and J. M. Fleming, directors.

The Fleming Grate Bar is a hollow bar which conducts the air from the front of the furnace and discharges it at 600 deg. Fahrenheit at the bridge wall where it meets the unconsumed carbon, and combustion is completed. These bars have been tested in several of the principal plants in Ottawa and Toronto and have saved in every case from 15 to 30 per cent. of the regular amount of fuel consumed. The bar also does away largely with smoke and is calculated to keep any place much within the limit of the smoke by-law.

Tenders for the stone work in connection with the new hotel and station have been called by the Grand Trunk Railway and it is confidently believed that actual operations will be begun within a couple of weeks.

The building permits for March this year were double March last year and the April figures show 101 permits issued, said to be the largest in any month in the city's history. This year

should give the plumbers a full complement of work.

The manufacturers' committee of the Central Canada Exhibition Association is directing particular attention to exhibits in the new process building which is expected to prove one of the best features of this year's fair.

The manufacturers at the Chaudiere are apparently taking "Progress" as their watchword from the activity which is observed daily in this district. Following the erection of a new and adequate power house by J. R. Booth, as well as other buildings for manufacturing purposes, the E. B. Eddy Co. are making a number of improvements and extensions to their already modern plants.

The Ottawa Hardware Co. have moved from Albert and Bank Street to 125 Bank Street, just half a block south. They moved in the quick time of a day and a half and were handicapped by rainy weather.

G. E. M. H.

KINGSTON.

May 4.—Archibald Strachan, Kingston's veteran hardware merchant, was this week honored by receiving the nomination, at the hands of the Liberal executive, for the position of collector of customs of this port, to fill the vacancy, caused by the superannuation of Clerk Hamilton. The names of several well-known Liberals were before the executive, but Mr. Strachan secured the highest vote and will, therefore, be the man for the position, and it is safe to say that no more popular appointment could be made. Born in Kingston, Mr. Strachan has been in his present hardware business for thirty years, and during all this time, has been identified with the life of the city, taking a keen interest in the city's welfare, and besides making a success of his business, found time to devote to public service. He is a member of the board of health, and public library board, in which he also served as chairman. He is a man popular with all classes.

The bell for the city hall has arrived. It was manufactured by the McShane Bell Co., Baltimore, weighs 2,000 pounds, 46 inches wide at the base. It is made of a composition of copper and tin, and cost $850.

Your correspondent was informed that thirty new dwellings are about to be constructed. Queen's University alone, will give employment to a great many men, in the erection of chemical and mineralogy buildings and an observatory. The three will cost $150,000.

House cleaning is the order of the day in all parts of the city, and the hardware men report good sales in the utensils necessary for this work.

F. G. B.

HAMILTON.

May 4—An industry which will be of much interest to the hardware trade, has just been secured by the city. It is the Hardware Supply Company, of Grand Rapids, Mich., which is establishing its Canadian branch here. The company has secured a plot of land 800 by 96 feet. The industry is the first fruit of the Greater Hamilton Association.

H. G. Wright, of the E. T. Wright Company, has returned from a trip to the south for the benefit of his health. He is very much improved.

The Hamilton Warehouse and Forwarding Company has been incorporated to carry on the business of a warehousing and general forwarding company. The capital is $75,000. The applicants for incorporation were: W. W. Stewart, W. P. Witton, H. L. Roberts, Thomas Patterson, W. J. Clark, H. L. Wilkinson and Arthur Hatch.

The Dowswell Manufacturing Company has undertaken the erection of a large addition to its plant.

The Oil and Gas Producers Limited, has been incorporated with headquarters in Hamilton. It is capitalized at $1,000,000 and the directors are: R. L. McIntyre and J. M. Sinclair of Toronto; G. G. Carscallen and E. D. Cahill of this city; W. G. Ryan of Chatham.

BRANTFORD.

May 4. — Taylor & Taylor, architects, are asking for tenders for the new Sanderson-Harold Co. factory plant at Paris. There will be a main building, 300 x 62, two storeys, a boiler and engine room 40 x 60, and dry kiln and warehouse.

Hardware merchants here will be considerably affected by the new insurance rates which have come into force this week. All local representatives of the tariff companies have been notified of the change, which gives a discount of 10 per cent. off the old rate.

A new building by-law will be drawn up by the buildings and grounds committee. It will include the extension of the fire limits, in order that the removal of frame houses in the city may be stopped, and will improve the regulations re concrete construction.

On Monday last Brantford free-holders voted for a new collegiate to cost $95,000 with all modern improvements.

A. W.

CHATHAM.

Shrewd hardwaremen are making a practice of displaying small articles prominently with accompanying price tags. This practice of keeping goods well to the fore is good salesmanship. The man who comes to purchase just one thing is frequently led, by merely seeing another article on display, to buy that too. Of course, the lines in display could be changed frequently, and seasonable stuff should be kept to the front. Judicious display, by means of a counter inside the store, is a good way of unloading surplus stock, or stuff which seems slow in moving out.

Attractive show cards help quite a bit to move out stuff too large for display. Frankly, the hand-made show card, even though it be a bit inartistic, seems more effective at times than the lithograph. "Have you bought your garden tools?" or "Prepared and Metallic Roofings are Fireproof," are among the timely reminders. The hand-made sign seems to inspire confidence; just as a facsimile typewritten letter is a better business getter than a printed circular.

Mitchell Bros., the new plumbing firm, are making considerable use of newspaper "locals" in their campaign for public patronage. They also put on an attractive display at their shop, 179 King St., the hanging electric lights with their many different syles of shades making an exceptionally attractive night effect. The firm has secured one big contract, for the installing of the steam heating system, electric wiring and plumbing in the addition now being made to the Ursuline College here. A contract has also been secured for hot water heating, plumbing and gas fitting in Perry Dolsen's new brick residence in Raleigh.

Dealers have sold large quantities of fencing this spring. The old rail and board fences once so common throughout the country are fast disappearing.

W. H. Goodhue of Ridgetown has completed the remodeling of his hardware store. In addition to the old Beattie premises he has also secured the store next door. The large closed windows at the front make beautiful show windows. The shelving has been extended to the ceiling, ladders having been added for the clerks. The two stores have been joined by archways, and a handsome office has been fitted up off the west store. The tinsmithing department is in the rear. The new premises are to be known as the Red Front Hardwae Store.

How many hardwaremen are there who realize that in the farmer they have not only a customer for implements and building materials, but a man who will appreciate modern plumbing and heating systems. The standard of living throughout the country is going up, and farmers everywhere are building better houses. Hardwaremen and plumbers might find it profitable to go a little out of their way to emphasize the fact that the comfort of a home lies largely in its conveniences. Incidentally, they will probably do something toward solving the question of how to keep the young men on the farm.

There was a record-breaking meeting of the Retail Merchants' Association this evening to hear D. A. Scroggie, secretary and official debt collector for the Guelph association, discuss the collection system in vogue among the merchants in that city.

Mr. Scroggie went into the subject in considerable detail, and was listened to with keen interest. His description of the Guelph system was quite a revelation to most of the merchants present, and will doubtless do much toward solving the difficulties with which the movers for a debt collecting system here have had to contend.

Following the address, a lengthy discussion took place, Mr. Scroggie being called on to answer quite a number of

questions with reference to the system. It was pointed out that even though a merchant did not have anything to collect, the protection afforded him by the system was worth the fee involved. The list of amounts collected for various Guelph merchants, and that from accounts in many cases written off as utterly bad, proved very convincing.

At the conclusion of the discussion, the executive was authorized to take up the matter with a view to working out a feasible system for Chatham on the same general lines as are in vogue in Guelph, with power to add to its numbers so as to make it a committee representative of all classes and localities of merchants. The point was raised during the discussion that the system would not touch country debtors, but solely those in the city, a point affecting hardwaremen probably more than any other class. A hearty vote of thanks was tendered Mr. Scroggie.

It is hoped that the committee will have a report ready in time for the regular merchants' meeting on Tuesday, May 11. The hardwaremen were well represented at this evening's gathering.

W. E. P.

LONDON.

May 4.—Work on the newly chartered North-Western Railway, an electric line from London to Sarnia, will commence shortly and be hurried through to completion. Several large financial concerns are interested in the undertaking, so that the matter of financing it will not be difficult.

The president of the Board of Trade is endeavoring to secure the removal to London of the Peabody Pant and Overall Company, of Windsor, an important concern, and has hopes of landing it.

The demand for gas ranges is greater this season than ever before, one large firm being unusually busy just now turning them out. The use of wood for cooking in summer is becoming less every year.

One innovation in McClary's foundry this year will be the establishment of a rest and test room, a nice little cozy corner away from the noise of machinery, where visitors can sit and see either a gas or cook stove in full operation, and discuss the merits of McClary's make to their heart's content.

F. T. Y.

GUELPH.

May 4—The hardwaremen of this city generally have a very good run on garden tools of all kinds at about this time of the year, as the Horticultural Society have been very successful in encouraging the citizens, by means of various garden and lawn competitions, to take a great interest in the beautifying of their home surroundings. When the local papers are coming out with accounts of Horticultural Society's rules and prize lists, the wide awake Guelph hardware man generally gets at least one of his windows well dressed with the accessories to gardening. This season, being backward, however, has interfered to some extent with the usual good sale of this line, and most of them have been pushing their house cleaning goods. Some very attractive windows have been seen dressed entirely with such articles as brushes and brooms, wash tubs, scrubbing brushes, feather dusters, mops, pails and woodenware of all kinds, suggesting to the lady shoppers things that they are just now, at house cleaning time, beginning to need very badly. McMillan Bros., Bond's and Penfold's have all had exceptionally good windows dressed with articles of this kind.

George Busselle, who has for 36 years been with the Bond Hardware Company has, on account of poor health, severed his connection with that firm and will leave in the course of a week or two for the West. His place will be taken by Norman Philip, who it is expected will fill the important position in a capable manner as he has had a good hardware experience, having travelled for some time for the hardware department.

G. A. Richardson the Upper Wyndham street hardware dealer, has two very attractive windows this week, one is dressed with baseball goods, and the other with fishing tackle entirely. The fishing tackle window is particularly good. It presents a pretty sight for any angler. In the display there are several fine Bristol steel rods.

H. Occomore recently had a fine gas stove window. He had a splendid gas range set up—hood and all, and besides worked in to very good advantage a small gas stove or two and a gas grate. Mr. Occomore, however, seems to be a graniteware specialist; he has just been enjoying another good run in this line.

"Wood's Fair," a novelty store that has dabbled a good deal in some lines of hardware, has been closed up and a sign on the door states that the stock, fixtures and goodwill of the business are for sale.

Penfold Bros., have a good window dressed altogether with roofing material this week.

George Penfold, has refused definitely, to run for a vacant seat at the city council board that an election will be held for shortly. He tells the many people who have been asking him to run, that he believes the conscientious efforts of an honest alderman are not appreciated and he can far better afford to be out of the council than in it.

H. S. N.

PETERBORO.

May 3.—Work was commenced on the new All Saints church this week. It will cost $25,000 and will be completed this year.

David Forsyth, of Douro township, is drilling an oil well on his farm. He procured the necessary machinery some time ago after discovering oil while digging a well. He has received several large offers for his property but has declined. The quality of the coal oil found is stated to be very good.

The Colonial Weaving Co. have announced that they will likely build a new factory this year.

The city has decided to construct six miles of granolithic walks this summer.

The ratepayers of Peterboro will be asked to vote on June 1st, on a by-law which the council is presenting to receive their sanction to an agreement with the Purity Ware Co., whereby the company proposes to locate in this city. It is a Canadian company but is backed by a strong American concern. They propose to manufacture all kinds of enamel ware, galvanized iron ware and range galvanized boilers. The factory will be 200 feet by 300 feet with the front part two stories high. In commencing they will employ 100 hands and after a time any number between that and 500. The American company manufacturing a similar line of goods is located in Brooklyn, N.Y., and has an excellent rating in Dun's. A marked cheque for $250 has been given the council if they do not go on with the work if the people support the by-law. W. C. McFarland and G. Noble, of Toronto, were present at the meeting in the company's interests before the council passed the by-law. The aldermen state that they are well satisfied with the terms of the agreement. The site has been decided upon and the company states that the work will be proceeded with this summer. Ald. Gillespie, who as chairman of the Manufacturers Committee, has had the brunt of the work in preparing the agreement and negotiating with the company, states that he is confident the factory will be built and will make a strong addition to Peterboro's industrial interests. A market has already been established in Canada for the American company's goods and a large portion of the export trade will be looked after by the Peterboro factory. The goods are all kinds of kitchen and other utensils made from enamel and galvanized iron. The employes will be skilled and will demand good wages. The New York factory was visited by members of the city council who are more enthusiastic than ever over securing this industry for Peterboro.

H. T.

The Prairie Provinces

Many New Buildings Being Erected in Saskatchewan Towns—Hardwareman Receives Black Hand Letter.

SASKATOON.

May 1.—Prospects for a good building season are of the brightest, there being a long list of all classes of buildings in sight. The continued frosty weather has retarded operations, although a start has been made on a good many sites. The building permits for April amount to $147,100, the total for this year so far being $180,000. During May the amount will be much larger, as there are two banks, a public school and a col-

legiate institute on the list for which no permit has yet been taken out.

Hardwaremen who consider this an opportune time to push the sale of carpenters' tools are making a special display of this line now. In the Clinkskill store a very attractive window is to be seen. There are carpenters' tools of every description, from a nail punch to a Disston's saw. In the centre of the window is a model house showing the class of workmanship which the tools are capable of doing. Other goods being pushed at this time are blacksmiths' supplies and painters' requirements.

The plans for the Saskatoon branch of the Bank of Montreal are now here and excavating has begun on the site on Second Avenue.

The Winnipeg Oil Co.'s warehouse and contents were totally destroyed by fire on Tuesday. The stock of oils and grease in the building at the time is valued at $6,003.68, and the building itself, which is a small one, at $1,175.12.

The Public School Board have decided to instal the very best plumbing, heating and ventilating systems in the new school, which are procurable.

A new school is being built at Venn, on the G.T.P.

The Saskatoon Concrete Co. have the contract for the erection of a school house at Lake Patience.

Henschel & Co., of Rosthern, will erect a new store to replace the one recently burned down.

A blackhand letter has been received by H. K. Wiebe, a Rosthern hardware merchant, to the effect that his store will be burned down in the same way as Henschel & Co.'s was destroyed a week ago.

R. J. Clare, of Warman, has had a new warehouse built. His former warehouse has been fitted up as a store.

An express service has been started between Saskatoon and the new town of Zealindia, on the southwest branch of the C.N.R. line and intermediate points.

D. G. R.

British Columbia.

VANCOUVER.

May 1.—General conditions are encouraging, and the prospects are that the good trade done by the hardwaremen will continue. There is a marked activity in the logging industry, with camps starting up on different parts of the coast, and this feature is also noticeable in the interior, where the spring drive of logs is taking place. Another good point is the announcement that the Kosmos liners are to call regularly at this port, while the Jebsen line, operating to Mexico, is to be put on a quicker service, All this increase in business means improved conditions for all concerned in the various lines of trade.

Arrangements have been completed for the erection here of a two-kettle plant by the Pacific Coast Gypsum Company, of Seattle. This concern has its bunkers at Gypsum, Alaska, and an additional plant at Tacoma. By establishing here, a saving will be effected in duty, and to meet requirements a subsidiary company will be formed, and the raw material brought from Alaska in ships registered in this country.

W. A. Wood, of the Wood, Vallance Hardware Company, of Vancouver, Nelson, Winnipeg and Hamilton, who was on the coast, states that business throughout the country is steadily improving and that commercial men were expressing most optimistic opinions as to the outlook for the year. Mr. Wood, who was on his way east, expects to make a trip to Europe shortly, returning to Canada in the fall.

Last week was an off period for building permits, and for the first week for some time they fell below the $100,000 mark. The total for the week was $54,-155.

Complaint has been made to a hardwareman by a householder that the cranks on wringers are put on with a back screw instead of a square socket. As it is now, with constant use, it is not very long before the thread of the screw gives way, practically making the wringer, otherwise good, of little use unless a machinist is employed to drill a hole through and pin the crank. It is thought this might be easily remedied by the manufacturers of wringers by having the handles fit on a square end.

Among the fourteen paragraphs made up in the horse show rebus window shown by the George Hunter Hardware Co., Vancouver, the words in parenthesis being represented by tools, etc., are the following:

"Now let us begin by stating that whether in the (pad) dock, or in the (boxes) it is the duty of every gentleman to watch first of (awl) what is taking place in the Horse Show (ring); should a lady en (gauge) his attention or (caster) eyes his way, it is, however, always in good form to (rubber) if she is good looking.

"To drive a (trap) to the show is quite the thing. People will (pick) you out for a (bit) of a (knob), besides it denotes your social (scale) and (rivets) the gaze of the crowd, but much (hinges) on whether your trousers (bag) at the knees, and whether your coat has shiny (elbows). Better (brush) the whole suit and take a street car in this case.

"For the ladies no (pads) this season. Instead, the directoire gown with the long, slim (waste) effect in all popular (shades). If you have secured your new (spring) (hatchet) wear it, for it may act as a (screen) and put a (damper) on the (wick)-ed man back of you.

"The Horse Show officials get no (rake)-off from the show, and they have taken measures to keep out (knockers), (hangers)-on, old (skates) and (awl (shade)y characters, or tough (mugs), their purpose being to (cement) good feeling among patrons and in(fuse) a proper spirit into the big event. The (mower) the merrier is their cry, and a warm welcome to (awl) (oakum)."

The Vancouver Gas Company is planning a large plant on the waterfront of Burrard Inlet, and has purchased for $100,000 property at Hastings, immediately east of the city proper. It is proposed to instal a plant that will meet the needs of the city for years to come.

In the revision of the new plumbing by-law, which is being taken up by a civic committee in sections, a change has been made to compel two inspections of the plumbing of each building before final certificate is granted. A water test is to be required after the roughing, in, and a smoke test after the completion of the entire work. Another new feature is the demand of an inspection fee of $1 in all cases where the plumbing inspectors have to make extra trips to premises because of work which is found faulty on the first inspection.

The value of building permits for the past week were $147,355. These included one for $25,000 for a residence for R. P. McLennan at Kitsileno. Mr. McLennan is of the wholesale hardware firm of McLennan & McFeely.

The Fort George Lumber and Navigation Company, which is composed of Vancouver people, has its new steamer nearly ready at Quesnel. This craft is made with only eighteen inches draft, and will navigate the upper Fraser, being the only boat to go as yet through the Fort George canyon. It will also operate on the Nechaco River, and will be of great assistance to settlers in the northern interior.

VICTORIA.

May 1.—Mr. Laurie, representing the Simmons Hardware Co., St. Louis, is in town this week.

With the advent of the fine weather trade is quite brisk. Hardwaremen especially are kept on the rush, due to a certain extent to the large amount of building at present going on in the city and suburbs.

The Oak Bay municipality are to raise $30,000 to put in the new waterworks system.

The Colbert Plumbing & Heating Co. successors to John Colbert, have bought a piece of property on Fort Street, and will at once erect a two-storey building for their own use.

Another plumber to follow the lead and build is C. M. Cookson, who has to move from his present quarters to make way for the new building of Watson & McGregor, plumbers and hardware dealers. He has secured a piece of property and will build at once. This, with the W. S. Fraser building and Bownass' new premises makes quite a bit of movement in hardware circles.

W. B. C.

VERNON.

May 1.—The Vernon Hardware Company has issued a card containing the location of the fire alarm boxes in the city. The card is attractively gotten up and is distributed gratis. It is a thing that people will keep by them, hung in a handy place, and thus the name of the enterprising firm is always before the eye of its patron.

Spring Sporting Goods Trade

The Man Who Goes Out After the Trade Secures the Best "Bag"—An Easy Line to Display—Bicycle Agency a Good Line for Hardware Merchants.

With trout fishing now on, baseball and lacrosse enthusiasts already loosening their arms, and footballers taking practice kicks, the hardwareman has, or should have, entered upon the threshold of his sporting demand. If he has done good educative work in the past, if he has thrown himself heartily into the sporting spirit of the community, if he has identified himself with any of the club organizations, if he has planned out some good window displays, and if he has ordered a comprehensive stock with due regard for the particular trend of the sporting tastes of the district, then he is in the best of positions to make the sporting department of his store a large profit-earner. There is no doubt as to the profit attached to sporting goods, but, like other things, the dealer must go after the trade. In other words, he must bait the fisherman as the fisherman baits the fish. Carry good lines, for the sportsman likes the best, and tempt him not by the low price of the goods, but by the quality.

As we have often pointed out, the merchant in arranging his sporting windows, has an ideal task. In ordinary hardware lines his ingenuity is often heavily taxed to make an artistic window. Tinware, for instance, does not lend itself to attractive display, but with sporting goods the case is entirely different. In the first place the articles themselves suggest enjoyment. They are viewed with recollections of good times in the past and of prospective equally good times in the future. They are always interesting to the observer, and with this initial advantage in his favor it is a very poor designer who cannot make something of his sporting window. From the commencement of the fishing season right up to the heavy game one, there is an endless variety of sporting designs from which to draw—designs which can be elaborated as the facilities of the dealer allow; from the little set piece of the fisherman enjoying himself over a piece of painted glass to the fisherman in his boat on a lake of real water containing live fish and a background of most elaborate scenery; from the small camping tent and the little fire, to the display of the same sort of thing on a much larger scale, and many more accessories, and so on. No matter what the resources of the merchant, he can always evolve something that will be spectacular, and to the point.

Suggested Displays.

If the sporting inclinations of the community lie that way, now is the time to display baseball accessories, lacrosse sticks, footballs, etc. No merchant should fail to introduce a figure into his display. A cardboard figure is not expensive, perhaps the merchant or one of his clerks could make one, and with a little ingenuity that figure can be made to do duty over and over again. An effective design for a baseball window can be made by marking out a small diamond on green baize, with miniature bases and a painted background, representing a row or two of enthusiastic fans. Then in the middle of the diamond put a figure of a player with a real, but small, ball in his hand. A catch announcement could be made as follows: "The first on the field. A good ball bought at this store." For lacrosse it is not difficult to manufacture a small lacrosse goal, using the same background and the same figure, this time carrying a lacrosse stick. The announcement could read: "Out to score. Our goods score all along the line."

Towards the end of the month when the days begin to get really warm, the merchant can display his boating and yachting accessories. He can also make a feature of his camping outfits. In this latter respect he can not only introduce a tent, but also staple hardware lines which are wanted for camping out. Oil and spirit stoves can be shown, kettles and culinary articles, proper camping sets, folding chairs, waterproof sheets, and safety and other razors, shaving sets electrical lamps, lighters, and other things so useful to the camper-out. Many of the articles could also be used when displaying the yachting accessories, especially the safety razors.

A Bicycle Agency Pays.

A line which hardwaremen should thoroughly push is the bicycle. The conditions have changed now with regard to bicycle selling. The old boom which brought so many shoddy machines on the market, and created dealers all over the place, has thoroughly died out, and with it has gone all that competition which ruined a natural trade for the hardwareman. But out of the ashes of this boom there has developed a natural and steady demand for one of the most useful conveniences that a man can possess, either for business or pleasure. The shoddy maker has been killed, and only the reputable manufacturer left in. The mushroom dealers have also disappeared, and with this the hardwareman has come to his own again. Bicycle manufacturers are looking to the hardware trade more than ever as a natural outlet for their production. The margin of profit, now that the old senseless competition has disappeared, is excellent. The hardwareman should not overlook the fact that a bicycle advertises itself, probably more than any other line. The owner of the machine is all over the place with it. His friends see it, and if the machine is of high grade—and no merchant should handle anything else—then its merits are discussed, and the store gets other customers. Bicycles are easy to handle; they do not take up much room, and the prospective owner can be allowed to get the best possible idea of the merits of the machine by having a trial spin on it. Besides, with a good bicycle trade, a merchant can run a repair shop, and a repair shop is useful in a thousand ways from the handling of bicycle and automobile breakdowns, to broken sporting goods and grinding skates. A repairing shop is a very profitable department when handled well.

BB AND AIR RIFLE SHOT.

Attention has been called to the fact that there is a great deal of confusion in the trade in regard to air rifle shot. Most dealers know that air rifle shot and BB shot are not the same thing, but as the manufacturers have no uniform way of designating air rifle shot, there is considerable confusion in terms and consequently errors in filling orders.

Air rifle shot is supposed to be .175 of an inch in diameter, but, of course, being a drop shot there always will be some variation. The manufacturers of air rifles understand this and build the barrels of their guns so as to allow for a reasonable variation in the shot. The air rifle variety is much more carefully screened and the manufacturers aim to get it much more uniform than any other shot they manufacture.

BB shot is supposed to be .18 of an inch in diameter, but as there is no necessity for doing so no effort is made to get the shot as uniform as that used in air rifles. Consequently there is a great variation in this shot and while some of the smaller shots may go into air rifle barrels, the larger ones will not and some are just large enough to go in and clog the barrel. When this occurs there is dissatisfaction with both gun and ammunition. The manufacturers of shot and dealers should co-operate to correct this condition. Manufacturers should adopt a uniform term for air rifle shot which would leave no room for errors or misunderstanding and we believe it would be best to use a term in which the BB does not appear at all. The term "Air rifle shot" has been suggested by the sporting goods dealer to designate this particular shot and for further identification the standard of diameter .175 also be shown therewith on all labels, packages and bags.

Misunderstandings in regard to the proper ammunition to use in any gun cannot fail to be harmful and would naturally limit the sale of such a gun and of ammunition for use in connection therewith.

There is now an enormous sale of air rifles and the demand is increasing each year. It therefore becomes a matter of great importance that the matter of ammunition of these guns be satisfactorily understood.

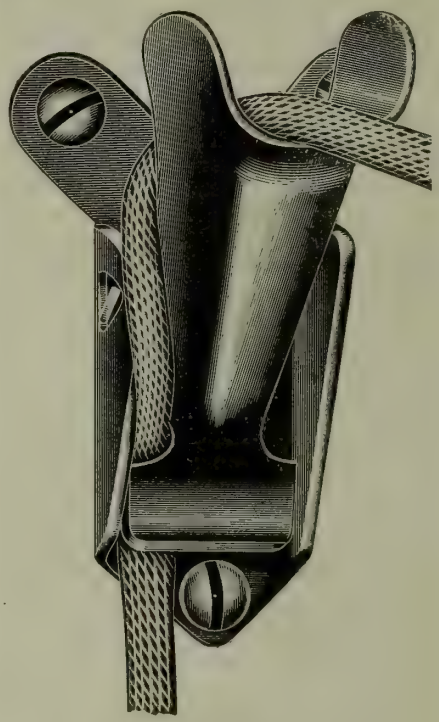
T. J. Thomson, Ltd., Owen Sound, capital, $40,000; will engage in hardware, tinware, stove and plumbing business. Incorporators, T. J. Thomson, T. W. Thomson and Leonard Ferguson, Owen Sound.

Novelties and New Goods

THE NEW RELIANCE PLATE.

The Oneida Community is to be congratulated for putting their new Reliance Plate on the market at this time. Throughout the entire country, the trade has noticed with interest during the last few years the marked increase in the demand for artistic plate at popular prices, and the community seem to have anticipated this demand.

Reliance Plate has a base metal of 18 per cent. German silver, and carries a full five ounce plate of pure silver. This makes it practically as heavy as the best of standard A1 brands, yet it is sold to the trade at a much lower price than this grade of plate. An inspection of the latest assortment of this new plate shows excellent workmanship and finish. The designs and patterns have a truly artistic appearance such as is always expected from a product of the Oneida Community.



The new plate is marketed in the same manner as Community Silver—under a restricted price agreement, and, therefore, no cut-throat competition need be feared. It is manufactured by the Oneida Community, and makes a strong running mate for their well known Community Silver, as it allows the retailer to compete with the department stores and similar stores for a very profitable class of business, that is, plated ware for outfitting country homes and for like purposes, besides supplying their regular trade.

The Oneida Community, Oneida, N. Y., announce that their extensive magazine advertising will be pushed as never before and that it will make Reliance Plate as well as Community Silver known to every woman throughout the country. Reliance Plate is guaranteed by the manufacturers to wear for ten years.

PRACTICAL CLOTHES LINE FASTENER.

A unique and practical clothes line fastener, known as the "Little Giant," is being placed on the Canadian market by the Taylor-Forbes Co., Guelph. This little device, besides lightening some of the trials of wash day, also makes a practical hammock fastener.

With the "Little Giant" the clothes line can be let down to easy reaching distance, filled and then adjusted to any height desired. A pull at the end of the line brings it taut. When the adjustment is made, the greater the load the more securely the fastener holds. The line may be quickly raised and lowered as desired. The device is fastened to the house or clothes post with three screws.

Little Giant Clothesline Fastener.

The "Little Giant" is made from the best grade of steel, intended to stand a maximum pull of 500 pounds. It is finished in a heavy enamel, which is said to be exceptionally durable.

GERMAN WIRE FENCING.

There is no need to point out to farmers and ranchers the importance of having the best fencing on the market. No matter on what careful lines they conduct their operations if they suffer from leakages such as occur through defective fencing then their profits fade away despite their labor. There is nothing more expensive and annoying to a farmer or rancher than to find his fencing continually down, allowing his cattle and sheep to stray, and often wanting stretching and tightening, all this adding to the overhead expenses. Farmers therefore are always ready to consider any good wire on the market, and hardwaremen should not overlook this fact. The "Neptune Unrivalled" patent steel fencing wires of Felten & Guilleaume, Germany, are being pushed most actively on the Canadian market, and are stated to be most durable and economical. The breaking strains are much higher than those of the relative numbers in many other wires, while they economize at least 50 per cent. on landed cost and at least 60 per cent. on inland transport charges, and further save a considerable sum in cost and transport charges of posts as the latter may be placed further apart. On account of the high grade material, great strain, and high elastic limit, there is little breakage, while no stretching and tightening up are required as the wire is not readily affected by changes of temperature and pressure exerted on it. These fences present the same neat appearance after 10 years service as when first erected. This firm also has a barb wire on the market which owing to the short distances of the barbs is not so dangerous as long barbed wire, while it is quite as effective and not so costly. The sole Canadian agents for Felten & Guilleaume are Watson Jack & Co., Bell Telephone Building, Montreal.

GOOD VENTILATION IMPORTANT.

The importance of breathing pure air in a building, and of eliminating all dust, which latter is so largely responsible for consumption, is now generally recognized. It is only by good ventilation that buildings can be made perfectly safe—a ventilation which carries off the foul air as well as admits the pure. In this respect G. D. Pearson's patent cone rotary ventilator fulfills all the important requisites of a perfect ventilator. It is also set in motion by the least current of air, and will give a perfect draught at all times. It is well and solidly made, is ornate in appearance, and having no fans, blades, or gear-wheels inside, does not get out of order or require oiling. The ventilator is in use throughout the Dominion, and some of the finest buildings in Montreal are fitted with it. The G. D. Pearson's patent cone rotary ventilator, which is recommended by the Factory Inspector of the Province of Quebec, is manufactured by G. D. Pearson & Co., 17 Pontiac Street, Montreal.

Reliance Plate Just Being Introduced.

CONDENSED OR "WANT" ADVERTISEMENTS.

RATES.

Two cents per word first insertion; one cent per word subsequent insertions.

Five cents additional each insertion where box number is desired.

Contractions count as one word, but five figures (as $1,000) are allowed as one word.

Cash remittances to cover cost must accompany all advertisements. In no case can this rule be overlooked. Advertisements received without remittance cannot be acknowledged.

RULES FOR COPY.

In addressing replies care of HARDWARE AND METAL don't fail to give box number.

Replies addressed to HARDWARE AND METAL boxes are re-mailed to advertisers every Monday, Wednesday and Friday.

Requests for classification will be followed where they do not conflict with established classified rules.

Orders should always clearly specify the number of times the advertisement is to run.

All "Want" advertisements are payable in advance.

ARTICLES FOR SALE.

Don't keep any fixtures or tools around your store for which you have no further use. They are worth more to-day than they will a year hence. Don't keep money tied up which you could use to secure discounts from your wholesaler.

HIGH CLASS COLOR WORK; Commercial Stationery, Posters. The Hough Lithographing Co. Limited, Office—No. 3 Jarvis St., Toronto, Telephone, Main 1576. Art, Good Workmanship; Business Methods.

IF YOU are looking for a side line to add to your business there is none better than COLUMBIA GRAPHOPHONES, Double Disc Records (which means two records for a single price) and Indestructible Records (that will not break or wear out no matter how much you abuse them). The Columbia Phonograph Company is the only firm that manufactures both Disc and Cylinder Machines and Records, therefore, a Columbia dealer has the advantage over all others, as he can furnish his customers with what they want, while his competitor has to sell them what he has or lose the sale, which he generally does where there is a Columbia dealer. Are Columbia goods sold in your town? If not, why not? Do you want the exclusive agency? (remember exclusive). You had better write to-day or someone else in your town will read this advertisement and beat you to it. A postal will bring catalogues and full information free. Write to-day. Do it now. Toronto Phonograph Company, Limited, Exclusive Columbia Jobbers, 40 Melinda St., Toronto, Canada.

NOTICE—Users of Pitner Gasoline Lamps are warned against being induced to purchase parts of other makes of lamps to be used on the Pitner. May 7.—Barb wire, $4 per 100 lbs.; plain twist wire, $4.25; brt. wire staples, $4.20; poultry netting, 50 p.c.

HORSESHOES — MRM and "Bell," $5.15 base.

HORSENAILS— MRM, new cold process—No. 3, $4.50; 4, $4; 5, $3.75; 6, $3.50; 7, $3.25; 8, $3.05; 9, $2.95; 10, 11 and 12, $2.85 in 25-lb. boxes. Less than 25-lb. boxes add 1c per lb.

WIRE NAILS—$3.45 base.

SCREWS—Flat head, bright, 85; brass, 75; round head, bright, 75 and 10; brass, 70 p.c.

BOLTS—Carriage, 3-16 and ¼, 60 p.c.; 5-16 and ⅜, 4-inch and shorter, 55 p.c.; ⅜ (longer than 4-inch), 50 p.c.; 7-16 and up, 45 p.c.; machine, ⅜ and under, 55 p.c.; 7-16 and over, 45 p.c.; plow, 45 and 5 p.c.; stove, 70 p.c.

SHOVELS — First grade, $11.55; fourth grade, $7.60 per dozen.

HARVEST TOOLS—50-10 p.c.

BRUSH HOOKS—$9 per dozen.

LANTERNS—No. 2 cold blast, $7.75 per dozen.

FILES—Arcade or Eagle, 70-10-5 p.c.

SOLDER—23c per lb.

WRINGERS—Royal Can., $38 doz.

CHURNS—45 p.c.

ROPE—Sisal, 11c per lb.; British manila, 12c; pure manila, 15c.

BUILDING PAPER—Plain, 62c per roll; tarred, 78c per roll.

LINSEED OIL—Boiled, 80c; raw, 77c per gal. in barrel lots.

AMMUNITION—Primers, $1.55 per M.; loaded shells. English and Canadian make. 12 gauge, black soft, $19 per M.; 10, $23.65; 12, smokeless, chilled, English, $25; 10, $29; 12, Canadian, $24; 10, Canadian, $28; shot, drop, $7.50 per 100 lbs.; chilled, $7.90; buck, $8.30; 28 ball, $8.70; powder, F.F., Hamilton, $5.25 per keg.

Do not talk about prices and forget quality. Tell about your goods. Prices are forgotten long before quality.

Does your clerk say to a customer. "You don't want anything else, do you?" Change your tactics, show the customer other goods and persuade him to buy. Your sales will increase if this plan is pursued.

Why not work up a Market Day for your town this summer and invite all of the farmers to come in and spend the day? Many agricultural towns have found this a splendid way to establish a more friendly relation between the merchant and farmer.

SAVE MONEY

By Using Our

Corrugated or Plain Round Conductor Pipe

made in 2", 3", 4", 5", 6" diameter by 8′ and 10′ lengths without a cross seam. You can buy this perfect pipe for much less than you can make up pipe in 30′ lengths. Our Eave Trough is the best; it is machine made on a steel die and every length is the same.

SEE THAT YOUR WHOLESALER SUPPLIES YOU WITH OUR PIPE AND TROUGH

PAINT MANUFACTURING IN WESTERN CANADA.

G. F. Stephens, who since 1882 has been jobbing and manufacturing paint materials in Winnipeg, spent several days in Toronto last week and in conversation with Hardware and Metal made some interesting statements regarding the development of the paint manufacturing business in Western Canada.

Mr. Stephens, who has been spending a few months in the Southern States, is enthusiastic about the future of Winnipeg, and says that everywhere he went he was questioned about Winnipeg and Western Canada. In all parts of the States the Canadian west is commanding first attention. The immense benefit this is to Canada is evidenced by the official statement that 70,000 citizens of the United States would migrate to Western Canada this year, the average wealth of these settlers being at least $1,000, or a total of $70,000,000 brought into Canada for investment in homesteads, farm machinery, house furnishings and the necessities of life.

Even though the spring is backward and crops may suffer in consequence, Mr. Stephens felt that the outlook was bright and business this year would be decidedly brisk. He referred to one farmer, in the High River district in Southern Alberta, who last year had garnered 35,000 bushels of wheat, this netting him $28,000. This is a new district intended to be made into farm lands by irrigation, but not having yet needed to use the irrigating canals constructed. With thousands of such farmers throughout the west, coupled with the natural growth resulting from the incoming of the settlers from the United States and other countries, a brisk trade is assured.

"Then there is the elevator trade" added Mr. Stephens. "We have upwards of 500 towns on our books and every one of these places has from five to ten elevators, each elevator requiring from half a barrel to one barrel of paint every year. We have made a specialty of this elevator business and by making only one grade of paint, and that the best we can produce, we have been able to secure a most satisfactory share of this trade. The manager of an elevator company controlling several dozen elevators recently came to us and said he could beat our price, but after we explained that we could make a lower grade paint to sell cheaper, but would not risk our reputation in doing so, he again placed his business with us. We have his confidence and can only keep it by maintaining the standard of our goods."

"The west is developing as a flax producing country and Winnipeg now has two linseed oil mills. You are close to the lead mines in the slocan and the lead smelter at Trail. With the west requiring such immense quantities of paint, what are the prospects for the establishment of a lead corroding plant at Winnipeg and the development of a complete paint manufacturing industry?" asked Hardware and Metal.

"I have seriously considered the establishing of a corroding plant at Winnipeg," replied Mr. Stephens, but the C.P.R. will not quote a better rate from Trail to Winnipeg than the full rate from Trail to Montreal plus the return rate to Winnipeg. Under these conditions a plant at Winnipeg is impossible, but I still hope to be able to establish the plant before long. By corroding the lead at Winnipeg we would save freight amounting to three-quarters of a cent a pound or $15 per ton and this would soon pay for the construction of the works."

In 1882 when Mr. Stephens went to Winnipeg there were only two places outside of Winnipeg he could sell paint materials in. Now, as he says, his firm have over 500 places on their books. With such a development it is not improbable that the hope of establishing a corroding plant in the west will be realized before long.

Catalogues and Booklets

Manufacturers or jobbers sending printed matter for review, should draw attention to the new lines listed; and retailers sending for catalogues or other matter, should write on their regular printed letterhead and mention this paper to make clear that they are in the trade.

Wire and Iron Goods.—The Crescent Wire and Iron Works (Partridge & Sons), Kingston, have issued a fine catalogue of the goods made at their works. Both the illustrations and letter-press are suggestive, and the prices of the various lines therein described should prove valuable pointers for hardwaremen. To name all the lines made by Partridge & Sons would require a great deal of space and the use of every letter in the alphabet; suffice it to say, that almost every article made from wire and iron is manufactured at their works. There are some outstanding lines, of course, such as animal cages, ash sifters, office railings, baskets of all kinds, lawn seats, coal and sand screens, flower stands and stable fittings. Two very prominent lines are gates and fencing, made in wrought iron and steel wire. There are gates for the humblest cottage as well as for the grandest mansion: and a feature is the light gate with hook for tops of stairways to prevent children falling down the steps. Wire fencing, plain and ornamental, for use about the farm or small garden plot, as also for indoor work, is made in great variety. There are also innumerable small kitchen and household utensils handled by hardwaremen made at the Crescent Works. The catalogue is worth having and hardware dealers should send for copies.

A New Combination Wrench.—The "Two in One" is the suggestive name given a combination wrench that is equally good on nut and pipe work. This wrench is made by the Bemis & Call Hardware & Tool Co., of Springfield, Mass., and a catalogue now published by the company illustrates and describes it as well as a number of other tools carried by hardwaremen. There is a saving for the mechanic in using this wrench as it does away with carrying two wrenches in his kit, and being up-to-date, workmen may be relied upon to choose this wrench when shown its possibilities.

A Popular House Pump.—A pump that is becoming more and more popular all the time is the "Aylmer House Lift Pump," manufactured by the Aylmer Pump and Scale Co., Aylmer, Ont. The pump is described and illustrated in a catalogue just now being issued by that company. Plumbers and pump men are beginning to realize the value of the pump for the cistern and the house. The Aylmer Co. are also makers of scales, iron pipe, pipe tools, etc., and extension and step ladders.

Samson Milk Can Trimmings.—The McClary Mfg. Co., London, are issuing at present their 1909 price list of "Samson" milk can trimmings. A neat little red-covered booklet gives this information, as well as containing illustrations and descriptions of all kinds of milk and cream cans and pails, together with trimmings and kindred appliances, can taps, creamery gauges etc. A chapter at the end of the pamphlet gives the government rulings re weights and measures, especially in regard to the handling of milk. The information therein contained should prove useful and valuable to hardwaremen carrying dairy utensils in stock.

A Huge Constructing Concern.—A rather elaborate booklet is the 150-page catalogue published by the Hamilton Bridge Works, dealers in builders' iron as well as being general contracting engineers. The booklet contains a great variety of illustrations of railway bridges and turntables; electric power houses and running sheds; buildings, roofs, steel towers, transmission work and many other things. It is ten years since the company issued its last catalogue, and the advance made in that time is shown by even a cursory glance through the pages of the present booklet.

New Hardware Catalogue.—James & Reid, Perth, Ont., have just issued in attractive form an illustrated catalogue showing a number of hardware specialities which they are manufacturing. This firm have established quite a trade with their different lines, and are on the alert to add good staple lines to those already manufactured. In addition to their hardware catalogue they issue a list illustrating their lines of steel sleds which have already secured a firm hold with the hardware trade throughout the Dominion. For the convenience of the Montreal trade they have made arrangements with Coulson & Blaikie, 459 St. Paul St., to have a line of their samples at their warehouse. Catalogues will be sent to any of the hardware trade on request.

The Cobalt Powder Co., Amherstberg; capital, $40,000, to manufacture dynamite and other high explosives. Incorporators, F. E. Dunbar, W. S. Falls and M. Barrett, Amherstburg.

Canadian Sheet Steel Corporation, Morrisburg; capital, $750,000, to manufacture every description of iron, steel, tin and other metal work. Incorporators, A. White, J. F. Hollis, and T. H. Wilson, Toronto.

THE LITTLE PAINT MAN.

Keeping Store and Keeping *Stock.*

My grandfather used to tell the story of a merchant who thought he was keepin' store when he was only keepin' *stock.* He got wise to the fact one day, and, when he investigated, found it was because he didn't handle the goods the people wanted, and so they went to his competitor where they could get 'em.

As you know, that's one of the fundamental principles of successful storekeeping. That's why merchants, who handle Sherwin-Williams products, make more money than those who don't—the people want Sherwin-Williams goods.

The Little Paint Man

875

Our advertising in 180 newspapers throughout the country is going to make more people want Sherwin-Williams products this year than ever before—I won't charge you anything for that tip.

Not every merchant can secure the Sherwin-Williams agency for house paint and other exclusive agency lines. There are a few towns where agencies are now open, however, and any merchant, who has an opportunity to secure an S-W. agency, should not put it off, as your competitor may have it tomorrow.

A lot of people think that the only thing paint can be used for is the outside of houses and floors. You know this is not so—that a handy man or woman with a few cans of S-W. Specialties can accomplish wonders around the house. You know it, I say, but the thing that'll make you money, is to tell your customers.

BUILDING AND INDUSTRIAL NEWS

For additional items see the correspondence pages. Information is solicited regarding building and industrial news, the incorporation of companies, establishment or enlargement of mills, factories or foundries, municipal waterworks and sewerage systems, railway or mining news, etc.

Industrial Activity.

A foundry plant is talked of at Port Arthur.

A coal gas works will be erected at Goderich this summer.

D. D. Mann has assured Port Arthur civic authorities that the Atikokan iron plant will be reopened at once.

The Ogilvie Mills Co. will build a 300,000 bushel elevator at Winnipeg this year.

The Goldie Milling Co., Galt, will build an extension to their present premises.

A new industry is promised for Ottawa, a rope factory which will probably be started soon.

The Dominion Iron and Steel Co. has received an order for 5,000 tons of steel rails from the Great Northern Ry. of England.

Sussex, N.B., will have a new industry to manufacture the newly invented Acme steel ladder, controlled by the Acme Steel Ladder Company.

The Grey & Bruce Portland Cement Company will transfer its operations from Owen Sound to St. Marys, where a $250,000 plant will be erected.

The C.N.R. contemplate the erection of stock yards, freight shed and an extension to the station at Aberdeen, Sask.

Thessalon, Ont., ratepayers have approved a by-law to loan $10,000 to a saw mill concern which will expend $25,000.

The Twin City Manufacturing Company, of Strathcona, is negotiating with Edmonton council for a site in that city.

The International Roturbine Engine Company of America, Minneapolis, propose to locate a Canadian branch factory in Winnipeg.

The American Laundry Machinery Manufacturing Company, Chicago, Ill., contemplate locating a Canadian branch factory in Toronto.

E. O'Connor, Hamilton, Ont., will probably establish a brick plant with a capacity of 20,000 a day at Welland. Estimated cost $9,000.

The Massey-Harris Company will build an additional warehouse behind their present building at Brantford. Tenders will be asked for in the near future.

Work is proceeding on the addition of two new hot mills and two new galvanizing machines at the Canadian Sheet Steel Corporation's plant at Morrisburg.

Among the new enterprises shortly to be added to the industries of Revelstoke, B.C., is the Revelstoke Sash and Door Factory, which is now in process of erection.

The East City furniture factory, Peterborough, is to be enlarged during the coming summer. An addition one-half the size of the present building will be built to the rear.

Woodstock, Ont., has given a site for a factory to the Watt Hose Coupler Co., and it is likely a site will also be given to the Russell Harvesting Machine Co. for the building of a plant.

The Brooks-Scanlon Lumber Company, of Minneapolis, which some time since announced its intention of erecting two or more large sawmills on the Fraser river, is seeking a site close to New Westminster for the first mill.

Montreal capitalists have formed the Pacific Pass Coal Fields, to develop 30,000 acres of coal lands in Alberta about 40 miles from the Yellowstone Pass. The areas are estimated to contain 800,000,000 tons of soft coal.

Premier Rutherford, of Alberta, is trying to get the Dominion Government to build a grain elevator at Vancouver, with a view to sending Alberta wheat to Europe by way of India and the Suez Canal.

Pheasey & Batson have been awarded the contract for the Edmonton Iron Works' new building, at a contract price of $35,000. The same firm have also secured the contract for Dr. McLean's business block, valued at $35,000.

The H. W. Johns-Manville Co., manufacturers of asbestos wares of all descriptions of Milwaukee and New York, will open a warehouse in Winnipeg to serve the prairie provinces, and propose in the near future to establish a factory at Portage la Prairie, if the trade warrants it.

"Scarboro Securities" behind which are Mackenzie & Mann, as well as the Canadian Northern and Toronto Railway interests, have bought the Norland power plant on Gull River and the Raven's Lake Cement Works for $500,000. The purchase is due to the fact that Mackenzie & Mann's interests could not get the large quantities of cement required.

Arrangements have been made for the addition at the Soo of an extra furnace to the existing open-hearth plant, to increase the production of steel; an additional blast furnace for the production of pig iron will also be installed. The construction of these furnaces alone entails an immediate expenditure of at least $1,000,000.

The Swanson Bay, (B.C.) pulp mill, will be manufacturing pulp by June. Work is being rushed on the mill, between seventy and eighty men being employed getting ready for the opening. A new wharf is being built at the mill, which, when completed, will be the largest north of Vancouver. The sawmill is at present running from 7 a.m. to 9 p.m. cutting the lumber for buildings at Prince Rupert. The pulp mill will be run by water power generated from the waterfall close by, but steam will also be necessary in the manufacture of the pulp.

Municipal Undertakings.

Olds, Alta., proposes to construct a fire protection system.

Waterworks and sewerage systems are proposed for Chapleau, Ont.

Yarmouth, N.S., is seeking authority to issue $80,000 for waterworks purposes.

Portage La Prairie ratepayers will be asked to vote $50,000 for waterworks purposes.

On May 15 Owen Sound ratepayers will vote on a by-law to raise $125,000 for waterworks purposes.

The Montreal water commissioners want $28,000 to lay water pipes on some dozen streets in that city.

A sewerage by-law will likely be submitted to the Orillia ratepayers at an early date.

On May 21 at Carman, Man., a by-law will be voted on to issue $25,000 worth of waterworks debentures.

Vernon's waterworks extension is estimated to cost $58,000, A by-law for the construction of this work will be voted upon.

A by-law will be voted on at Wetaskiwin, Alta., to issue $7,000 debentures for the purpose of improving the fire fighting system.

A recommendation has been passed that a by-law be submitted to the Brandon Council authorizing the issue of debentures for the construction of a trunk sewer.

Henault & Heffernan, Montreal, have been awarded the contract for laying of a system of sewers for the town of St. Pierre, to cost $100,000.

City Engineer Ker of Ottawa will prepare plans for the drainage of the western end of Hintonburg. The cost has been roughly estimated at $100,000.

The Hamilton Sewer Commision has decided to construct sewers in the annex on Chase, Emily and Clinton St. at a cost of $16,000; also a sewer on Hunt Street.

A start has been made with the work of constructing Revelstoke's sewerage system. The central section will be pushed, and it is expected that it will be completed by October 15.

Estevan, Sask., ratepayers have approved by-laws to raise $30,000 for a water works system and $10,000 for a trunk sewer, and tenders addressed to L. A. Duncan, secretary-treasurer, will be received until May 19, for construction of the two systems comprising 7,300 feet of water mains, 2,400 feet of tile sewer, also steel water tower, gasoline engines and power pump.

The contract for the excavating and laying of the pipe for the New Liskeard waterworks extension was given to Hill & Clark, their price being some $2,642.12. The iron work called for tenders from Canada Foundry Co., Toronto; Canada Iron Corporation, Montreal; Gartshore-Thompson Co., Hamilton; Beverley Robinson Co., Montreal. The first two named offered the iron pipe at $33.60 per ton, the former being accepted. Four tenders were received on valves, hydrants, etc., Canada Foundry Company being the lowest.

New Companies.

Superior Steel Co., Toronto; capital, $250,000; to manufacture metals and products thereof. Incorporators, R. W. Hart, S. Webb and A. C. Bedford-Jones, Toronto.

Oil and Gas Producers, Hamilton; capital, $1,000,000; to sink and develop oil and gas wells. Incorporators, R. L. McIntyre, J. M. Sinclair and O. G. Carscallen, Hamilton.

The Builders' Supply Co., St. Catharines; capital, $40,000; to carry on all forms of buildings. Incorporators, M. J. Murphy, F. W. Wilson and Nella L. Nelson, St. Catharines.

The Auto Tire Co., Toronto; capital, $40,000; to manufacture and repair rubber tires for bicycles, etc. Incorporators, T. G. Hamilton, W. H. Syms and G. E. McCann, Toronto.

La Raquette Water Works, Rigaud, Que.; capital, $45,000; to construct and operate a system of waterworks. Incorporators, J. H. Redpath, J. J. Riley and F. G. Bush, Montreal.

The Making of Feather Dusters a New Industry

Just Introduced Into Canada—Visitor to the Factory at Toronto Describes the Process of Manufacture—A Market Provided for Turkey Feathers.

The latest industry to invade the manufacturing field in Canada is the making of feather dusters. Strange as it may seem to grocers, hardwaremen, and other merchants who handle these goods, feather dusters until the present have not been made in Canada, if we except a small but unsuccessful effort made some few years ago to start such an industry in a Western Ontario city.

The Canadian wholesale and retail trade therefore, has had to depend on imported lines of feather dusters for their stocks. Naturally, being unable to obtain supplies at home the great bulk of feather dusters entering Canada have come from the United States, where the industry is established for many years.

New Industry Here.

It is but four months since H. W. Nelson & Co., Toronto, manufacturers of brooms and whisks, and dealers in

The First Feather Duster Made in Canada.

woodenware, etc., added to their plant a factory for the making of feather dusters. The beginning was a modest one and the company confined itself to the manufacture of but one grade—the standard—used for household dusting purposes. Now, however, so great has been the success of the original effort that six or seven lines are being made, and the end is not yet.

S. G. Wharin, managing director of the company, showed a representative of this paper over the factory and explained the various processes of manufacture. He said the company was starting in a small way and would follow the lead of demand rather than go before, because the industry was just being built up. However, he was much cheered with the success of the undertaking up to now and was having some difficulty in supplying the demand for the lines at present made. As demand took concrete form for other wantable lines he would add them from time to time.

Wing and Tail Feathers.

Feather dusters, as everyone knows, are made from the wing and tail feathers of turkeys and they are cleaned, sorted and softened before being made up. Perhaps a description of the process of manufacture step by step will prove interesting and give some idea of how these useful household articles are made.

In the United States the saving and gathering of feathers has proved profitable to the farmer who plucks his own fowl for the market. He sells these feathers with his fowl to the dealers in his section, and through these dealers they find their way to the factories. They arrive, too, in fair shape, for the feathers are tied in bundles of 100 and placed in large sacks containing about 250 pounds. This allows of careful handling and also saves something in the way of freight tolls. In Canada, being a new industry, the feathers do not arrive at the factory in such fair shape; nor, in fact, does the same careful method of marketing, picking and packing obtain, the feathers reaching the factory in bulk lots of no particular size. However, this difficulty will be overcome before another year goes by, when the raisers of fowl know that turkey feathers are a merchantable commodity and have a monetary value.

The Cleaning Process.

The feathers are placed in a huge rectangular box, the bottom and top of which are covered with screens. This box will contain probably 300 pounds of feathers. By means of an electric motor the box is revolved for some length of time and the dust and grit falling through the screens is entirely separated from the feathers. The feathers next go through two sorting processes, a number of nimble-fingered girls who soon become experts doing this work. The feathers are divided into black, brown and fancy feathers, and these three groups are sub-divided according to sizes, which run from 8 to 14 inches. The brown feathers are used in the standard household size, which is the cheapest and most called for line, the black and spotted fancy feathers being used in the higher grades.

The next stage takes the feathers through a machine which spilts the quill, a sharp knife cutting off the rough underport of the stem, leaving the vane or beard attached to part of the shell of the quill. In this splitting or trimming occurs the only noticeable waste. With the quill unavoidably goes some part of the feather, and as yet no use has been found for this waste. In some of the U. S. factories it is understood that this quill is used in the making of ammonia, but the manufacture and supply of this latter commodity is greater than the demand at present in Canada.

Putting on the Handle.

After trimming they are run between two metal cylinders of a rolling machine which softens the stem and makes them pliable. They now go to another set of sorters who count out twenty feathers, place them in a clothes-pin and put them in baskets containing similar sized feathers. This latter sorting makes it convenient for the men assembling and binding the dusters. Every standard duster contains 100 feathers, so the assemblers taking five clothes-pins have without any counting on their part the requisite 100 feathers necessary for a duster. Evening and rounding off the ends a circular stub is inserted in the centre, the whole placed on a binding machine, a few twists of which completely and firmly wires the feathers to the stub, A couple of rows of shorter feathers around the lower end of the stub hides the wire and finishes off the brush end of the duster. The remainder of the duster-making process is simple. A paper binding is placed over the feather ends; a leather cuff is next put on and then the handle is inserted by being screwed into the wooden stub. This handle is of black-japanned tan and cherry-colored woods for household dusters, and in the better grades is of imitation ebony and rubberoid. On these latter there is also placed a drawn-steel, nickel-plated ferrule. The leather cuff, which is on all the dusters, is a new idea and the Nelson company use it for displaying the names of the grade, the firm, and the "bull dog" trade mark of the manufacturers.

Many Varieties Made.

As before mentioned, while the factory was started primarily to manufacture the standard household feather duster, of late the making of the higher grade parlor, picture, janitor and carriage dusters are important additions. The factory while yet conducted on a small scale is as complete as any in the United States. It is impossible to say what amount of feathers are available for manufacture in Canada, but for purposes of estimating last year Great Britain imported 916,122 pounds of feathers of all kinds from all parts of the earth, and valued at £981,459. Of these 26,383 pounds, valued at £82,422, were for the purpose of manufacture into dusters and similar goods.

News of the Paint Trade

A USEFUL LESSON.

A good example of the value of display in the selling of paint was recently brought to our notice by a paint manufacturer. While taking a trip in a country district he called upon a merchant who, he knew, handled a couple of lines or so of the firm's products, and asked him how he was doing. The dealer replied that there was very little trade going and that he had only sold a couple of tins. "But," said the manufacturer vainly looking round the store, "where is the stuff. I don't see it anywhere." "Oh," replied the merchant, "it is at the back of the store." This somewhat exasperated the manufacturer as the back happened to be out of line with the rest of the store, but he said: "where is all the good advertising matter that we supplied you with." "Oh," was the reply, "I believe it is all under the counter." This nearly floored the manufacturer, but he rose to the occasion and said: "You have a long counter here with nothing on it. Will you let me have a portion?" The dealer did not object, and so the manufacturer set to work and made a little pyramid of some tins rescued from the back. Behind this pyramid he placed some bright advertising matter, and by the side some little reading notices for the consumer with the announcement: "Take one." Turning to the merchant he said, "let that stay there for a time and inform me if the demand improves. It was not long before he received a letter telling him that the paint was going splendidly, that what the merchant almost looked upon as dead stock was nearly cleared out, and that a larger order would soon be placed. Thus the merchant had a lesson shown him that will not be forgotten. It will influence him not only in his paint department, but in his other lines as well, and make his store a real live proposition.

In selling paints, as in everything else, the merchant must throw his heart into it. He must be convinced that the lines he is carrying are good ones, that he has a large consuming field before him, and that he can hold the consumers when they come with his selling points. He must realize that to sell his paints he must thrust them before the notice of the community. Few people think of paint unless it is brought under their notice, and if a merchant imagines that his tins are to bring in customers when hidden in the back part of the store, and the advertising stuff of the manufacturer to throw its brightness through the sides of the counter, he is, to put it lightly, making a big mistake. It should be apparent to any dealer that a manufacturer would not spend his money on something that he did not think was useful, and if the manufacturer with all his experience knows the value of display it must be surely worth the while of the merchant to follow suit. The brighter the store the more attractive it is to the consumer, and the merchant nowadays has little difficulty in achieving this with the help of the artistic advertising matter that he can get from the manufacturer.

Don't Get "Notions" About

Floorglaze

Please don't get the notion that FLOORGLAZE is good only for floors. FLOORGLAZE is a solid-color floor-enamel with all the elasticity of good paint, and more; and that has a dozen uses about the house, indoors and out. It's so advertised for you that it can't help selling once; and its own quality sells it again to the same people—and their neighbors. FLOORGLAZE is the kind of goods that strike you as about right for your store.

QUALITY COUNTS

"M.R.M." HORSE SHOES are superior to other makes of Horse Shoes, because they meet the requirements of the farriers in the fullest sense.

Material is right, and patterns are correct and as approved by leading farriers.

Punching, creasing and general finish of "M.R.M." Shoes are such as to cause the farrier less work in fitting to the horses' feet than is required with most makes.

The Montreal Rolling Mills Co.

Paint and Oil Markets

MONTREAL.

May 7.—Although the climatic conditions have not been exactly favorable to paint, oil and varnish generally, trade is moving along briskly. The cold weather probably has affected the sale of ready-mixed paints more than any other line, as householders and property owners are holding off the buying of paint. Oils and colors are going better as painters are busy on inside decorating work if not on the outside. Locally, dealers report a quieter call owing to the cold and the yearly moving times. More seasonable weather will, however, at once revive the demand. The markets are firm with the exception of turpentine. No change is reported.

TURPENTINE—Stocks in the South are reported to be abundant, and there is a slight tendency for quotations for car lots to sag locally. For ordinary requirements, the trade being brisk, no change is noted. We continue to quote 55c for single barrels, net 30 days.

LINSEED OIL—There is a good demand although users are not buying beyond their actual requirements. With the opening of navigation orders which were booked earlier are being shipped promptly. We continue to quote: Raw, 1 to 4 barrels, 59c; 5 to 9 barrels, 58c; boiled, 1 to 4 barrels, 62c; 5 to 9 barrels, 61c; strictly net, 30 days.

GROUND WHITE LEAD—Shipments are very encouraging, but stocks are accumulating, and the month will have to show up well regarding the call for white lead to keep supplies down. The market is unchanged, and we quote: Strictly pure, $5.50 to $6, according to brand, and No. 1, $5 to $5.50 f.o.b. Montreal.

RED LEAD—The market is brisk. Orders which have been accumulating for some days will be taken from stocks on the wharf as ocean shipments are now due. There is no change in quotations. Genuine red lead in casks, $4.50; in 100-lb. kegs, $5; in less quantities, at $6 per 100 lbs.; No. 1 red lead, casks, $4; kegs, $4.50, and smaller quantities, $5.50.

PARIS GREEN — The better spirit noted in Paris green last week continues. Most general orders contain a good percentage of Paris green, and the total bulk moving has greatly improved. There is no change in prices and we quote: 1-lb. cartons, 18c; 1-lb. tins, 19c; 50-lb. drums, 17c.

WHITE ZINC—Owing to the cold weather the call for white zinc has been affected, but fair shipments have been made. There is no change in the market, and we quote: Dry V.M. Red Seal, 7½c; Red Seal, 7c; French V.M., 6c; Lehigh, 5c; white zinc, ground in oil, pure, 8½c; No. 1, 7c; No. 2, 5¾c.

PUTTY—With the opening of navigation and the running of the various river steamers dealers are better buyers of putty, and good bulk is now moving. We continue to quote: Standard putty, 880 lbs., in casks, $1.65; in 100-lb. drums $1.90; bladder putty, 400 lbs., in barrels, $1.90; in 100-lb. cases, $2.05; in 25-lb. drums, $2; 25-lb. tins, $2.05; 12½-lb. tins, $2.25 f.o.b. Montreal.

TORONTO.

May 7.—This has been a very good week for all paint lines, some houses reporting the best week's business so far this year. Paints are moving, too; the bookings earlier in the season are now being shipped, and present orders call for immediate delivery.

The outlook favors a good year in paints, as general business shows signs of continued improvement and the building permits issued in all sections are in many cases above past records. Factories, too, are in the majority of cases, again running full time and are calling for something like their old-time quota of paint supplies.

With the exception of turpentine, which has declined a cent since last week, all paint lines are steady and firm, and there is not the tendency to cut prices that there was some few months ago. This has made for a feeling of general satisfaction with the passing volume of business and a greater faith in the future of the trade.

TURPENTINE—Down a cent since last issue, "turps" are now quoted at 57c for single barrels. Several houses, however, which did not quote the advance of a fortnight ago are still offering turpentine at 55c. The South has firmed up and dropped away again, but the tendency seems for firmer prices. The receipts at Savannah for April are just one-half those of a year ago—11,000 barrels against 22,000—and the same condition prevails in regard to rosins. New York had a slight scare early in the week on account of low supplies, but no effect was felt in Toronto. Buying has been very light.

LINSEED OIL—Raw, 59c; and boiled 62c per gallon, barrel lots, are yet the local market quotations, and there does not appear to be any prospect of an immediate change. The world's flaxseed markets are yet surprisingly bare of supplies, so there need be no counting on lower prices. Crushers are not carrying much seed in their tanks, nor are there any considerable stocks in the elevators. The demand is good for oil just now.

WHITE LEAD — Another bumper movement is on in lead lines and shipments are taking pretty large quantities. Prices are unchanged. No. 1 is $5.40 to $5.65; pure white from $5.80 to $6, and a superior line is offered at $6.25. Genuine red lead is quoted at $4.50 for casks and $4.75 to $4.80 in 100 lbs.

PARIS GREEN—Spring ordering has about ceased, although some fair repeat orders at 17¾c per pound for 25-lb. drums, which is considered a low figure, have been received. Shipments of orders booked earlier in the year are going out freely this week.

STAINS AND VARNISHES—With these might be included wall finishes, glue, brushes and many other seasonable lines. They are active again, and with ready mixed paints are being

A Paint that is PURE

That's what you have the agency for when you handle

"English" Liquid Paint

A paint with the formula on the can, showing the white base to consist of:

70% Pure White Lead
30% Pure White Zinc

mixed ready for use with pure Linseed Oil, Turpentine and Dryer.

A paint in which the only white lead used is

BRANDRAM'S B.B. GENUINE

NEW YORK CHICAGO CLEVELAND

A Reminder.

This is to remind you, Mr. Paint Dealer, that if you haven't written for our money-making plan that you are wasting valuable time. It isn't every brand of paint that has back of it a 100 per cent PURE GUARANTEE. Every gallon of

Martin-Senour 100 per cent Pure Paint

that you sell is another stone laid in the foundation of a permanent paint trade. Purchasers who buy it to try, buy it again the next time they want paint. It doesn't take long for them to find out that for durability, service, richness of appearance, brilliancy and wear it's the most economical and satisfactory article they can buy.

It will pay you to get acquainted with us and let us make your trade acquainted with Martin-Senour 100 per cent Pure Paint. Write today.

The MARTIN-SENOUR CO., Ltd.,

Pioneers of Pure Paint

MONTREAL — **The Winnipeg Paint & Glass Co., Ltd., Winnipeg**

CHICAGO — **The Maritime Paint & Varnish Co., Ltd., Halifax, N. S.**

bought up by householders more freely than was anticipated.

GLASS AND PUTTY—The new glass has not yet arrived, but early importations are expected shortly. Business is fair for both glass and putty at unchanged quotations. Putty is in slightly better demand than glass.

PETROLEUM—Prime white is 13½c, water white, 15½c, and Pratt's astral, 17½c. Business is fair.

PAINT AND HUMAN NATURE.

Did it ever occur to you that there is an intimate connection between paint and the peculiarities of the people? The paint salesman who would make the largest success should study human nature carefully. This he will have many an opportunity to do in his daily contact with customers. He cannot have been long in the selling game without learning the weak points and the strong points of buyers. He must have noticed that there is a powerful leverage in flattery in some instances, in bluff or indifference or an appeal to honesty in other instances, and if he is wise he will work those influences judiciously. He will flatter the customer who knows it all; argue with the customer who is skeptical as to the merits of the goods; emphasize the purity of his wares to a buyer who dotes on honesty; make much of their value to one who is economical; dwell on the beauty of the work to one who is aesthetic, etc. The salesman who can do this will be literally all things to all men, but in so doing he will come pretty near pleasing them all and getting their business.

THE SELLING OF VARNISH.

In these days of varnish stains for many purposes the retailer needs to "know the goods" intimately. He must be able to inform the buyer just what the varnish will do and what it won't do, or there may be trouble. An exchange has well said that varnish purchasers may be divided into two great classes: the Trade and the Public. As a rule, the Trade (painter, etc.) know what they want and how to apply the varnish when they have bought it. Equally, as a rule, the Public knows nothing about varnish and in most cases will consult the storekeeper or his salesman before making a purchase. In some cases, however, they won't do so, and that fact often leads to trouble. It is a pretty safe rule never to sell the general public varnish until you have ascertained exactly for what purpose they intend using it. A few judicious questions will always secure this information without giving offense, and will, at the same time, show you whether the customer knows anything about the application of the varnish he or she is buying. If you judge that they don't, give them all the points you can. Be particular to find out whether they are going to use it on old work or new, what kind of wood it is to be applied over, and remind them that old paint or varnish should be thoroughly cleaned before they apply their new varnish, etc. In fact, post them as thoroughly as you can.

With the painter, however, to whom the varnish is an everyday experience, the proposition is an entirely different one, although even here complaints are liable to be made. Painters are sometimes careless, and at other times are driven by necessity to use varnish under adverse conditions.

EDUCATING THE CLERK.

Too much cannot be said on the subject of educating the clerk to the point where he will be able to combat every argument a customer may advance, says an exchange.

Some time ago the writer entered a paint store with a problem on his mind. An old pine floor in a building about ready for the house wreckers was giving forth more than its quota of dust and dirt. It was in a terrible condition; but as the floor was going to be used but a short time, it was desirable to put but little expense upon it to make it usable.

The young man who heard the story made one single suggestion, which was adopted. The idea in the first place was to putty up the cracks and cover with three or four coats of paint, but when the proposition was put up to Mr. Clerk, he advised simply using oil, the entire cost of which amounted to about 75 cents. The oil was used, the dust was settled and the floor is quite usable.

MANUFACTURERS' HELP.

I do not believe, writes a prominent man, that it is any exaggeration to say that the educational work done among property owners and paint users generally by paint manufacturers is responsible for 25 per cent. of the painting done in the country. By this I mean that if the pressure which the paint makers continually exert on the public was withdrawn, the sales of paint generally would fall off just 25 per cent. This educational work takes the form of magazine and newspaper advertisements, personal letters and literature of all descriptions showing convincingly and in plain language how the life of lumber is prolonged by the use of paint; how the real estate value is enhanced, and the increased pleasure of beholding and living in buildings which are kept well painted. This sort of work unremittingly kept up, creates a tremendous amount of painting which would never be undertaken otherwise.

PAINT NOTES.

A license has been granted by the Ontario Provincial Secretary to Canadian Turpentine, Ltd., authorizing them to transact the business granted by their letters patent of incorporation. The company have appointed W. H. Allison, Toronto, to be their attorney.

The Winnipeg Paint and Glass Co. will extend their Calgary warehouse.

Georgia was the second state in the production of naval stores articles last year, with a record of more than 10,000,000 gallons of turpentine and 1,000,000 barrels of rosin.

Answers to Correspondents

ANXIOUS ONE:

"Please say what is 'Cumoff?'"

ANSWER:

"CUMOFF"

is the

Paint and Varnish Remover

for use on

Wood or Metal

Removes Old Paint, Varnish, Shellac or Enamel, leaving the surface ready for re-finishing.

Will not raise the grain of the wood.

HAS NO DISAGREEABLE ODOR.

Will not injure the hands. Will not destroy the brush.

Will undoubtedly increase your trade, as "Cumoff" is an article long wanted by every painter.

Specially useful on Mouldings, Carving and the re-finishing of old frames or Cabinet Work.

The White Lead Association of Canada

This Association was formed in 1889, for the purpose of removing abuses in the sale of White Lead, and was successful in securing legislation which has contributed to securing that White Lead, marked "Pure" or "Genuine" must be absolutely free from adulteration. The Association adopted the following label, which is used by its members on all pure White Lead issued by them.

This label, the Association believes, is being imitated in several quarters, and the copy label is here shown in order that dealers may be careful to avoid imitations and secure White Lead bearing the guarantee of the Association.

This label is registered at Ottawa and action will be taken against all parties using any imitation thereof.

All enquiries will be answered by the Secretary, JOHN HYDE, Chartered Accountant, 304 Merchants Bank Chambers, Montreal

We Have Doubled Your Market For Roofing

Where previously you have sold one roll of ready roofing you ought now to be easily able to sell two rolls Ruberoid.

For the attractive new Ruberoid IN COLORS has doubled the market for roofing.

Ruberoid in red, green or brown is suitable for the finest home, the costliest public building.

With all the durability of uncolored Ruberoid, these new shades meet the demand which no other ready roofing has ever been able to fill.

And in Ruberoid, whether in colors or plain, you are sure of selling the best there is in roofings.

There are now more than three-hundred substitutes for genuine Ruberoid, but Ruberoid is the original and Ruberoid alone has withstood the test of seventeen unbroken years of actual use.

The first roofs of Ruberoid, laid in 1892, still look good for many more years of wear—still weather-tight.

RUBEROID

(Trade Mark Registered)

Ruberoid is sun-proof, rain-proof, snow-proof, cold-proof and weather-proof. It resists acids, gases and fumes.

It is so nearly fire-proof that if you drop live coals on a roof of Ruberoid, neither the Ruberoid nor the timbers beneath will take fire.

The secret of these unique properties lies in the Ruberoid gum which we use. Ruberoid gum is our exclusive product. No other maker can use it.

That is why, of three hundred substitutes, no one of them can possibly be so durable, so good, as Ruberoid.

Our international advertising campaign is now in full swing. We are sure to have inquiries for Ruberoid from those who live near you. Be prepared to fill the demand which we create. A postal card will bring our dealer's plan, and will explain how we willingly stand the expense to make sales for you. Address Dealer's Department 92A.

82 McGill Street MONTREAL

F. J. COX, Winnipeg, is our Sole Agent for the Northwest Provinces

CURRENT MARKET QUOTATIONS.

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate.

Amatite ROOFING

TRADE B MARK

Most roofings are made of only *one layer*, but Amatite is made in *five layers*. The bottom layer is wool felt, the next is real Coal Tar Pitch, the third is wool felt, the fourth is pitch again, into which is embedded the fifth layer, namely, the *mineral surface*.

If the weather should, in the course of years, wear away the mineral surface and dispose of the layer of Pitch (which is the most waterproof substance on earth,) it would still have to penetrate a layer of felt and another layer of composition *and* another layer of felt before the roof would leak.

It is easy to see why amatite lasts so long when you realize how it is made.

That mineral surface *requires no painting* or coating whatever, and will take the brunt of the weather without renewal or attention or care.

Send for a sample of Amatite. It's free.

"CHAMPION OF THE YEAR"

[New York Herald, July 16-'08]

This extract voices the opinions of the English press after the performances of the Ross Rifles at Bisley meet last year. Canadian rifle shots at the D. R. A. last year were equally successful, when, though many who used Ross Rifles were comparatively green men, 60 per cent. won places on the 1909 Bisley team.

No keen Rifle Shot can afford to do without one this season.
Write for catalogue and prices of our

ROSS RIFLE "MARK III"

The Ross Sporting Rifle, retailing at from $25.00 upwards, is worthy of the praise which those who have used it freely accord to it.

ROSS RIFLE CO., - - Quebec, P.Q.

For over forty years

We have been Canada's foremost manufacturers of

Wood Screws

Wire Nails, Machine Screws; Iron, Brass and Copper Rivets and Burrs; Staples, Corrugated Fasteners; Stove, Sink, Tire and Sleigh Shoe Bolts; Bright Wire Goods; Wire—Bright, Coppered, Tinned, in coils and cut to lengths, etc.

Throughout our entire career we have carefully maintained a high standard of quality, and have kept right up to the march of progress in improved methods of manufacture. All jobbers handle Canada Screw Company Goods.

Taylor-Forbes Lawn Mowers

They are easy to sell, give genuine satisfaction, and will stand more wear and tear, rough usage, and more service tests than any other make. All machines are self sharpening. The cross bars, girts and shafts are double the weight and strength of foreign mowers and all cylinder wings are of malleable iron, and not of cast iron, as in imported machines. All plates for cylinders and knife backs are double the thickness.

The Canadian Fairbanks Company, Limited

Montreal Toronto St. John Calgary Vancouver Winnipeg

YOU WILL FIND THIS SINGLE BARREL SHOT GUN

a rapid seller and and a great profit maker. It is from the Hopkins & Allen arms factory and like all their product is high in quality.

This is a three-piece single gun and it has found much favor among exacting sportsmen in every part of the country. The rebounding safety hammer makes the gun very desirable for use in the bush and renders it perfectly safe for the use of boys. It has a detachable snap fore-end and can be taken down almost instantly so that it will pack in a very small space.

The barrel is the best decarbonized steel. No better steel barrels can be ground on any other guns of equal value. It is choke bored for long range shooting and is adapted for the use of black or smokeless powders. The stock and fore-end are of walnut, oiled and polished. The stock is shaped with care and has a comfortable full pistol grip. The butt is finished off with a hard rubber butt plate.

We keep this gun in 12, 16 and 20 gauge, both plain extractor and automatic ejector. You can sell this gun at $7.00 and $7.50 each and make a handsome profit.

This gun and many others are shown in our 1909 Sporting and Fall Goods Catalogue just fresh from the press. We want every hardware dealer to have a copy. Let us know if your name is not on our mailing list.

Long Distance Phone No. 87

Sold throughout the Dominion by all Wholesale and Retail Hardware Merchants.

Every Little Bit Helps!!

Mr. Hardware Man,—Don't you often find that the "little sales" of the day are a big feature in the day's receipts and are often the lever to larger sales?

The Kaiser Wax Pad and Iron Cleaner

is a "little thing"—retails at 10 cent—but it is a household necessity, something entirely new on the market, a quick and big seller, with a good profit.

Every housekeeper dreads ironing day, especially so when she has a lot of shirt-waists, men's shirts, collars, cuffs, etc. to iron, she always wants to obtain a high-grade finish, equal to first-class laundries. She of course asks the dealer for advice—in return he offers her the common wax—She knows it is impossible to do good work with the common wax—So she walks away—one customer lost.

Now where she can procure an article of this merit—that reduces ironing time by half—reduces labor to a minimum—adds to the finish of clothes—and makes ironing a day of pleasure—THERE SHE IS SURE TO DO HER BUYING—AND LEAVE HER ORDER FOR OTHER THINGS.

A post card to any of our Canadian agents or direct will bring a sample of this great little business getter.

Crescent Brand

Registered

DO YOU GET WHAT YOU ORDER

or do you take whatever they like to send you? An independent merchant surely won't stand for substitution.

WE RECEIVE EVERY DAY LETTERS SOMETHING LIKE THIS:

"Will you please ship us the following Strap and Tee Hinges and Butts. We have told the jobbing house we deal with three or four times to send us goods of your make, but they send on inferior goods we don't want."
One man was so enraged that he said he would not buy another dollar's worth of goods of any kind from that firm.
We think you are taking the right stand and as you have to pay for the goods, you are correct in demanding Hinges that are properly made, and of the best quality.
Our Hinges and Butts suit the people who have to use them, and why should you lose time and money trying to palm off something inferior? Ask for Crescent Brand Butts and Hinges every time and if you are not supplied with them, **MAIL US YOUR ORDER.** They will not cost you any more.

Canada Steel Goods Company, Limited

TURKEY
Feather Dusters

MADE IN CANADA

We are producing the finest dusters ever manufactured. Look for the "bull dog" trade mark.

The feathers are the finest obtainable, while the handles come in a variety of styles.

HERE IS A SPLENDID OPENING FOR YOU, MR. HARDWAREMAN. THE DEMAND FOR FEATHER DUSTERS IS DAILY INCREASING

Buy from the Makers

H. W. NELSON & CO., Limited : : Toronto, Canada

It pays you to Demonstrate

You can make $1.50 profit on each AutoStrop Safety Razor you sell.

No other razor pays you a better profit than this, and no other sells so readily in the hands of a capable demonstrator.

Show your customer how the AutoStrop Safety Razor keeps itself constantly sharp, how it removes all his shaving troubles, and he will gladly give you $5.00 for it.

But—bear this in mind: It is no use merely saying to him "The AutoStrop Safety Razor is a good razor. I can recommend it"—or "The AutoStrop is the best on the market."

To interest and convince him, you must demonstrate to him:

1. How it sharpens itself.
2. How it can be cleaned without taking anything apart.
3. How it pays for itself in a year by doing away with the buying of new blades, necessary with all non-stropping razors.

PRICES:

Retail - - -	**$5.00**
Wholesale	
3 DOZ. LOTS - -	**3.50**
SMALLER QUANTITIES - -	**3.75**

You have opportunities every day of doing this, and a week or two will prove to you that it pays you to demonstrate.

Address your order to your Jobber or to

Permanent Patrons are secured

BY SELLING THE

DILLON HINGE STAY FENCE

There are no weak spots in this fence. When it is up, it stays up. It will not sag, droop or break. It will stand a greater strain than any other fence, because it is built on the hinge stay principle. The wires give at the hinges only, and when the weight is removed, the laterals spring back into position. This is a feature possessed by no other fence.

Martin's Store Ladder

Low Down High

For all merchants that carry merchandise on shelves enquire of E. R. BASE, Toronto

A Few Testimonials

Rockford, Ill., May 27, 1908.

Mr. S. B. Martin, Dalton, Ohio,

Dear Sir,—Ladder is very satisfactory—the new track holds up and were we fitting a "string of stores" we should place your ladder in each one of them.

Very truly,
Hunter Hardware Co.

Toronto, Ont., Sept. 28, 1908.

Mr. S. B. Martin, Dalton, O.

Dear Sir,—We are well pleased with the "Low-Down-High" Ladder you installed in our warehouse some weeks ago. We find same works very easily and smoothly and makes the work of filling orders from the shelves a very easy matter compared with the old style of ladders. We will be glad to receive quotations for Ladders for other parts of the Warehouse.

Yours truly, T. Woodbridge & Co.

The Celebrated "Dreadnought" Milling File

A substitute for Files which is revolutionizing File Work. A great cost reducer; a simple and radical improvement on the ordinary style of hand files; it cuts from 300 to 500 p.c. faster than an ordinary file; it is self cleaning; it can be sharpened four times; it cuts equally well all metals, also wood and marble; its cutting edge outlasts from five to ten ordinary files; although practically a rasp, it leaves the surface smooth N.B.—The Dreadnought is adaptable to every job in which ordinary files can be used, expediting the work and doing it better, and for numerous jobs usually milled in machines. Gold Medal, Franco-British Exhibition, 1908. Gold Medal, International Exhibition, Madrid, 1907

HAMILTON (22 Calibre) RIFLES

Money Makers

Models 27 and 027

Prices $2.00 and $2.25

We Specialize on Boys' Rifles

We build our rifles under patents exclusively our own and confidently claim to make the **best rifle ever built for the money.**

MODEL No. 27 is an efficient sporting rifle, with hammer action, of few parts and exceedingly simple, using 22 calibre short or long cartridges. The barrel is bronze, rifled and steel jacketed, finished in blue black gun finish. Breaks down for loading and ejecting shells. Flat stock and forearm of gun of gum wood. A beautiful model, symmetrical and well balanced. Barrel is 16 inches long, length of rifle over all, 30 inches. **Price $2.00.**

MODEL No. 027 is exactly like No. 27, except the stock and forearm, which are of genuine walnut, turned and beautifully finished. **Price $2.25.**

Other models are Nos. 15 at $2.00, 19 at $2.50 and 23 at $3.50, each a winner in its class.

Our continuous advertising in the boys' papers will bring the business to you, as every boy will want one and you should have a stock on hand. **Write for catalogue and net trade prices.**

"CROWN" CORNICE WORKS : 250-260 Slater St., Ottawa, Canada

CONGO — The only Roofing Guaranteed by a SURETY BOND

IT PROTECTS YOU ABSOLUTELY

A GUARANTEE WITHOUT A LOOPHOLE

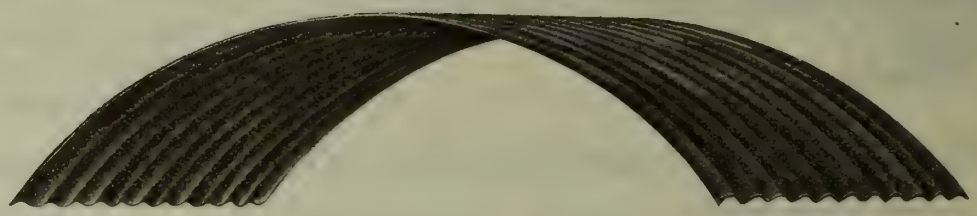
When we used to say that Congo 3-ply would last ten years people laughed and replied that "Every body claimed that." When we offered to *guarantee* such service they said "Guarantees mean nothing—the buyer can never enforce them."

So we went to the National Surety Co. and paid them a large cash premium to issue a Surety Bond *with every roll* of Congo Roofing.

These bonds give our customers a real, substantial guarantee *as good as a government bond.*

If the customer's own lawyer drew the guarantee he could not devise an instrument that would give any better protection.

It is because Congo is so tough, perfect and durable that the National Surety Company is willing to stand back of it. They know that we use the *best materials* and the *best methods* and that we watch and inspect every roll. Then we wrap it for domestic use just as carefully as if it were destined for Madagascar or Thibet, and you get perfect, undamaged rolls, every inch of which you can use.



The man that buys Congo gets the most value for his money and *takes no chances.*

We will send you a copy of that guarantee on request—also a sample of Congo Roofing free.

Genasco

Ready Roofing

(Mineral and smooth surface).

Do you know what we're doing to help progressive dealers sell Genasco?

We're spending thousands of dollars in national publicity to tell people all about Genasco and keep it continually before their notice in the leading magazines and agricultural publications of the country.

We supply dealers with vigorous ready-made advertisements for local use to follow up our general campaign and bring the customers right into the stores. See how easy this makes selling for you.

Can you afford not to handle a roofing with such advantages?

Get in line and get your share of this paying business. Write to-day for samples and full information.

Genasco is backed by a thirty-two-million-dollar guarantee

The "NORKA" Two-Grooved High-Speed Twist Drill

The Drill Without a Tang

This is the latest thing in the High Speed Twist Drill line, and the Drill that will cut down your cost of drilling.

It has great strength, because it is twisted while hot, therefore, the grain of the steel is not disturbed.

There are no tang troubles because a piece of the stock is left untwisted, forming the shank, and the jaws of the Chuck fit perfectly into the grooves of the shank, not only holding the Drill, but also centering it.

It will pay you to write for our Catalogue No. 72, which shows our complete line of High Speed Tools.

HIGH CLASS COLOR WORK; Commercial Stationery, Posters. The Hough Lithographing Co. Limited, Office—No. 3 Jarvis St., Toronto, Telephone, Main 1576. Art, Good Workmanship; Business Methods.

IF YOU are looking for a side line to add to your business there is none better than COLUMBIA GRAPHOPHONES. Double Disc Records (which means two records for a single price) and Indestructible Records (that will not break or wear out no matter how much you abuse them). The Columbia Phonograph Company is the only firm that manufactures both Disc and Cylinder Machines and Records, therefore, a Columbia dealer has the advantage over all others, as he can furnish his customers with what they want, while his competitor has to sell them what he has or lose the sale, which he generally does where there is a Columbia dealer. Are Columbia goods sold in your town? If not, why not? Do you want the exclusive agency? (remember exclusive). You had better write to-day or someone else in your town will read this advertisement and beat you to it. A postal will bring catalogues and full information free. Write to-day. Do it now. Toronto Phonograph Company, Limited, Exclusive Columbia Jobbers, 40 Melinda St., Toronto, Canada.

NOTICE—Users of Pitner Gasoline Lamps are warned against being induced to purchase parts of other makes of lamps to be used on the Pitner. The most vital part of any lamp is its generator, and the Pitner generator has been granted a patent in Canada, the United States and other countries, on the principle of its improved method of generating gasoline vapour. Supplies and parts for the Pitner lamps can be received by return mail by applying to our representatives or direct to THE PITNER LIGHTING CO., Limited. 36-38 Lombard St., Toronto, Ontario.

NATIONAL AID—An aid to every retail merchant in the world. Saves money, time, work and worry. The National Cash Register Co., F. E. Mutton, Canadian Manager, cor. Yonge St. and Wilton Ave., Toronto.

The **Fire Box** is large and fitted with our special **Combination Crate** for burning either Coal or Wood, and no special wood linings are supplied.

The **Arctic Jewel** can be supplied either with Cabinet Base or with Legs, with Reservoir or without, with or without High Shelf or High Closet.

The body of the range is made of polished steel and presents a very nice appearance.

Every variety of COOKING STOVES and RANGES, HEATING STOVES and WARM AIR FURNACES are manufactured by

The Burrow, Stewart & Milne Co.,
HAMILTON, ONT. **Limited**

35,000 Kelsey Warm Air Generators Sold

The Kelsey Warm Air Generator

We are not giving these figures showing the number of Kelseys sold since 1889 (when three heaters were sold) with any other motive than to impress you with the fact, that, although Kelseys cost more to produce than other heaters, they have made good because of sheer merit and good results accomplished.

IN COMPETITION with cheap furnaces and good furnaces, and steam and hot water heaters, the Kelsey has steadily forged ahead ; the sales have constantly increased, and to-day more good dealers are urging Kelsey sales than ever before.

Kelsey Heating is for Homes of Any Size, and for Churches and Schools, and there's no heater or system of heating for these purposes that is better at any price

ANY DEALER who will explain the many advantages of the Kelsey will have little difficulty in selling to those people who consider comfort, health and efficiency above the matter of a low first cost.

The Experience and People Back of Sunshine Furnace

Three Score Years of Application.

Sunshine Furnace is the triumph of sixty-one years' experience—a growth from a small tinshop to 16½ acres of floor space.

From a half dozen artisans to fifteen hundred.

From an annual wage sheet of $4,000 to one of $670,000.

From a capital of Energy to one of $3,000,000.

From obscurity to recognition as Largest Makers of Furnaces in the British Empire.

When Sunshine Furnace was placed on the market it was the first furnace to be wholly and solely designed by a Canadian Company.

So good was Sunshine Furnace in the eyes of an American Furnace Company that they purchased the rights for the United States.

We employ a consulting staff of furnace experts, who are continually experimenting with new ideas in order that Sunshine Furnace shall not have to travel on its past reputation for goodness.

We buy materials in such large quantities that its quality is guaranteed to us. We have our own testing rooms, so that supervision of construction is exercised down to the finest detail.

Magnitude of Plant.

Through our great shipping facilities at head office, and great warehousing facilities in leading centres of the Dominion, we are enabled to supply your dealer on shortest notice with the furnace you require, and through him to give you our practical advice and counsel free of charge.

And we pay out Fifteen Thousand Dollars per week that we may be able to obtain the services of men who can produce a perfect working furnace.

And in our head office factories alone we occupy more than two blocks of London's soil that we may have the necessary space and facilities to manufacture a furnace most securely and most economically.

And the bulk of the men in our employ are infused with the McClary Ideal from boyhood—start in at the bottom of the ladder with us—and thus step by step they realize how we put our very selves into the making of each furnace.

☞Do you wonder that Sunshine Furnace is sold in nine provinces? Do you wonder that our business grows bigger day by day?

Canada Experiencing a Building Boom

Steady Increases Reported From All Parts of the Dominion—Several Cities Show Increases of Over 100 Per Cent.—This Year Likely to Surpass All Previous Records.

As the season advances evidence increases of the vast volume of building projected in Canada during 1909. The late spring and rainy weather in the first part of May has delayed much work and held back sales of many classes of goods, but notwithstanding this architects and contractors are working overtime on plans for new buildings and civic officials are issuing permits amounting to figures far ahead of 1908 and in many cases surpassing the big totals of 1906 and 1907. As building authorities have said, it seems no longer a question as to whether Canada will surpass all previous records, but more of a matter of speculation as to how great the gain will actually be on the year's work.

Complete returns for the first four months of 1909 are not yet obtainable as the building departments in many places are considerably behind in their work, but those sending figures show that April has been a big month and if the pace set is kept up hardware manufacturers and merchants will require large stocks of the supplies needed to finish the buildings to be constructed this season.

Toronto's Building Boom.

Toronto's record for new buildings in 1908 was $11,795,436, the first four months having a total of $2,740,858. Against this the figures for the four months up to May 1, 1909, show a total of $4,940,298, an increase of $2,200,000 or almost 100 per cent. At this rate the permits for 1909 may reach the remarkable figure of $20,000 000 if the pace is kept up. In March Montreal had also shown an increase of 90 per cent. over last year with permits for $376,275, while Winnipeg, with $851,700 in March, showed an increase over the same month in 1908 of 646 per cent. Halifax in March had an increase of 273 per cent., Fort William, 269 per cent.; Edmonton, 232 per cent., and Calgary 125 per cent.

Ontario cities show great activity with estimates for 1909 amounting to $2,000,000 in Ottawa, where the greatest building boom in the city's history seems to be on, $1,500,000 in Hamilton, $1,000 000 in London, $300,000 in Kingston, $250,000 at Galt, $100,000 at Chatham and so on in scores of other towns and cities.

Winnipeg and the West.

Winnipeg's building permits have already passed the $2,000,000 mark and, including the new million dollar union depot, it is estimated that the end of 1909 will find the year's total very close to $10.000,000. Included in this will be apartment houses costing $200,000 and $100,000; twelve-storey office building, school, costing $80,000; bank $250,000 and many other large structures. Edmonton will have about $2,000,000 of public and other buildings erected this year, the bulk of this work being on the new Parliament buildings. Saskatoon is to have $500,000 spent on University buildings and as much more on other structures. Calgary too, is forging to the front with a large number of wholesale houses and factories. Lethbridge issued to the beginning of April permits valued at $195,485. Kenora will witness building operations for the season aggregating $175,000. Among the new buildings will be a tourist hotel, $75,000; court house, $40,000; gaol, $10,000; Oddfellows' block, $15,000. The Lake of the Woods Yacht Club will erect a club house, and a summer hotel at Keewatin Beach will cost $30,000. Minnedosa will have new buildings aggregating $100,000. This includes a new court house at $40,000, a public school at $20,000, several business structures and at least ten new residences. Macleod will see at least $500,000 spent on buildings during the summer. The Bank of Commerce is putting up a block to cost $75,000. Brandon is to have this year a new court house at a cost of $100,000. The new Methodist church will cost $15,000. Permits have been taken out for other business buildings totalling $60,000 and for residences totalling $50,000. Yorkton is to have this year a new post office at $75,000; an addition to the monastery of the Redemption Fathers, $35,000; a Presbyterian church, $16,000; two brick blocks, $10,000 each, and sixteen new residences. Several other places will also be the scene of building operations of considerable importance. Manitou will see spent in this way $100,000; Portage la Prairie, $50,000; Pincher Creek, $150,000; Maple Creek, $30,000; Carberry, $60,000; Gimli, $25,000; Morris, $20,000; Oak River, $20,000 Gretna, $8,000; Cranbrook, $200,000.

Millions Spent by Railways.

The Western Provinces are also to be favored with enormous sums to be spent on railway development, railway officials having estimated these at $12,000,000 to be outlayed by the Canadian Northern, $10,000,000 by the Grand Trunk Pacific, $6,000,000 by the Canadian Pacific, and a considerable sum by the Great Northern Railway. In addition to this is the estimated number of 200,000 new settlers, 70,000 of whom will come with an average wealth of at least $1,000, making $70,000,000 to be spent by these settlers alone.

British Columbia, too, is again enjoying prosperity with its lumber and mining industries and the many towns in the interior as well as on the coast are all growing rapidly, with numerous buildings being erected. Victoria is keeping up the boom it has been enjoying for a couple of years while in Vancouver, where in 1907 it was claimed that the city would have 100,000 population before the end of 1910, the statement is now made in the local press that the population has already reached that mark. During the next few years it is expected that thousands of suburban homes will be built on the splendid view points overlooking the Fraser River and Gulf of Georgia to the south, and Burrard Inlet and Vancouver to the north.

Following are given reports sent in by some correspondents and readers of Hardware and Metal in scores of places from one end of the country to the other.

Big School at Brantford.

The amount of building permits issued in Brantford up to April 20th is $42,845, exclusive of the Collegiate Institute, which will be erected at a cost of $95,000. The Sanderson-Harold Co. will build a $50,000 factory at Paris.

$250,000 at Galt.

And by the way there will be a lot of building in Galt this year. Already in sight are an addition to Central school, costing $15,000; a new block of stores for Scott & Bennett, plumbers, $10,000; a block of stores (nearly completed) for J. C. Dietrich, $15,000; the building of the Potato Machinery Co., now being finished, $4,000; a $5,000 pattern shop for the Goldie & McCulloch Co.; an addition to the Peter Hay Knife Works, and a number of other new buildings. It is safe to say that $50,000 alone will be spent on stores in Galt this year. And then in the residential line big things are promised. Already more than 20 houses are under way, and a conservative estimate fixes the sum to be spent in house-building in Galt this year at $200,000.

Building Active at St. Thomas.

Up to April 30 the building permits taken out amounted to $49,000. The city assessor reports that likely the month of May will exceed the total for the last three months.

Million Dollars at London.

Judging from the large increase in the number and value of building permits issued during the first four months of the year, it is calculated that before the close of the season permits to the extent of a million dollars will have been issued. Last year the total value of buildings erected was $866,330, including the new hospital buildings and

store, which together accounted for $260,000 of the expenditure. The record for each of the four months is:—January, $24,385; February, $70,800; Macrh, $69,095; April, $177,250; total, $341,520.

That the demand for permits will increase as the season advances will be seen from the fact that for the first four days of the present month permits amounting to $33,075 were issued. The buildings to be erected this year include a number of very fine residences, several factories and warehouses. Another big work which will give employment to a large number of men is the instaling of the Niagara power distributing plant, for which tenders have been asked and which will involve an expenditure of probably $250,000. It will thus be seen that 1909 promises to be a prosperous year for all classes in London.

$100,000 at Chatham.

A summary of building permits actually issued for the first four manths of 1909 indicates that the building outlook for the present year, as compared with 1908, is most encouraging. Up to April 30, 1909, permits aggregating $15,200 had been issued. For the same four months of the previous year the permits issued aggregated $6,270. Thus two and a half times as much building has already taken place this year as took place in the first four months of 1908.

Last year, permits were largely confined to renovations—all of which, over $100 in value, have to be recorded—while this year's permits are for new buildings. Moreover, the fringe of this year's buildings has just barely been touched. Not included in the foregoing are three buildings, any one of which will exceed in value the total amount of permits already issued. One is the addition to the Chatham Wagon Works, just outside the city limits, on which work has been already commenced, and the contract price of which is uncertain. Work is being commenced on the Ursuline College addition, price $27,000; and tenders are being asked by Wilson, Son & Arnold, architects, for the addition to the Chatham Collegiate Institute, to be built during the holidays, and to cost approximately $18,000. In addition, there is a possibility that the building of a sugar factory, capitalized at $600,000, will be commenced some time this year. Leaving this out of consideration, a conservative estimate would place this year's building at $100,000.

Building in the country is even more active than in the city. The biggest item is, of course, the rebuilding of the Sydenham Glass Co.'s factory at Wallaceburg, at a cost approximating $200,000.

Saskatoon Building Trade Active.

Building permits for April amounted to $147,100. They included warehouses for the International Harvester Co., $75,000; Enterprise Hardware Co., $2,000; S. T. Kempthorne, hardware store, $17.000; land titles office, $27,000; F. H. Webb, apartment block, $2,400; residences for N. Benolken, $5,000; C. H. Wentz, $4,000; G. W. Abraham, $2,000; The total figure for the first four months of the year is $180,000. This month is expected to cap that amount. Residences are being built for J. F. Johnson, E. McLaughlin, J. W. Petapiece, A. McDonald, E. W. McGill, A. Ross, H. M. Earle, R. H. Timmins and others. Elford & Cornish, plumbers, are preparing to build a workshop and sample room.

Record Week at Vancouver.

While for one week there was a lapse in the amount of the value of building permits for the preceding seven days to below $100,000, last week made up for it. The last seven-day total is $233,955, for 48 permits. The largest was for $40,000 for a new school at the corner of Clark Drive and Ninth Ave., in a district which has been settled up only during the past year or two. Two permits were for frame apartment houses, one for O. H. Bush, for $38,000, and the other for Thomas Hunter for $15,000. Apartment houses are going up in the best residential districts of the city, with smaller ones even to the outside. The largest dwelling house permit for the week was for William Miller's brick veneer house on Semlin Drive, valued at $10,000.

Making Records at Victoria.

Building permits for April reached the total of $188,000, being very much in excess of the same month of last year. Among the permits issued several were for business blocks, one to be built by Lim Dat for $35,000; one on Broad St. to cost $18,000; B. C. Electric, $8,000; B. C. Land & Investment Co., a fine office block, $22,000. The first four months of 1909 show an increase of $150,000 over the same period last year. Permits for May are showing up well and from indications it will be a record month. Permits to the value of over $70,000 were issued during the first three days, the principal item being the new Central Park school, which is to cost $63,000.

The ratepayers will be asked to sanction the raising of $125,000 for the purpose of purchasing pipe for the extension of the distribution system of the waterworks. The growth of the city has been so rapid and so many new streets have been opened up and the demand for water services so large that all the pipe has been used. The amount of pipe required is: 2,500 feet of 12-in. cast iron, cost, $6,250; 10,000 feet 8-in., cost $20,000; 20,000 feet 6-in., $30,000; 50,000 feet 4-in, to cost $50,000.

Large Works at Halifax.

Building operations promise to be active in Halifax this season. Already there is a large amount of building going on and several contracts have just been, or are about to be awarded. The construction of the Technical College, costing about $159,000 is nearing completion, also the remodelling of the post office building at a similar cost. Work has been commenced on the $30,000 addition to the Convent of the Sacred Heart, the Children's Hospital costing $25,000 and St. Luke's Anglican Cathedral costing $150,000. Tenders are now out for a two storey brick addition to the factory of Moirs, Limited, another for a three storey brick building for Ungar's laundry; a large extension to the Waegwoltic Club at the North West Arm, and a new skating rink on South Street. Besides these a large number of private residences are under construction, or are about to be started, some of them costing as high as $12,000.

Building Boom at St. John.

It would appear from present indications that St. John, N.B., is in for quite a building boom this year though it is difficult to estimate what the total for the year will be.

The value of the buildings for the first four months amounts to $121,100. This shows a big increase over the same period in 1908, the total then being $34,100, showing an increase for 1909 of $87,000. Included in the permits issued in April are, two, for improvements and additions to the Royal Hotel, and one for alterations and improvements to buildings owned by Manchester, Robertson, Allison. These involve an expenditure of over $30,000 for each firm. The automobile garage being built for J. A. Pugsley will cost about $5,000. The new building for the Bank of New Brunswick to be erected in the near future, is the only one of any note projected now.

Two Million at Ottawa.

Present indications predict a large increase in the number of building permits issued this year as compared with 1908 and the value should also show an increase. The estimated outlay for 1908 was $1,794,075 and this year should reach the two million mark. Numerous houses are being erected costing from $2,500 to $5,000. The purchasing demand this season has been for property ranging in price between these two figures. The estimated value of the permits issued during February, March and April this year as compared with the same three months last year shows an increase for this year over last of $188,940, or almost fifty per cent. Apartment houses are to be erected on Elgin Street, by the Elgin St. Syndicate to cost $18,000; another by James Havey on Nepeau St., costing about $14,000; then there is the magnificent structure to be erected on Laurier Avenue, by the Imperial Realty Co., costing in the neighborhood of $300,000; a Montreal company proposes the erection of a handsome $100,000 house at the east end of Wilbrod St. The Sacred Heart Church, of which the corner stone was laid the other day, will cost about $150,000 while on the site of the Brunswick Hotel will be erected a four-storey dry goods building. This building is being erected by F. W. Carling and will be of reinforced concrete and absolutely fire proof. It is also probable that the Separate School Board will spend between $35,000 and $40,000 this year on the erection of two new four-room schools, one to be in Bayswater and the other in Hintonburgh. A permit has been issued to the G.T.Ry for the station annex, estimated to cost $50,000.

Controller James Davidson has also taken out a permit for a row of 19 houses to cost $30,000. The permit for the construction of the new McKay Street Presbyterian Church has also been issued. The church is to be of solid brick and to cost $17,000.

In spite of the trade depression the International Portland Cement Company's shipments for April show an increase of 10,085 barrels over April last year. This year's shipments were the largest for the same months in the history of the company. Up to the present this year shows an increase in shipments of 21,196 barrels over the corresponding period of the best previous years. The orders on hand for immediate shipment are also more than it ever had in its history.

Big Increase at Peterboro.

Building permits during the month of April amounted to $78,121 as compared with $24,910 for the same month last year. The total for year thus far is $87,281 and for the same time in 1908 it was $26,605. With good weather now the city should experience a good run of building activity.

$300,000 at Kingston.

Contractors say that there is more building going on in Kingston this summer than there has been for several years. An estimate of the value of the buildings planned at the present time, will reach about $300,000, considerable of this amount being for the new buildings to be erected at Queen's University.

$1,500,000 at Hamilton.

The prospects never looked brighter for a big year in the building line than they do at present. It is confidently expected that the total of nearly a million and a half for building permits last year will be greatly exceeded this year and the reports for the first four months fully justify this expectation. Although there has been a great deal of activity in building so far this year it is a noteable fact that the greater percentage of this work is confined to houses and small additions to buildings. There is a falling off of factory work owing to the fact that before the depression many of the large concerns made extensive additions to the plants which are only now coming into use. The big contracts which have been let so far have been for warehouses, Y.W.C.A. buildings and car barns. For the first four months the total is $421,230 compared with $338,300 for the same months last year. For the first four months the total is $421,230, compared with $338,300 for the same months last year. Last year the total permits were $1,394,351 but Building Inspector Anderson thinks that this year the building operations will outshine these figures by long odds. Among the buildings either in the course of erection or which are to come later are the Y.W.C.A., building which is to cost $38,000 : an addition to the present Y.M.C.A. building to be used as a boy's department, estimated cost, $50,000 : alterations and extensions to the old Central Presbyterian Church building for the Hamilton Warehouse and Forwarding Company, $20,000 ; preserving plant for Wagstaffe, Ltd., already in the course of erection, $30,000, and car barns for the Hamilton Street Railway Company, $40,000. The addition to the Frost Wire Fence Company's works which was forecasted in Hardware and Metal a short time ago is about to be gone on with. The Bank of Montreal will erect a branch bank at the corner of Barton Street and Victoria Avenue to cost in the neighborhood of $10,000, and Stewart & Witton, architects, have instructions to apply for tenders for the erection of a concrete warehouse on the T. H. & B. right of way for a concern the name of which for the present is withheld. The Spectator Printing Company is also contemplating the erection of a $50,000 building on East King St. near James, but its plans for the time being have not been definitely agreed upon.

General Building Notes.

H, S. Osler, Toronto, will build a $10,300 dwelling.

Campbell River, B.C., will have a $12,000 hotel this year.

John Shanahan will build a $10,000 store at Vancouver.

A new 70-room hotel will be erected at Swanson Bay, B.C.

Prof. Adam Shortt will build a $10,000 dwelling at Ottawa.

Geo. Ambridge, Ottawa, is building a $10,000 row of dwellings.

The Y.M.C.A. propose to erect a $25,000 building at Saskatoon.

R. P. McLennan will build a $25,000 residence at Kitsalano, B.C.

Mackay & Dieppe will build at Calgary a $12,000 business block.

Work has been begun on the $22,000 Langley Street block, Victoria.

C. M. Essery will build two pair of dwellings at Toronto to cost $10,000.

E. B. Butterworth will spend $15 000 on an apartment block at Ottawa.

The Elgin Syndicate will build an $18,000 apartment block at Ottawa.

Edward Knox, Montreal, has a permit for a store. Estimated cost $8,000.

A permit has been issued to J. M. Brooks for three brick stores to cost $4,000.

Work has commenced on the erection of the $80,000 Ruttan block at Port Arthur.

Tees & Persse, Winnipeg, will shortly erect a warehouse and office building at Regina.

Work will shortly commence on a block of three stores for Scott & Bennett, Galt.

The contract for the $10,000 club house for the Alpine Club at Banff has been awarded.

Hall & Son, Toronto, have the contract for a $16,000 apartment house for Thos. McIlwain.

A $35,000 apartment house will be erected at Winnipeg by E. M. Counsell and W. W. Cross.

The alterations and additions to La Banque Nationale's building, Montreal, will cost $126,498.

The Dominion Bank has a permit for the erection of a bank building at Montreal. Estimated cost $18,000.

Nicholas Garland, Portage la Prairie, will build six modern brick residences this spring at a cost of $3,500 each.

J. L. Skene will shortly commence the building of a modern apartment house of five storeys to cost $150,000, at Victoria.

J. A. Jacobs, Montreal, has been granted a permit for a block of stores and warehouses to be built there. Estimated cost $123,000.

Jos. Sawyer, Montreal, has prepared plans for a three-storey building, to contain stores and dwellings, for F. Harel. Estimated cost, $55,000.

Peden & McLaren, Montreal, have awarded the general contract for the erection of a bank building for the Bank of Montreal, at Vernon, B.C., to Byers & Anglin, Montreal.

Plans have been prepared for a $1,000,000 bank building to be erected at Winnipeg for the Bank of Montreal to be modelled after the style of the headquarters of the Montreal office.

W. W. Scott, Winnipeg, is building the following structures at that place: S. M. Burbridge, dwelling, $8,000; C. R. Hegan, dwelling, $6,000; A. N. McPherson, dwelling, $7,000; J. Geddes, $5,500.

Recent building permits at Winnipeg include: B. C. Cockshutt, two dwellings, $2,000; Dunn & Wallace, dwelling, $4,500; G. W. Allan, dwelling, $22,000; F. E. Sprague, residence, $5,500; H. F. Osler, dwelling, $20,000.

Recent building permits at Vancouver are as follows: Reilly Brothers, two houses, $2,800; J. D. McGregor, two houses, $5,000; J. Kitamura, $300; First Church Scientist, $2,000; G. M. Endacott, two houses, $2,500; J. Dadson, $1,200.

Public Buildings.

A $20,000 hospital may be built at Galt.

A $40,000 theatre will likely be built at Regina.

Brantford's new Collegiate Institute will cost $95,000.

A 12-room public school will be erected at Winnipeg.

Plans are now ready for the new C. N.R. depot at Brandon.

There is a proposition on at Galt to spend $15,000 on schools.

The Cobourg, Ont., fair buildings will be remodelled this season.

A new Methodist church to cost $12,000 will be built at Brandon.

The North Vancouver Mission will be enlarged at a cost of $5,000.

Ingersoll will erect a new $1,500 main building on its exhibition grounds.

A by-law has been passed at Ottawa to issue $67,800 for school purposes.

Vernon, B.C., proposes to borrow $30,000 for the erection of public schools.

Tenders are asked for the erection of an eight-room public school at Goderich.

Edmonton will ask Mr. Carnegie for a grant of $75,000 for a public library.

The Orillia council has accepted an offer of $12,500 for a Carnegie library.

W. B. Angus has prepared plans for an extension to the North Bay hospital.

The trustees of the Rosedale Presbyterian church, Toronto, have applied for

a permit to erect a church at a cost of $50,000.

The Salvation Army will erect new barracks at Dauphin, at a cost of $2,000.

A $12,000 addition will be made to the Auditorium theatre at Fort William.

Nearly $6,000 has been subscribed towards the erection of a hospital at Ingersoll.

Kent school, Toronto, is to be enlarged to 31 rooms, at an expenditure of $80,000.

Moose Jaw ratepayers have carried a by-law to raise $17,000 for exhibition buildings.

The Revelstoke, B.C., hospital directors have decided to build a new wing at a cost of $16,000.

Estevan, Sask., ratepayers have approved a by-law to raise $10,000 for the erection of a town hall.

A modern brick high school, to contain ten rooms, will be erected at Springdale, N.S., this season.

The Victoria school board have approved preliminary plans for the new $45,000 school building.

The trustees of St. James' Cathedral, Toronto, are building a club and school house at a cost of $65,000.

It is proposed to erect a $30,000 building for the accommodation of various Protestant brotherhoods at Windsor.

A site for the new court house at Medicine Hat has been selected and building operations will start at once.

All Saints' Anglican church, Ottawa, will be enlarged. A new rectory and other improvements are also under discussion.

A permit has been issued to the Sisters of Hotel Dieu, Montreal, for the erection of an additional hospital building to cost $5,400.

Prof. E. Nobbs, Montreal, has awarded the general contract for the erection of a power building for McGill University to Byers & Anglin.

Railway Development.

Engineers are now surveying the C. N.R. projected line between Port Arthur and Nepigon.

Construction will shortly be started upon the C.N.R. branch from Emerson to Winnipeg.

An electric railway line is proposed to be built between the fruit district about Vancouver and that city.

At a recent meeting of the Brockville town council a letter was read from T. M. Kirkwood, Toronto, asking the council to agree to guarantee the interest on the bonds of a company for twenty years to an amount of $25,000 per mile for an electric railway from Toronto to Montreal.

Engineers have been employed to locate the projected Alberta and Great Waterways Railway, extending from Edmonton to Fort McMurray, at the head of navigation on the lower reaches of the Athabasca river. With branch lines it will have a length of about three hundred and fifty miles. It is intended to place survey parties in the field within sixty days and this season will see the construction work well advanced from the Edmonton end. The entire line will be completed within three years, or twelve months ahead of the time limit for the construction. The charter has been acquired by W. R. & D. O. Clarke, bankers, of Kansas City, and the enterprise is backed by the guarantee of the Alberta Government.

EXCURSION TO MONTREAL.

Arrangements are practically concluded for the excursion to Montreal to be conducted by the Ontario Retail Hardware and Stove Dealers Association, in August.

The Railway Passengers Association have refused to make any concessions other than usual convention rates of single fare if 300 attend and as less than half that number have as yet promised to make the trip the Executive Committee have declined to accept the terms offered by the railways.

Negotiations with the Richelieu & Ontario Navigation Co. have resulted more favorably, however, and a special party rate has been secured which offers members of the Association, their wives, etc., to make the trip from Toronto to Montreal and return by their finest boats for only $19. This rate includes meals and stateroom for practically three days on the boat, and as the regular return rate exclusive of meals and berth is $16.70, it will be seen that the rate quoted is very low. The rate to non-members of the Association will probably be $20, the extra $1 going to defray expenses.

A committee of the hardware jobbers and manufacturers of Montreal is being formed to arrange a program of entertainment for the visiting hardwaremen while in the Royal City.

It is suggested that the trip be made the week of August 23, the party leaving Toronto on Monday, August 23, at 3 p.m., after going through the Thousand Islands and shooting the St. Lawrence rapids, arriving in Montreal on Tuesday evening. A three day program is planned at Montreal and a special rate to Quebec by boat is being arranged for those not going to Quebec, leaving Montreal on the return trip on Saturday noon and arriving in Toronto, Monday, Aug. 30, at 7 a.m., this being the first week of the Toronto Exhibition. Hardwaremen living in Eastern Ontario can join the boat at Kingston, Brockville or Prescott at a proportionally low rate.

Hardwaremen not members of the Association who wish to avail themselves of this opportunity of enjoying a holiday trip in company with men in their own line of business and visiting Montreal at a time when the Montreal jobbers and manufacturers are keeping "open house," should send their names to the Secretary of the Ontario Retail Hardware Association, 10 Front Street East, Toronto, without delay.

APPARENT VS. REAL VALUE.

Although rope is bought and sold by the pound its real value is determined by its length and strength. When these factors are considered the highest priced rope will, under normal conditions prove to be the cheapest.

In a recent publication the Plymouth Cordage Co. presents an instructive object lesson by means of an illustration and authentic comparison of values. Two coils of rope of the same size (one-half inch diameter) were taken from a retailer's regular stock just as they were placed on sale. The burlap coverings were removed, the coils were photographed, accurately weighed and measured and a number of pieces of each were tested for strength upon a reliable testing machine.

The coil marked "A" was of the highest grade manila, that marked "B" was of "so-called" manila selling for 3 cents less per pound than "A." The results of the comparison were as follows:

	"A"	"B"
L'gth of rope in coil	1,250 ft.	1,070 ft.
Weight of coil with lashings	97 lbs.	97 lbs.
Weight of lashings	1 lb.	3 lbs.
Price per lb.	12 cts.	9 cts.
Comparative price per 100 ft.	93 cts.	82 cts.
Breaking strength	2,907 lbs.	1,450 lbs.
Comparative value ("A" worth 12c).	12 cts.	5 2-3c

These figures are well worth the careful study of anyone who buys even one dollar's worth of rope. It will be seen that although the two ropes in the illustration were the same size and the coils weighed the same, coil "A" contained nearly two hundred feet more rope than "B." It will also be seen that while rope like "B" can be bought at three cents per pound less than "A" the actual cost of 100 feet is only eleven cents less.

The difference is better shown when we consider the most important quality of these rope—strength. The figures indicate that "B," although much heavier, was less than one-half as strong. Assuming the value of "A" to be 12 cents per pound, a simple calculation shows that, taking into consideration weight and strength, the comparative value of "B" is only 5 2-3 cents per pound, Or, to return to the original proposition, when high grade rope like "A" can be bought for 12 cents per pound, every penny above 5 2-3 cents per pound paid for rope like "B" is absolutely wasted. Of course the same proportion holds good with the price of "A" higher or lower.

Actual figures might vary in other cases, but the results are typical of those always obtained in buying low-grade rope.

R. T. Hopper, Montreal president of the Standard Asbestos Co. and vice-president of the Dominion Asbestos Co., both of which are included in the new asbestos merger, will join the board of the amalgamated corporation.

The Department Store School Book Monopoly

A Correspondent Condemns the Arrangement Which Gives the T. Eaton Company, Toronto, a Practical Monopoly of the Sale of School Books as Well as a Big Lever to Use in Making Sales of Other Goods.

The following letter from a member of the Ontario Retail Hardware and Stove Dealers' Association is indicative of the growing feeling of protest among merchants of all classes who are beginning to understand the evil results which will follow the carrying out of the ten-year (renewable) contract for the printing and sale of school books entered into between the Ontario Government and the T. Eaton Company, Toronto.

Mr. Bell, as stated in his letter, does not sell stationery, but he has a feeling for the fellow-retailer who does, and he intends using his influence with his local M.P.P. to prevent, if possible, the working out of the contract from being too one-sided. Mr. Bell is helping himself by so doing as the arrangement seems likely to injure hardwaremen, grocers, dry goods merchants and other retailers almost as much as it does the booksellers.

It works out this way: The Eaton Company, as publishers, are under contract to sell the set of books at 39 cents to everyone, whether retailers or ordinary buyers. They will not pay postage on the books, however, so it will be possible for booksellers living outside Toronto and suburbs to receive shipments of the books at 39 cents, plus freight and sell at 49 cents retail, making as their margin to cover their cost of doing business the difference between what their freight costs per set and the postage per set paid by the Eaton Company. They may, or may not, be able to sell for the 49-cent retail price, and if they do not buy in quantity or if they are some distance from Toronto and the freight is high they will have no margin at all.

But the Eaton Company handle other goods than school books and they will not lose the opportunity to point out that buyers outside Toronto can secure school books from them at 39 cents, and if a shipment of other goods is ordered there will be no postage, freight or cartage to pay. Herein is where the harm will be done to grocers, hardware dealers and other merchants. The wholesale price on school books will be used as a lever to sell hardware, dry goods, groceries, boots or shoes.

As this paper understands the situation the Eaton Company will monopolize probably ninety per cent. of the retail sales throughout the province besides influencing the sale of other goods and securing an advertisement of inestimable value in the form of the firm's imprint on the bottom of the title page of each volume.

The Government, by exercising its privilege of purchasing the entire edition and selling them at wholesale (39 cents) to be sold in regular retail channels at 49 cents, could protect not only the booksellers but all classes of retailers, and by further causing the publishers to leave their name off the books the department store advertisement could be eliminated.

In an interview, however, with Hon. Mr. Pyne, Minister of Education, no hope was held out that the publisher's imprint would be left off. The Government has the right to revise each page but it is said that another clause allows the publishers to add their name. If this is so the retailers can only secure protection by having the Government handle the sale of the books through the Education Department and to secure this protection every influence should be brought upon the local members of the Legislature, particularly if they are Government supporters.

Mr. Bell's letter follows:

A Letter of Protest.

Editor Hardware and Metal,—I read with much interest the editorial in your issue of last week under the caption of "Retailers Getting Alarmed." I am quite in accord with your remarks in connection therewith, and—being a Conservative—I, like yourself, have no desire to get the Government of Ontario into trouble, but on the contrary, I think they are entitled to receive the thanks of the people of this province for taking the school readers out of the hands of the "Book Ring" and thus enabling the parents of school children to procure the books at a fraction of the previous cost. In stating that I agree with your views in this matter, it must not be overlooked that the present Government took office pledged to break this "Ring" and let such contracts by tender, awarding same to the lowest tenderer, and to place school text books in the hands of the people at or near the cost of production.

Such being the case, the Government could not well overlook the tender of the T. Eaton Company—although the president is a Liberal—they being the lowest tenderers. Now as I understand the matter, the full set of readers can be procured from the T. Eaton Company for 39 cents, and retailers throughout the country are not allowed to charge more than 49 cents for the set.

To my mind this seems to be where the Government has erred. The T. Eaton Company should not be allowed to sell these books at retail, for any less money than any other dealer throughout the country can sell them, for the average householder, knowing he can purchase the books for 39 cents, will not be satisfied to pay his local dealer 25 per cent. more money, but will send or go to the T. Eaton Company for the books, and procure other goods at the same time, and this, it seems to me, is where the profit of the T. Eaton Company lies.

The self-respecting retailer, too, does not want to charge 25 per cent. more for his goods than the same articles can be got elsewhere, and so the whole business will go to the T. Eaton Company, for the country merchant will not carry the line, and the poorer parent in the country, whose buying needs are not great, will have to send his little 39 cents to the T. Eaton Company and pay express or postage in addition thus costing him more than they otherwise would if all retailers were placed on an equal basis.

I fully agree with you in saying "the books should be delivered to the Educational Department and by it distributed among the purchasers" or otherwise the Government should fix a uniform retail price at which the books must be sold by all dealers who may choose to handle them, the T. Eaton Company included, and thus remove from retailers what will certainly prove to be a great handicap.

I may add that I am not opposed to the T. Eaton Company getting the contract, since they were the lowest tenderers, but I am opposed to their getting a monopoly on the retail sale of such a necessary staple as school books, and practically to exclusion of all other retailers, at least, to the extent that they are permitted to sell these books at retail, at the same price as any other dealer in stationery would have to pay wholesale. I quite agree, too, with your suggestion, that all retailers get after their local member, and endeavor to have this lop-sided arrangement set aside.

W. J. BELL.

Beeton, May 11.

P.S.—I do not handle stationery but have a feeling for my fellow-retailer who does. W. J. B.

USES OF CONCRETE.

A few years ago the use of concrete was largely confined to the building of foundations, sidewalks and similar constructions, while to-day it is superseding timber in all fields of use. Concrete telegraph poles, concrete ties, piles, and even entire buildings, are common examples comprising this new industry The latest use, and one that presents opportunities for development, is the construction of scows and boats. The system of construction is very simple. The keel is laid in the usual manner, the iron rod reinforcement being anchored to the armoring of the former, and being brought up the sides of the hull in conformity with the desired lines of the craft. And now an engineering firm in Missouri is engaged in building small concrete power-propelled boats for river use.

PUBLISHED EVERY SATURDAY.

A TEN-YEAR MONOPOLY.

The school book monopoly which the T. Eaton Co. has secured from the Ontario Government is not a thing for the day only. It has a ten-year term to run, with renewable privileges.

In other words, the big department store will for ten years enjoy the privilege, under Government patronage, of educating the school children of Ontario and through them the parents in regard to the advantages of dealing with the T. Eaton Co.

While it is estimated that for the first year the number required will not be more than 700,000, yet what will it be at the end of ten years? The possibilities are almost too great to comprehend.

Without this instrument of monopoly in its control the T. Eaton Company, during the last ten years, has wrought a great deal of injury to the retail trade throughout this country.

With a monopoly of the school book trade in its possession, and with the large amount of business which this will necessarily bring to it in other lines of merchandise, it must be apparent to everyone who gives the matter a moment's consideration, that it will cut into the retail trade of the country a great deal more deeply during the next decade than it has during the past.

There is only one thing that can clip its wings and modify its influence, and that is for the Ontario Government to take advantage of the conditions of the contract whereby the Government may stipulate that the imprint of the Educational Department shall be placed on the books and that delivery shall be made to the Educational Department.

To the task of persuading the Government to do this every retail merchant in Ontario should set himself, beginning with the members of the Local Legislature, and through them to compel the Government to recognize the justice of their claims.

This should not be a difficult task. What the Government has done has been done inadvertently, not through design, and when it realizes the great wrong it does the retail trade, it is reasonable to suppose it will modify the conditions. The first thing is to persuade the Government, and no merchant in Ontario should either slumber or sleep until he has taken steps to assist in doing so.

METAL MARKET SITUATION.

The improvement in the iron and steel market in the States, has, naturally, given a much brighter tone to trade conditions across the border. Iron and steel are the best indicators of the trend of business, especially when the market is open and therefore due measure of confidence can be taken in the hopeful signs that are now given. Copper, tin, and the other metals, may rise and fall as the speculators desire, but let iron and steel point the way, and the country is willing to believe. April was a month of steady improvement in both iron and steel, and May looks as if it were going to follow suit. It is now estimated that the present rate of pig iron production with all the caution as to stock accumulation compares well, on a yearly basis, with the maximum made in any year, while the activity in the steel trade compares favorably with the average demand. When it is considered that the railroads are buying very conservatively this relative position has added significance.

With this improvement in tonnage booked comes a strengthening in the tone of the markets. Pig iron prices are undoubtedly stiffer, and some interests have advanced quotations 25c a ton. All this comes as most satisfactory reading, although it creates the regret that the Steel Corporation did not see fit to open the markets long before they did. The use of steel is so bound up with general commerce that any improvement was strangled until prices were cut.

With the cut in wire lines, nothing has escaped the pruning hook except rails and whether they are ultimately affected or not does not matter much. Rails are on a different plane from other steel commodities, and the stimulation of a cut would not be very far reaching. With the steady basis of iron and steel the spring trade has now the best opportunity of expanding. The railroads and other larger interests must soon come into the markets strongly. The smaller consumer has played a great part, and it is this section of the purchasing community who must be credited with the saving of the situation.

BASEBALLS AND GLOVES.

In the manufacture of a league ball there are a great many operations, through which the ball must pass before the cover is sewed on. Starting from the rubber centre, the four-play wool yarn is wrapped on under very heavy tension until the ball reaches a certain diameter, and then three-ply white yarn follows until the ball reaches a certain diameter.

In the next operation the ball is placed back on the machines, is wound with the finishing extra fine grade three-ply yarn, and then the finishing twine for the outside surface of the ball is put on. The ball next passes through an inspector's hands, who tests it for weight and circumference, and if there is the slightest variation from the standard gauge the balls are returned to the wind-room. After inspection the trade-mark, number, name, etc., are stamped upon each in one operation on a stamping machine, turning out twenty balls a minute.

In the glove and mitt department a heavy power press is used for cutting out the felt linings for fielders' gloves and catchers' mitts. Heavy steel dies are used, which cut out as high as two dozen linings in one stroke. The better grade of goods are cut by expert hand cutters, who sort the best part of the hides for the various grades. All finished gloves and mitts then pass to the inspection department, where they are carefully examined, stamped, a guarantee ticket attached and then carefully packed.

DECEPTION IN BUSINESS.

Business men who practice deception are not wise. Possibly for a time deception may appear to pay, but as a paying proposition all the time there is no question of its futility.

The very foundation of successful and permanent business is confidence. It is as impossible to build up confidence on a foundation of deception as it is to build an enduring super structure on quick-sand.

Up-and-above-board ways of dealing with customers, creditors and employes may not make all rich in dollars who practise it, but it will create a name for probity and that, after all, is more important than even cash as a basis of commercial credit.

COMMITTEE WILL CONSIDER ASSESSMENT ACT

Throughout Ontario when the operations of the new assessment act come into force in January, 1905, resulting in the business assessment being substituted for the personal property tax, it was generally felt that some radical move on the basis of definite, accurate, and more equitable valuations was needed; otherwise, no change would have been inaugurated. After nearly five years of trial it is admitted that the business assessment as a substitute for the personal tax is, on the whole, preferable, although as time has proceeded some inequalities have developed in the working out of the new order of things, not only with regard to business assessments of manufacturers, wholesalers and retailers, but also in connection with the assessment of income, etc.

During the recent session of the Ontario Legislature several notices of amendments to the act were brought forward and specific cases instanced where its provisions were unfair, but the Government felt that to make changes in order to meet these objections would constitute a bad precedent and create a muddle. Patching up an assessment act, once in operation, is like tinkering with the tariff. It would create uneasiness, discord and dissatisfaction. If any alterations are to be made they should be general and take in the whole scheme so that business conditions and standards of valuation may not be too much upset. Mercantile interests want to know exactly where they are at.

Special Committee Appointed.

Nothing was carried out in the shape of amendments last session, but a special committee was appointed shortly before the House adjourned, to inquire into and report upon the working of the present act, and to this committee all bills having in view the changing of present provisions were referred. All these will be thoroughly considered by the committee which will bring in a report at the next session when the provisions of the whole act will come under review. Any changes that are deemed desirable from the standpoint of the many rather than the interests of the few, will likely be made. Merchants and manufacturers, wholesalers and retailers, who think that some of the present clauses should be altered, would be acting in their own welfare if, in the meantime, they present their views and lay their objections before members of the special committee which is a large one, and representative of all parts of the province.

The special committee is composed of Sir James Whitney, Premier; Hon. W. J. Hanna, Provincial Secretary; Hon. A. J. Matheson, Provincial Treasurer; W. K. McNaught, North Toronto; J. W. Johnson, West Hastings; I. B. Lucas, Centre Grey; W. F. Nickle, Kingston; Col. Hugh Clark, Centre Bruce; Henry Eilber, South Huron; W. S. Brewster, South Brant; W. H. Hoyle, North Ontario; G. H. Pharand, Prescott; J. R. Dargavel, Leeds; W. H. Hearst, Sault Ste. Marie; James Torrance, North Perth; P. H. Bowyer, East Kent; F. G. Macdiarmid, West Elgin; J. J. Preston, East Durham; George Pattinson, South Waterloo; Allan Studholme, East Hamilton; Hon. A. G. MacKay, Leader of the Opposition; Daniel Reed, South Wentworth; V. Stock, South Perth; W. J. McCart, Stormont; James McEwing, West Wellington; Duncan C. Ross, North Middlesex; Wm. Proudfoot, Centre Huron; J. C. Elliott, East Middlesex.

Why Change Was Made.

The reason that the business assessment was substituted five years ago for the personal property tax was that it had been the experience, not only in Ontario, but all through America it was found impossible to equitably assess personal property; that an assessor had not the means of getting at a fixed, true valuation, and that there was no definiteness, certainty or foundation for the system. These and many other reasons were urged in favor of a change. Under the old system different methods of escaping taxation were resorted to while the whole plan was found to lead to deception, suppression of facts, and evasion, in the matter of liabilities, liens, and notes, the latter being often greatly exaggerated. The loop-hole was afforded by sub-section 20 regarding "exemption" in the matter of a personal tax, which says: "So much of the personal property of any person as is equal to the just debts owed by him on account of such property." This was the avenue of escape and the machinery provided to get at correct returns was ineffective and inoperative. Some men could, and frequently did refuse to give an assessor a statement of assets and liabilities and then the assessor had largely to resort to guesswork.

As result of crude methods, inequalities and other objections, the business assessment came into force whereby the merchant, the wholesaler and the manufacturer are assessed a certain proportion of the value of the real estate or premises occupied by them, the rating varying from 25 to 150 per cent. of the total value of their respective quarters, and to what purpose they are devoted. No man, however, can escape, if he is engaged in business, for the law does not permit him to pay taxes on a less value than one hundred dollars.

How Merchants Are Assessed.

All grocers, hardware merchants, plumbers, dry goods merchants, and others, under the business assessment, are assessed at 25 per cent. of the value of the premises occupied where the population of the municipality is over 50 000; 30 per cent. where the population is over 10,000; and 35 per cent. if under 10,000. The business tax of wholesalers is 75 per cent. and manufacturers 60 per cent. Coal merchants are rated at 50 p.c., except in cities of over 100,000 population, where it is 30 per cent. This method is easy of application, definite and fixed and the assessor does not have to delve into the private affairs of everyone doing business. It is not claimed that the new system is equitable from a basis of wealth, and could not be for the reason that a percentage of the assessed value of the land is taken as the business assessment in lieu of the value of personal property. Large capital is employed in small places and vice versa, but its advocates contend that it has this effect; and that is, no one can escape. Under the old way, debts due on account of personalty were to be deducted and it is said that not one-tenth of the personal property liable to assessment was assessed. Under the business assessment a certain rating is fixed by the act and an assessor cannot go beyond this rating. Here is where the improvement comes in, although the rating may afford causes of dissatisfaction.

Inquiries made from the city assessment department in Toronto and other cities elicits the information that the new system of business assessment is regarded as a decided improvement, and, while not perfect perhaps, is more satisfactory than the personal property tax. In fact, the number of appeals entered by merchants wholesalers, and manufacturers are not one-half what they used to be under the old order of things.

Difference in Rating.

The question naturally arises why rate some at 25 per cent., some 50 per cent., some 60 per cent., and so on up to 150 per cent? The answer is that, in framing the act and considering its effect on the different municipalities throughout Ontario as a means of providing taxes, it was necessary that its operation should provide at least as much taxes as were collectable under the old act. To prove this statistics from seventy-two municipalities in Ontario, showing the total assessment of their real and personal property and income were collected and statements were obtained also of the amount of taxes collectable from the merchant, the manufacturer, the wholesaler, and others and the assessed value of their real property, so that by supplying the present ratings it was satisfactorily demonstrated that no loss in taxation to any of these places would result. There were also, other reasons for the discrimination in rating, particularly in the larger cities.

All objections entered by any business interests will be taken into consideration by the special committee appointed by the Legislature and all anomalies and inequalities, if successfully established, will, in all likelihood, be remedied next year. The general opinion is that the business assessment, although having weakness, is preferable to the old mode. In a recent address before the National Tax Association Mr. Forman, Assessment Commissioner of Toronto, declared that, as a substitute for personal property, the business assessment is so far in advance of the former system, that the assessment of personal property as such, will, in his opinion, never be revived.

CANADIAN METAL MARKETS

See Itemized Market Quotations on Page 74.

MARKETS IN BRIEF.

Montreal.

Antimony—Cut of ½c.
Wire—Reduction in barb wire, galvanized, and coiled spring.

Toronto.

Turpentine—down 1c.
Wire—Unsettled.

THE MARKET SITUATION.

A better tone has been apparent in the primary markets. Copper made a sudden jump in London, and of course New York was not slow to follow suit. This jump was speculative, but whether it will induce better legitimate buying all the way round remains to be seen. It may be only a flash in the pan or just the reverse. Exports from New York last month were below the total for the same month last year, but were only beaten by two other months of 1908, January and June. It must not be forgotten that Europe generally knows the best time to buy copper. Tin has shown better strength under a stronger inquiry, but there is not much character either to the London or New York market. The latter seem very disappointed that the recent good buying there did not influence the situation more. But London has the final say in tin. Spelter has continued firm both in London and St. Louis. The consumption is good and the stocks are held under strong control. Lead has shown signs of better strength probably in sympathy with the other metals. Cleveland warrants are quoted at 48 shillings and fourpence, an advance of sixpence over last figures. Exportations in iron and steel from the Old Country, have shown improvement, and the home consumption is better. The United States iron and steel market has shown decided improvement. Great tonnage has been booked, while prices have firmed up. Bars, plates, and shapes have now gone back to the prices first made on the February reduction, while some pig iron interests have advanced prices 25c. a ton.

MONTREAL METAL MARKETS.

May 24.—With orders coming in freely, and a much better inquiry, a bright tone is manifested in the metal markets. With the exception of antimony, which has been cut ½c, all prices are firm, especially copper, and if the latter metal continues to show the strength in the primary market that it has been doing, local quotations will advance. It is not surprising that with the firmer tone in London and New York, a stronger interest should be taken in the markets. Users have very little metal on hand, and there will be some heavy booking if the markets seem to be in for a steady advance. Jobbers report orders coming in from all directions. All the metals are wanted, and individual consignments are undoubtedly heavier than they were. There is a strong demand for galvanized sheets, and in fact, trade is good all the way round. First hands are extremely busy shipping away consignments arriving at the wharves. As one merchant remarked, the stuff is not coming in fast enough to suit customers. The firmer tone in the United States iron and steel markets is also having good effect upon conditions here. Canadian prices are firm, and the furnaces have good business in hand. Prospects look extremely favorable unless the primary markets have another setback.

TIN—An active demand has developed for tin, users wanting the metal at once. With the stiffening in the English market, inquiries have increased, and much more interest is being taken in the situation. There is no change in jobbing prices, which are still at 32½c, but if the English markets continue to advance, local prices will follow.

COPPER—Despite the strong advance in the primary markets, and very good home consumption, jobbing prices for copper still remain at 14c. This will not, however, last if the outside markets continue to show developing strength. Naturally inquiries have increased with this improvement and booking ahead has been certainly better, which shows what will happen if copper in New York swings ahead.

SPELTER—Spelter is firm and unchanged at $5.75. The demand is very active, and the steadiness of the primary markets keeps things in a very strong position. Spelter, both in England and the States, is under strong control, and with the rapidly increasing demand for galvanized sheets the consumption keeps good. One of the features of the season up to now has been the heavy consignments of galvanized sheets to the Montreal market.

LEAD—There is no change in lead quotations which are still at $3.65 for imported, and $3.55 for trail. This metal has also felt the influence of better trading and a much stronger tone is observable. Orders are of heavier bulk. The English market has been stronger, no doubt, in sympathy with the other metals.

PIG IRON—Consignments of pig iron are rapidly being reshipped to various parts of the country, users being greatly in want of the metal. Orders are also swinging in well, and a good season promises. Canadian furnaces seem to be in a very firm position. Undoubtedly the improvement in the United States in iron and steel will have a good stiffening effect here. Conditions in the Old Country are also improving, and merchants are wanting higher figures for contracts placed well ahead.

SCRAP METALS—The market is inclined to be quiet. There is little scrap offering, and quotations have not shown much change. Heavy copper and wire, 11c; light copper, 10c; heavy red brass, 10c; heavy lead, 2¾c; scrap zinc, 3c; wrought iron, 11c; machinery cast $14.50.

TORONTO.

May 14.—While metals are yet strong locally, there has not been the improvement this week that could be wished for. The market is firm, all the metals holding their prices without fluctuation. There have been no advances, neither have there been and declines. Even lead, which created some flurry in the metal world in New York and London during the week, owing to the reported combine of the lead trusts all over the world, has remained unmoved here. The local metal men, unlike the paint jobbers, are not at all "scarey," and say the story of a world combine was circulated by the lead trust across the border, and is nothing else than a cry of "wolf" to frighten the innocents.

PIG IRON—The market is showing signs of a change for the better. Demand is much improved over say six months ago, and prices hold at a more stable figure. $19.50 is asked for Canadian foundry; $20 for No. 3 Middlesboro, and $21.50 for Cleveland. Inquiries are frequent now, and when sales are made they call for immediate delivery. Futures are asked about, but booking of them can hardly be said to be brisk. Taken all in all, there is a decidedly better feeling regarding pig iron and the products of iron and steel, more especially structural steel, and iron pipe and bars.

LEAD.—This metal, which was the cause of some flurry in foreign markets, did not change much in price or condition locally. The metal was active during the week but not more so than it was for the past two weeks. The quotation is $3.65, last week's figure, and firm at that.

COPPER.—The condition of the red metal has been unsteady, quiet one day and active the next. The price, however, remained firm all through the week and the local quotation of 14c is still good.

TIN.—Early in the week tin developed an easy tendency but the past few days it has come round again and is now firm at 32c, which is also last week's quotation. Business has been quiet with dealers, though manufacturers say they bought pretty heavily.

SPELTER.—This metal continues to hold the position of being the steadiest metal of the season. It is at present active and strong, and all week it was steady. The quotation is unchanged, and there is no immediate prospect of a change apparent.

SHEETS AND PLATES.—Good business is being done in these two lines. Importations are now here and deliveries are being made of orders booked since January. Metal men are satisfied with the passing trade, which shows a small but healthy increase over a year ago.

OLD MATERIALS.—Slightly better business is passing in old materials, particularly in scrap metals and old rubbers. Old iron and copper are leading in demand. Stocks are yet pretty large. Unchanged prices prevail.

HARDWARE MARKETS

MONTREAL.

May 14.—Despite the continuance of the broken weather, trade has been very good. The roads have not been in the best of shape, and travelers have found some difficulty in getting round, but orders are more easy to get then they were, and although there is still the disinclination to book ahead, immediate requirement wants are placed freely. As one jobber remarked "We have enough business to handle comfortably," and this about sums up the situation. Despite the lateness of the seeding a very bright feeling exists in the Northwest, and dealers are buying more confidently. The Maritime Provinces are also very good. In Quebec and some parts of Ontario trade is perhaps not showing the improvement it should, although probably better weather will alter this.

Builders' hardware continues to move well, while harvest tools are showing distinct improvement. Hose is not quite so good as it was, which may be put down to the wet weather. Lawn mowers are, however, moving well, and so are other gardening tools. Repeat orders for screen doors, green wire cloth, and poultry netting are coming in steadily. shelf goods, generally still show the best improvement, the heavy lines, while moving better than they did, being on the quiet side. The markets generally are firm, but owing to competition in the States between the Pittsburg Steel Co. and the U. S. Steel Corporation, prices on galvanized wire, barbed wire and coiled spring fencing have been reduced 20c, 25c and 30c respectively.

BUILDERS' HARDWARE — These lines continue to move well. With the advance made in Canadian makes, there is an improving demand for the home article. Builders generally are placing much more artistic trimmings on the houses and dealers are catering for this. There are no important price changes, and we quote: door sets and escutcheons, 50 and 10; escutcheon pins, steel, 50; brass, 55. Spring hinges, No. 20, $9 per gross.

SPRING GOODS — Owing to the weather hose has not been moving so well, but repeat orders for gardening tools are coming in steadily. Lawn mowers show distinct improvement. Refrigerators and ice cream freezers are in good request, but would no doubt be in better demand but for the climatic conditions. Repeat orders for screen doors and poultry netting are well to the fore. There is no change in quotations. Screen doors, stained, $7.80; grained, $8.10; screen hinges, $9 a gross; poultry netting, 60 and 2½; green wire cloth $1.70 in 100 feet rolls.

HARVEST TOOLS—Bookings have increased for harvest tools, and the demand is now assuming much better proportions. There are no changes in prices, and we quote: Hay fork pulleys, $1.60 to $8.50 a dozen; hay carriers, hay rakes, etc., 55 off.

MINERS' SUPPLIES—The demand continues good for fuse and powder, but other lines are more quiet than they were some weeks back. No price changes are announced, and we quote: Miners' picks, 17c a pound; prospectors' hammers, 20c; pick handles, $1.85 a dozen; drilling hammers, 6c a pound; crowbars, 3½c; drill steel, 8c.

BOLTS AND NUTS—A good demand exists for bolts and nuts. Orders generally are well assorted, and with the improvement in construction dealers are getting stocks in good shape Discounts on carriage bolts, ⅝ and smaller, 70; machine bolts, ⅝ and less 60, 10 and 10; coach screws, 75; stove bolts, 80 and 7½.

SCREWS—Screws are also in active demand, repeat orders coming in freely. No change in quotation is announced: 85 and 10 off for flat head, bright; 80 and 10 off for round head, bright; 75 and 10 off for flat head, brass, and 70 and 10 for round head, brass.

WIRE—Orders in barbed wire, galvanized wire, and coiled spring fencing are coming in with a great rush, and there is extreme difficulty in meeting and shipping orders. Despite this, however, and owing to severe competition in the States between the Pittsburg Steel Co. and the wire concerns of the U. S. Steel Corporation, the prices in barbed wire have been cut 25c; galvanized 20c and coiled spring wire 30c. We now quote: Barb wire, car lots and mixed, $2.40; small lots, $2.45; plain twist, car lots, $2.70; small, $2.75; plain wire, $2.30 base. Galvanized wire No. 9, $2.15 in straight and mixed car lots, and $2.20 small lots, f.o.b. Montreal. Coiled spring fencing, $2.35; straight and mixed car lots, and $2.45 small lots.

TORONTO.

May 14.—While the hardware trade is still brisk, there is not that swing to business that the past few weeks promised. The early days of May were fair for trade, but beyond the fact that orders placed earlier in the season were being rushed out there was hardly as good business as during the early part of April. For this condition the unsettled weather is held accountable. "It is peculiar," said a jobber, "how even one day's rain puts an immediate damper on trade; and it takes three or four days of fair weather to entirely recover from the effect."

Prices are unchanged. In wire the market is unsettled, because of the cut prices prevailing across the border, New York reports a firming up again. Local quotations remain at the old figure. Manufacturers and jobbers are awaiting a ruling on what duty shall be enforced should a quantity of wire be brought in from the U. S. at the low prices. This has had the effect of keeping up wire prices here, and the line is not being pushed vigorously. There may be a revision of prices next week. Eastern markets already report a decline in market quotations.

SEASONABLE GOODS— Spring and summer goods, which are the seasonable lines, are to the front in demand. During the past ten days summer goods have been much sought after, and immense quantities of window and door screens have gone out. Refrigerators and ice cream freezers have passed the inquiry stage and satisfactory orders are being filled. Lawn mowers have had an impetus with the growth of grass, and, early as it is, there have been some splendid repeat orders received. Garden tools are another strong feature—rakes, hoes and spades, together with light wheelbarrows are active just now. Shovels of all kinds and heavy wheelbarrows, as also picks and other tools, are going out fairly free to construction camps. Light express wagons have had ready sale this week.

SPORTING GOODS—Lacrosse articles and outfits are giving baseball goods a run for first position just now, and fishing rods and tackle are coming to the front very satisfactorily. Guns and ammunition are improving in demand as the season progresses, and while no big orders have been placed, there are more firearms called for this year so far than was the case last season. Evidently the retail hardwareman is coming to his own in being the supply house in his own locality for sporting goods. Jobbers say the number of hardwaremen carrying and pushing sporting goods is increasing from year to year.

WIRE—Unchanged quotations prevail on the local market, although in the east lower prices are said to be asked. The cut in wire prices in the U. S. has unsettled the local market to some extent and buyers are holding off somewhat. It should be said, however, that great quantities of wire fencing and netting have been sold this season. More stable conditions are looked for next week and there may be some price revisions.

BUILDERS' HARDWARE—"Just as busy as ever," said a clerk in one of the larger retail stores, when asked about the condition of builders' hardware. Locks in all styles and sizes have been going out in large volume the past two months, and the end is not yet.

HEAVY GOODS—An enormous demand is made for nails this season. Manufacturers are compelled to run their mills night and day, and then are unable to keep pace with the demand. This condition has given a firmness to the market, and it does not look as if lower prices would come on the market this season. Bar iron is increasing in demand. It is firm in price. Large lots of pipe have been moving since the beginning of May.

Pitner Gasoline Lighting Co., Toronto; capital, $75,000; to manufacture gas and oil machines for the supply and use of light, heat and power. Incorporators, M. Downey, A. Popham, and J. H. Spence, Toronto.

IRON MARKET'S BRIGHT OUTLOOK

Cleveland, May 13.—The Iron Trade Review says: The outlook in the iron trade is exceedingly bright. Sales of finished products continue heavy, and pig iron is making a fairly good record. On the whole, conditions are more favorable than at any time since the panic of 1907. A decided improvement in the condition of the market, with regard to all of the heavier steel products characterized the past week. The position of all of the mills, both in the matter of price and willingness to contract, is unmistakably firmer, and what is especially significant is the amount of buying that is being done by jobbers in replenishing stocks that for many months have been kept down to the lowest notch. The general buying for structural purposes, involving shapes and plates, has run into a very considerable tonnage.

From the standpoint of prices, the iron and steel trade has recovered lost ground, at present it is holding at practically the point at which the open market established buying and selling levels almost three months ago. The recent upward movement from the low marks touched has followed from the heavy tonnage that has been placed with the mills and it has gradually resulted in the elimination of the weakness that has been apparent in some sources.

The Carnegie Co. is preparing to start the Bellaire plant, two furnaces and a steel mill. These have been idle seventeen months.

Hardware Trade Gossip.

Quebec.

A. McNairn, of Bruce, Stewart & Co., Charlottetown, P.E.I., has been visiting Montreal.

George B. Meadows, of the Wire, Iron & Brass Works, Toronto, has been on a visit to Montreal.

Watson, Jack & Company, Montreal, have removed from the Bell Telephone Building to suite 709 Power Building, Craig St. west, Montreal.

G. R. Nimmo, of the Canada Paint Co., who generally covers the district between Montreal and Toronto, has returned from the Lower Provinces where he has been representing his firm owing to the illness of another traveler.

Ontario.

Thos. Barnett, Walkerton, is closing out his stove and tinware business.

A. W. Humphries & Son, Parkhill, are advertising a "Quarter Century Sale."

John Young, who established a stove and hardware business at Thornbury in 1862, died last week, aged 82.

The Onward Manufacturing Company, Berlin, Ont., report that their sliding furniture shoes are being generally stocked by hardware dealers in place of the old style wheel castors.

R. H. Smart, Brockville, has just installed in his store an equipment of seven Bowser pumps for handling oils.

William Knight, of the Amherst Foundry Company, Amherst, N.S., was a visitor in Toronto on Wednesday and Thursday.

The Crown Plate Glass and Window Glass Co., Toronto, suffered $1,500 damage to building and stock by a fire on their premises last week.

The large new store and warehouse of the Vokes Hardware Co. on Queen St. east, Toronto, was broken into by burglars last week and cutlery valued at between $200 and $300 taken.

Charles A. Moore, formerly accountant for the Stratford Chair Co., has been appointed manager and secretary-treasurer of the Stratford Manufacturing Company, manufacturers of ladders, lawn swings, etc.

John R. Folsetter, Ayr, has sold his hardware business to R. C. Puddicombe, of the Hobbs Hardware Co., London, who has also purchased the stove and tinware business of M. G. Otto. The two businesses will be combined in the Folsetter block.

Geo. W. Ecclestone, whose hardware store at Bracebridge was damaged by fire last week, was caught by telegraph in Toronto before leaving for California. He will postpone his western trip. The loss is placed between $15,000 and $20,000, but is covered by insurance.

CATALOGUES.

Everything in Wire.—A particularly fine catalogue is that issued by The B. Greening Wire Co., Hamilton. Though numbered 10, it is the first complete catalogue published by the company since 1905. The catalogue is a book of 228 pages, bound in green cloth, stamped with gold, and printed on coated paper. The illustrations are many and of first class quality. A short historical sketch of the Greenings and the wire industry leads the reader to the series of products made by the company—perforated metals, cloth, lathing, rope, guards, counter railings, etc., all made of wire. All the lines manufactured are fully described. In wire cloth the decimal size of opening as well as the size of wire is given, thus enabling a person to see at a glance what size of mesh in a heavier wire would give the same opening. Full-size illustrations of perforated metal lines are given showing exactly what the article is. Each section of the catalogue is entirely distinct and separate, this hardware catalogue being simply the entire series of department lists bound together and brought down to date. A useful chapter is that devoted to shipping weights whereby the hardwareman may figure his cost laid down in making quotations. There is as well a complete telegraph code and a very full index. Sent as it is to members of the hardware trade only it should prove a helpful book to all those merchants who receive it. If any hardwaremen in the Dominion have been overlooked the management would gladly sent a copy on receipt of a post card.

"Hobbies" Fretwork.—Hobbies, the English company which caters to the amateur wood and metal worker all over the world, are making a strong onslaught upon the Canadian market. In the Old Country especially, fretwork is never considered without the association of Hobbies. For years the ingenuity of the firm's experts, with the help of special machinery and plant has been devoted to the evolution of tools and contrivances to help amateurs, and professionals so far as that goes, in making artistic wood and metal articles.

Their representative, C. R. Bloxman, is now taking a business trip throughout Canada. The registered office of the company is at 12 Paternoster Sq. London, and the factory at Dereham, England.

A WORLD'S LEAD TRUST.

It is reported from London that 70 per cent. of the entire world's lead supply is to be brought under the absolute control of one group of separate corporations, and that prices are to advance from $68.75 to $100 a ton. This world's trust, it is said, will control the production of Canada, Mexico, the United States, Spain and Australia. The meeting at which this trust was formed was held at Paris, and Edward Bursh, vice-president of the American Smelting and Refining Co., B. Hochschild, treasurer of the American Metals Co., and Mr. Gardiner, of Merton & Co., London, representing Spanish and Australian interests participated in the conference.

The interests concerned besides the above comprise the Guggenheims and other American producers, the Spanish Ass'n of Lead Producers, the Broken Hill interests of Australia and the German Lead Trust.

John A. Macdonald, a prominent New York metal man who arranged the deal between the Spanish and German interests in an interview said: "Lead is too low and has been for a long time, but this new arrangement will enable us to put the industry on a safe basis without injuring anyone."

A number of Toronto metal and paint men were interviewed in regard to this lead trust, and without exception the metal men "pooh poohed" the idea of an advance in lead prices. Nor did they think much of the story about the trust getting hold of the bulk of the production. "It is like one of those stories which we hear every little while about some man from Podunk discovering a process for the fusing of copper," said Mr. Pepall, of Samuel, Benjamin & Co. Wm. Harris, of the Canada Metal Co., had seen the advance in lead quoted in New York, but there is no increase here. "I bought 50 tons the other day and I ought to know."

The paint jobbers, however looked at it differently, and felt that if there was an increase in the price of pig lead, an advance in white lead and paints might be looked for, some stating that white lead might advance a dollar a hundred more than at present.

Trade News From Atlantic to Pacific

Trade Gossip from Eastern Canada

Halifax Firm Loses Heavily by Fire—Brooms and Brushes Being Displayed in Hardware Windows—Montreal Foundry Changes Hands.

HALIFAX.

May 11.—Hardwaremen report that business is looking up since the opening of May. The demand from the farming districts has improved very greatly, and on the whole conditions appear to be quite satisfactory. Barbed and plain wire is in good demand, also poultry netting, nails, spikes, tarred and metal roofing, paints, oils and varnishes. With the improved conditions in the weather dealers are hopeful of business becoming much brisker. There have been some slight changes in the prices of metals, which are a little easier. Prices of other lines are pretty steady.

Another Halifax hardware firm has again been hard hit by fire. This time it is the reliable house of H. H. Fuller & Co., the oldest firm carrying on a hardware business in this city. The loss to the firm at the present time is a most disastrous one, as they had just completed their spring stocks, the warehouses being filled with new goods. In addition to having large orders on hand, the firm has the contract to supply the city with hardware for the present year, and now they will have to depend on other firms to help them out of their difficulty. The firm occupied three separate buildings, all connected with the retail store fronting on Water Street, The fire originated in the iron warehouse on the waterfront, and worked its way up through the other buildings. The whole stock was practically ruined, if not by fire, by water. The flames spread throughout the building with such remarkable rapidity that the firemen were able to remove only a small quantity of stock from the front of the retail store. The firm's loss is estimated at about $60,000, on which there is about $40,000 insurance in local offices. The buildings did not belong to the firm, they being owned by the Collins Estate. The firm have opened temporary offices at 159 Granville Street. The firm will resume business, but whether at the old stand or in new quarters, has not yet been decided. The principal members of the firm are Messrs. Stearns and Laurence, the business being under the general management of Henry Bennett. The cause of the fire is not known, but it is supposed to have originated from spontaneous combustion.

Several other firms in the immediate neighborhood were also burned out. Among these were the firm of Donovan & Brennan, tinsmiths, plumbers and dealers in stoves and supplies, their loss being about $2,000, covered by insurance J. L. H.

ST. JOHN.

May 12.—Practically all the hardware dealers are now showing in their windows an extensive array of housecleaning materials, such as brushes, mops, brooms, pails, scouring soaps and powders, etc. Paints and paint brushes, sporting goods, including athletic accessories, yachting supplies and fishing tackle are also being prominently shown. Other lines displayed include garden tools, bird cages and an attractive lot of nickled, brass and copper kettles, etc. Trade is reported brisk and collections about as usual.

The new fire escapes ordered to be placed on the public schools are about completed. The contractors, William Lewis & Sons, have been at work on the order for some months and as soon as the necessary mason work has been completed the escapes will be placed in position.

Plans have been prepared by Architect F. Neil Brodie, for the new Bank of New Brunswick building to be erected in Charlotte St. Tenders will be called for very shortly.

Tenders are being called for the erection of a court house at Woodstock, according to plans prepared by F. Neil Brodie, St. John. Tenders close May 21 with J. G. Hartley, secretary-treasurer, Woodstock.

On Saturday, May 8, an application for the winding up of the H. H. Dryden Co., Limited, tin and enamelware manufacturers, of Sussex, was made by the Thomas Davidson Company, Montreal, who are the largest creditors. An offer of thirty cents on the dollar by the company was not accepted by the creditors. The liabilities are placed at about $32,000. The claim of the Thomas Davidson Company is about $14,000.

W. E. H.

NEWCASTLE.

May 10.—Building is brisker here this spring than usual. A new schoolhouse is going up to cost $40,000. Also an annex to St. James' Presbyterian church, to cost about $3,000. A handsome new Anglican rectory has just been completed.

The Anderson Furniture Co., whose factory here was recently burned, has been turned down by the Nova Scotia Legislature, which refused to pass the bill authorizing Halifax to loan the company $40,000. There is some talk of them rebuilding here.

The prospects are now that the Drummond Iron Corporation will ship their iron ore from Newcastle to a Nova Scotian smelter.

W. O. McAllister, Moncton, has invented a new iron ladder, which is proving a good seller. The ladder is made in sections of steel. Bolts or rivets are not used in the construction. Steel bars, 56 inches in length, and 7-16 inches in diameter, go through a bending process, thus forming the sections, which are locked together. Each section has a width of 14 inches, with the steps 12 inches, and a foothold 3½ inches. These sections are made at the rate of one a minute. One man can make 450 feet complete in one day. The sections after bending are heated and dipped into hot thermolite, which provides a most endurable covering. H. H. S.

MONTREAL.

May 12.—Three St. John, N.B., young men, Allan McAvity, Andrew Jones and Arthur M. Irvine, have secured control of Parker Bros. Foundry, Montreal. Mr. Jones is engaged in the machinery business in Montreal and Messrs. McAvity and Irvine are managing the Canadian business of the Buffalo Forge Company. The venture will not interfere in any way with the present business of the three proprietors.

May 12.—Bleury St. has been embellished by a couple of attractive looking new hardware stores. J. A. Jackson, who was formerly one of Lewis Bros.' representatives, has opened up most spacious premises near St. Catherine St. E. D. Colleret & Co., who were formerly on St. Lawrence Boulevard, are responsible for the other store. The interior of the store is well arranged, and the window display is very striking.

Drummond, McCall & Co. have removed from the Canada Life Building, Montreal, to more commodious rooms in the new Mark Fisher Building, Victoria Square.

It has been argued by some dealers that bicycles cannot be effectively displayed in the window with other sporting articles. This is shown otherwise by the Arlington Bicycle Co., Beaver Hall Hill, who are displaying a well assorted window of sporting goods, etc., with a couple of high-grade machines occupying the central position. The hardwareman is really the best situated to cope with and make the most of the trade that is now springing up for good class bicycles. F. J. A.

Items of Interest Gathered in Ontario

Interesting Legal Case at Peterboro—Cheap Goods Sold at St. Thomas—Brantford Merchants Appoint an Official Collector—Goods Being Displayed in Hardware Windows Throughout the Province.

KINGSTON.

May 11.—Local hardware dealers report that business has greatly improved and credits this change to the large amount of building, and also to the number of boats being built.

Archibald Strachan, Kingston's veteran hardware merchant, received official notice from Ottawa of his appointment as collector of customs, and commenced his duties this week.

Housecleaning time is here, and a great many of the grocers, as well as the hardwaremen are displaying brushes brooms and whisks, and also doing some extra advertising in the local papers.

E. G. B.

PETERBORO.

May 12.—Purity Ware, Limited, which expects to locate in Peterboro, manufacturing enamel and galvanized iron ware, have rented offices in the Opera House block.

A police court case of interest to merchants in general arose last week. J. M. Donovan, a grocer, was owed a debt of $1.20 which he had tried in vain to collect. The woman sent her son with a five dollar bill to Mr. Donovan in order to have it changed. The boy said it belonged to his mother, and the grocer kept his $1.20 and gave the boy the change. The woman charged Mr. Donovan with stealing the money. She said the bill belonged to her daughter who had wanted it changed in order to pay $3 for board. The customer also stated that Mr. Donovan had not sent a bill and that she did not really owe the money. If he had proven her debt to him she would have paid it. Mr. Donovan argued that he did endeavor to collect and had almost relinquished hope of getting his money. He did not have his books in court so the magistrate remanded the case for a week, urging the parties to settle the matter between themselves in the meantime.

The Best Stove and Hardware Co. state that their advertising scheme is proving satisfactory. They publish monthly the names of the five persons who have bought the largest amount of goods in their store. Five prizes will be given at the end of the year to those whose purchases have been the heaviest.

The Peterboro Hardware Co. have a window of lawn mowers which are now quite seasonable. Already lawns are being trimmed and the idea is one which is up to the minute.

A suggestion of summer is given to the public in another manner by the Kingan Hardware Co. Their Main St. window contains an attractive display of refrigerators and ice cream freezers.

All the hardware merchants are still pushing the paint business. Whiting, turpentine, oil, brushes and the many necessities of the housecleaning army are selling well. The Higgins Hardware Co. have an attractive window of paints, brushes and housecleaning articles.

Business activity is brightening considerably and is fully appreciated in the hardware business. The weather is proving rather backward and is certainly not helping matters.

H. T.

OTTAWA.

May 12.—The Capital Scale, Brass and Iron Foundry Company has purchased a large lot on the corner of Duke St. and Queen St west, on which they will erect a machine shop 40x90 and a foundry 30x20. The building will be cement blocks and construction begun at once.

J. E. Wilson, of Carleton Place, has joined Charles Watt's staff.

G. E. M. H.

BRANTFORD.

May 11.—With spring cleaning in full swing, the exhibits of brooms, brushes and paints in the local hardwaremen's windows are very timely. A. Ballantyne's window is perhaps the neatest dressed, a circle formed of brushes, radiating from a centre card being the basis. Howie & Feely also show a line of brushes. Watt & Squire make a fine showing of paints. Bishop & Son exhibit gardening utensils in their east window, and paints in the west window. Telephone City Stoves are having a sale of paints. Turnbull & Cutcliffe make an extra fine showing of copper and brass goods in their Colborne St. windows.

Telephone City Stoves have secured the agency for Martin-Senour paints.

As was forecasted by your correspondent in a recent issue of Hardware and Metal, the local branch of the American Radiator Company has purchased the property now occupied by them from the Cockshutt Plow Company. Plans are now being formulated for an extension of business at the plant in this city. P. H. Secord & Son have received the contract for changes at the factory at a cost of $5,000. New core ovens are being put in, tracks laid from the molding shop and more room in the warerooms. During the past few months the firm has been making extensive shipments to outside points.

At a largely attended meeting of the retail merchants of this city, held on Thursday evening, the Brantford Retail Merchants' Protective Association was formally organized, with a membership of 110—a very representative number. The committee which was appointed to enquire into, and obtain full details of the scheme now in force in Guelph for the protection of the retail merchants against "dead-beats," reported, expressing themselves as being heartily in its favor. They had received no less than 50 applications for the position of official collector, and from these a splendid man was chosen in the person of Norman Willits, late of the firm of Pettit & Willits, bakers. The regular Wednesday afternoon holidays for the clerks will commence in June and continue throughout July and August. A room will be secured on Market St. to hold the monthly meetings in.

There is some quiet agitation among the local clerks to abolish late closing hours on Saturday evening. W. A. Hollinrake, dry goods merchant, has inaugurated the move, closing at nine o'clock, in order that his clerks may not be tired out for Sunday. The clerks wish the rest of the firms to close up at the same hour, instead of waiting till 10. 10.30 and 11 o'clock.

The last has not been heard of the Liberty Oil and Drug Co., of New York, who lost their suit against Tipper & Son, of this city, for oil shipped. A number of Brantford merchants have received notices, stating that the accounts have been handed to an accountant in Hamilton for collection. On the advice of the solicitor no notice of this will be taken.

A. W.

LONDON.

May 11.—The McClary Manufacturing Company is contemplating the erection of a big addition to their molding plant in the south-east end of the city. The foundation will be put in at once and the building completed during the winder months. Superintendent King states that business is rapidly improving, and that at the present time 450 men, the greatest number since the erection of the new buildings in that section, are now employed sixty hours a week. McClary's total staff numbers about 1,000 men and in addition there are about 250 employed in the different branch warehouses throughout Canada.

A big United States manufacturing concern, capitalized at $1,500,000, and whose name is kept secret lest other cities should get after it, is making inquiries concerning London as a place in which to locate a branch factory. The Mayor is now in communication with these people.

F. T. Y.

ST. THOMAS.

May 11.—The local Knox store announced last week a factory clearing sale. Among the articles advertised being a five foot step ladder for 15c. The sale opened on Thursday morning at 9 a.m., and at 8 a.m. the crowd began to gather. After the sale started there was a line of men, women and children carting step ladders down the street. Only one was sold to each purchaser.

One woman in particular took three girls with her, so that she could get a supply. Before she had reached home two of the ladders went to pieces. She told a neighbor that she would have been ahead if she had gone to her hardware dealer and bought one good ladder. Another woman fell through one and was severely hurt. It goes to show no matter how absurd a thing is, if it is advertised it will sell. Why will people buy such stuff, and not make a kick. If the same deal was put up by any of the hardware dealers they would have had all the ladders returned to them or suits for damages in case of an accident.

G. A. McMurtry has opened a new hardware store in opposition to the McMurtry Hardware Co. and other St. Thomas stores.

Matt Loney has let the contract for a block of cement houses at Port Stanley.

The local merchants are all making window displays of brushes, brooms and other house cleaning necessities, lawn and garden tools, paint, etc. Some very good effects are obtained.

G. W. Davey, of Ingram & Davey spent last week in Toronto.

The Ontario Fire Underwriters' Association has notified local agents of a reduction of 15c. per $100 to take effect at once.

The case of the Metallic Co. which was noted in this column a short while ago, was settled out of court, but the company must have had a good sized amount to be charged up to loss.

The Simcoe assessor reports an increase of assessment over last year of $49,000 and 130 increase in population.

G. A. F.

GUELPH.

May 12.—In hopes that the weather will soon be warm and seasonable, the Bond Hardware Co., H. Occomore and other local hardwaremen are ready to make a good showing of refrigerators.

Penfold Brothers, in common with all other Guelph hardware firms, have felt the need of brighter weather to make their building trade accessories move out as they should at this season, but they have been fortunate at this time in having a good demand for their roofing materials and wire nettings.

McMillan Bros. have windows this week containing sporting goods and fishing tackle. Bond's windows are dressed with paints and garden tools. Garden tools and sporting goods are also being made the feature displays in Richardson's windows this week, while Occomore's have one of the best woodenware windows seen here for some time.

Speaking of hardwaremen taking up side lines, one of the most prominent ones of this city expressed the opinion that it was just at poor seasons like this one that the benefit of a good side line as a business-getter is best appreciated. "Now, this is Monday," he said, "we ought to be busy sending kegs of nails and bags of cement out all over the city, but there is practically nothing doing at all in that line; our clerks are not idle, however, just come round the corner of the store and see the stir in the linoleum department." The department referred to was visited and there, sure enough, several customers were being waited on. The fact that this branch of the business was paying well was evidenced by the manner in which it was fitted out. Every roll of oilcloth was hung up on an elevated rack. These racks are so arranged that every pattern in the place could be shown to a customer and not one roll necessarily taken down and laid out on the floor, an operation that entails a good deal of labor and takes up a lot of room.

H. S. N.

CHATHAM.

May 11.—Though the weather has been unfavorable business is reported good. Spring window displays are in order, paints, screen doors, lawn mowers, garden tools and rubber hose being prominent features, brooms, brushes and indoor housecleaning appliances being also shown.

R. Riddell & Sons are making a feature of bicycle repairs and lawn mower overhauling in connection with their machine shop. These are lines which the regular hardwaremen touch very little. From all accounts the bicycle repair business, at one time a veritable "gold mine," has dwindled considerably of late years. This is due, not so much to the disuse of the bicycle, as to the fact that bicycles are most largely used by mechanics in the factories, who feel competent to do their own repairing.

Geo. M. Watt, of Jas. Watt & Son, plumbers, who recently underwent an operation for appendicitis is now fully recovered.

Stephen & Douglas were, at the last meeting of the water commissioners, awarded the contract for waterworks supplies for the current year.

The International Varnish Co., Toronto, is sending out "Lacqueret" advertising cards to householders throughout the city, in the interests of J. C. Wanless.

C. E. Myers, the Blenheim hardwareman, is giving considerable attention to bicycles, putting out a Myers' Special wheel. E. W. Myers, of Tillsonburg, has recently moved to Blenheim, and will join his brother in the business.

W. E. P.

News from West of Great Lakes

New Heating Supply House at Winnipeg—Large Order for Steel Fence Posts Resulting From An Advertisement in Hardware and Metal—Trade Outlook Good on the Pacific Coast.

VANCOUVER.

May 7.—Hardware men continue to report activity better than ever, with every prospect of it keeping up. In plumbing, there is plenty to do, at remunerative rates. In shipbuilding yards, many constructions are on the way, in the shape of scows, tugs, and small boats. While there is an improvement in the lumber industry, a prominent manufacturer remarked this morning to the Hardware and Metal that general conditions were not of the best. There was the anomaly of logs being quoted as high as $13, and the cost of them was equal to the selling price of rough lumber, whereas to be on a margin of profit, rough lumber should sell say at $3 more. Logging camps are starting up all over, and before the summer is ended there should be plenty on hand for all purposes.

The initial draft of the plumbing by-law has now been completed by the committee and is ready for consideration by the city council. Among the important changes is one which requires a fall of 1 foot in 30 for connections with the city sewers, this displacing the present regulation of a fall of one foot in forty. The demand is also made for the deposit of $25 by a plumber in connection with tearing up of block-paved streets. In the technical line alterations are those requiring that all exposed soil pipes shall be coated with asphaltum or the Dr. Agnes Smith preparation, that all waste pipes from sinks must be two inches in diameter and that vents from toilets must not open below any window of an adjoining building. As the by-law now stands no provision is made for plumbing work to be done by certificated men.

W. T. Rodden, of Montreal, president of the Western Explosives, Ltd., is in the city to inspect the plant of the company on Bowen Island, three or four miles from the city. In less than a couple of months, it is expected the factory will be in operation. All the raw materials from Chili, Japan and the United States have arrived.

R. B. B.

VICTORIA.

May 7.—The Y.M.C.A. have succeeded in raising $100,000 in two weeks. On April 30, $100,362.75 had been promised and building is to commence as soon as a site can be secured.

A special meeting of the school board was held yesterday when the type of heating apparatus to be installed in the new $63,000 school was considered. The Buffalo Forge Co., Montreal, will be asked to supply a figure for which the steam blower system can be installed.

Trade still continues active and the prospects are very bright for a good year for the coast. Real estate sales have been good of late some very good sales having been made and several new residential districts have been opened up and have found ready sale.

The Masonic Society of Victoria, are to put a large addition to and entirely reconstruct their present temple.

Tenders will be called in a few days for the grading and construction of the Alberni extension of the E. & N. Ry, from French Creek to Alberni. This line is opening up a very fine country and will mean much to the island when finished.

Mr. Payne, managing director Geo. Wostenholm and Sons, Sheffield, England, makers of the world known I.X.L. cutlery is in town this week.

W.B.C.

WINNIPEG.

May 11.—Winnipeg retail merchants have been deprived of a very valuable line of trade within the past few years due to the large business done in the departmental stores in household goods. The competition is necessarily keen in the somewhat limited lines which the retailers are compelled to carry. One merchant, who until three years ago, conducted a heavy business in granite and kitchen wares, is to-day doing a business 75 per cent. of which is in builders' tools and hardware. Such evidences of specialization are increasing.

The Continental Oil Company of Winnipeg, the Canadian corporation of the Continental Refining Company of Pennsylvania, is meeting with success in its endeavor to place goods in western Canada. Although they have been incorporated since the new year, four large warehouses have been built in Winnipeg, Regina, Saskatoon and Calgary, from which shipments are going out freely to all parts of the west. J. S. Wilbert, the western manager, says the trade has opened up well this spring considering the fact that there are five oil companies in the field.

Charles D. Waldon, late of Pease-Waldon Furnace Co., of this city, has recently arrived from the east where he has been making preparations for the opening, in the near future, of a steam-heating and furnace wholesale house in Winnipeg.

The Purity Manufacturing Company, a branch of the Hardware and Specialty Catalogue House of that name in Buffalo, N.Y., has sold out its local stock to Robinson & Company, of this city.

Henry Miller, head of the Miller-Morse Hardware Company, of this city, has returned from a four months' trip to Europe.

Two new devices recently patented by the Munro Steel and Wire Company of this city, are becoming very popular in Western Canada. One of these articles is the steel fence post which was advertised in Hardware and Metal a few weeks ago. Mr. Munro says that one advertisement brought him an order for three car loads or 21,000 posts. These posts are destined to become extensively used in this country where cedar is not to be had.

The other device is the Munro fence lock which is simply the upright supports for the wire fence upon which locks are made which fit into the smooth strands of wire. They sell the upright locks in bundles and the wire in the original coils. They have sold the exclusive right to handle this fence in British Columbia, for the sum of $10,000.

The Manitoba Bridge and Iron Works, Limited, has obtained the contract from the general contractors, Haney, Quinlan & Robertson, for the whole of the structural steel in the new Transcontinental railway shops at St. Boniface, amounting to nearly 5,000 tons. This is the largest contract for structural material that has been given in Canada this year, the contract price being in the neighborhood of $350,000.

Morkill & Scott, of Dominion City, Manitoba, who have been in the hardware and grocery business since 1881, have sold out to H. Wellband, of that town.

The Canadian H. W. Johns-Manville Co., Toronto, manufacturers of asbestos wares of all descriptions, of Milwaukee and New York, have decided to open a branch warehouse in Winnipeg to serve the prairie provinces with their manufactures, with M. C. Burgess as representative.

Frank Simms, son of the late T. S. Simms, the brush and broom manufacturer, of St. John, New Brunswick, is in the city in interest of the firm of which he is now the head. He has just returned from Vancouver and intermediate points.

The Boswell Bicycle and Skate Company, Limited, has been incorporated recently in Winnipeg with a capital stock of $5,000, for the purpose of manufacturing those articles in this city.

Several local business men have secured letters patent incorporating a company under the name of "The United Glass Manufacturing Company, Limited," with a capital of $500,000. The offices of the firm for the present are in the Ashdown building in this city. John H. Gunn, president of the company, says that about $75,000 will be spent in building a factory, glass plant and warehouse this summer on the site recently obtained for the industry which will be adjacent to the new Grand Trunk Pacific shops now under construction. Ten acres have been purchased on which to erect buildings and an option on an additional six acres has been secured. The sand to be used in the works will be obtained from deposits about thirty miles east of the factory site, to which a spur track will be run.

Theodore Korb, for the past six years resident in Canada in the service of wholesale hardware houses, left Edmonton recently for Louisville, Kentucky, to assume the management of the Belknap Hardware and Manufacturing Company Advertising Department. Mr. Korb has confined his attention more particularly to catalogue compiling while in Canada. Among the several wholesale houses he has served in this way are Lewis Bros., Montreal, Miller-Morse, Winnipeg, and E. G. Prior, Victoria.

E. A. Dykes for a number of years in the retail hardware business in this city, has left the city with about $6,000 worth of stock to conduct a similar business in some Saskatchewan town. It is not known where he will locate, since when he left the city he had designs on several towns in which he felt satisfied an encouraging trade could be worked up.

The hardware stock formerly owned by Neil Lightly, a north-end retailer, has been taken over by the J. H. Ashdown Wholesale Hardware Company.

The Pease-Waldon Furnace Co., of this city, are in receipt of orders to supply furnaces to the Cranbrook public school, two schools in Dauphin, Manitoba, and the Minnedosa school. L. C. H.

SASKATOON.

May 11.—The plans for the new C.N.R. depot to be erected here have arrived in the city and it is probable that the tender for erecting the building will be let in a few days.

J. G. Nicholson is to build an addition to his warehouse.

The Agnew Bros. Hardware Co. have called for tenders on the three-storey block which they will erect this season.

T. J. Henderson, of Henderson & Batterby, hardware merchants, Broderick, Sask., was in the city last week.

The tender of McVean & Craig on sewer and water extensions throughout the city, has been accepted by the council. The figure at which the contract is let is $3,237.

On May 29 the citizens will vote on several money by-laws. They include the raising of $26,400 for macadamizing streets in the business district; $14,000 for extension of waterworks system; $10,000 towards equipment for the electric plant; $9,600 to provide for sewer extensions; $13,000 for grading streets and building sidewalks.

A. W. Cassidy, whose tender for $31,725 was accepted by Saskatoon public school board on a new school, has thrown up his contract and excavating operations have ceased in the meantime. Mr. Cassidy claims that he made a mistake of $10,000 in figuring out the tender. The contract had been signed by trustees and contractor and a deposit of $1,000 put up. A special meeting of the board has been called to adjust matters. D. G. R.

WESTERN CANADA NOTES.

E. A. Dykes & Co. are giving up their hardware business at Winnipeg.

The Hockin-Siddons Co., a new wholesale hardware house at Moose Jaw, will be managed by Ross Bros.

R. G. Swain, hardwareman and harness dealer, Altamont, Man., has sold his hardware business to Ross Davidson.

Wankel & Bare, hardware and lumber merchants, Oak River, Man., have sold their hardware business to Hume & Osborne.

HARDWAREMEN AND MUSIC.

E. A. Humphries, Parkhill, son of the former president of the Ontario Retail Hardware Association, is the subject of a half-column article in last week's Parkhill Post. Mr. Humphries has organized the Parkhill Choral Society, composed of 100 singers, and has been training them with credit to himself. With Fred C. Lariviere, Montreal, as president of Montreal's leading chorus, S. H. Alexander, of Wood, Vallance & Co., Hamilton, secretary of Hamilton's best choir, and Mr. Humphries, as conductor of the Parkhill organization, the hardware trade cannot be said to be lacking in musical talent.

PAY FOR QUALITY.

After buying a piece of meat did you ever discover that you had unexpectedly paid for quite a chunk of bone? Cheaper to pay more a pound for clear meat. The "bone" in rope is composed of cheap fibre, French clay, excess of oil, etc. It is cheaper to pay more per pound for the best brand, which is all "meat."

SAVE MONEY

By Using Our

Corrugated or Plain Round Conductor Pipe

made in 2", 3", 4", 5", 6" diameter by 8′ and 10′ lengths without a cross seam. You can buy this perfect pipe for much less than you can make up pipe in 30′ lengths. Our Eave Trough is the best; it is machine made on a steel die and every length is the same.

SEE THAT YOUR WHOLESALER SUPPLIES YOU WITH OUR PIPE AND TROUGH

FOR SALE EVERYWHERE

In the Beginning

that's when

Pease Furnaces

cost most. The best iron and steel used in proper quantities and assembled by only expert workmen backed by an experience of over thirty-five years is worth money—cost money.

In the End

that's when

Pease Furnaces

cost least, because the life of a Pease furnace is long—it gives satisfaction all the time, and means reduced repair and fuel bills.

You can add to your list of pleased customers with a Pease Agency.

Western Canada Market Situation

Our Western Correspondent Reviews the Market Outlook—Hardware Quotations Corrected by Telegraph up to Noon on Friday.

The general revival of trade among the retailers has not yet affected the wholesale trade. The business has been dull in both lines for several weeks owing to the prolonged cold weather.

Within the past week building operations began in many quarters, and if the building permits are carried out many more will begin very soon. Builders hardware is the line the majority of local retailers depend upon more particularly, and it is interesting to note the rise and fall of trade according to the extent of building activity.

Refrigerators, paints and brushes, and sporting goods are moving well generally.

It is expected that nails will advance in price within a few days. An advance is quoted in Chicago to-day.

Winnipeg Quotations.

WIRE—Barbed wire, 100 lbs., $3.15; plain twist, $3.40; staples, $2.90; annealed wire, $2.90 base; oiled, 10c extra; bright iron, $3.10 base; brass spring wire, 29c base; plain galvanized, wire, 6, 7 and 8, $3.50; No. 9, $3.10; No. 10, $3.00; No. 11, $3.70; No. 12, $3.30; No. 13, $3.40; No. 14, $4.25; No. 15, $4.75; No. 16, $5.

THE LITTLE PAINT MAN.

The Truth About S. W. P.

We could not make better house paint than S. W. P. if we charged ten times as much, and on the other hand we could not make as good paint if we charged less—I know, 'cause I work in the factory an' know just how it's made—I've seen the stuff that goes into it and know it's right up to standard. This allows the fact to remain that S. W. P. is the kind of merchandise that growing, progressive, business-like merchants want to handle. There's any number of advantages in selling a good standard article like S. W. P. instead of selling cheaper goods at a lower price. I am jotting down one or two of them below. Read them at least twice.

The Little Paint Man

There is more profit on each sale.

The customers who buy good standard merchandise are more desirable customers in every way, easier to handle, quicker to wait on, easier to satisfy and better pay than those who are always haggling over the price.

S. W. P. is the backbone of the Sherwin-Williams Agency, than which there is no stronger agency proposition in any line. The S-W Agency not only embraces the highest quality goods in the paint and varnish trade, but the best advertised and best established goods. We are always planning new ways of increasing the consumption of S-W. Products. Just at present we are carrying on an extensive campaign in 180 of the best national and local newspapers throughout the country. You should have this force working for you. Write us for full particulars.

BUILDING AND INDUSTRIAL NEWS

For additional items see the correspondence pages. Information is solicited regarding building and industrial news, the incorporation of companies, establishment or enlargement of mills, factories or foundries, municipal waterworks and sewerage systems, railway or mining news, etc.

Industrial Activity.

The Pacific Coast Gypsum Co. will erect a new plant at Vancouver.

The Keystone Engineering Co., Toronto, purpose locating at Wiarton.

Whitney Bros., Superior, Wis., propose building a large dry dock at Fort William.

Preliminary work on the construction of the G.T.P. shops and bridge atWinnipeg has been begun.

The American Radiator Co., Brantford, have bought some property there and will extend their plant.

Sheet steel roller mills for the manufacture of block tin and sheet steel will be erected this year at Peterboro.

Wiarton hopes to obtain the big steel plant purposed to be built at some Georgian Bay port by a Universal, Pa., steel concern.

Two U.S. industrial concerns, whose names are not mentioned, are negotiating with the London civic authorities for factory sites.

The Vigars-Shear Lumber Mills, at Port Arthur, have resumed operations and 300 men will be employed in them until next winter.

The Dominion Carbolinium Works will erect a large plant and expend several thousand dollars in modern machinery and improvements at Vancouver.

The Bond Transmission and Foundry Co., of Mannheim, Dakota, intend locating a branch in Canada, and are looking over the possibilities of Alexandria.

Orillia has passed a by-law to grant the E. Long Co., a free site for a new factory and plant and fixed the assessment. The company agree to increase the employes by over 50 per cent. They now employ 70.

The McClary Mfg. Co., London, is contemplating the erection of a big addition to the molding plant. The foundation will be put in within a few weeks, and the building will be completed during the winter months.

Samuel J. Shimer & Sons, a Pennsylvania concern, have obtained a license to manufacture in Ontario rotary cutter heads and other tools and machinery from metals. The Canadian headquarters of the company are at Galt.

The Capital Scale, Brass and Iron Foundry Co., has purchased a large lot on which a factory will be erected. Construction will be begun at once. The factory will be for the manufacture of special patents and devices, and there will be a foundry in connection.

A reorganization of the Canadian Portland Cement Co., Wiarton, has been effected and the company will resume operations at once. The assets of the concern are placed at $500,000 and an additional $100,000 has been subscribed to put the company on a good working basis.

Purity Ware, Limited, is a new company which will erect a large factory at Peterboro to manufacture all kinds of enamelware, galvanized iron ware and range boilers. $150,000 worth of machinery will be installed and 100 men will be employed at first, which may later be increased to 500.

Welland has secured another industry in the Canadian Seamless Steel Co., manufacturers of bathroom fixtures and all heavy articles of pressed steel. A plant to cost $125,000 will be built, and 75 hands will be employed at the start, to be increased to 200 by January 1, next. The parent company of the local industry is the Seamless Steel Mfg. Co., of Detroit.

Municipal Undertakings.

Construction work has begun on sewer and water extensions at Saskatoon.

The time for receiving tenders for Estevan's (Sask.) waterworks system and main sewer has been extended to May 26.

Winnipeg controllers have placed the laying of a water main on Jessie avenue on the order paper for immediate construction.

The work of building a $7,000 extension to the Hull waterworks was approved at a recent meeting of the Hull city council.

At a recent meeting of the Walkerville town council, Engineer McKay reported upon the proposed new trunk sewer, estimated to cost $27,000.

Victoria ratepayers will be asked to sanction the raising of $125,000 for the purpose of purchasing pipe for the extension of the distribution system of waterworks.

An agreement has been reached between the C.P.R. and the Taber, Alta., council by which the railroad company agree to supply the necessary water from their water main to supply a waterworks system throughout the town. The town must put in their own laterals and high pressure tank. A by-law will be submitted to the people shortly and it is expected will be carried.

Railway Development.

The reconstruction of Brantford's street railway system will be pushed.

The Mount McKay and Kakabeka Falls Railway at Fort William will be constructed at once.

Trains are expected to be running over the Winnipeg-Fort William branch of the G. T. P. by the end of July.

Work on the newly chartered North-Western Railway, an electric line from London to Sarnia, will commence shortly and be hurried through to completion.

Contracts are reported to have been let to Foley, Welsh and Stewart for the construction of 40 miles of C.P.R. line northerly of Cheadle, Alta. for 28 miles northerly from Kipp to Little Bow River, Alta.; and for 35 miles easterly from near Lacombe, Alta. A contract is also reported to have been let to Dutton & Finson for the construction of 20 miles westerly form Weyburn, Sask.

New Companies.

The Energite Explosive Co., Haileybury; capital, $175,000. To manufacture powder, dynamite and other explosives. Incorporators, L. Sohier, G. Nicot and J. R. Genin, Montreal.

Steel Reesor Co., Toronto, capital, $60,000; to manufacture stoves, furnaces, engines, boilers, plumbing and hardware supplies. Incorporators, J. Reesor, C. W. Steel and Geo. Hickey, Toronto.

Catalogues and Booklets

Manufacturers or jobbers sending printed matter for review, should draw attention to the new lines listed; and retailers sending for catalogues or other matter, should write on their regular printed letterhead and mention this paper to make clear that they are in the trade.

Summer Cooking Specialties. — The foregoing is the title of McClary's 1909 catalogue of summer lines. The company is calling special attention just now the the "Caloric" gas range, which this season has been much improved. It is made in 35 styles and sizes, and may be used for both natural and artificial gas. This range is treated of in the catalogue under review, as are the "Chelsea" hot plate gas stove, and the "Model" oil stove. Other lamp, gasolene and oil stoves are as well described, and an unique line is the "Model" knocked-down oven, which, as its name implies, is a collapsable oven that may be folded in a small parcel. Then there are the oil heaters and enamelware lines of kitchen utensils and sundries and ice cream freezers, refrigerators, and other articles which are brought to one's notice during the hot weather months—all of them are noticed in this 1909 catalogue.

Canada Foundry Co.—Under the title "Our Product," the Canada Foundry Co., Toronto, has issued a booklet in a convenient form for distribution among those interested in the output of its works. The company claims to be the largest general engineering and manufacturing company in Canada, and the booklet under review is devoted to a description of these and other manufactures of the concern. Three works are operated by the concern—at Toronto, where are built locomotives, boilers, dredges, bridges and gas engines; the Ornamental Iron Works, also at Toronto, comprising machine shop, foundry, etc., and the Canadian General Electric Works, at Peterboro, where are constructed all manner of electrical apparatus and supplies. The booklet is printed on coated paper and is well illustrated, fully one-half of the book showing views of the works and the products of the company.

to sell the

Manitoba Steel Plate Furnace

We want a good hardware man in every town to handle our furnace. It will burn Souris and other soft coals mined in the West, and it will burn them economically. It is the furnace Western people have been looking for. If you are from Missouri, so much the better. Ask us and we will show you.

The consumer saves 25 to 40 per cent. on fuel when he uses the Manitoba.

The Brandon Machine Works Co., Limited

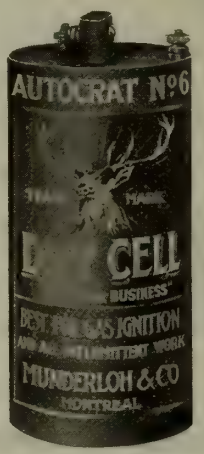
Brandon, Manitoba

Electrical and Lighting Supplies

Housecleaning Creates Much Business for this Department—Automobile and Motor Boat Supplies—Lighting by Acetylene.

Hardwaremen handling electrical supplies are extremely busy just now. With the spring cleaning many little improvements are being made to the electrical lighting. New style shades are being bought by the householder, while with the development of the power and economy of the lamps themselves, there is plenty of scope for new lines. As a rule the hardwareman is much more accessible than the electrical supply house pure and simple, and for minor breakages and improvements he is the best man for the trade. Door bell batteries are often going wrong, cutouts and sockets breaking, and dealers with the rapidly developing use of electricity can work up a most profitable demand. The carrying of electrical supplies is distinctly part and parcel of the hardware industry, just as gas and lamp supplies are, and not only that, but the handsome fixtures and pretty shades now on the market combine effectively with any display that the hardwareman might make of a general character. With the development of automobiling, the demand for batteries and other electrical apparatus is a rapidly increasing one.

Door Bell Batteries Eliminated.



In regard to batteries for door bell systems, an invention has been put on the market which does away with the inconvenience attending the exhaustion of the battery or the breaking of the connection. This is a tranformer which enables the householder to obtain the current from the electrical main, and thus dispense with a battery. It will operate on the ordinary lighting circuits, and can be installed by anyone with a slight knowledge of electricity. As it has no moving parts, once installed it will thereafter require no attention. It is adapted to operate on circuits running from 100 to 130 volts, and is provided with taps giving 6, 12, and 18 volts so as to meet the requirements of various styles and sizes of bells and buzzers.

Shooting by Electricity.

Electrical light is being brought in to help rifle firing at night, by illuminating the sights. A small battery fitted on the stock of the rifle serves to light a pair of miniature electric bulbs, placed on each side of the gun barrel, at the extreme end. The button which controls the electric circuit is fitted on the trigger guard, and when the operator presses this button, the miniature lamps serve to light the rifle sight. The lights, themselves, are shielded from view. In twilight hours it is often impossible to take any aim with the ordinary rifle, although the object fired at owing to its size may be readily seen. By illuminating the sights in the manner indicated the shooter may aim quite accurately. The invention should be valuable for close range firing at night."

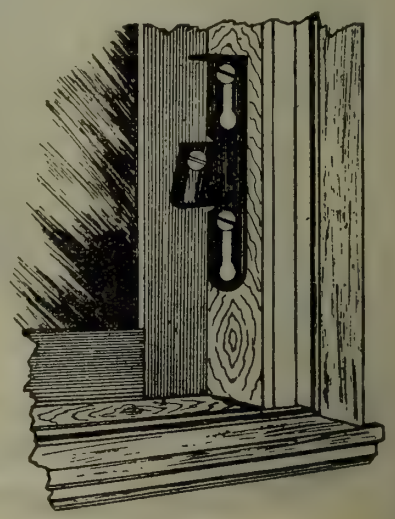
Electrical Catalogue.

Munderloh & Co., Montreal, who last year put up a large fireproof warehouse and factory, which is one of the finest buildings of its kind in Montreal, have just issued a very handsome electrical supply catalogue. The book is a work of art, and embodies in concise form

Autocrat Electric Battery.

nearly everything that can possibly be required for the electrical trade. It is particularly useful as a reference book, and any responsible dealer can have one by sending in a request. One of the lines shown is the Autocrat battery for automobiles and motor boats.

Acetylene Gas Lighting.



Since it has been proved that acetylene gas was capable of producing a light, and a good light too, and by which colors can be distinguished as easily as in daylight, many inferior machines for generating have been put on the market. This condition naturally caused dissatisfaction and for a time it seemed as if acetylene gas was doomed. More had to be learned. These difficulties and discouragements had to be overcome. Men of science and mechanics studied and experimented with success and proved that to produce acetylene gas certain conditions were necessary. A generator must be built of the proper dimensions, of the best material and workmanship, yet withal simple enough in design that any person could operate them with safety.

There should be no overheating of gas during its generation. This overheating was the greatest trouble with primitive machines (in which the heat was known to sometimes rise to 1,000 degrees.) It is no wonder, now that its nature is understood, that acetylene failed to give satisfaction in the past. Unless the acetylene is washed, and dried, relieving it of impurities, the bubbles destroyed, filtered, and made at a uniform temperature, it is impossible to get good results. The National Gas Generator, manufactured by the National Acetylene Gas Company, Sherbrooke, Que., is said to fulfil these requisites. It is well made, automatic, simple, durable, and is easily recharged, and cleaned. It is provided with a bell or floating gasometer which gives uniform pressure to the gas, and has but one place where to feed the water. It has an agitator or shaker, contains sufficient water to generate the gas and sufficient water to keep it cool. The National, which washes gas, destroys all bubbles, filters the gas, dries it, and gives a bright mellow light, is approved by the Canadian Fire Underwriters' Association. The company also has in hand certain new and useful improvements in flush tanks invented by J. O. Brousseau, of North Hatley, Que. By these improvements, which have been patented, the syphoning of the tank is made much more certain, while the defective closing of the inlet valves and outlet flush pipes, and consequent waste of water, is prevented.

STORM WINDOW FASTENER.

The storm window fastener manufactured by W. Bourque, East Sherbrooke, Que., is a simple and economical device not only for fastening windows in the winter but for screen windows or venetian blind frames. It can be used as an inside or outside fastener. Used inside the fasteners can be utilised to lock the sash for those who are closing their houses in the summer.

When in place the fastener is there to stay, and there is no trouble for the householder to take out screws every fall and spring. Once put on the only

Storm Window Fastener.

tool required is a hammer, and a few taps on the top projection draws the window tight as required. It is made of steel and will last a life time.

The Retail Paint Trade

A FARMER'S INSURANCE.

Although farmers are beginning to realize the value of paint, there is plenty of room for educative work on the part of the dealers who cater to the farming trade. It is a curious fact that although the progressive farmer may keep his farm buildings in good condition, he entirely neglects his implements. Yet the latter are as well worth saving as the former. Of course the farmer is inclined to look at the individual cost, and in a short sighted way act accordingly. He says, "my barn cost me a pile of money, and therefore I must pay a little to keep it in order, but my wagon, or my plough, or some other implement cost comparatively little, and I do not think that I will spend any more money on it." He forgets that wear and tear is not only affecting the one utensil but all the others on the farm at the same time, and that his implements in the aggregate total up a pretty heavy sum.

In addition the farmer is influenced by the fact that he has not yet grasped the full value of paint. He still considers it more as a decoration, something to make something else pretty, than as a magnificent preservative. It is the dealer who must drive these essential qualities of paint into the mind of the farmer. He must point out over and over again, for educative work of any kind is very slow, how the farmer can save money by using paint, how the life of his barns, fences, and implements can be prolonged. In fact a farmer by the regular use of paint can save on his implements alone enough money in a comparatively short term of years to build a barn or to completely restock his farm with new implements.

A progressive farmer who believes in paint recently stated that he saved thousands of dollars on his farms by the free use of the paint pail. He gave an instance of how by the expenditure of $10 worth of paint on three wagons in five years he had saved $100. Besides the wagons were to-day as good as when he had first purchased them. For instance, take the mower. Ordinarily it is exposed to rain and wind, sleet and snow. One hour, and fifteen cents worth of paint, will suffice to protect this mower for half a season. Usually the beam of the farmer's plow is checked and cracked. A single coat a season—five minutes' work and three cents worth of paint—will save it. Rake, hoe and shovel handles can be made as good as new by a few movements of the paint brush.

And going from implements to buildings there are thousands of barns throughout the country now well on the road to ruin that could be saved, if paint were used upon them this spring. Get after the farmer. Do not wait until he finds out all this for himself, or from a competitive dealer. Start the

Don't Get "Notions" About

Floorglaze

Please don't get the notion that FLOORGLAZE is good only for floors. FLOORGLAZE is a solid-color floor-enamel with all the elasticity of good paint, and more; and that has a dozen uses about the house, indoors and out. It's so advertised for you that it can't help selling once; and its own quality sells it again to the same people—and their neighbors. FLOORGLAZE is the kind of goods that strike you as about right for your store.

TACKS

Every household requires Tacks; Tacks made from good material, with heads that will not fly off easily, with points that are sharp and clean cut; Tacks carefully picked over, and culls thrown out.

This is the kind of Tacks we have been making for years, and the proof that they give satisfaction is found in the fact that they are stocked and sold by all the leading Hardware Houses in the country.

The Montreal Rolling Mills Co.

educative work at once, and when the farmer has been seized with your enthusiasm, not only will you make a good sale, but create a customer who will always be grateful for your advice, and who will realize as time goes on, how much you have saved him by your paint salesmanship.

Paint and Oil Markets

MONTREAL.

May 14.—The improvement in orders consequent upon the more spring-like weather has taxed the shipping facilities of the various paint and varnish concerns. The number of small orders is most marked, and this hand to mouth buying is creating some friction as it is most difficult to oblige every customer by shipping the moment the order is received while the rush is on. "The trade," remarked one grinder "should go back to its first principles, and order six months ahead of probable requirements."

TURPENTINE—Notwithstanding that large calls have been made upon the new stock of turpentine which is gathering at Southern shipping points, prices have kept steady, and we continue to quote 55c for single barrels net 30 days.

LINSEED OIL—It is reported that the call for linseed oil this spring is probably above the average. This in a measure is explained by the fact that with the comparatively low prices now obtaining, and the uniform quality of the oil, there is very little disposition to use substitutes. Influenced by the steady market users and jobbers are buying freely. There is no change in quotations. Raw, 1 to 4 barrels, 59c; 5 to 9 barrels, 58c; boiled, 1 to 4 barrels, 62c; 5 to 9 barrels, 61c; strictly net, 30 days.

GROUND WHITE LEAD—The orders are erratic for white lead, but an encouraging trade is being done in the Province of Quebec. There is no change in prices, and we quote: Strictly pure, $5.50 to $6, according to brand, and No. 1, $5 to $5.50 f.o.b. Montreal.

RED LEAD—Owing to market conditions buyers of staples such as red lead. orange minerals, litharge, etc., are said to be purchasing freely. The demand for red lead is especially good, and quotations are unchanged. Genuine red lead in casks, $4.50; in 100-lb. kegs, $5; less quantities, at $6 per 100 lbs.; No. 1 red lead, casks, $4; kegs, $4.50, and smaller quantities, $5.50.

PARIS GREEN—The recent weather has not been in favor of paris green. The demand has fallen into a rut, and will not recover until warmer weather prevails. We continue to quote: 1-lb. cartons, 18c; 1-lb. tins, 19c; 50-lb. drums, 17c.

WHITE ZINC—In sympathy with white lead, shipments are improving, but there is no special feature to the market. Dry V.M. Red Seal, 7½c; Red Seal, 7c; French V.M., 6c; Lehigh, 5c; white zinc, ground in oil, pure, 8½c; No. 1, 7c; No. 2, 5¾c.

PUTTY—Putty is experiencing the good effect of lower freights, and the demand has improved considerably. We continue to quote: Standard putty, 880 lbs., in casks, $1.65; in 100-lb. drums $1.90; bladder putty, 400 lbs., in barrels, $1.90; in 100-lb. cases, $2.05; in 25-lb. drums, $2; 25-lb. tins, $2.05; 12½-lb. tins, $2.25 f.o.b. Montreal.

TORONTO.

May 14.—Lead lines are the interesting feature this week. The reported combine of the American, Spanish, Australasian and German lead trusts has already brought about an advance of 25 cents a hundred in the price of pig lead in New York, and this new trust say they will advance the price in London from $68.75 a ton, the present price, to $95 or $100 a ton.

All this is very interesting not only to metal men, but to paint manufacturers, hardwaremen, and painters generally who handle such large quantities of lead products. A number of Toronto paint manufacturers and jobbers were interviewed in relation to the effect of this world's lead combine on the paint market, and with one accord they all stated that undoubtedly there would be an advance. At present beyond a firmer and stiffer tone there has been no change in the quotations of lead lines.

In general paint lines business has been fairly good. But for the atrocious weather of the past week the present would be near the height of the painting season, and there would be great activity in the demand for paints. Paint men, however, say the unfavorable weather has but delayed business and will make painters the busier when they can get at outside painting.

TURPENTINE.—All over the country the weather has been extremely backward and heavy rains have interfered with operations in the turpentine belt. It is said that for the first five weeks of this season dating from April 1 there is a shortage in production of fully 30 per cent. There was a slight decline in the price of turpentine at southern ports some four or five days ago, since which time the market has again advanced and is now reported very firm. Locally the price has fallen off from last week, and 56c. is now asked for single barrels. It is possible, however, to obtain "turps" from a couple of houses at 55c. Very little trading is passing even at the low quotations. Evidently hardwaremen and painters are pretty well stocked up. The market appears to be firming up.

LINSEED OIL.—In Great Britain oil still seems to be very firm and flaxseed from India and from the Argentine Republic remains at such a price as indicates that linseed oil is not to be any lower for this season. The local market here remains about the same, as the rather more-than-ordinary amount of rain at this season has to some extent lessened the amount of out-door work

YOU KNOW JUST WHAT YOU'RE SELLING

when you hand out "English" Liquid Paint to your customer—and he knows just what he is buying. The **guarantee formula** is on the can, stating plainly that the white base on which

"English" Liquid Paint

is made is 70% Pure White Lead (Brandram's B.B. Genuine) and 30% Pure White Zinc. No paint can possibly be better, for Brandram's White Lead is recognized as the best in the world.

If you are one of those dealers who believe in **knowing** just what they are selling to their customers, you'll appreciate "English" Liquid Paint, with its guarantee label.

Halifax, N. S.

that would otherwise have been done, so that trade is not quite so brisk in the paint line as had been anticipated. Raw is at 59c., and boiled at 62c. per gallon, barrel lots.

WHITE LEAD.—The local market is very firm and dealers are awaiting the action of corroders. Pig lead has advanced in New York, and undoubtedly will do so here, too, say the jobbers. If this should happen lead products will advance. In the meantime quotations remain at last week's figures: No. 1 is $5.40 to $5.65; pure white from $5.80 to $6, and a superior line is offered at $6.25. Genuine red lead is still quoted at $4.50 for casks and $4.75 to $4.80 in 100 lbs.

STAINS AND VARNISHES.—From all parts of the country come reports of excellent business in these and other seasonable lines. Ready mixed paints are strong in demand just now, and brushes are active.

GLASS AND PUTTY.—Glass importations are arriving this week and goodly lots are going out to hardwaremen. Prices are unchanged from last season, and there is rather a firmer tendency than otherwise to the market. Putty is increasing in demand.

PARIS GREEN.—Orders are fair, though not so large as a couple of weeks ago. 25-lb. drums are quoted at 17¾c.

PETROLEUM.—Illuminating lines are declining somewhat in demand, and lubricating oil and gasolene are pushing to the front. Motor gasolene is 17c. per gallon in barrel lots.

THE PAINT STOCK.

It takes time and careful watchfulness to keep a paint stock in good, neat condition but it can be done with a little clever arrangement of your goods and attention to the small details of keeping your arrangement right down to the minute.

Many a paint sale is lost by a dirty, disorderly store, says Paint Modernism. Don't you like to walk into a place of business of any kind and see plainly as though it were written in large letters across the door that the merchant believes that "Order is Heaven's First law?"

Stop right here a minute and walk into your paint section, not as an owner, but as a prospective customer, and try to size up your stock from his standpoint. Are your counters dirty and covered with miscellaneous collections of cans, putty knives, scales and the general accumulation of utensils so common in many a store?

Are there barrels of dry material standing around open? Have you open buckets full of putty lying around to catch dust and dirt from your daily sweepings? Do your shelves look untidy and disorderly, and are the labels on your packages dirty and shopworn? If you were buying paint as a stranger would you buy from your own stock, or from Brown, across the street?

With a little scheming and thought put into this idea you can keep your stock in such shape that you will be proud to take a customer to look at it. Try to figure some rearrangement which will enable you to keep your various kinds of paint in most attractive condition. See if you can't put those dry colors into drawers or bins and take those old barrels out into your warehouse, or burn them up. Keep your different specialties all in their proper space and have a section or division for each, with a neat, attractive sign showing at a glance which is floor paint or which varnish stains. Keep your cans in order and in numerical or alphabetical sequence so that you can tell at a glance just where a certain shade is.

Partition off your counter for putty and keep it there and see that it is always of the proper consistency. Have a cover for it so that it may be kept free from dust.

MAINTAINING COLOR STANDARDS FOR PAINT.

Large buyers and users of paint are well aware of the difficulty of maintaining a standard color year after year. The general practice is to obtain a paint of a satisfactory shade, and to require that all future shipments match this shade. Frequently the original sample is lost or used up, and even if carefully preserved, the difficulty of determining slight changes in shade and the probable change due to fading frequently results in a gradual change in the standard color. Where specifications are in use the trouble caused in this way is considerable as differences of opinion are bound to arise.

A very interesting instrument is in use at the Arthur D. Little Laboratory in Boston, for maintaining a desired shade of paint. This instrument, which was recently invented by Frederick C. Ives, and which is called a "colorimeter," accurately measures the shades of any color. The method of procedure is as follows: The standard paint being determined, a board is carefully painted in the same manner as a car body and the color measured on the colorimeter. This instrument gives a certain scale reading, and by setting the instrument again at this same reading the original shade is at any time reproduced in the field of the instrument. On subsequent shipments a sample board is prepared in a similar manner and the exact shade measured on the instrument. This method does away with any need of preserving the original sample and eliminates any possibility of change from fading, as the standard is defined by certain scale-readings on the instrument which give the exact color value of the different components which together make up the composite color under examination.

A good ink for marking tinware is made by reducing asphalt or black varnish with turpentine to the proper consistency. Keep this in a corked bottle. When it is wanted for use, shake the bottle and stick the pen into the varnish which adheres to the cork. Turpentine or kerosene will remove the mark.

Aylmer Pumps

The above words always bring to the mind of the man who knows them, the thought of **Quality.** That has always been our aim and we are accomplishing it if the increase in the demand for our goods tells anything.

Don't forget that we have a full line in Pumps and Supplies. Also Iron Pipes and Pipe Tools, Scales, Extension and Step Ladders, etc.

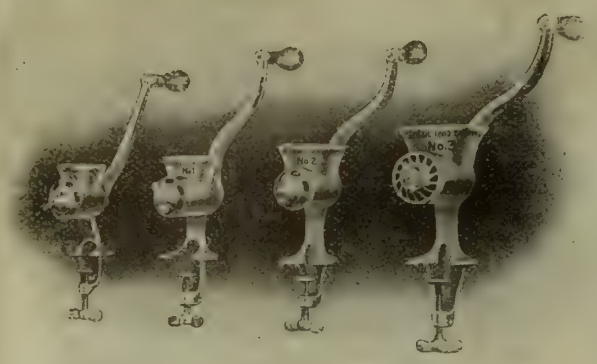
Mistakes. Oh, yes! We make them, but we try very hard not to make the same mistake twice. You may have been offering your customers another make of pumps and we suggest that you get right by adopting



McDOUGALL PUMPS

which are Standard Pumps, and you will prevent that repetition of mistake.

Our Catalogue explains

The R. McDOUGALL CO.

SIMONDS HAND SAWS

are good sellers. Dealers should send for 1907 Catalogue and discounts.

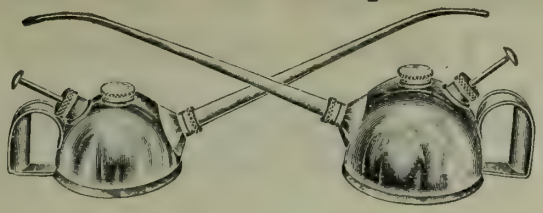
SIMONDS MANUFACTURING CO.

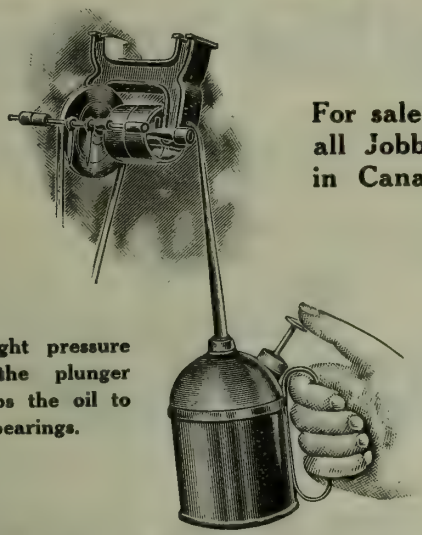
Fitchburg, Mass.

Branches Throughout The United States

SIMONDS No. 8½

This Saw is of the general style and shape which carpenters have been accustomed to using for years past. Has a carved apple handle with highly polished sides and edges, making a very pretty Saw. Holds its cutting edge and saws true. Its high quality and even temper are due to the fact that it is **Made of Simonds Steel.** Covered by the broadest Simonds warranty.





New Beaver Oil Stone

This stone has been tested by experts in Canada and United States and pronounced by them to be the equal of anything on the market. This is the first time a stone of this kind has been made in Canada and as the price is right, it will pay the trade throughout the Dominion to investigate.

CANADIAN HART WHEELS Limited 440 Barton St. East, **Hamilton, Ont.** Operating { Canadian Corundum Wheel Company, Limited / Hart Corundum Wheel Company, Limited }

Howland's Pump Oilers

Wagons and Autos—For Canadians

The best, handsomest and strongest toy automobile placed on the market to-day is that represented by the cut on the left. You will find this a ready seller in every centre where there are boys—and that means everywhere.

On the right is a practical delivery wagon, capable of carrying a load up to 700 pounds, and suitable for grocers, butchers, druggists, printers, etc. The body is hardwood; the wheels are iron, spoked and tired, while the gearing is made of heavy band steel.

SHRP-SHAVR SAFETY RAZOR

25c.

There is no better razor sold at ANY PRICE

We do it to Sell our Blades

Sold under a positive guarantee. Your money back if you want it.

Shrp-Shavr Razor Co

Smith Hardware Co., Limited
2 & 4 Lemoine Street
Montreal, Canada

We sell it at 25c. to create a quick and large market FOR OUR BLADES because we make the BEST blade. In fact, "it's all in OUR BLADES." The profit to the retailer as well as to the manufacturer is in the continuous sale of blades.

The frame or blade-holder is beautifully SILVER PLATED, and the adjustment is absolutely correct. It fits the face. The blade can be adjusted or released instantly. But you don't shave with a razor frame whether it costs $5.00 or 25c., the blade is the thing.

Our proposition is a revelation and revolution in safety razor selling. The SHRP-SHAVR is the ORIGINAL 25c. RAZOR.

When writing advertisers kindly mention having seen the advertisement in this paper.

METALLIC vs. BRICK

A few years ago metallic store fronts, ceilings, shingles, sidings, were unthought of. Brick, stone and wood predominated. We discovered that metallic would take the place of brick and wood, and immediately started to instruct the people in the use of it.

Who benefited by this? The dealer. We have created the demand—which you have to meet, and which increases your trade and profits.

For a quarter of a century we have had a strong PROTECTION wall around the Trade

Co-operate with us and insure your success.

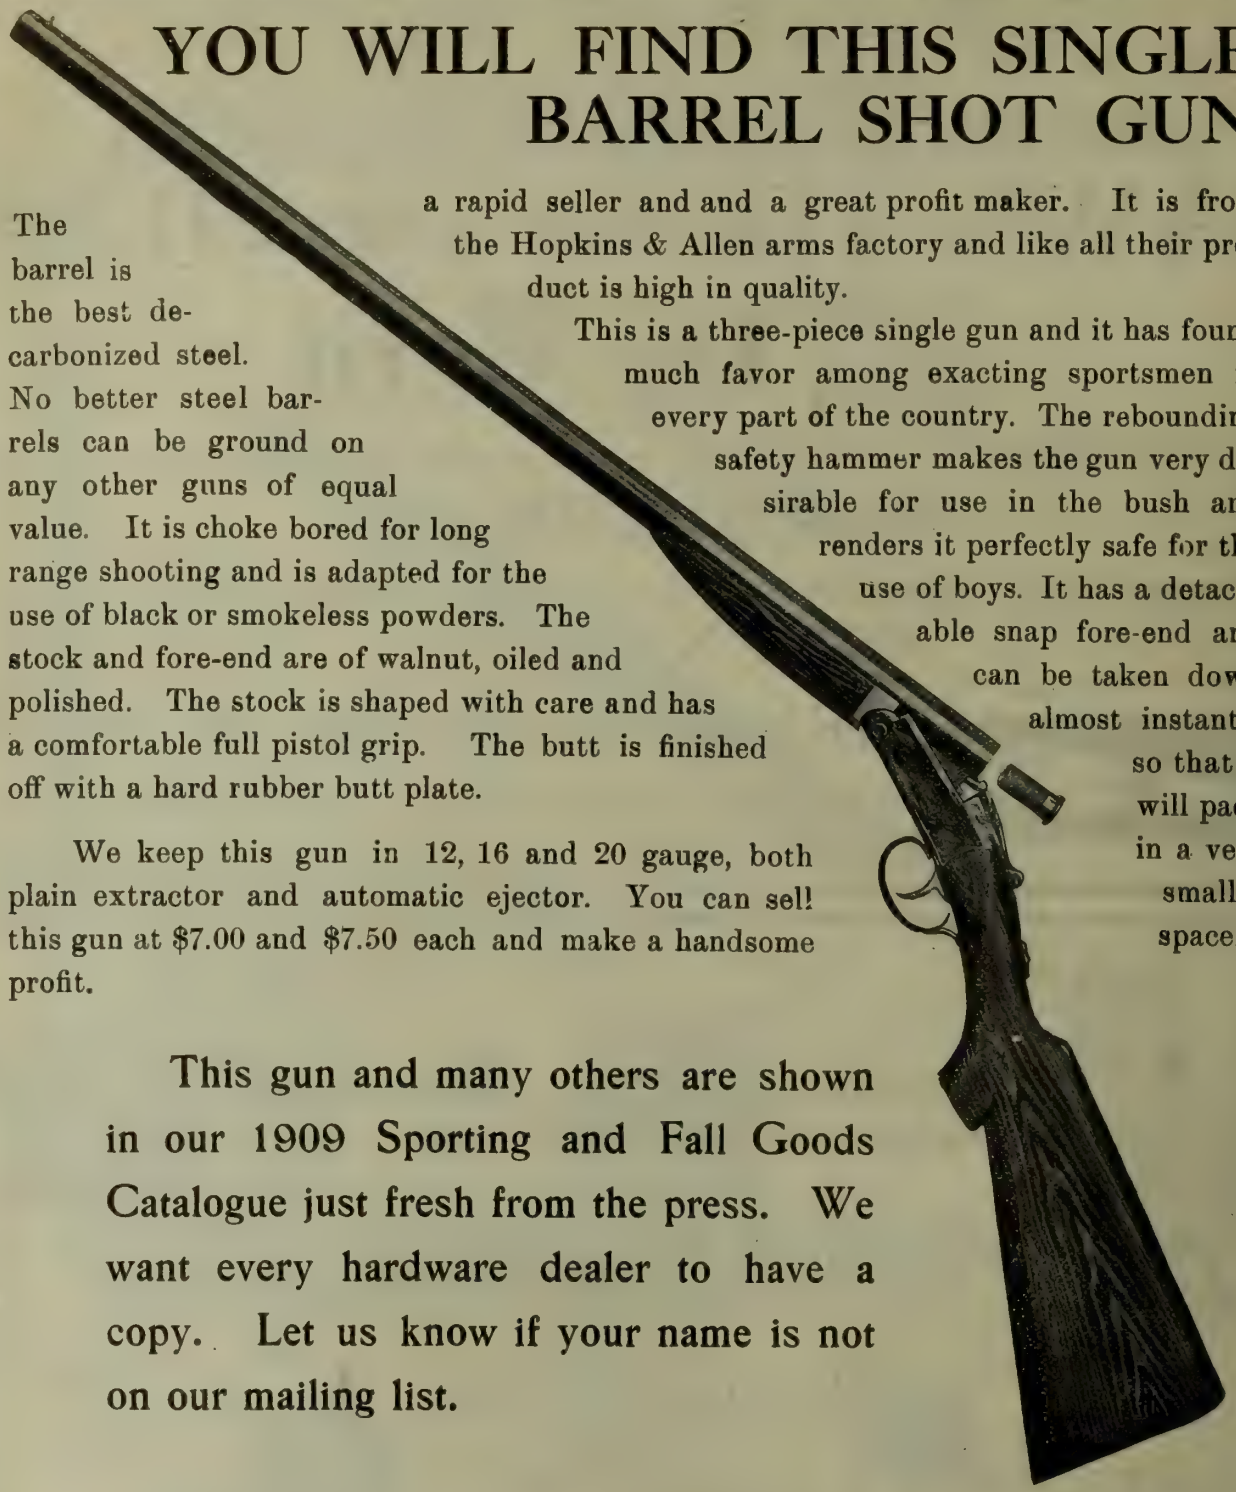
BENCH WRINGER



THE
Dowswell Mfg. Co.
Limited

Hamilton
Canada

YOU WILL FIND THIS SINGLE BARREL SHOT GUN

a rapid seller and and a great profit maker. It is from the Hopkins & Allen arms factory and like all their product is high in quality.

This is a three-piece single gun and it has found much favor among exacting sportsmen in every part of the country. The rebounding safety hammer makes the gun very desirable for use in the bush and renders it perfectly safe for the use of boys. It has a detachable snap fore-end and can be taken down almost instantly so that it will pack in a very small space.

The barrel is the best decarbonized steel. No better steel barrels can be ground on any other guns of equal value. It is choke bored for long range shooting and is adapted for the use of black or smokeless powders. The stock and fore-end are of walnut, oiled and polished. The stock is shaped with care and has a comfortable full pistol grip. The butt is finished off with a hard rubber butt plate.

We keep this gun in 12, 16 and 20 gauge, both plain extractor and automatic ejector. You can sell this gun at $7.00 and $7.50 each and make a handsome profit.

This gun and many others are shown in our 1909 Sporting and Fall Goods Catalogue just fresh from the press. We want every hardware dealer to have a copy. Let us know if your name is not on our mailing list.

WYANDOTTE
Cleaner and Cleanser

INDISPENSABLE IN

Dairy, Kitchen, Lavatory and Laundry

Read the opinion of H. H. Dean, B.S.A., Professor of Dairy Husbandry, Ontario Agricultural College, Guelph, Ontario.

To Whom it May Concern:

"This is to certify that we have used Wyandotte Dairyman's Cleaner and Cleanser in our Dairy School and Dairy Department of the Ontario Agricultural College with very satisfactory results, and we can confidently recommend it to dairymen for cleaning and cleansing purposes."

Many others, equally prominent, have written unsolicited and enthusiastic testimony as to its value.

Words of unqualified approval from such authorities require no comment.

"Nothing is clean that can be made cleaner."

Write for particulars or ask our travellers about it.

The HOBBS HARDWARE CO., Limited

DISTRIBUTORS

LONDON **TORONTO**

Crescent Brand
Registered

DO YOU GET WHAT YOU ORDER

or do you take whatever they like to send you? An independent merchant surely won't stand for substitution.

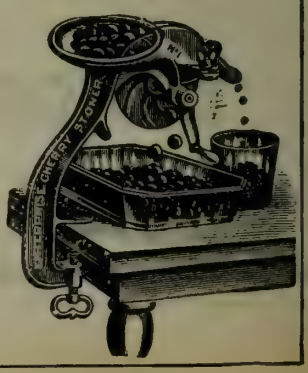
WE RECEIVE EVERY DAY LETTERS SOMETHING LIKE THIS:

"Will you please ship us the following Strap and Tee Hinges and Butts. We have told the jobbing house we deal with three or four times to send us goods of your make, but they send on inferior goods we don't want."
One man was so enraged that he said he would not buy another dollar's worth of goods of any kind from that firm.
We think you are taking the right stand and as you have to pay for the goods, you are correct in demanding Hinges that are properly made, and of the best quality.
Our Hinges and Butts suit the people who have to use them, and why should you lose time and money trying to palm off something inferior? Ask for Crescent Brand Butts and Hinges every time and if you are not supplied with them, **MAIL US YOUR ORDER.** They will not cost you any more.

Canada Steel Goods Company, Limited

Makers of High-Grade Butts, Hinges, Etc. **HAMILTON, ONTARIO**

Quick!



Can't wait when cherries are ripe—must have the right machine, *quick*

No. 60

No. 60 Breast Drill

Manufactured by

Ryall Tool Company, Montreal, Canada

ROYAL TOOL CO. Breast Drill is carefully designed and proportioned, durable, easy working and strong.

FRAME—Finished in black and yellow enamel.

HANDLE—Polished Hardwood.

BREAST PLATE—Adjustable to any position.

GEARS—All gear teeth cut from solid metal, and the small pinions from rolled steel bars. Double gears equalize the bearing,

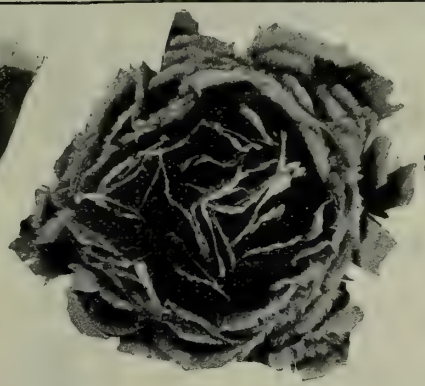
CHUCK—Nickel-plated, three-jawed chuck with knurled sleeve holding round straight shank drills No. 0-½ in. in diameter.

LEVEL—Enables the drill to be held true. It is set in solid iron where it can be seen while in use, and is protected from all but intentional injury.

SPEEDS—Two speeds, one approximately three times faster than the other: readily changed to fast or slow by turning the knurled nut on the frame marked "F" and "S," at the same time turning the large gear slowly so the clutch may drop in.

SPINDLE—Runs in case-hardened, anti-friction cone bearing.

Length: 16 inches over all. Weight: 61 lbs. per doz.



Packed one drill only in a linen reinforced cardboard box.

Money in Selling Structural Steel

You are not asked to put in a dollar. Simply get after the builders and contractors in your city. You can make a big margin by closing a few contracts. We will assist you, quote you close prices, and protect you in every way. Write us.

THE HAMILTON BRIDGE WORKS CO., Limited, HAMILTON, Canada

THERE'S MONEY FOR YOU IN

introducing to every woman in your neighborhood the washing machine that takes all the hard, back-breaking work out of wash day. That's

THE "PURITAN"

The roller gear, roller bearings and heavy balance wheel make it run very easily and smoothly. At each revolution the "dolly board" makes a ¾ turn instead of the ½ turn of other machines, and does twice as much real rubbing. That's why it washes so quickly.

These points make the "PURITAN" a steady seller and a money maker for you.

Write us for booklet and prices.

DAVID MAXWELL & SONS, ST. MARY'S, ONT.

A Quick Seller—Connor's Winner Rotary

The driving shaft of the Winner Rotary runs entirely on steel roller bearings. They carry the weight and do most of the work.

The clothes are put into a new position by the dolly being raised and lowered with every revolution.

The large corrugations on Wash-Board surface are another "Winner" feature.

The cover opens the full width of the tub, giving the operator every advantage in handling the clothes.

Nicely finished in light oak graining, with vermilion striped hoops, and castings bronzed and green japanned.

More of this machine sold than all the other Rotary Washers we ever made, and we have been in the business for over a quarter of a century.

Have you seen our new catalogue? A post card will bring it.

ORILLIA ONTARIO CANADA

Wagons and Autos—For Canadians

The best, handsomest and strongest toy automobile placed on the market to-day is that represented by the cut on the left. You will find this a ready seller in every centre where there are boys—and that means everywhere.

On the right is a practical delivery wagon, capable of carrying a load up to 700 pounds, and suitable for grocers, butchers, druggists, printers, etc. The body is hardwood; the wheels are iron, spoked and tired, while the gearing is made of heavy band steel.

Our Catalogue "D" awaits your asking

MEN WHO SELL THINGS

By WALTER D. MOODY.

This "Salesman's Blue Book" gives the up-to-date methods of solving the problems which confront the average seller of goods. These practical and stimulating suggestions, written in vigorous and entertaining style, are based on twenty years' experience. It is specially written for Manufacturers, Merchants, Employers, Salesmen and all Sellers of Goods for it will show them HOW TO INCREASE BUSINESS. The three maxims of this book are—"How to Get Out of the Rut"; "How to Increase the Efficiency of Your Selling Service"; "How to Encourage a Higher Standard of Salesmanship on the part of Your Men or in Yourself." 259 pages. Net, $1.00. By Mail, $1.10.

The foregoing were the first twenty dealers who, during the week from May 10 to 15, sent us their orders for five squares or over of "Crown" Patent Lock All-Round Shingles. The winners are now receiving their prizes through the mails.

HEAR THE JINGLE OF THE $5 GOLD PIECES

Twenty lucky hardwaremen and tinsmiths.

Contest In the "Crown" Patented Lock All-Round Shingle closes amid Enthusiasm

Yes! It created a great deal of interest among the dealers, and the rivalry was of a spirited character. Our newly patented shingles have certainly "caught on." They are popular with the trade and patrons alike. The competition has been not only among those with whom we have in the past been doing business, but among those from whom we never received an order before. In fact we have, with the "Crown" Patent Lock All-Round Shingle, opened up many new accounts. We are sorry there are not nearly enough gold pieces to go around, but to those who have failed we heartily wish "better luck next time."

The "NORKA" Two-Grooved High-Speed Twist Drill

The Drill Without a Tang

This is the latest thing in the High Speed Twist Drill line, and the Drill that will cut down your cost of drilling.

It has great strength, because it is twisted while hot, therefore, the grain of the steel is not disturbed.

There are no tang troubles because a piece of the stock is left untwisted, forming the shank, and the jaws of the Chuck fit perfectly into the grooves of the shank, not only holding the Drill, but also centering it.

It will pay you to write for our Catalogue No. 72, which shows our complete line of High Speed Tools.

"They Come From McClary's"

That's the surest introduction an article could have

"White Mountain" Ice Cream Freezer

MADE WITH CRANK OR FLY WHEELS

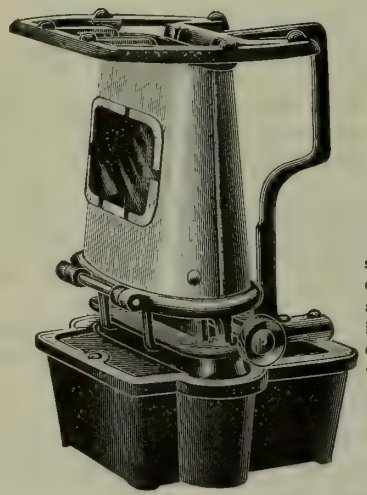
This is universally the favorite family ICE CREAM FREEZER, because it combines more excellence than all other family freezers made. It is easy to operate, because the parts fit perfectly and therefore run smoothly.

It is exceptionally durable. The tubs are built very strong, and will not warp, leak or crack, and the cans are made of thefinest quality bright charcoal tin-plate.

SECTIONAL VIEW
Showing Duplex Dasher and Double Scrapers

"Model" Refrigerator

The "Model" is a moderate-priced Refrigerator, but compares favorably with the more expensive lines, and is much better value for the money than many of the so-called high-grade refrigerators.

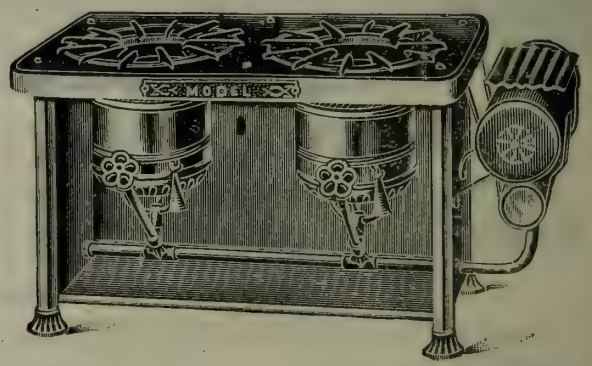


It is made of Hardwood, finished in Golden Oak; has heavy solid bronze locks and hinges and is lined with galvanized iron, while the insulation is superior to many of the higher-priced refrigerators.

The linings are made of metal and are removable for cleaning. This is an especially valuable feature.

Door on Provision Chamber and Lid are both, in the inside, lined throughout with metal. In order that Drip Pan may readily be drawn out or placed in position, the "Model" is constructed with a swing base.

"Golden Star" Lamp Stove



CAST-IRON OIL TANK

4-INCH BRASS BURNER

ALL CAST-IRON PARTS JAPANNED

This is a heavy and durable stove, with convenient handle for carrying. The burner is set high, and plenty of air spaces surround it to prevent odors from overheated oil. The chimney is bright tin with mica illumination.

Hardware Store Business Methods.

Price $1.00

220 Pages, Bound in Cloth.

The authors of the articles in this book are for the most part practical and progressive Hardware merchants. The embodiment in these articles of the experience of such able and enterprising men and the suggestiveness of the principles and maxims presented make this volume of infinite value to that trade. NINE of the FORTY subjects discussed are:

Rules and Regulations for the Hardware Store.
The Hardware Buyer.
Good Methods in Stock Taking.
Prices and Catalogues.
Collecting Accounts.
The Merchant and His Employees.
Changing Business Conditions and How to Meet Them.
Profit Figuring System.
Starting in Business.

SEND $1.00 TODY , and the book will be mailed by return.

Building a Hardware Business

The Ambitious Start of a Young Man as a Proprietor at Twenty-One, as Told in the Hardware Dealers' Magazine—He Buys a Store and What He Did to Build Up Trade—A Leader in Nails, and How His Scheme Worked Out—The Business Grows by Push and Advertising.

Twenty-five years ago I was employed as a clerk in a hardware store in New England, having previously worked for some time in a factory for the making of builders' hardware. My salary as a clerk was twelve dollars a week. I gave my mind to learning the details of the business, but as my experience was limited, I was only entering on the kindergarten stage of a hardware education.

Soon after I had reached twenty-one, my father died and left me a few thousand dollars in what was practically available cash. As I had always entertained the ambition to be a merchant, this unexpected acquisition of a working capital spurred me to a desire that I had not expected to fulfill until after the passage of a number of laborious years. I decided immediately to go into business for myself. I approached my employer with the proposition that I should become his partner by the purchase of an interest in the concern. He declined it, possibly on the ground that he could secure all the boy help he needed by the payment of a small salary, rather than a division of the profits. As he had a good business on a paying basis, he was in no need of the money which I was ready to pay for an interest in the firm.

Nowise dissuaded from my purpose, I kept my eyes and ears open for such chances of investment as might offer themselves. I heard of a retail hardwareman with a small store, in Albany, New York, who was anxious to sell out. Getting a leave of absence from my employer for several days, I took an early train for the capital of the Empire State. En route I bought a New York Herald, and closely examined a list of business opportunities contained in one of its advertising columns. There was one that attracted my attention, and although I kept on in my trip to Albany, I decided not to make any definite move until I had looked into this other opportunity.

Attracted by a Want Ad.

The Albany proposition did not commend itself either to my business judgment or the size of my available capital, so I turned my face southward, and was soon in the New Jersey town where was situated the store offered for sale in the Herald advertisement. While it was a small and very modest concern, I felt that I could handle it without much help, and that it had possibilities of development. A talk with the proprietor soon showed that it was within my means financially.

The owner was a young man who had been traveling for a New York hardware house, and in whom the nomadic blood was again astir. He did not feel himself fitted in temperament for the close details and confinement of a retail store, and he longed to get out again on the road. An immediate opening of an advantageous nature had presented itself, and he declared that he was ready to make any sort of a reasonable deal that would let him out in time to take advantage of his chance.

The store was about twenty feet wide and sixty in length, with a cellar of the same dimensions. There was a small enclosed back yard in which there was a shed for the storing of powder and other goods. The neighborhood was not thickly settled, although I thought there was a chance for growth in time. The proprietor was not cut out for a merchant, evidently, as I could not discover that he had done anything to develop trade, except to sit down and wait for it.

His goods were not well displayed; the store was not orderly, and he had made no effort to make use of such window display space as the store contained.

Store Unattractive.

We sat down and discussed the situation, and I noticed somewhat dubiously that our talk of a couple of hours was not much interrupted by a rush of customers. The young boy who was employed as clerk was fully able to take care of all who came in. I also noticed that no effort seemed to have been made to attract and hold the attention of such people as passed the store to and from their homes. The store was there; the goods were there; the merchant was ready to take orders and cash and deliver them the goods if once they came in. But he did not seem to be making any effort to get them to come in. I thought of Josh Billings' story of the man who sat down in a ten-acre lot with a pail on his lap, waiting for some cow to back up and be milked.

We had not talked long before we began to get near each other on a proposition of purchase and sale. If I bought, I was to take over his lease on the same terms he was paying. The goods were to be inventoried under our mutual inspection, and a fair price put upon the same. I was to buy his fixtures at such figures as we could agree on. Cash in full was to be paid at the time of taking possession.

When our bargain was concluded, we set a day on which I was to return and begin the inventory. I said, "Well, I guess it is all right, and I must be getting back home." I held out my hand, in good-bye.

"But hold on," said the merchant. "I don't know you. How about the chances I am taking?"

"I guess you know me as well as I know you," I answered.

"But how about my risk?" he said.

"I don't see how far you run any chances," I answered. "I am not carrying away any of the stock, and you don't give possession until you get your cash."

"But here I am with this store on my hands," he explained; "anxious to get away, and take the job on the road that is waiting for me. You are a stranger to me. You walk out, and go home, and how do I know you will ever return? Meanwhile, I sit here with the store on my hands, when I might sell it to someone else. You don't show up, and I lose my chance."

"Well," I answered, "what do you want me to do?" I had made up my mind to buy, and was willing to do anything in reason.

"Let us reduce our agreement to writing," he said, "and you pay me five hundred down. Then if you forget to come back, I keep the five hundred to pay me for the delay."

"All right," I answered, "I am agreeable."

He sat down and wrote out our agreement, and we both signed it. A witness was called in. I gave him his check for the five hundred dollars and went back home.

My employer and my relatives endeavored to persuade me that I was making a mistake. They thought I was too young to go into business for myself; urged me to let the five hundred go rather than risk much more, and pointed out the risk I ran in endeavoring to set up for myself so far away from home.

Becomes a Proprietor.

But the more I pictured myself as the proprietor of that little store, and the longer I contemplated myself as going

in there and setting things to rights, and to pushing the business, the more determined I became. Even an offer of an increase of salary, with a chance of becoming a part owner sometime, did not have any weight. I had made my first move in a business life, and I was determined to carry it out, no matter what might happen.

On the day appointed, I returned, accompanied by a friend who was to assist me in the work of inventory, and the fixing of values. I recall with a conscious remembrance of my youth and verdancy, that when I landed in the town, I was not able to locate the store, and was put to some trouble in discovering first its general direction from the railroad station, and then just the route by which it could be reached. But we managed to find it all right.

We went to work, and pushed the inventory very expeditiously, I endeavored to get the price of each article as near as possible to what it would be worth to me in sale, while the other party naturally looked after his own interests. As we were both fair-minded men, and as I was as anxious to get in as he was to get out, there was little dispute between us. We also agreed readily as to the value of his fixtures.

The sum total reached about $3,500. I gave him a check for what was due him; he gave me a bill of sale for the goods, signed over his lease, shook hands with me, handed me the keys, and went out to meet such fortune as the future might hold for him.

I walked to the centre of the store, and looked about. The store was mine, and there came over me a feelnig of responsibility, with the hope of a possibility of success. Then I took off my coat, and went to work.

Arranging the Stock.

The former owner of the store had employed two boys, one at five dollars a week, and one at three. I told the five dollar one that he could remain, and advised the other to go back to school. I really did not feel the need of anyone because of the business on hand, but I was determined that it should grow, and in addition I would need some one there when I was at meals, or had to go down-town for the replenishment of any portion of my stock.

My fingers had itched to put that stock in shape ever since my eyes fell on it, even before I had decided on a purchase. All of the goods were crowded in the front part of the store in a heterogeneous mass, perhaps under the impression that the larger the stock could be made to look, the better chance there was of obtaining trade.

The boy and the boss—oh! how proud I was to feel that I was "the old man" even to this one-boy force of employes, went at the job of regulation, almost before my predecessor had reached his street car.

We cleaned the rear of the store thoroughly, walls and ceiling as well as floor, and moved most of the goods from front to back. Then we cleaned in front, and within a day or so there were delivered to me from the manufacturer in New York, enough shelf boxes to fill a large portion of the shelf-space in front. These were covered on the front with green paper, and added much to the attractiveness of the establishment.

When they were in place, I began the labor of filling them. I selected the most attractive of the shelf goods from the heaps in the rear of the store, and filled a box with as many of the articles as it would contain; but in many cases there were not enough articles in stock to begin to fill it. On the front of the box, I placed the brightest sample of the lot; and I smile to myself as I recall the fact that in several cases the sample was all there was to show the line, the box being empty. On each box I pasted a white label, on which was the number of the article, and its cost and selling price in my private trade-marks.

We cleaned the sidewalk, and the front of the store. Everything was taken out of the window, with the dust that had gathered upon it, and the windows were made to shine with such brightness as could be given them by a day of elbow-brease from my husky five-dollar working force. We then refilled the windows in as attractive a manner as the space available and my limited stock, would permit.

The Store Cleaned Up.

A new gilt sign went over the door, and it was all that I could do to keep from going across the street a half dozen times a day to look at it. The rush of customers was not so large that I could not have indulged myself, but the watchful eye of the boy was on me, and it was up to me to preserve the dignity of my position, as owner, manager and superintendent of departments.

We cleaned the cellar and put it in order, and also the shed in the back yard. Wherever a touch of brightness could be added, we brightened it. Wherever a ray of sunshine could be let in, we let it in. I hunted up all the showy hardware cards and posters I could find, and tacked them on the vacant places on the wall. At the end of the first wek, after the boy had gone home, I took a look about the place, and felt very much as a king does, when he is getting the fit of his crown.

I soon discovered that if anything like a good trade was to be secured, it would have to be worked up, rather than by sitting in the store and whistling for it.

We were located on a fairly good street, with, as I have said, a growing residential neighborhood beyond it. But unfortunately, the most of the people when they went to and from their business, or on shopping or marketing expeditions to the centre of the town took the street car, and so had little need to do their shopping en route. It does a wayside merchant no good if thousands daily pass his door, in such manner as does not lead them to stop. The street car crowd were, therefore, to a very large extent, out of my reach.

Advertising for Local Trade.

I have always believed in advertising, and even believed in it then, when I was a boy, twenty-five years ago. I decided to see what could be done with printer's ink. I dropped into the office of the leading newspaper of the town and gave the advertising manager the heart disease by contracting for $300 worth of space, to be used up in a year in such divisions of space, and at such times as I chose. When he looked at my beardless cheek, and learned where I was located, and how long I had been there, he gave me to understand that his advertising was done on a cash basis.

I asked him, "What discount will you give me, if I pay you the full amount now?"

His respect for me evidently increased. "I would not think of asking you to do that," he said. "All I was getting at was that bills are presented when the ad appears, and that they are to be paid on such presentation."

"You have my address," I answered. "Your collector can call as often as he chooses."

I endeavored to be somewhat original in my ads, and am certain that they did attract attention to me, and aided materially in the upbuilding of my trade.

But I soon learned that the building contractors and carpenters there, were not looking in my direction. There were quite a number of these, and a good deal in the way of new construction work was in progress. I sold a little of the hardware needed in these new buildings, but nowhere in comparison with the larger establishments down-town, where the contractors and carpenters had accounts.

It was not long before I saw that something must be done. My rent went steadily on, seven days in the week. My personal expenses were small, but they had to be met. The wages of my clerk, lights, fuel, incidentals; all these were against my not rapidly increasing sales. In addition, there was the interest on my investments, to say nothing of my time,

which I could be easily selling to some one else at fifteen dollars a week.

We have all heard of "leaders" in other trades; of grocers who sell sugar, for instance, at cost, so as to bring people to trade with them. I did a little close figuring and decided on a leader of my own. I looked into Nails, and Nails about filled the bill. Carpenters keep an eye on their cost, they know what they can be bought for, and are worth; they know when they are sold at a bargain, and a bargain I determined to give.

I wanted to get the contractors and carpenters headed in my direction, and it would then be up to me to do the rest.

Cuts Price on Nails.

Nails were then selling, in carload lots at $2 per keg. These were of the cut variety, as twenty-five years ago, the wire nails were going on the market only in small quantities, done up in cardboard packages. The keg that cost the dealer $2, was sold to the consuming trade at say $2.25, or a profit of twenty-five cents per keg. I made my calculations, and decided to offer them at $1.99, or a loss of one cent per keg.

I figured this way: "If a new customer comes in and takes ten kegs, I am out ten cents. But I am a mighty poor salesman, and do not deserve to succeed in business, unless I can make this man, before he gets out of the store, purchase some one article on which I can make ten cents. In any case, I have got a line on him for future business; he knows I am on earth, and he will figure that if I sell him one variety of goods at a close figure, I may be liable to do the same thing on another. The thing I now want to do, is to 'get them coming.'"

I ordered a couple of hundred cards printed in a bright red, in which I made my nail offer. I gave the price at which I offered them for sale, whether a customer took one keg or more. One of these was mailed to each contractor or builder, who would be liable to be in the market for nails.

The next morning, a carpenter's wagon stopped at the store. The driver cocked his eye at my gilt sign in all its virgin newness, and then looked over the outside of the store as if to ask himself why this small newcomer could hand out nails at a price the big dealers down town would not look at. I could see the workings of his mind, as he finished hitching his horse and came into the store.

Gets the Builders' Trade.

I looked up from my work and said "Good morning."

"Same to you," he said. "I came up to ask about nails."

"Yes, sir," I said, "I guess we can accommodate you. About how many do you want?"

"Oh, a dozen kegs. Can I look at them?"

"Certainly," I answered. I showed him the samples taken from an open keg. He examined them carefully; he had received one of my cards, I was sure, and was uncertain in his mind as to whether they were really of iron, or wood painted black. He made up his mind they were nails, and said, "I guess a dozen kegs will do me this time."

"Yes, sir," I said, "shall I get them up now?"

"No," he answered. "You can roll them out on the sidewalk, and I will be back in a half hour."

"If that is not convenient," I said, with a cheerfulness I didn't feel, "I can have them delivered to you, without extra charge."

"Not necessary," he said. "I'll be back in a little while, and load up."

"You understand, of course," I added, "that at this price the goods are cash on delivery?"

"That's all right," he said, "the money will be ready when the nails are." He went out and drove away.

When he returned, he came in to pay the bill, while my boy was dumping the kegs into the wagon. I called his attention to a number of things in my stock, and made one small sale, and which my profit was seven cents. He gave me his name and business card, and we became quite good friends. He promised that I would see him again, and kept his word. In the next two years he bought many goods of me, and kept an account upon the books.

Of course I had to hold my nail sales at that price, to a cash basis. The mills would send me no carloads that were not paid for on the spot, and as my capital was limited, and nail profits less than nothing, I could not carry the accounts, and run the risk of losing some of them. At that time I knew nothing of the responsibility of the buyer, and was compelled to treat them all alike.

There were quite a number of others who called in response to my cards. They were all at first suspicious, after the manner of my customer above described, but as soon as they discovered that it was a bona fide transaction and that I meant business, they began to take stock in me, and in the main were inclined to encourage me in what some of them declared was a good stroke of business, and a neat bit of advertising. I was talked about among consumers, and out of this movement I not only sold a lot of goods at a profit, but added a number of really good accounts to my books.

I also soon discovered that I was being mentioned among other dealers in town. The question was plumped at them more than once, "How could that fellow up-town sell goods, at a less price than they were asking?"

Of course, explanation was made:

"All a cheap advertising dodge; he won't keep it up long; he can't last at that rate; he must be a fool to sell goods for less than he pays for them," etc., etc.

I had become a frequent purchaser from one of the larger stores of the town, of articles of which I was in immediate need, and of which my stock was depleted. I had an account there in a small way. One morning I made a purchase to the extent of two dollars, and the clerk who had made the sale was putting it on the book, as usual. The proprietor, who had been hovering about us, apparently engaged in something else, walked up to the clerk and asked him a question. Then he came up to me, called me by name, and said, "I see that you have had some goods charged?"

"Yes, sir," I answered.

"I don't think I care to do that," he said.

"What's the matter?" I asked. "Has anything happened to destroy my credit? Don't I always pay my bills?"

"You always have," he answered, "but I am afraid you cannot much longer, the way things are going."

Refused Credit.

I knew what he was getting at, but I wanted him to come out flat-footed without any aid from me, so I said: "I don't understand you. I am selling more goods and making more money than I ever have since I went into business. I think, sir, it is only fair that you should tell me just what you mean."

"I do not approve of your business methods," he answered. "They are not sound, and cannot be made to succeed. They are demoralizing. No man can last if he keeps on selling goods for less than he pays for them. You are on the wrong track, young man, and the sooner you get back into legitimate methods the sooner will you succeed. I have had a great deal more experience than you have, and know what I am talking about."

"You refer to my nail crusade?"

"I refer to your selling goods for less than they cost you, my boy."

"You have had much more experience that I have had," I answered respectfully. "But your experience has been in your own establishment, while mine has been in mine. Perhaps mine is as instructive as yours has been, so far as it goes. I am glad you spoke to me about this, and I will be as frank in my explanation.

"Soon after the little store came into

my possession, I fould that while my expenses were keeping on fixedly, my profits were of a variable character. Some days I would make enough to bring me out even, or a little ahead, while on the other hand, there were days when I was left behind. I saw there was only one way to change this situation, and that was to get more business. Not wait for it, but go out and get it. I had to persuade people that it was to their interest to come to my store.

Established a Sound Business.

"The result is that I am selling nails for one cent less per keg than they cost me. The loss is small, but it has been much more than made up by profits on other goods I have sold to the men who come to buy nails. There is no loss except that cent, as my boy and myself handle them, and I am not compelled to borrow money with which to purchase them. It has been a good stroke of business, and I can assure you that I do not sell anything else at a loss. Nor will I sell nails at a loss just as soon as I find I am standing on solid ground. Instead of injuring my credit by this move, I have really increased it. I have been making money by it, and my resources have therefore been increased."

The merchant seemed satisfied with my explanation, and no more was said about my credit in that store. I knew at the time that he felt my little account was safe, and only brought it up as a text on which he proposed to preach me a business sermon.

That nail transaction was the turning point of my career. People began to come to me, I booked a number of regular customers, and before three years had passed, I was out of the woods and making money. But I kept expenses down, did most of the work myself, and kept a sharp eye on collections.

Secret Commissions Contrary to Law

Act Passes House of Commons and Senate Prohibiting Such Considerations—Travelers and Retail Merchants Directly Interested—Heavy Fine May Be Imposed Upon Any Person Convicted of This Offence—How It Has Been Carried on in The Past.

To prevent the payment or acceptance of illicit or secret commissions, an act has been passed by the House of Commons at Ottawa, amended and approved of by the Senate and now awaits only Royal assent before it becomes law. It is to be known as The Secret Commissions Act and is especially applicable to the business of retail merchants and travelers or agents of wholesalers and manufacturers who employ them.

The act is known as Bill 31 and reads as follows:

Everyone is guilty of an offence and liable, upon conviction on indictment, to two years' imprisonment, or to a fine not exceeding two thousand five hundred dollars, or to both, and, upon summary conviction, to imprisonment for six months, with or without hard labour, or to a fine not exceeding one hundred dollars, or to both, who,—

(a) being an agent, corruptly accepts or obtains, or agrees to accept or attempts to obtain, from any person for himself or for any other person, any gift or consideration as an inducement or reward for doing or forbearing to do, or for having after the passing of this Act done or forborne to do, any act relating to his principal's affairs or business, or for showing or forbearing to show favour or disfavour to any person with relation to his principal's affairs or business; or

(b) corruptly gives or agrees to give or offers any gift or consideration to any agent as an inducement or reward or consideration to such agent for doing or forbearing to do, or for having after the passing of this Act done or forborne to do, any act relating to his principal's affairs or business, or for showing or forbearing to show favour or disfavour to any person with relation to his principal's affairs or business; or

(c) knowingly gives to any agent, or, being an agent, knowingly uses with intent to deceive his principal, any receipt, account, or other document in respect of which the principal is interested, and which contains any statement which is false or erroneous or defective in any material particular, and which, to his knowledge, is intended to mislead the principal.

(d) Every person who is a party or knowingly privy to any offence under this act shall be guilty of such offence and shall be liable upon conviction to punishment hereinbefore provided for by this section.

The latter clause was an amendment to the original bill which passed the Senate on March 31st last. After being amended it was sent back to the House of Commons and agreed to on April 21st and was finally sanctioned by the Senate.

The Practical Meaning.

The Secret Commissions Act, as its name infers, prevents the giving of secret commissions, rebates or considerations.

A traveler who sells an article to a retailer—one which is sold generally by the trade so that its selling price is fixed by the manufacturer—cannot legally give that retailer any secret rebate or commission to induce the latter to purchase from him. If the goods are sold for less than the manufacturers' price in the ordinary way the sale will of course be legitimate in the eyes of the law; but if the goods are sold for the manufacturers' price and the salesman puts his hand in his pocket and gives a rebate or commission to the purchaser then the sale is illicit and that salesman if convicted is liable to imprisonment for two years or to a fine not exceeding $2 500 or both, as mentioned above.

One way that this has been done in the past was by the agent or traveler giving a purchaser the secret rebate in order to get his business and then carging up the rebate to his employer or the firm he represented as road expenses.

The new bill when it becomes law makes such an act contrary to the criminal code.

In the event of the traveler or agent selling below the manufacturer's price and doing so openly that traveler or agent does not commit a breach of the law. The manufacturer, however, has the privilege of determining to whom his goods shall be sold and at what price and in such a case if he desires, may refuse his goods to the house whose travelers or agents cut down his price.

A Concrete Example.

In the case of a staple-priced article such as sugar the giving of the secret commission could up to the present be easily accomplished. A traveler may probably have difficulty in selling a merchant sugar but he knows that if he allows that merchant a rebate of $10 he can sell him a car load. To get his business he does so by personally paying him ten dollars. He gets his money back from his house in his expenses.

This system is sometimes used by a house anxious to get business and when the traveler for the one "on the square" comes along he finds he is up against a competition that he cannot legitimately meet.

A traveler may offer the merchant a discount of a certain per cent. for cash off the staple wholesale price of an article. He promises that his house will do this and is very often backed up by the house. If he could secure the business of the merchant in the regular way this offer would not be made so that clearly a dishonest act has been committed to the detriment of the honest firm.

Retailer Becomes Liable.

Clause (d) in the above bill is the amendment that was made to it after it had reached the Senate. It makes the

retail merchant just as liable as the traveler or house he represents who is guilty of a breach of the act.

Hitherto, the retailer has been under no moral or legal obligation and there was no legal or moral obstacle in the way in the acceptance of a secret commission. Now, however, if he is a party to an offence such as described, upon conviction he will be liable to the same punishment as the traveler who gives to him the secret consideration.

Being under no moral or legal obligation—further than knowing that the traveler was doing something that he had agreed not to do—he could up to the present accept the rebate, but when the bill becomes law he will become legally liable and morally liable as well and will be considered in the eyes of the law as much a party to the criminal act as the traveler.

Deterrent To Dishonesty.

"While the new act may not entirely put a stop to the practice of giving secret commissions it will be a great deterrent" remarked an interested business man to Hardware and Metal the other day.

"It is" he explained, "difficult to make a conviction but nevertheless there will not be so many breaches of the law."

Wholesalers know fairly well to whom they should sell sugar and soap, etc. They know their loyal customers and if they become suspicious that a secret commission has been given by the agent of another house to induce the sales of such goods they have the privilege of laying a charge against both him and the retailers. They will be obliged to make an affidavit that the have committed no breach of the law.

"The punishment being so heavy it is not likely that many offences of this nature will occur," remarked one man in referring to the new act.

Origin of the Bill.

What led the government to take up this question were the frauds recently exposed in the Marine and Fisheries Department in Quebec. The Act prior to the amendment referred to, was similar to an English Act which was passed some years ago because English buyers representing London houses used to go to foreign countries where they practiced the secret commission game. It became somewhat general that they should get a commission from the London house before they did any buying. They not only did business for their house-but for themselves as well by secret commission and this became the foundation for the English Act. The English Act, however, did not include the amendment which made the party who accepts the rebate liable to the punishment mentioned.

Retail merchants and travelers will, no doubt, think seriously before they place themselves liable in eyes of the law and the Act should have a tendency to place wholesalers and manufacturers on a more even footing than they have been in the past.

Hardware Letter Box

Any questions on trade subjects will be answered by the editor in this department. Do you want any address, any special line of goods, anything relating to the hardware trade? Ask us. Letters from manufacturers, jobbers, travelers, retailers or clerks are solicited. Suggestions for trade improvement or discussions on trade evils are invited.

School Furniture.—A firm whishes to know the different makers of school desks and school furniture.

Canadian Office & School Furniture Co., Preston; Ellis Furniture Co., Ingersoll; Globe Furniture Co., Walkerville; S. Knechtel Furniture Co., Southampton; Wilson Bros., Collingwood; Office Specialty Mfg. Co., Toronto.—Editor.

Charcoal in Bulk.—The Steel Trough & Machine Co., Tweed, ask: "Where can we buy charcoal in bulk, say half-ton lots?"

Try the Standard Chemical Co., Toronto, or Eley Bros., Toronto.—Editor.

Charcoal.—Cameron & Leacock, of Smith's Falls, ask where they can procure charcoal outside Toronto.

A. D. Gall & Co., Board of Trade Building, Montreal, have a plant just outside of Montreal. The Wood Products Co., Toronto, have a charcoal plant at Donald, north of Lindsay, but they have sold the output of their works to the Standard Chemical Co., Manning Chambers, Toronto.

IMPORTANT LEGAL DECISION.

Judgment has been given in the suit of the Standard Sanitary Manufacturing Company, Pittsburg and Toronto, against the Standard Ideal Company, Port Hope, an injunction asked for being given preventing the latter firm from using the name "Standard," on any of its products or advertising matter. A further decision is expected in a few days as to the standing of the Standard Sanitary Co. in the Province of Quebec, it being held that, having failed to register, their hands are tied.

Whichever way the case goes, however, it is likely that an appeal will be carried to the Privy Council unless a compromise is arrived at between the litigants.

Theodore Ahrens, F. J. Torrance, W. A. Myler and E. L. Dawes, four of the leading officials of the Standard Sanitary Manufacturing Co., arrived in Toronto from Pittsburg on Wednesday, and it is possible an agreemtn may be completed to stop further proceedings in the courts.

SNOW SHOVELS IN CANADA.

United States Consul Sackett, Prescott, Ont., writes for the benefit of United States manufacturers that a durable and efficient snow shovel is strikingly lacking in that section of Canada. He writes as follows: "This is a country of deep snows, yet one looks in vain here for a shovel, either in form or style of manufacture, such as is sold in the States. One is largely used here fabricated from a single piece of wood, literally whittled out of a tree. This tool has the shovel form, it is true, and works fairly well in some conditions, but it is very slow, splits easily, and is inadequate for doing the work of a snow shovel rapidly and effectively. There is also in use a small affair with a blade of thin iron and a wooden handle, which is a fairly good article in heavy snow or slush, but for rapid use under normal conditions in this climate the householder can find nothing in the local market so suitable as the cheap, durable snow shovels made of a number of thin wood ply to be found in the United States. I am convinced that a snow shovel made either of wood or part wood and part metal, big enough to clear the road, durable and fairly cheap, would sell in this section in large quantities."

GUM BASE FOR ROOFING.

A commonly mispronounced word is Rubber-oid, the correct pronounciation is as though it were spelled "Rue-beroid." It is commonly supposed that Rubberoid is a "rubber" roofing—but a roofing containing rubber would be practically useless, as rubber rots under slight exposure to the weather. The base of Rubberoid is an exclusive processed gum known as ruberoid gum. This gum resembles crude rubber, and is as flexible as crude rubber, but unlike it, retains its durability and flexibility after years of exposure to the weather.

RESTRICTION OF FIREARMS SALES.

Legislation to stop the carrying of revolvers as concealed weapons seems to start at the wrong end of the line, writes Fred I. Johnson, of the Iver-Johnson's Arms & Cycle Works. In other words, it attacks the law-abiding citizen and says that he shall not carry such weapons, by different kinds of prohibitive measures which are proposed; but it does not attack the ruffian, because the latter has no regard for the law; he is a criminal and is liable at all times, therefore he does as he pleases, regardless of such laws.

But if legislation would make it a prison offence, with penalty of two years' imprisonment, for a criminal to be caught with a concealed weapon (and by "concealed weapon" we mean daggers, dirks, brass knuckles, pistols, or anything of this order), this would be an attack where it is needed, and would cover all who have a police record.

If legislation could thus take care of the thugs and the thieves, there would probably be little trouble about any further legislation in this line; and the peaceable citizen would not then be hindered from having a revolver for use in his own home, nor would he be prevented from carrying one on his person, for the protection of his body or valuables.

MARKING PRICES ON GOODS.

Some merchants lose money because of failure to properly mark goods, thinking they can remember the cost price, and in this way they many times do not get actual cost for the goods.

Other merchants, either from carelessness or force of habit, mark the selling price on all goods a certain percentage above cost, regardless of real values. Still others do not see the goods at all, but tell a clerk to open them up and what selling price to mark on them.

When goods come into the store they should be carefully inspected, for if there is one place where the best judgment of a merchant is brought into action, it is in marking or pricing goods. Only the very best judgment should be used to put a good, strong profit where it will fit, and make up for the short profit, or possible loss, on something which has been purchased to sell at a bargain.

Marking goods in plain figures can very often be made the basis for further sales. A customer while waiting to purchase some special article is often prompted to buy other things by being able to know the price. But, above all, don't have mixed or cut prices. Remember that one man can't do all the business.

Make it a law to have one price to all, and that price in plain figures, and "money back if you want it" should be the rule in every wide-awake retail hardware store. Let it be recognized in the community that a child may be able to buy goods in your store as cheap and with the same satisfaction as could an expert of values.

Such a policy can not do other than command the confidence and respect of the public and bring the greatest possible benefit to the retailer.

CANNOT RIDE TWO HORSES.

A correspondent draws attention to the fact that some manufacturers of wire fencing are attempting the impossible feat of riding two horses going in opposite directions.

They call upon the trade and induce them to stock their lines of fencing on the supposition that they intend to sell only through retailers. Then they go and sell direct to farmers or through some farmer agent, at prices lower htan the hardwareman can sell and make a profit.

No objection can be taken to manufacturers selling to farmers if they choose to do business on a direct to consumer basis. But hardware merchants have a right to expect that manufacturers of wire fencing, as well as roofing, stoves and similar lines, must protect the merchants if they want the trade of retail hardwaremen. It may be necessary at times to sell to customers not in business, but in such cases the prices quoted should be the retail rather than the wholesale price.

THE STRUGGLE FOR RICHES.

There is scarcely a hardwareman or clerk but wishes that he was rich. He thinks that he is not making money fast enough and wonders whether the wheel of good luck will ever let fall a fortune at his feet. Most fortunes have been started and developed by thrift; even the foundations for the wealth of the multi-millionaires in America were laid that way. There is more truth than sarcasm in the old axiom about not being able to have your cake and eat it too. In plain words its tranlation is you cannot spend all you make or earn and have money in your pocket or to your credit in the bank. A safe, inviolable rule to guide the ambitious clerk on the road to a competency is to remember that it is only attained by saving—by building little by little—the process may be slow and at times tedious, but the structure will be reared in time. There are only three other ways to get wealthy in a short time. One is by misappropriation or graft—which no honest, self-respecting person countenances. Another means is by speculation which may make of you an opulent individual or it may restore you to primitive poverty, after you have put all the money you have in about-which-you-know-nothing scheme or proposition. The mere speculator simply takes his chance. The extreme is very much like a wager—it may result successfully or it may render vou so much worse off.

Another way to acquire riches is by judicious, careful and well planned investment, which is widely different from speculation. To one who makes a study of bonds, real estate, industrial concerns, growing towns, promising farming districts or excellent business openings, a few hundred dollars invested at the opportune time—the psychological moment—will yield handsome returns. Outside of the good, old-fashioned way of building a fortune—dollar by dollar—comparatively few men have the knack, the genius or the unerring judgment to make money quickly and easily, even in investments. It would be well for the man of moderate means to leave pure speculation alone. Investment should be well considered by the one about to embark in that field; if rightly understood there there is generally a liberal return made. Investments are after all like other things—their success depends to a large extent in knowing and doing the proper thing at the proper time. This is why one man prospers and another fails. No. 1 bought or sold or entered into business at the proper time and in the proper place. The other chap acted an hour, a week or a month too late, did not locate on the right spot or misjudged conditions. Life after all is a complex and peculiar problem and for the majority of us our chief business here is the business of making a living. The next time you hear so much about the good luck, the unparalleled success, the big income or the large dividends that the other fellow has, do not become restless or grow melancholy. Your turn is likely to come, but remember it will never arrive as long as you spend every dollar of your weekly wage or fail to lay aside something whether you are in business or not. It takes a little money to make money, but the prime necessity, the fundamental, underlying, principle is first to have that "little." You get that only by thrift which is the basis of all prosperity.

INTERESTING LEGAL POINT.

A point in law not generally understood is that a cheque marked "paid in full of account" can be accepted anl used without prejudice even though the amount of the cheque does not cover the full account. A merchant having, for instance, an account for $200 against a delinquent could accept a cheque marked "paid in full of account" and then sue for the balance due.

DON'TS FOR TRAVELERS.

A good deal has been written about how traveling salesmen are treated by merchants who do not realize that it pays to be courteous not only to the people they sell goods to but also to those they buy goods from.

Some merchants have much to learn in this regard and even some officials in large manufacturing concerns can to advantage change their policy and treat salesmen in a manner more in keeping with the Golden Rule.

The story is told of how one of the most gentlemanly and considerate salesmen on the road called on the buyer for a hardware manufacturing concern which closed its doors in an Ontario town during the past year. The salesman presented his card and the buyer in a churlish manner tore it up and threw it in the waste paper basket. A second and a third card met the same fate with the result that the affronted salesman spoke his mind freely to the buyer, comparing his actions with what a true gentleman's would have been.

There are always two sides to a story, however, and while we can give no additional information regarding the case referred to, the side of the manufacturers, and the manner in which they are treated by some self-conscious salesmen is given in the following letter received from the secretary of a large manufacturing concern advertising in Hardware and Metal. His letter follows:

> Editor Hardware and Metal,—Having often noticed in your valuable journal, the many "Dont's" that buyers should not do to travelers, I write to inform you that for every don't that the buyer should not do to the traveler, I can name you two dont's which the traveler should not do to the buyer.
>
> It might surprise many travelers to know that one half of them do not know how to approach a buyer. They may have called on him perhaps three or four times during the year and he has the impression that he is the only man who calls on that firm.
>
> The traveler walks in and says, "How do you do, Mr. So-and-So, how is business to-day?" You immediately start to wonder who he is but he does not tell you. You might know his face but cannot recollect his name nor the name of the firm he represents. He will ask you how business is and if there is any chance for an order in his line but of course we always say no, because we do not know who he is. We do not ask him who he is; if he does not know enough to tell us.
>
> The writer had a case the other day where a traveler came in and asked if we needed anything in his line. We know his face but could not place him. He said that we had sent an inquiry to his house but did not mention the name of the house he represented and I immediately told him that no doubt his price was too high and the order went past him; but while he sat here the order was made out for two car loads of lumber, to his firm, and was mailed on the same train he was on. His house called him down the next day, asking him why he had not called on "Jones & Smith." He said he had but that there was nothing they required and that the quotation was too high.
>
> Many travelers come in who do not know enough to take the cigar out of their mouth, while others who might know the buyer salute him in a very familiar and loud tone with, "Hello, Jack, old boy, how are you?"
>
> Still others who come in feel it their privilege to walk around the office and chat with other members of the office staff if the buyer happens to be busy.
>
> I could go on giving you many more "Dont's" which the traveler should take note of but space and time are too limited to allow me to do so.
>
> As an old traveler myself I would say that the first thing a traveler should do when approaching a buyer is to mention the wares he handles and the name of his firm. There is not one buyer in a thousand who care a snap for the traveler's name or his beautifully embossed cards.
>
> "SUNSHINE."

The editor would like to hear from other readers on this subject. Experienced travelers know how to approach a customer and make it worth the customer's while to give him a hearing. There are many young salesmen on the road to-day, however, who have their careers to make or mar, and instances where buyers or salesmen have been discourteous are worth repeating if a lesson can be learned from their telling.

THE COPPER PROBLEM.

In spite of roseate accounts from different American copper houses as to what the metal is likely to do in the near future, it cannot be said that the present position is very re-assuring. It is true that figures for April are better than for the three preceding months, That is to say, owing to the great increase in exports and the higher deliveries into home consumption, the amount going into stock was not so great. But in spite of better consumption and increased exportation, the month's movement resulted in an increase of nearly a million pounds to stocks, and this added to the surplus of the other months is a matter for careful thinking.

If there was some guarantee that the millions of pounds of metal exported to Europe were being, and had been, used, the future might not look quite so uncertain. But trading conditions in Europe have not been so brisk, or so incomparably better than those in the States, that industrial activity should want many million pounds of metal more than was wanted this side of the Atlantic. It is, therefore, more than likely, considering the bulk of other months' exportations, that holdings in speculators' hands are not by any means decreasing.

If confidence of producers can win the day then copper should stand a good chance, for the market has been held up in a remarkable way by the big interests refusing to make sales. But it is the confidence of the customer, and not the confidence of the producer; that will make copper strengthen. And the way to induce this confidence is not by having a record output for April. Iron and steel production was restricted, and now we have a growing improvement in these markets.

The sensitive character of the New York market is apparent from the fact that speculative rises in London are made an excuse for bolstering up prices in New York. At one time the price was held steadily, let London manipulate as much as it liked. The fate of copper seems to hang in the balance. At present the exportations to Europe keep the stock down, but let Europe cease to buy, or some political panic cause holders to unload, and the metal will be in a bad way. Legitimate consumption must come to the rescue. Considering everything, however, the demand has not been so poor. Immense quantities of metal have been used, not only in the States, but in Canada, but even at the high-water mark of industrial activity, it would take mighty efforts to keep pace with such a tremendous rate of production as that shown for April. It cannot be said, therefore, that the copper situation looks particularly rosy at present.

CANADIAN METAL MARKETS

See Itemized Market Quotations on Page 66.

MARKETS IN BRIEF.

Montreal.

Tin—Unchanged.

Wire—Advance of 10c in barb wire, galvanized wire, and coiled spring fencing.

Toronto.

Wire—New prices in some lines. Bright, annealed and oiled and annealed for fencing is now $2.25 base. Coppered and tinned is $2.30.

Iron—From 25c to 50c lower on some grades.

THE MARKET SITUATION.

The primary markets have been sagging again, and the situation generally is not so bright as it was. The London tin market has been easy, and without character, while jobbing conditions, both in this market and in New York, have been dull and unsatisfactory. Copper fell away again in the English market owing to the absence of speculation. The New York market has been extremely quiet, with little buying. The recent spurt in consumption seems to have satisfied requirements for the time being. Lead has been fluctuating across the Atlantic. Stocks are apparently much heavier than they should be. On the whole the tendency, however, has been to improve. Spelter is still the bright star. Under a good consuming demand and the control of the European Zinc Convention, whereby curtailment of output will take place whenever the average price of ordinary brands has been below £19 for a period of six months, or if the total stock of spelter shows an increase during such a period. The English pig iron market continues to show fair improvement, the home consumption being larger than for some time past. While stocks in public stores still show a slight increase, tonnage held in makers' yards has been almost cleared out. There has been a slight decrease in warrants, but that is understood to be speculative only.

MONTREAL.

May 21.—Although steady trade has been done this week, it cannot be said that the tone of the markets is quite so good as it was. The unseasonable weather has not helped matters, and the slight feeling of apprehension as to the welfare of the crops seems to have damped consumers a little. Then again the primary markets are not in the best of shapes. The result of all this has been to depress the markets slightly. There are no changes in prices for ordinary jobbing lots. All the metals have been in demand, but the inquiries have not been so good. The metal markets are very easily influenced just at present, however, and better reports as to general trading conditions would soon elevate the tone.

PIG IRON—Trade is good locally. The heavy consignments arriving regularly from the Old Country are being distributed as quickly as possible. Buying ahead has improved, and consumers are paying somewhat higher prices for deliveries extending into the fall. The belief seems to be that prices will not go lower, and there is less hesitation in covering requirements. With several Canadian furnaces out of the open market owing to their steel orders, the situation is much stronger, and prices for home pig are well kept up. The furnaces are fully occupied, and the tone of the market very good. Both the United States and the Old Country markets continue to show improvement, and this naturally helps the position here. We continue to quote: imported pig, Clarence, $16.75 to $17; Middlesboro No. 3, $16.50 to $16.75; Summerlee No. 1, $18.75 to $19; No. 2, $18.25 to $18.50.

TIN—There is no change in the jobbing quotations this week, and the price is still 32½ for ordinary lots. Some good orders have come in, but inquiries are not so good. The weak tone of the English market has not improved matters, and consumers are still uncertain as to whether they had better look ahead.

COPPER—With a steady purchasing movement, copper quotations are unchanged at 14c for ordinary jobbing lots. The city demand has shown improvement, but the tone of the market is not so good as it was last week. There is a great deal of doubt as to the future of copper, and consumers are not buying more than they really require. The jobbing consumption in the States is very dull, and with production going along at record speed, the situation is not one to impress buyers.

SPELTER—The demand continues very good, and quotations remain unchanged at $5.75. There is a splendid demand for galvanized sheets, and steady shipments are being made to all parts of the country. The English market remains very firm, and the influence of the European Zinc convention is plainly to be seen. The St. Louis market is also firm.

LEAD—With an improving demand, lead is unchanged at $3.65 for imported, and $3.55 for Trail. Inquiries are better, and if general trading conditions improve there should be a good future for lead. The English market has been fluctuating, but on the whole has been stronger.

SCRAP METALS—No changes are announced in scrap metals. Buying is on the quiet side. Heavy copper and wire, 11c; light copper, 10c; heavy red brass, 10c; heavy lead, 2¾c; scrap zinc, 3c; wrought iron, 11c; machinery cast, $14.50.

TORONTO.

The local metal market is hardly as brisk as it was a couple of weeks ago. May opened up well, but apparently business has dropped off this week quite a little. Trading is fairly good, however, though the metal men have to fight for every order and are trying to dig up trade in all quarters.

Iron has developed an easier tendency, though the quantity of iron used has increased in volume. Copper is showing a gradually improving situation. That is to say, the difference between consumption and production is not so great as it was six months ago. The revival in industries using copper has brought this condition about.

PIG IRON—While business is gradually increasing in volume—there is quite a lot more iron used to-day than there was eight weeks ago—it is hardly keeping step with the pace set at the beginning of the month. As a consequence prices are somewhat easier. The quotations ruling for several weeks past were considered high for business and consequently some cutting was indulged in. Reports continue to circulate that the market is firming up, and so it is, though not to the extent some persons would have readers believe, and there is lacking the substantial foundation to back these reports up. Canadian foundry is now $19.25; No. 3 Middlesboro, $19.50, and Cleveland, $21.

LEAD—The local situation is unchanged, and the price remains at $3.65. the quotation which has been ruling for some weeks past. Outside, however, lead is showing excitement. New York has gone up another 15c, lead now being quoted there at $4.50.

COPPER—The red metal is improving statistically; that is, there is not now the great difference in the figures showing production and those showing consumption. Locally copper is firm and active at 14c, though some offers for business were made at a close margin.

TIN—Fairly active at unchanged prices is tin this week. 32c continues to be the market quotation. The tendency is uncertain, though no startling movement is looked for.

SPELTER—This metal is continuing to show good results, and it is the most satisfactory metal on the market, though the volume of spelter passing in trade is not very great. Stocks are none too heavy. The market quotation of $5.75 holds good and it is firm at the price.

SHEETS AND PLATES — Quotations for the year are unchanged from those ruling last season, though some few sales for large quantities have been made at lower rates than those of a year ago. Much more business is being done this season, however, the improvement being quite noticeable.

OLD MATERIALS—Present business is fair, but might be somewhat better. Stocks are pretty high, though not accumulating so rapidly as a month ago. Prices remain unchanged. Dealers are paying for heavy copper and wire, 11c; light copper bottoms, 10c; heavy red brass, 9¾c; heavy yellow brass, 8¼c; light brass, 6¾c; tea lead, 2½c; heavy lead, 3c; scrap zinc, 3c; No. 1 wrought iron, $10; machinery cast scrap, No. 1, $14; stove plate, $12; malleable and steel, $8; old rubbers, 7c.

HARDWARE MARKETS

MONTREAL.

May 21.—Although trade is moving steadily there is no doubt that the weather has kept back a large amount of business that would otherwise have been placed. With the roads in a very bad condition, and seeding late, farmers are reluctant to buy, and of course this makes merchants more cautious for the time being. There is no feeling of doubt as to the ultimate trend of trade, but until the warm weather sets in, and business has every opportunity to expand, merchants will not extend themselves. A similar absence of swing is noticed in the city trade. As one merchant remarked, people are thinking more of buying umbrellas than gardening tools.

A slight improvement has been noticed in the bookings for harvest tools, but apart from this there is little buying ahead. Most orders are repeat spring ones, and are of a general assorted character. Hose has naturally fallen off with the wet weather but lawn mowers have improved. Builders' hardware is moving splendidly, and is proving to be one of the strongest selling lines this spring. The Dowswell Manufacturing Co. have adopted a new list and discount for wringers and washers, but there is practically no change in prices. The Royal Canadian wringer now lists at $42.25 less 20 per cent., the Reacting Round at $73.75, and the Reacting Square washers at $77.50 less 20 per cent.

Owing to a rise in the American wire market, the rival wire concerns having together raised their prices 10c, the local market has followed suit, and barbed wire, galvanized, and coiled spring fencing has been advanced 10c. Consumers who placed orders during the week's reduction are congratulating themselves. It looks as if these lines were shaping for a further rise. The markets generally are firm and unchanged.

BUILDERS' HARDWARE—The broken weather does not seem to have affected the movement of builders' hardware which is one of the strongest selling lines. The city demand is very good and of a general assorted character, while outside points are buying well. No changes are announced, and we quote: Door sets and escutcheons, 50 and 10; escutcheon pins, steel 50; brass, 55. Spring hinges, No. 20, $9 per gross.

SPRING GOODS—Repeat orders are not so brisk as they should be, although a steady volume of trade is being done. Hose is quiet, but lawn mowers and other gardening tools are moving in fair bulk. Screen doors and hinges, poultry netting, and green wire cloth are in steady demand. We continue to quote: Screen doors, stained, $7.80; grained, $8.10; screen hinges, $9 a gross; poultry netting, 60 and 2½; green wire cloth, $1.70 in 100 feet rolls.

HARVEST TOOLS—A slight improvement is noticed in the bookings, but the weather is having the effect of retarding the buying season and the accumulation of orders is not so heavy as would otherwise be the case. We continue to quote: Hay fork pulleys, $1.60 to $8.50 a dozen; hay carriers, hay rakes, etc., 55 off.

MINER'S SUPPLIES—The demand is quiet for the time being, and without much character. We continue to quote: Miners' picks, 17c a pound; prospectors' hammers, 20c; pick handles, $1.85 a dozen; drilling hammers, 6c a pound; crowbars, 3½c; drill steel, 8c.

BOLTS AND NUTS—A really good demand exists for bolts and nuts. Repeat orders are coming in briskly, and the tone of the market is very good. Nails are also in steady demand. We continue to quote: Discounts on carriage bolts, ⅝ and smaller, 70; machine bolts, ⅝ and less 60, 10 and 10; coach screws, 75; stove bolts, 80 and 7½.

SCREWS—Screws, like bolts and nuts, are in excellent demand. Dealers are placing repeat orders most freely, and the prospects look very favorable. We continue to quote: 85 and 10 off for flat head, bright; 80 and 10 off for round head, bright; 75 and 10 off for flat head, brass, and 70 and 10 for round head, brass.

SPORTING GOODS—The season has been kept back by the wet weather. Many of the lakes are still covered by ice, and the demand for fishing tackle is quieter than is usually the case at this time of the year. The opening of the baseball season has helped the sale of baseball outfits, but it cannot be said that the sporting goods season has come to its full powers as yet. Guns and ammunition are on the quiet side.

WIRE—The United States controlling wire concerns have raised their prices 10c on barb, galvanized, and coiled spring fencing, and this has affected the local market to a similar extent. The plain wire lines—bright, annealed, and annealed and oiled are now quoted at $2.25 base. The other plain wire lines are unchanged at $2.30. The strong demand for all wire goods still continues and back orders are accumulating in almost every line. We now quote: Barb wire, car lots and mixed, $2.50; small lots, $2.55; plain twist, car lots, $2.80; small, $2.85. Galvanized wire No. 9, $2.25 in straight and mixed car lots, and $2.30 small lots, f.o.b. Montreal. Coiled spring fencing $2.45; straight and mixed car lots, and $2.55 small lots. Plain wire, bright, annealed, and annealed and oiled, $2.25 base. Other lines $2.30 f.o.b. Montreal.

TORONTO.

May 21.—"Five days of continuous sunshiny weather would make such a demand for seasonable hardware articles that they would go like hot cakes," said a prominent jobber in discussing the prospect of trade. "The hardwareman would find his goods going out in sales very largely, and they, in turn, would come to us with repeat orders."

The passing week is a splendid one for business. All lines that are asked for at this season of the year are in brisk demand, especially so are farm and garden tools and implements. Great quantities of hoes, rakes and spades have been moving this week, and in spading forks there has been a veritable dearth, so great has been the demand. Practically all the stocks in the city have been depleted of this one line.

Wire prices have undergone a change. Last Saturday there was a decline due to the cut in the U. S. and a smypathetic feeling to the lower quotations in the eastern markets. But the low prices lasted only three days, and on Tuesday evening last they again came near the old figures. Other lines are unchanged in price.

BUILDERS' HARDWARE — Sales which were stimulated by the numerous building permits granted have increased, if anything, since operations have really opened out. This looks like a bumper building season. Already material has increased enormously, and, in fact, is quite scarce. With it all builders' hardware, too, is meeting with such a big demand that a record sales year is anticipated. It is hard to say which articles are going out best in sales, so great is the inquiry for all kinds of builders' hardware, but hinges are particularly active.

WIRE—An unsettled week has just gone by so far as price fluctuations are concerned, but the market has firmed up during the latter part of this week. Bright annealed wire and oiled and annealed wire for fencing is now $2.25 base; and coppered and tinned wire is $2.50. Demand is good.

SEASONABLE GOODS—Poultry netting and wire cloth are showing renewed life, and large quantities have gone out during the week. Summer goods are moving rapidly, lawn mowers perticularly selling well. Hose is a little light and so are refrigerators and ice cream freezers, though some nice sales of these latter have been put through. The smaller variety of garden tools have sold well and barn and farm implements figured largely in shipments.

SPORTING GOODS—The season is at its height. The holiday ahead has brought orders asking for speedy delivery of sporting articles. Baseball outfits still hold first place, but lacrosse goods and fishing outfits are selling well. Orders for guns and ammunition are increasing satisfactorily.

HEAVY GOODS—Nails continue to be much called for and present-day sales appear to be breaking all records. Bar iron is steadily increasing in demand, and pipe continues to go out freely.

STEEL PRODUCTS ADVANCING.

Cleveland, O., May 20.—The Iron Trade Review says: The progressive strides made by the general market within the past month have effectively checked the consideration of further wage reductions and a number of the steel companies and blast furnaces, which made 10 per cent. cuts in April, will restore the former basis June 1. The United States Steel Corporation has not and will not reduce the wages of its 200,000 employes.

Evidence is accumulating that the finishing end of the iron and steel industry is now in a state of very favorable activity. There has been no cessation of the steady volume of orders which has been coming into the mills

during the past six weeks and a further increase of this movement has been noted during the past ten days. Consumers are freely entering the market, but are meeting a stronger sentiment on the part of the mills as to committing material of extended deliveries at the prevailing quotations.

The general movement of the market is unmistakably upward. During the week, wire prices, which were reduced $7 to $10 a ton on May 1, were elevated $2 a ton, and further increases are expected soon. The tonnage of steel bars placed with some companies has been of such proportions that they are practically withdrawing from the market. One of the leading makers this week added $1 to its price, and is now asking $1.25 for this year's shipment. In tubular goods there is considerable speculation as to a probable advance within 30 to 60 days. In semi-finished material and in sheets a more bullish sentiment is appearing.

METAL NOTES.

The copper output of the United States in 1908 is estimated at 948,146,490 pounds.

Bars, plates and shapes advanced another $1 a ton at Pittsburgh the middle of May.

The U. S. Senate last week voted to place a duty of 25 cents a ton on iron ores entering that country.

An English report recently issued places the production of iron ore in the world at 129,000,000 tons in 1907.

The "Metall-Anstrich Syndikat" of Berlin has put on the market a new process by which tinning is effected by painting with a pasty mass and subsequent melting on of this latter. The tin is rubbed fine like ordinary bronze powder, and worked into a paint with a suitable menstruum. According to the requirements, a mass is made either of pure Banca tin and lead, or of tin, zinc and lead. Experiments with the new metallic coating show that bending, twisting and embossing cause no flaking. The tests for porosity show that the protective action of the coating on iron is the same as with the ordinary tinned sheet.

Fifty tons of Vanadium steel have been rolled successfully at a steel plant in Coatesville, Pa. Vanadium was discovered in South Africa and is under the control of the American Vanadium Co. The idea of the makers of the new steel is to use it for the construction of steam boilers, especially locomotives. Steel plate now used tests 60,000 lbs. to the square inch, while the Vanadium steel it is said, will test to 80,000. The harder the steel, the less tensile strength it has, and by the use of Vanadium, strength is added with hardness. It is said that the new steel will wear longer and boilers can be made of lighter plate and have the same durability. Vanadium in steel does not change its appearance.

M. J. Otto, recently of Ayr has purchased the stove and tinware business of J. H. Rowe & Co., Dunnville.

The R. H. Smith Co., saw manufacturers, St. Catharines, have secured an option on a site of eight acres at Ottawa, and are considering the advisability of removing their plant to that city.

HARDWARE TRADE GOSSIP

Ontario.

Alf. St. Onge, hardwareman and contractor, Windsor, has offered to compromise.

Newman & Livingston, Picton, are establishing a branch store at Gananoque, on a departmental store basis.

W. C. Connell, late with R. J. Bruce, West Toronto, has accepted a position as sales representative in Hamilton for the Gurney-Tilden Co.

Coleman Miller, for 35 years connected with M. & L. Samuel, Benjamin & Co., Toronto, left on Wednesday on a couple of months' holiday and business trip to Great Britain and the continent.

During the most severe electrical storm of many years lightning struck the plant of the British-American Smelting Co., at Chippawa, last Saturady, and striking a barrel of gasolene, started a fire causing damage estimated at $15,000.

Quebec.

The Bazin Mfg. Co., nail manufacturers, Quebec, are offering to compromise.

The Charles Fawcett Mfg. Co., Sackville, N. B., have opened a branch office in St. Paul Street, Montreal.

The Pallascio Hardware Co., Notre Dame West, Montreal, have changed their name to the Raymond Hardware Co.

James Redmond has been elected president, and Willian V. Kelly, chairman, of the board of the Dominion Car & Foundry Co., Montreal.

James Simmonds, vice-president of the Starr Manufacturing Company, and head of James Simmonds & Co., Dartmouth, N.S., has been on a visit to Montreal.

Robt. Munro, managing director of the Canada Paint Co., Montreal, is on his way to Scotland, on board the Cassandra. Mr. Munro is accompanied by Mrs. Munro.

S. F. McKinnon, of Toronto, president of the Canada Paint Co., Montreal, has sailed for England on the Laurentian. Mr. McKinnon was accompanied by Mrs. McKinnon.

J. E. Paine, managing director of Geo. Wstenholme & Son, Sheffield, has been on a trip through Canada, going from coast to coast. A visit was paid to Montreal, the Canadian agents of his firm being B. & S. H. Thompson & Co., of that city.

The mayor of Sarnia, David Milne, head of the firm of MacKenzie, Milne & Co., paid a visit to Montreal this week. In the morning he visited several manufacturing establishments, and after luncheon, with C. M. Hays, general manager of the Grand Trunk Railway at the Canada Club, spent the afternoon in company with his old friends, T. H. Newman, of Caverhill, Learmont & Co.: A. A. Brown, of the McClary Mfg. C., and W. H. Evans, of the Canada Paint Co.

Western Canada.

C. W. Sainsbury, hardwareman, Winnipeg, has assigned.

David Gibson has sold his hardware stock at Elgin, Man.

F. L. Sherrin Holland, Man., has sold his hardware business to Dogg Bros., who will take possession on June 1.

Chas. Woodhull is preparing to open a hardware store at Hartney, Man., in the building formerly occupied by Blair & Son.

The wedding was celebrated at Treherne, Man., recently, of Miss Amy Frances Cooper to Charles Seymour Galusha, hardware traveler for the Marshall-Wells Co., Winnipeg.

J. G. Hayes has sold his hardware business at Windthorst, Sask., to Hector McLean, Mr. Hayes is removing to Dryden, Ont., where he has bought the hardware business of A. W. Coulter.

United States.

John F. Pease, Syracuse, N.Y., and one of the founders of the Pease Foundry Co., Toronto, died a fortnight ago. Mr. Pease invented the Pease furnace, which he commenced to manufacture in 1883. During his career he invented 18 different types of heaters. The company he organized grew to be very large and several years ago became a part of the International Heater Company, with which he was connected several years previous to his retiring from business. Mr. Pease was closely identified with, if not the originator of, the combination system of heating and ventilating. He has had no interest in the Pease Foundry Co., Toronto, for many years.

RUSTLESS WIRE CLOTH.

There being a demand for a superior grade of wire cloth for screening doors and windows in the better class houses, the B. Greening Wire Co., Hamilton, are now supplying a rustless cloth to meet this demand. Their largest seller is a 14-mesh solid bronze cloth, extra heavy, and of perfect weave. Being almost invisible it does not obstruct the vision and proves an ideal screening. Another kind which possesses most of the advantages of the bronze screening and is much cheaper is made of galvanized wire, 14-mesh, and 33 gauge wire. The stock widths of both grades are 24, 30, 36 and 42 inches, but special widths are supplied when quantity will warrant it.

NEW MANUFACTURERS' AGENCY.

Norman Macdonald, recently buyer for Rice Lewis & Son, Toronto, has been appointed sole sales agent for Ontario for the Carborundum Company Niagara Falls, N.Y., manufacturers of abrasive materials. Mr. Macdonald will take on other agencies more particularly in tools and supplies for factories. He has established offices and warerooms at 30 Front Street east, Toronto, in the same building as T. B. Lee, manufacturers' agent, is located.

Trade News From Atlantic to Pacific

Trade Gossip from Eastern Canada

Bathurst and St. Peters to Have Water and Sewerage Systems—Lumber Company Formed With Three-quarters of a Million Capital.

ST. JOHN.

May 19.—Extensive repairs are being made to the walls of the Union Foundry building on the west side. John Long has the contract and now has a crew of men at work.

F. E. Jones, electrician, has moved from the Jardine building to quarters in the Vroom and Arnold building, where he will have more room to display his stock of fixtures.

The Bathurst St. Peters Water and Sewerage Co. has been incorporated to supply water and sewerage to Bathurst and the village of St. Peters. Capital $20,000.

Murdock Kennedy and Parnell McMahon have opened a general store in Emerald, P.E.I. W. E. H.

NEWCASTLE.

The business of the Rosebank Lumber Company and the Swedish Planing Co. here has been taken over by the Swedish-Canadian Lumber Co., with capital of $750,000, headquarters to be at Nordin, N.B., a suburb of Newcastle.

The Monitor Manufacturing Co., of Fredericton, N.B., has been granted a Canadian patent for their acetylene gas generator.

L. H. Higgins, shoe merchant, of Moncton, will this summer build a new block, adjoining his store. H. H. S.

HALIFAX.

May 17.—There is considerable activity in the hardware markets at present. Prices are steady, but there is a tendency to move upwards.

H. H. Fuller & Co. received $27,000 insurance on their stock of hardware recently damaged by fire. For the present the firm is disposing of some of the stock that was saved, in temporary quarters on Granville Street. The work of repairing the firm's buildings on Water Street is now proceeding.

H. P. Conreye, special agent of the American Railway Association, was a visitor to Halifax last week, and in company with J. T. Hallisey, District Superintendent of the Intercolonial Railway, called on the various firms interested in the transportation of explosives. The association which Mr. Conreye represents includes all the principal American railways, and their object is to enforce the laws passed by the United States Government for safety in transporting explosives to prevent both the loss of life and property. Many mishaps have occurred on the railways and at sea, which have caused great losses, but since the formation of this association the losses have been very greatly reduced. The association now embraces trans-Atlantic shipping interests as well as the railways. The Intercolonial has recently joined this association, as they regard it as a great benefit for life and property, as the regulations require particular care in packing and looking after general safety in handling explosives. While here they visited the steamship firms whose lines carry explosives and they expressed surprise at the large quantity carried by the firms, especially the Furness Withy Co. This firm's steamers carry nearly all the explosives used by the collieries in Nova Scotia. They also visited the Acadia Powder Co.'s plant at Waverley, N.S. J. H.

MONTREAL.

May 20.—W. S. Leslie, of A. C. Leslie & Co., has returned from an extended trip to the Old Country, visiting among other places Bristol, the headquarters of John Lysaght, for which people his firm are Canadian managers. Mr. Leslie stated that although trading conditions were on the whole quiet across the Atlantic, there was an improvement in a number of lines, and the general feeling was that business would improve steadily. Prices in iron and steel were low, but the opinion was that these prices were as low as they were going to go, and some branches were now advancing. All over the country there was a general feeling of interest regarding Canada, and business men were looking to an improvement in the Dominion to brighten things up at home. The tin plate trade, continued Mr. Leslie, while quiet for some time had had quite a revival during the past month. Tin plate makers have more orders in hand than ever before in their history. This was owing to general expansion in the different markets of the world. Australia and British Columbia were large buyers. Owing to this increase in business the large tin plate makers were all adding to their plants.

T. R. Ferrall, Wakefield, Mass., has been visiting Montreal hardware circles in the interests of the Boston & Lockport Block Co., East Boston.

Items of Interest Gathered in Ontario

Movement Towards Early Closing at Kingston — Chatham Merchant has Children Using a Lawn Swing in His Window.

OTTAWA.

May 18.—Business is picking up now and summer appurtenances are prominently displayed in all the hardware shops. Fishing tackle and other sporting goods are also to the fore. In this connection, Graves Bros. have a very fine showing of yachting equipment.

A very artistic and instructive book has just been issued by the International Portland Cement Co. as a souvenir, dealing with the history, development and possibilities of Portland cement. It is a work of art and the illustrations contained therein are exceptionally fine. But to the engineer, architect and all interested in the work of construction be it, houses, bridges, breakwaters, dams, piers, etc., the book contains a lot of valuable information regarding the method adopted for the manufacture of this great building adjunct. The history of cement is in itself educative. Egypt was the home of cement makers 4,000 years ago and about 2,000 years later the Romans discovered hydraulic cement of which they were the sole possessors, until Col. John Sweaton an English engineer in 1756 discovered that a certain limestone containing a percentage of clay on being calcined, produced a cement which he called "Improved Hydraulic Lime." It was upon this he staked his reputation and built the Eddystone Lighthouse, a monument not only to the excellence of his cement, but to his ability and courage as an engineer. Later developments are of equal interest and any hardwaremen handling this material will be well repaid for the trouble of sending to the International Portland Cement Co., Ottawa, for a copy.

If a meeting of the Ontario Master Plumbers' is held in Windsor during the last week of June, several Ottawa master plumbers will attend if conditions are favorable to their getting away. Building is strongly evident now and the majority of the plumbers feel that the possibility of their being able to take a few days at that time is very questionable. However, all agree that such a convention would be a good thing as it would not only promote a fraternal feeling, but would also provide an occasion for the exchange of ideas and discussion of suggestions which would undoubtedly be of value to everyone. An Ottawa plumber suggests that if conventions are held in the winter there would be more liklihood of better attendance as plumbers at that season are not rushed to the same extent as from now to the end of the summer. As regards the establishment of provincial legislation governing the plumbing work in country districts there was an unanimity of opinion in Ottawa. Everyone was emphatic in the endorsation of such a proposal and all agreed that the benefits arising from such enactment would not be alone to the plumbing trade, but to the general welfare of the public health. One master

plumber in this connection suggested a clause governing the location of cesspools, closets and privys in respect to wells. He stated that such places should be located according to the formation of the soil or strata at stated distances from sources of water supply and this would materially aid in the prevention of contagious diseases. Others were of opinion that a master plumber should be on the board of health so as to be in a position to intelligently discuss the sanitary methods pursued in the respective cities and towns.

Maurice O'Connell has installed plumbing, heating and ventillating systems in the Cumberland Apartments, Attwood Apartments, Catholic Lyceum and the Ottawa Hunt Club.

WALLACEBURG.

May 11.—J. M. Husband & Son, Wallaceburg, are paying special attention to window dressing and always have a tastily dressed neat window, emphasizing special lines, and they find the displays pay well. They have an arrangement with a produce man by which they can pay cash or trade for eggs and find it a profitable department.

The Stonehouse, Monroe, Zavitz Co., Wallaceburg, are instaling metal she'f boxes in their hardware department, and are also adding a line of motor and boat supplies.

Work has begun on the excavation for a 250-barrel flour mill and elevator at Wallaceburg. J. K.

LEAMINGTON.

May 12—Greenhill & Moffitt, Leamington, had an interesting inquiry some time ago from a gentleman from Virginia, now connected with the tobacco business in Leamington. The gentleman brought in an English padlock which had been in use for 51 years and with the exception of being weatherworn was in as good condition as ever, and wanted a dozen exactly similar. Fortuately Mr. Greenhill's knowledge of English goods enabled him to procure these, and after a time they duly arrived and were delivered. This incident goes to show how substantially English goods are made.

On the safety razor question Mr Greenhill expressed his opinion that the hardware trade were losing much of this business because these goods were placed in the hands of the drug and stationery stores. J. K.

CHATHAM.

May 18.—"It seems like work night and day," remarked one hardwareman this afternoon, in reference to the marked pick-up in business the last few days. Hardwaremen all along the line report things busy. Plumbing is picking up rapidly now, and a busy season is anticipated.

The debt collection system for some time past under contemplation by the local retail merchants was whipped into shape at the regular monthly meeting Tuesday evening, when the executive presented its report on the matter. Under the system, as adopted, each merchant contributes at the flat rate of $10 for the services of the collection department for the year. While this might seem to weigh against merchants on the side streets, it was pointed out that owing to the fact that King Street merchants do a larger proportion of cash business, the merchants in outlying parts of the city probably have as many bad debts as those with more extensive business on the main street. The fee is exclusive of the $2 membership fee in the R.M.A., of which the merchant has to be a member before he can secure the benefits of the collection department.

After some discussion, W. M. Murdock was named as official collector for the association. Mr. Murdock is a retired grocer who latterly has been engaged in the insurance business. He will have charge of the outside department of the work, while the clerical work will be handled by the association secretary, J. W. Powers. Collections will be turned in to the secretary-treasurer daily, while payments will be made to merchants twice a month, and monthly reports rendered as to the names of debtors on the collection list, and other matters of interest. As in the case of the Guelph Association, the weekly collections from any one debtor will be divided equally among the creditors, irrespective of the amount of their claims, till each claim is satisfied. Quite a number of merchants present subscribed immediately as members of the collection department, and the collector and secretary assisted by leading merchants, will make a thorough canvass of the merchants of the city in the course of the next two weeks. The fixing of salaries was deferred till the result of the canvass is known.

News from West of Great Lakes

Next Week to be a "Clean-up Week" at Calgary — Large Volume of Building at Edmonton and Calgary—Nail Factory May be Established—New Stores and Changes in British Columbia Cities.

VANCOUVER.

May 15.—The hardware and plumbing trade is very good at present, and in talking with the men in the trade, little complaint is found. It is a good time of year anyway, but the prospects are particularly good just now. In the wholesale line there is greater movement than at any time previously, and this indicates a firest rate retail turnover. Building continues active, the permits being nearly all for dwelling houses, railway construction is going on close to the city, logging is starting up, and, in short, the situation all through, is encouraging.

A large amount of work is to be done by the B. C. Electric Railway Company in the city and surburban districts, which will total an expenditure of about $2,000,000.

The value of the permits issued last week was $111,905, all for dwellings. The largest was for $43,000 for a brick addition to an apartment house being erected by J. J. Banfield at the corner of Bute and Melville streets.

G. J. Johanson, has established a tinsmithing and plumbing business on Fourth Street, North Vancouver.

CALGARY.

May 13.—Th s city has been doing its utmost to interest the people in the beautifying of Calgary. The Horticultural Society has given a course of free lectures to help along the good work, and the week from May 17th to 22nd has been set apart as "clear up week." And every hardware dealer is ready for it, with the window decorated to suit the occasion with spades, rakes, hoes, and all kinds of garden tools.

It is rumored that Calgary may have a nail factory in the near future. The Alberta Wire Nail Company have been negotiating with The Gordon Nail Co. of St. John, for the purchase of their plant, and if the deal goes through the plant will be transferred to Calgary. Calgary is an excellent field for such a plant, as at present it costs the dealer $1.48 per 100 lbs. to bring nails from the eastern coast, whereas the material could be brought cheaper to Vancouver, and from there to this city for 52 cents a hundred, thus making an important saving, and a profitable industry.

The building permits so far this year are almost double of that for the corresponding time last year. Below are the actual figures :

	1909.	1908.
January	$ 21,650	$ 12,800
February	78,050	23,590
March	94,900	42,100
April	174,150	106,450
	$368,750	$184,940

It is estimated that the cost of building in the city this year will be $2,000,000. Some of the larger buildings are : Thurber & Giles, business block, $20,000 ; St. Mary's Separate School, $44,000; A. J. Sanirs, business block, $50,000; W. R. Hull, business block, $140,000; Dr. Bruner, apartment house, $20,000; three schools, each $45,000 ; Tees & Pense, warehouse, $35,000; Dr. Blow, warehouse, $30,000; Calgary Paint & Glass Co., addition to warehouse, $35,000; J. Rodrique, hotel, $20,000. A. R. A.

VERNON.

May 15.—W. J. Burroughs and family have left for England. Mr. Burroughs has been for some time in charge of the Vernon Hardware Company's plumbing department. He expects to return to the Okanagan at some future date, probably early next year. R. B. B.

VICTORIA.

May 13.—The new order of things, increase of business and a consequent influx of population bringing in new business firms with a displacing of some of the older establishments. Businesses which have been landmarks for a generation have to move on and make way for the new. This has come to be the order in Victoria. One of the last to

CONDENSED OR "WANT" ADVERTISEMENTS.

RATES.

Two cents per word first insertion; one cent per word subsequent insertions.

Five cents additional each insertion where box number is desired.

Contractions count as one word, but five figures (as $1,000) are allowed as one word.

Cash remittances to cover cost must accompany all advertisements. In no case can this rule be overlooked. Advertisements received without remittance cannot be acknowledged.

RULES FOR COPY.

In addressing replies care of HARDWARE AND METAL don't fail to give box number.

Replies addressed to HARDWARE AND METAL boxes are re-mailed to advertisers every Monday, Wednesday and Friday.

Requests for classification will be followed where they do not conflict with established classified rules.

Orders should always clearly specify the number of times the advertisement is to run.

All "Want" advertisements are payable in advance.

ARTICLES FOR SALE.

Don't keep any fixtures or tools around your store for which you have no further use. They are worth more to-day than they will a year hence. Don't keep money tied up which you could use to secure discounts from your wholesaler.

CASH REGISTER, high grade, nickel plated. Registers one cent to twenty dollars. Perfect condition guaranteed. Half price, $55.00. The R. O. Smith Co., Orillia, Ont. (23)

ELLIOTT-FISHER STANDARD Writing-Adding Machines make toil easier. Elliott-Fisher Limited, 513, No. 83, Craig St. W., Montreal, and 129 Bay Street, Toronto.

THE WALES VISIBLE ADDING AND LISTING MACHINE is superior to any other machine for these reasons, among others:—Visible Printing, Flexible Keyboard, Columns Space Bar, Automatic Clear Signal, Adjustment for Carbon Copies, Eliminating Keys, enabling the operator by the mere pressure of a key to add without listing or list without adding. 30 days free trial to responsible people. Write us for free illustrated catalogue. Adder Machine Company, Wilkesbarre, Pa.

ARTICLES WANTED.

If you cannot afford to buy a new counter, show case, screw cabinet, store ladder, or some other fixture which you could use to advantage, try a "Want Ad." under "Articles Wanted," and you may get what you want at a bargain price.

WANTED—Toggle Press. Apply Box 844, HARDWARE AND METAL, Toronto. (24)

AGENTS WANTED.

This is the problem of many manufacturers who are anxious to get a foothold in Western Canada. It will be easily solved if HARDWARE AND METAL is given the opportunity to solve it.

WANTED—By Montreal hardware and manufacturing company, two representative agents. Location, Vancouver for British Columbia; Edmonton, Regina or Calgary for Alberta and Saskatchewan. Address, Box 846, HARDWARE AND METAL, Montreal.

BUSINESS CHANCES.

FARM FOR SALE OR EXCHANGE for stock of hardware. 177 acres, famous Red River valley, 35 miles south of Winnipeg, 5 miles north of Town of Morris. Good graded road to town. This land is high and dry and first class soil. Price, $17 per acre. Address, Box 848, HARDWARE AND METAL, Toronto. (22)

HARDWARE BUSINESS FOR SALE in good live town 100 miles east of Toronto. Address Box 841, HARDWARE AND METAL, Toronto. (24)

BUSINESSES FOR SALE.

Somewhere in Canada is a man who is looking for just such a proposition as you have to offer. Our "For Sale" department brings together buyer and seller, and enables them to do business although they may be thousands of miles apart.

FOR SALE—Hardware, stove and tinware business, with tinshop tools. Stock about $4,000. Can be reduced to suit purchaser. This is a good growing business in a splendid section of country. Good reasons for selling. Apply Box 832, HARDWARE AND METAL, Toronto. [23]

MISCELLANEOUS

ADDING TYPEWRITERS write, add or subtract in one operation. Elliott Fisher, Limited, 129 Bay Street, Toronto.

A MARKET OF BUYERS, backed up by money to spend, is open to you in the Busy Man's Magazine. Every territory in Canada is represented. If you have something to sell, want to buy something, a condensed advertisement in the Busy Man's Magazine will put you in touch with the classes you wish to reach. Four cents per word will carry your message from Atlantic to Pacific. Send copy of your advertisement along with order to cover cost of insertion before 10th of month preceding date of publication. Your announcement will appear under a special heading. BUSY MAN'S MAGAZINE, Montreal, Toronto, Winnipeg.

CUT DOWN YOUR PRINTING BILLS one half, by installing a "Writerpress." Your office girl or boy can with it print your circulars, price lists, etc., at the rate of 1500 to 2000 copies per hour. Best machine ever made for printing facsimile typewritten letters. Prints from printers' type, half-tones, etc. Retail stores could greatly increase their business by using a WRITERPRESS to run off circulars and letters, sending them out to their customers and probable customers announcing special sales, etc. Send for illustrated catalogue and samples. The Canadian Writerpress Company, 33 John St. South, Hamilton, Ontario.

IF YOU are looking for a side line to add to your business there is none better than COLUMBIA GRAPHOPHONES. Double Disc Records (which means two records for a single price) and Indestructible Records (that will not break or wear out no matter how much you abuse them). The Columbia Phonograph Company is the only firm that manufactures both Disc and Cylinder Machines and Records, therefore, a Columbia dealer has the advantage over all others, as he can furnish his customers with what they want, while his competitor has to sell them what he has or lose the sale, which he generally does where there is a Columbia dealer. Are Columbia goods sold in your town? If not, why not? Do you want the exclusive agency? (remember exclusive). You had better write to-day or someone else in your town will read this advertisement and beat you to it. A postal will bring catalogues and full information free. Write to-day. Do it now. Toronto Phonograph Company, Limited, Exclusive Columbia Jobbers, 40 Melinda St., Toronto, Canada.

KEEP AN ACCURATE ACCOUNT of your employes' time. The Bundy Autograph Time Recorder is the ideal Time Recorder for retail merchants. It is the only machine where one employe cannot register for another, as each employe signs his name and the employer knows the signatures of his men. Whether you employ a few or hundreds of hands, we can supply you with a machine suited to your requirements. Write for illustrated catalog. International Time Recording Co. of Canada, Limited. Office and factory, 11 Alice Street, Toronto.

650,000—Not one of the 650,000 retail merchants who have bought a National Cash Register would think of doing business without it. The National Cash Register Co., F. E. Mutton, Canadian Manager, cor. Yonge Street and Wilton Avenue, Toronto.

SITUATIONS VACANT.

You can secure a "five-thousand-a-year" manager, or a "five-hundred-a-year" clerk, by stating your wants under "Situations Vacant."

WANTED—Experienced paint and glass traveler State previous experience and salary expected. Box 9, HARDWARE AND METAL, Winnipeg.

WANTED—A traveling salesman for the province of New Brunswick by wholesale hardware house of Montreal. Only A1 men need apply. Address Wholesale, Box 2310, Montreal. (tf)

WANTED—At once, manager's assistant for retail paint department. Only experienced men need apply. Ashdown Hardware Co., Retail Store, Winnipeg, Man. (22)

WANTED—A good smart boy with one or two years experience in the retail hardware trade. Apply, stating wages expected, to N. H. Bowers, Massey Station, Ont. (22)

SITUATIONS WANTED.

Travellers, clerks, or tinsmiths, wishing to secure new positions, can engage the attention of the largest number of employers in their respective lines, by giving full particulars as to qualifications, etc., under "Situations Vacant."

HARDWARE SALESMAN with seven years retail experience wants a good position. Best references. Box 842, HARDWARE AND METAL, Toronto. (21)

SALESMAN, assistant buyer or manager, or other position of responsibility, with wholesale or jobbing house, by man of twelve years experience and at present with one of principal jobbers. Box 850, HARDWARE AND METAL, Toronto. (23)

SALESMAN, youth with two years wholesale experience, wants retail position in city. Highest references. Apply 259 Grace Street, Toronto. (21)

It illustrates and explains how hardware windows may be dressed to sell goods. Price $2.50 post paid., The MacLean Publishing Co., Technical Book Dept. 10 Front St. East, Toronto.

MENSURATION FOR SHEET METAL WORKERS, by Wm. Neubecker.—This new book gives the principles of the art of measure, showing its practical application in solving problems, in finding the areas, dimensions or capacities of the diverse sizes and shapes of sheet metal products. It is of infinite value to all sheet metal workers. 72 subjects and 70 figures. Price 50 cents, postpaid. The MacLean Publishing Co., Technical Book Dept., 10 Front St. East, Toronto.

SUCCESSFUL ADVERTISING, HOW TO ACCOMPLISH IT, by J. Angus Macdonald.—Authoritative work by an advertising expert, setting forth the inner advertising principles of each business clearly and briefly. Contents include Ad. Building, Retail Advertising All the Year Round, Special Features in Retail Advertising, Mail Order Advertising, Miscellaneous Advertising. The suggestions are applicable to any trade. Price $2.00 postpaid. MacLean Publishing Co., Technical Book Dept., 10 Front St. East, Toronto.

feel the effect of this is the old established firm of Clark & Pearson, hardware and stove dealers. The property on which their business has been conducted for years has been sold, the old premises are to be pulled down and a handsome new building is to be constructed on the site. The new structure will cost about $15,000. Clark & Pearson so far have been unable to find suitable quarters, but expect to find an improved location before long.

Two more business blocks are to be erected on Yates St. Messrs Finch & Finch have purchased a good sized lot and will build a large four-storey block. The other is in the same block and will be about the same size and height and will give a substantial appearance to that section, which is rapidly coming to the front as a retail centre.

Victoria is at last making a move in the direction of having public lavatories put in, thus coming abreast of eastern and Old Country cities, which have for long time been up-to-date in the matter of public conveniences. Alderman Humber will move at the next meeting of the city council that plans and specifications be prepared for the construction of five lavatories and sites secured by a committee of the mayor and three aldermen. The backwardness of the city in this respect has frequently been commented upon by visitors and several suggestions have been made to the city council and letters written to the press on the subject. The latest was made by John Wilson, he submitting plans of an up-to-date, thoroughly hygienic structure and estimated that a revenue could be obtained which would pay for maintenance and all possible charges.

W. H. Adams who, until recently had carried on a cutlery and sporting goods store on Douglas St., died very suddenly while out trap shooting at Langford Lake.

The Hindus of Victoria hope to begin the construction of their temple in a few weeks.

Tenders were received by the city council for drinking fountains from the following firms. Hayward & Dodds, Crane & Company, B. C. Hardware Co., Andrew Sheritt, W. Bownass, Colbert Plumbing Co.

Three by-laws will be voted on on May 27, one to raise $45,000 for sewers, $125,000 for water extension. The other is for street improvement and block paving.

Spring cleaning displays of brushware and house cleaning articles have been made by several of the hardware stores, the best display being that of Drake & Horne, who have put in an attractive window of different lines of brushes and mops carried by them. The Shore Hardware Co. also have a display of brushes and paints making a good suggestion to the spring cleaner.

WINNIPEG.

May 18.—Owing to the number of failures, considered fraudulent, which have occurred amongst general merchants during the past year and a half, the wholesalers of Western Canada have come to a decision to investigate such failures thoroughly, and where the fraud can be proven, to prosecute the fraudulent party to the fullest extent.

With this object in view W. S. Willie, formerly a general merchant in Stony Plain, Alta., was recently prosecuted before the Superior Court of Alberta, sitting at Edmonton, and was convicted last week of obtaining goods on the strength of a fraudulent statement given to a prominent wholesale house in this city. It appears that Mr. Willie gave a signed statement to the representative of the wholesalers, at the time he ordered the goods. This statement showed his liabilities to be about $1,200, whereas it was proven that at the time he owed at least six or seven thousand dollars, of which he was undoubtedly aware.

It was attempted to show that the court had no jurisdiction, as the goods were sold f.o.b. Winnipeg. However, the judge set this point aside, as having no bearing on the question, and convicted the defendant of the offence charged, and remanded the prisoner in custody.

The wholesalers state that these actions are taken not only for their own protection, but also for retailers, doing business on a legitimate basis, and considerable satisfaction has been expressed amongst the retail trade of northern Alberta, that that section of the country has been able to secure two convictions of the above nature within the past few months.

Percy Watson, who for some years was superintendent of city trade in the builders' hardware department of the J. H. Ashdown retail store, has been transferred to the Calgary retail house, to act as manager of the same department in that city. On the eve of his departure he was made the recipient of a gold locket by his fellow employes in this city.

Winnipeg hardware retailers believe in making the best possible display of their goods. This spring it has been observed that the retail stores have presented a more attractive window display than that of last spring. Perhaps the reason for this lies in the fact that retailers were not realizing as much business as they anticipated, owing to the backward season, and lest someone else should secure the trade, it was necessary to put the goods before the public in the best possible way in order to retain a fair balance of the business. Seasonable goods are those which are most in evidence. This week, builders' hardware and sporting goods are quite prominent, and the artistic manner in which these are arranged in almost every instance is a credit to the various dressers.

It can be readily understood that the retailer who is fortunate enough to secure a good trade in sporting goods has an advantage in the matter of display over the dealer who trades more extensively in builders' hardware and the miscellaneous general lines. But it is encouraging to note that retailers make the best use of their circumstances, notwithstanding the condition of the trade in developing the artistic side of their business. A beautiful window is the ablest sales agency the business can sustain.

J. S. Wilbert, western manager of the Continental Oil Company, has recently returned from Regina, where he made arrangements for the establishing of a warehouse and compounding factory in that city.

The stove trade in Western Canada cannot be said to be in a flourishing condition at the present time. Local wholesale and jobbing stove houses are not content with doing a business similar to that of last year, and they are justified in looking for an increase in business, due to the increased general prosperity to the growth of population. In new sections of the country the trade has been all that could be expected. American stoves and ranges of the much-talked-of malleable steel type continue to come in, and notwithstanding the extra freight and duty charges, they, as a rule, undersell the better and more substantial Canadian-manufactured stoves. And as a means to this end expert solicitors and novelty articles are used, which are of great advantage in presenting a really inferior goods on the market. Malleable iron has no advantage over the ordinary steel stove manufactured in Ontario. The American salesman, however, has convinced many western buyers that it is, by simply giving demonstrations of its strength. It is quality which is required in the minute details of the stove's make-up. The American popular stove is the malleable steel, beautifully gilded and with fancy accessories, but the same stove has only a single case oven, as compared with the triple oven of the Canadian stove. It is because of these points of superiority that the Canadian stove cannot be reduced in price, and need not be reduced to the cut-price of the American stove.

EDMONTON.

May 15.—Trade has shown a decided improvement during the past week, the the principal lines moving, being poultry netting, green wire, cloth, barb wire, nails, etc.

Building trade is very brisk, work having started on the following buildings: J. Kenwoods stores and offices, $20,000; J. McKay Dixon's stores and offices, $10,000; Lewis Eiler's stores and offices, $30,000; Mrs. Looby's stores and offices, $15,000; S. Nankin's stores and offices, $9,200; Twin City Mfg. Co., factory, $15,000; Sisters Companions of Jesus, Convent, $25,000; J. Whitla's residence, $5,000; F. Adams, residence, $5,500, and a large number of smaller buildings are also under construction.

Building permits for the month of March this year, show an increase of 204 per cent. over the same month last year, the figures for April being $197,460 for 1908, and $210,890 for 1909 or an increase of 7 per cent for this year.

Cox and Weller are starting a hardware business in the city. They have erected a store near the big Swift Packing plant. J. H.

McKenzie Bros., hardwaremen and implement dealers. Wadena, Sask., have sold their implement business to P. McNichol.

SAVE MONEY

By Using Our

Corrugated or Plain Round Conductor Pipe

made in 2", 3", 4", 5", 6" diameter by 8′ and 10′ lengths without a cross seam. You can buy this perfect pipe for much less than you can make up pipe in 30′ lengths. Our Eave Trough is the best; it is machine made on a steel die and every length is the same.

Western Canada Market Situation

Our Western Correspondent Reviews the Market Outlook—Hardware Quotations Corrected by Telegraph up to Noon on Friday.

May 21.—Although the retail trade has revived owing to the opening of summer weather, yet the wholesalers are feeling the general dullness that has prevailed generally for some time, the condition is not serious, however, since the building business, upon which the hardware is at present depending very largely, will be brisk for several months. The market situation is more changeable at present than it has been for some weeks. It is expected that barbed wire will decline in price very shortly. American firms are landing heavy shipments at the head of the lakes just now and efforts are being made to have local wholesalers take in the stock. The wire business will be quite extensive in the west this summer. After seeding the farmers resort to fence building, and this branch of farm work is increasing each year as the country becomes more settled.

We quote a decline of 10 cents on all Canada plates.

As a result of the meeting a few days ago of the shovel manufacturers an open market is announced in that line of hardware. British manufactured shovels formerly were sold to the railway companies through the jobbers, but now the railway companies buy direct both from the Canadian and English manufacturer.

Winnipeg Quotations.

WIRE—Barbed wire, 100 lbs., $3.15; plain twist, $3.40; staples, $2.90; annealed wire, $2.90 base; oiled, 10c extra; bright iron, $3.10 base; brass spring wire, 29c base; plain galvanized, wire, 6, 7 and 8, $3.50; No. 9, $3.10; No. 10, $3.60; No. 11, $3.70; No. 12, $3.30; No. 13, $3.40; No. 14, $4.25; No. 15, $4.75; No. 16, $5.

IRON PIPE—Black pipe, ¼ in., $2.50; ⅜, $2.85; ½, $3.50; ¾, $4.65; 1, $6.60; 1¼, $9; 1½, $10.75; 2, $14.50; 2½, $24.40; 3, $31.50; 3½, $39.50; 4, $45; 4½, $52; 5, $58; 6, $75. Galvanized; ¼-in., $3.50; ⅜, $3.80; ½, $4.25; ¾, $5.75; 1, $8.50; 1¼, $11.50; 1½, $13.90; 2, $18.50; 2½, $30.50.

FITTINGS—Wrought couplings, 60 per cent.; nipples, 75; classified malleable fittings, 25; malleable bushings, 60; malleable unions, 60.

GALVANIZED IRON — Apollo, 16-gauge, $3.90; 18, $3.95; 20, $4.00; 22 and 24, $4.10; 26, $4.30; 28, $4.70; 30-gauge or 10¾-oz., $4.90; Queen's Head, 20, $4.10; 24, $4.30; 26, $4.70, 28, $4.90.

TIN PLATES—I.C. charcoal, 20x28, full box, $9.00; ½ box, $4.75; IX. full box, $9.00; ½ box, $5.75; IXX., full box, $13.00; ½ box, $6.75.

TERNE PLATES—I.C. plates, $8.50.

CANADA PLATES—Half polish, 6 and 7 inch, $3.00; 8 inch, $3.25; full polish, 6 and 7 inch, $3.75; 8 inch, $4.00.

LUBRICATING OILS—600 W. cylinders, 80c; Maple Leaf cylinder, $1 per gal., 700 A. cylinder, 75c; Sterling cylinder, 55c; 600 A. cylinder, 50c; Capital cylinder, 59 and 54c; Solar red engine, 32c; Atlantic red engine, 29c; Eldorado castor, heavy, 27c; medium, 26c; Ruddy harvester, 28c; standard gas engine oil, 36c; Renown engine 38c.

PETROLEUM AND GASOLINE—Silver Star, in bbls., per gal., 20c; Sunlight, 22c; case, $2.45; Eocene, gal., 24c; case, $2.60; Penniline, gal., 25c; Silver Light, 22c; Starlight, 20c; Sterling Light, 24c. Engine gasoline, gal., 22½c; f.o.b. Winnipeg, cases, $2.50.

Edmonton Quotations.

Barb wire, $4.00 per 100 lbs.; plain twist wire, $4.25; brt. wire staples, $4.20; poultry netting, 50 p.c.

HORSESHOES — MRM and "Bell," $5.15 base.

HORSENAILS— MRM, new cold process—No. 3, $4.50; 4, $4; 5, $3.75; 6, $3.50; 7, $3.25; 8, $3.05; 9, $2.95; 10, 11 and 12, $2.85 in 25-lb. boxes. Less than 25-lb. boxes add 1c per lb.

WIRE NAILS—$3.45 base.

SCREWS—Flat head, bright, 85; brass, 75; round head, bright, 75 and 10; brass, 70 p.c.

BOLTS—Carriage, 3-16 and ¼, 60 p.c.; 5-16 and ⅜, 4-inch and shorter, 55 p.c.; ⅜ (longer than 4-inch), 50 p.c.; 7-16 and up, 45 p.c.; machine, ⅜ and under, 55 p.c.; 7-16 and over, 45 p.c.; plow, 45 and 5 p.c.; stove, 70 p.c.

SHOVELS — First grade, $11.55; fourth grade, $7.60 per dozen.

HARVEST TOOLS—50-10 p.c.

BRUSH HOOKS—$9 per dozen.

LANTERNS—No. 2 cold blast, $7.75 per dozen.

FILES—Arcade or Eagle, 70-10-5 p.c.

SOLDER—23c per lb.

WRINGERS—Royal Can., $38 doz.

CHURNS—45 p.c.

ROPE—Sisal, 11c per lb.; British manila, 12c; pure manila, 15c.

BUILDING PAPER—Plain, 62c per roll; tarred, 78c per roll.

LINSEED OIL—Boiled, 80c; raw, 77c per gal. in barrel lots.

The Sherwin-Williams News

VOL. I. SOMETHING NEW EVERY TIME NO. 8

Published by
THE SHERWIN-WILLIAMS CO.
Canadian Headquarters and Plant:
639 Centre St., Montreal, Que.
Warehouses:
Toronto, Ont., and Winnipeg, Man.
Edited by
THE LITTLE PAINT MAN.

I don't believe I have ever given editorial mention in this paper to varnishes. You may be sure, good reader, that this is not because S-W. Varnishes do not deserve first rank among Sherwin-Williams Products, but simply because I could not talk about everything good in a limited space like this. Speakin' of varnishes reminds me of a story my ol' man used to tell. "Clothes don't make the man," he says, "but they're one of the things that help." An' it's jest that way with varnishes—they go a mighty long way in improving the appearance of almost anything, except perhaps food and clothing. An' let me tell you that fine varnishes like Sherwin-Williams' improve the reputation of the storekeeper who handles them, an' a good reputation makes money, an' "money makes the mare go." *The Little Paint Man.*

The exceptional uniformity and dependability for which S-W. Varnishes are noted are due to the utmost precautions we take for safeguarding their manufacture.

First, the formulas are right—right from both the chemist's standpoint and the practical man's standpoint.

The raw materials are carefully selected. For instance, we are able to procure the choicest varnish gums.

Then we make our own linseed oil and know that it is right in every respect.

We use the greatest care in cooking the varnish at just the right temperature and for just the right length of time for each particular batch.

We filter not only the high-priced varnishes, but every grade of varnish we make.

All S-W. Varnishes are thoroughly aged. We never allow filtering to take the place of aging, as some manufacturers do.

BUILDING AND INDUSTRIAL NEWS

For additional items see the correspondence pages. Information is solicited regarding building and industrial news, the incorporation of companies, establishment or enlargement of mills, factories or foundries, municipal waterworks and sewerage systems, railway or mining news, etc.

Industrial Activity.

A sewer pipe company is looking for an industrial site on which to locate at Medicine Hat.

The Royal Elevator Co., of Regina, are building elevators at Mortlach and Parkbeg, Sask.

The Canada Iron Corporation, St. Thomas, will make extensive improvements to their plant.

The Waterloo Manufacturing Co. will commence building operations at once at Portage la Prairie.

The Canadian Pacific Timber Company's mill at Gerrard, B.C., is to start operations very shortly.

The American Laundry Machine Manufacturing Co., Chicago, are likely soon to build a factory at Toronto.

A by-law to grant to the Trent Valley Woolen Mfg. Co. a fixed assessment for 20 years was carried on May 10 at Campbellford, Ont.

A large number of men have left Cranbrook for the Skookemchuck, to start a tie camp for Breckenridge & Lund, of Wardner. Over 100 men will be employed.

The big mill of the East Kootenay Company, at Jaffray, was started up recently. The mill is one of the largest in the district and gives employment to a large number of men.

Superintendent King, of McClary's, London, stated that business is rapidly improving, and that at the present time 450 men, the greatest number since the erection of the new buildings in South London, are now employed, a schedule of 60 hours a week being maintained.

The by-law granting the Structural Steel Co. a free site for the erection of a factory and exemption from taxation was passed by Sherbrooke ratepayers. The company will erect a plant valued at $25,000. The manufacture of bridges and boilers will be the main industry.

The Bancroft Mfg. Co. is a new organization with headquarters at Bancroft, Ont., for the manufacture of wood and other natural resources. It is proposed, at the outset, to engage in wood turning of all kinds, and a commodious four-storey building with a foundation specially suited for accommodating heavy machinery has been acquired.

Thornbury, Ont., has passed without a dissenting vote a by-law to loan by way of bonus $10,000 to the Thornbury Transportation & Reduction Co. to establish works. In addition they also give a free site for twenty years with harbor and water privileges. This company, besides employing a line of steel vessels, intend operating an iron smelter. It is composed largely of Meaford and Toronto capitalists.

Municipal Undertakings.

Moose Jaw asks tenders for laying water and sewer mains.

Tenders are asked by St. Thomas for building a sewage disposal plant.

London may adopt the artesian well system for getting its drinking water.

There are indications that the construction of the proposed trunk sewer at Brandon will be commenced this season.

Work is to be started at once on the $50,000 sewerage system at Macleod, Alta.

Work is to be started at once on the $50,000 sewerage system at McLeod, Alta.

Tenders will be received up to June 2, for the supply of waterpipe for Vancouver.

Moose Jaw has passed a by-law to spend $24,000 on waterworks and sewerage extensions.

Peterborough water commissioners are calling for tenders for waterworks plant for that city.

Olds, Alta., ratepayers will vote on a by-law on June 15 to issue $6,000 fire protection debentures.

Latchford, Ont., ratepayers will vote on Aug. 15 on a by-law to issue $4,000 fire protection debentures.

Niagara Falls, Ont., ratepayers will vote on May 27 to issue $1,800 debentures for sewer construction.

Wetaskiwin, Sask., ratepayers will vote on a by-law on May 27 to raise $7,000 for fire protection purposes.

Oak Bay ratepayers will vote June 15 on a by-law to raise $30,000 for the installation of a waterworks system.

Representatives of Ottawa, Hull and Aylmer met recently to discuss the installation of septic tanks at Aylmer.

Gravenhurst ratepayers will probably be asked to vote on a by-law to raise $20,000 for a new waterworks system.

Carman ratepayers will vote on a by-law to raise $25,000 for the completion of the town waterworks system.

The Ontario Railway and Municipal Board has validated Cobalt's by-law to raise $75,000 for sewerage and waterworks system.

City Engineer Antonisen of Port Arthur is preparing estimates for proposed extensions to the waterworks and sewerage plants.

The Moncton, N.B., Board of Works, is considering several water and sewer extensions, for which tenders will probably be called in the near future.

North Battleford, Sask., ratepayers will vote on a by-law on May 25 to raise $100,000 to install waterworks, sewerage and electric lighting systems.

Tenders will be received until May 24 for the construction at Yorkton, Sask., of sewers as follows:—2,000 feet of 12-inch, and 15,000 feet of 8-inch, with all necessary appurtenances.

The successful tenderers in connection with Saskatoon's water mains and sewer pipe and their tenders are: Section 1, Harry Welch, Saskatoon, $13,725; Section 2, Reginald Boulton, Prince Albert, $17,900; Section 3, William Cook, Saskatoon, $9,756.25.

At a recent meeting of the Stellarton, N.S., town council the chairman of the water commissioners reported on the proposed extension of the water service to Lourdes and the Allen Shafts colliery. It will require 11,121 feet of pipe, and the total estimated cost of the work is $11,826.05.

Yorkton is making preparations to supply the Canadian Pacific Railway with twenty thousand gallons of water a day. On account of the good work done by the waterworks system at a recent fire, inquiries have been received from other towns wishing to make an installation, the latest being from Neepawa, Man.

The following tenders for material required in the installation of the high pressure system at Victoria were accepted: Fine wire, Hawkins & Hayward, 18½ cents per lb.; stempipe line, Marine Iron Works Co., $350; water suction connections and valves, Marine Iron Works Co., $450; condensing equipment, tender not awarded though the apparatus offered by the Hutchinson Bros. Company, the lowest tenderers, at $1,750, is recommended.

The Berlin Light Commission opened tenders for wrought and cast iron pipe for new gas mains and extensions. Seven tenders were received for 4-inch pipe and that of P. Hymmen & Co., Berlin, was the lowest, $27.24 2-5 per 100 feet. The tenders ran up to $28.25 per 100 feet. There were three tenders for the six-inch cast iron pipe, and the lowest was $48 per 100 feet. The highest tender was $50.25. The successful tenderer was the Gartshore Thompson Company, Hamilton.

Railway Development.

The Halifax and Guysboro Ry. is likely to be built this year.

The New Brunswick Coal and Ry. Co. have completed the ballasting of 20 miles between Norton and Chipman, N.B.

The Atlantic, Quebec and Western Ry. will be completed from Port Daniel to Pabos, Que., by June 30, and the whole line to Gaspe by Aug., 1910.

A grading outfit with two hundred teams has arrived at Airdrie, Sask, and taken up quarters. It is stated they will shortly commence work on a section on the new Canadian Pacific line between Stettler and Cheadle.

The Ontario Legislature has granted 1,000 acres of land a mile in aid of the construction of a railway through Kenora, northerly to the National Transcontinental Ry., by the Lac Seul, Rat Portage and Keewatin Ry.

Janse & McDonnell, Lethbridge, have secured the contract for the construction of the C.N.R. cut-off at Stanley Junction, west of Port Arthur. The work is 10 miles in length and involves the moving of about 300,000 cubic yards of earth and rock.

A by-law has been introduced in the council of the municipality of Burnaby to grant a forty-year, franchise to the British Columbia Electric Railway Co. It is proposed to construct an electric line from the east boundary of Hastings townsite through the municipality.

It is reported that the controlling interest of the Quebec Railway, Light & Power Company has passed into the hands of a syndicate, which is desirous of extending the railway to Murray Bay, a distance of 56 miles. The railway will start from St. Joachim and will cost about $2,000,000.

The Ontario Legislature has voted a cash subsidy of $3,000 a mile in aid of construction of the northerly extension for 15 miles of the Central Ontario Ry. line now terminating at a junction with the Canada Atlantic Ry. between Whitney and Madawaska stations. Construction has to be started within three months and completed within two years.

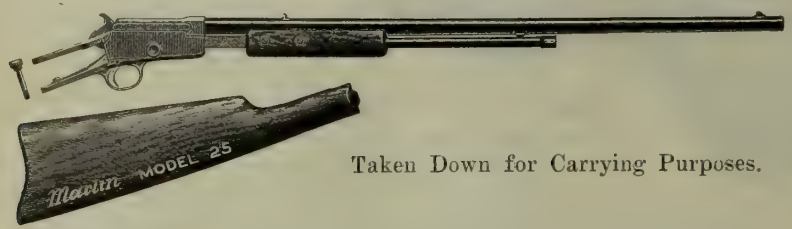
to sell the

Manitoba Steel Plate Furnace

We want a good hardware man in every town to handle our furnace. It will burn Souris and other soft coals mined in the West, and it will burn them economically. It is the furnace Western people have been looking for. If you are from Missouri, so much the better. Ask us and we will show you.

The consumer saves 25 to 40 per cent. on fuel when he uses the Manitoba.



The Brandon Machine Works Co., Limited

Brandon, Manitoba

Novelties and New Goods

NEW MARLIN RIFLES.

The Marlin Firearms Co., New Haven, Conn., report a very heavy advance sale for their new Model 25, .22 calibre repeater, cuts of which are shown herewith. This new gun is unique in being the first repeating rifle built to handle the .22 C.B. caps, which are very accurate and satisfactory in gallery work and small game shooting, and the cheapest form of reliable ammunition ever made.

Taken Down for Carrying Purposes.

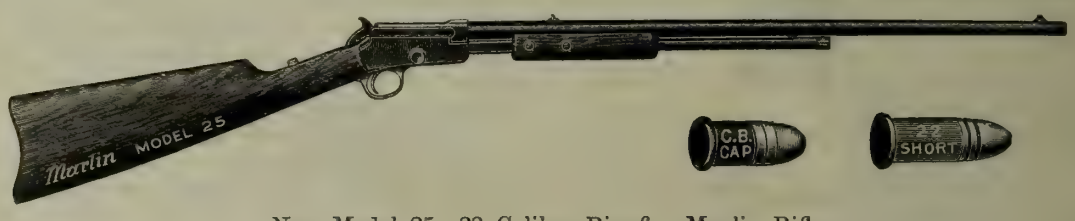
C.B. caps should not be confused with B.C. caps. C.B. caps, or "Conical Bullet" caps of all makes have long conical bullet and are loaded with blank, semi-smokeless and smokeless powders. B.B. caps, or "Bullet Breech" caps, are less powerful; they use a round ball and are usually loaded with fulminate instead of powder; they are not recommended for use in this rifle.

The Model 25 Marlin handles 18 of the C.B. caps. at one loading, black, semi-smokeless or smokeless loads. It also handles without any change in adjustment the .22 short cartridges, black, semi-smokeless and smokeless of all makes, giving 15 shots at one loading.

Loading Tube, Showing Position of Cartridges in Tube.

In construction it is similar to the well-known Model 20 Marlin repeater, being made of the same high quality of material throughout. It is furnished with 23-inch round barrel only and has the deep, clean-cut Ballard rifling, which insures greatest possible accuracy and adds greatly to the life of the barrel. A removable side-plate allows instant removal of all operating parts for cleaning, without using tools, and further allows are wiping rod to be inserted at one end and drawn entirely through the barrel—cleaning the barrel quickly and thoroughly and adding to the life and efficiency of the gun.

The Model 25 Marlin repeater is a gun every man, woman and boy who shoots can buy and enjoy. It sells at a price all can afford, and because of its cheap ammunition quickly pays for itself in the reduced cost of cartridges. Order now for quick delivery.



ELECTRICAL SPECIALTIES.

Two new sizes of "X-cell" dry batteries, Nos. 7 and 8, are being introduced through the hardware trade by Electrical Specialties, Limited, 12 Shuter Street, Toronto. These are larger type than previously available, being 3x7 inches, and 3½x8 inches, and made for heavy ignition work on engines. The hardware dealer on whom the engine owners in the country calls frequently will find it easy to sell dry cells of the larger type.

Electrical Specialties have been awarded the contract to supply dry cells to the Manitoba Government. They state that they have established a large trade with hardware merchants, electrical goods being found a profitable line. They are sending out a convenient court plaster case as an advertising novelty and will send a sample to any retailer on receipt of a post card.

IMPORTED MILITARY RIFLES.

Last fall several importations of foreign military rifles were made at low figures by Canadian firms and towards the end of the year the Government raised the duty, bringing their value in passing customs up to $4 for single-shot and $8 for repeating rifles. The importation of these goods is now entirely prohibited, however, and it is considered by men who know the value of the goods that the "Swiss" and repeating rifles should now bring from $7 to $10 retail, and the "Mauser" repeating rifles from $10 to $15, according to the district in which they are sold and the expense in stocking them.

New Model 25, .22 Calibre Rim-fire Marlin Rifle.

Catalogues and Booklets

Manufacturers or jobbers sending printed matter for review, should draw attention to the new lines listed; and retailers sending for catalogues or other matter, should write on their regular printed letterhead and mention this paper to make clear that they are in the trade.

Complete Hardware .Catalogue—The most complete catalogue yet issued by H. S. Howland, Sons & Co., Toronto, is that numbered 23, which is now being loaned to customers. It is a stupendous work, being a volume of nearly 1,200 pages, descriptive of almost every article handled by hardwaremen. The index alone covers 24 pages. The book took months of time in preparation for the press. and is full of suggestions of good selling lines, which should make the catalogue of assistance to harwwaremen. The volume abounds in illustrations which give a good idea of the articles described. Progressive merchants are using the mail more and more for ordering goods, orders being given more frequently for small lots, rather than stocking heavily two or three times each year. Such catalogues as Howland's, therefore, if studied, are invaluable for reference. List prices are quoted on a present basis of a 50 per cent. discount.

The Pilgrim.—The Dominion Cartridge Co., Montreal, have published in brochure form "to sportsmen all" a bear story of the Canadian Rockies, entitled "The Pilgrim," by Edward Cave. It is one of those little stories that will make the person into whose hands the book falls read it through. It contains no advertising matter, and yet is a good advertisement, as it deals with the usefulness of guns and ammunition. At the back of the book some few pages are devoted to Dominion ammunition; its manufacture, its system, and its guarantee. The brochure is well worth having and reading.

CATALOGUES WANTED.

George W. Ecclestone, Bracebridge, whose store was burned a fortnight ago, writes Hardware and Metal that he has lost all of his catalogues and would appreciate the receipt of catalogues from manufacturers and jobbers as soon as possible.

Mr. Ecclestone is rebuilding, adding another storey to his store, this giving him three floors and a basement, 28x90 feet. He is also instaling an electric elevator and an iron stairway.

The Retail Paint Trade

STOP PRICE-CUTTING.

Although the evils of price-cutting are continually being harped upon, merchants are still prone to adopt this suicidal practice. On many staple lines of hardware cutting has been so long indulged in and has become so prevalent, that it is too late now to effect reform. Oils and colors are similarly situated, but there is yet plenty of time to save ready-mixed paints. Despite the fact that liquid paints are a comparatively new commodity, and that the field of consumption before the merchant is a very large one, yet price-cutting has already commenced to creep in. When it is considered how the demand is being nursed and encouraged by the manufacturer, how the merchant is given opportunities to display and to push his lines, it would be hardly thought possible that business-like men would discount these efforts on their behalf, by throwing away part of their profits, and spoiling their chances in the future. For it must not be forgotten, that if a merchant once cuts on a regular line, he must always cut. Customers who have bought at one price are never content to pay more, and a favor to one must eventually be extended to others.

Talking to a manfacturer the other day comment was made upon the great opportunities that the dealer had in his paint department, and how profitable a progressive man could make his paints. "Yes, that is true," said the manufacturer, "but, unfortunately, despite the field before him, and the invaluable help we give the dealer, he is spoiling his prospects by cutting. In spite of our efforts, price-cutting has crept in, both by the jobber and the retail merchant. There is really no need for it, but if it is not stopped, it will ruin one of the most profitable lines that a dealer can carry."

It is well that the merchant should ponder over this. Why, should it be necessary to cut? Because one man has a mania for leaders or general cutting all the way round, that is no reason why others should follow suit. Cutting is foolish enough in any line, even where the demand is a confined one, and the competition severe. But in paints, the demand is only just beginning to show itself. There is room for everyone, and with most dealers carrying their own particular lines, the competition need not be severe—at any rate, it need not be a competition of price, but of quality. Let the merchant talk quality, not price, in pushing his paint lines. The cut of a few cents on a tin of paint will not make a householder want to embellish his rooms, a property owner to save his property from destruction, while at the same time making it look 50 per cent. better. A desire for paint will not be tempted by a cut price. It is the dealer's consistent propaganda of the value of paint that will attract the consumer, and when he is willing to

Don't Get "Notions" About

Floorglaze

Please don't get the notion that FLOORGLAZE is good only for floors. FLOORGLAZE is a solid-color floor-enamel with all the elasticity of good paint, and more; and that has a dozen uses about the house, indoors and out. It's so advertised for you that it can't help selling once; and its own quality sells it again to the same people—and their neighbors. FLOORGLAZE is the kind of goods that strike you as about right for your store.

M. R. M. CO.

AIR RIFLE SHOT

To overcome the difficulty experienced by many in the past as to the correct size of Shot for Air Rifles, we beg to announce that we make a size of Shot to fit standard Air Rifles.

In specifying for this size it will be necessary simply to say "Air Rifle Shot," as this is what it will be known as in future.

The Montreal Rolling Mills Co.

buy, why cut the price to him. People are conservative in the paints they use. Let a consumer be satisfied with the paint that he has tried, and he will use it again.

No! It is not necessary for the dealer to cut his paint lines, nor to encourage a demand by having leaders. Let the merchant, as we have said, talk quality, not price. Let him show that by the preserving, sanitary, and brightening-up qualities of paint the user is getting more than his money's worth, and the later will not then need the encouragement of price-cutting. Support the manufacturers in the strong stand they take for the maintenance of the price, and thus take full advantage of the great consuming field that lies before every dealer carrying paints.

Paint and Oil Markets

MONTREAL.

May 21.—Trade is moving along at a quick rate, and in some cases manufacturers report that they have great difficulty in getting the transportation companies to furnish teams quickly enough to keep their shipping departments clear. Orders from all parts of the country, notwithstanding the excessive wet weather, have swung in most freely, and this has not only given a good tone to the markets, but has maintained prices on a firm basis. Quotations are unchanged this week, but there is a slight sagging noticed in red lead owing to abundant supplies.

TURPENTINE—Yielding to the better business conditions which are gradually making themselves felt, turpentine has had a strong call. For the present, the market is in good shape, and prices are unchanged. We quote 55c for single barrels, net 30 days.

LINSEED OIL—Orders are improving and with the supply keeping well up to the demand the market is very steady. There is no change in quotations. Raw, 1 to 4 barrels, 59c; 5 to 9 barrels, 58c; boiled, 1 to 4 barrels, 62c; 5 to 9 barrels, 61c; strictly net, 30 days.

GROUND WHITE LEAD—Orders for ground white lead are somewhat on the light side for this time of the season. This may be owing to the fact that painting work has been in many cases delayed by the wet weather. There is no change in the markets, and we quote: Strictly pure, $5.50 to $6, according to brand, and No. 1, $5 to $5.50 f.o.b. Montreal.

RED LEAD—The orders are good, but owing to the abundant supplies, a slight tendency to ease off quotations for fair size orders is noticed. For ordinary lots quotations are unchanged. Genuine red lead in casks, $4.50; in 100-lb. kegs, $5; less quantities, at $6 per 100 lbs.; No. 1 red lead, casks, $4; kegs, $4.50, and smaller quantities, $5.50.

PARIS GREEN—The warmer weather now being experienced has had the tendency to encourage the hardware trade to look up their stocks of paris green. Shipments have therefore been heavier than for some time. We continue to quote: 1-lb. cartons, 18c; 1-lb. tins, 19c; 50-lb. drums, 17c.

WHITE ZINC—The market is dull without change. We continue to quote: Dry V.M. Red Seal, 7½c; Red Seal, 7c; French V. M., 6c; Lehigh, 5c; white zinc, ground in oil, pure, 8½c; No. 1, 7c; No. 2, 5¾c.

VARNISH—On account of the improving business conditions across the border holders of gums are very much firmer in their views, and consequently a much better feeling exists in varnish and shellac than for some time past. There is a good call for furniture and implement varnish.

PUTTY—Owing to the good demand the large stocks of putty have disappeared, and the market is firm and in good shape. We continue to quote: Standard putty, 880 lbs., in casks, $1.65; in 100-lb. drums $1.90; bladder putty, 400 lbs., in barrels, $1.90; in 100-lb. cases, $2.05; in 25-lb. drums, $2; 25-lb. tins, $2.05; 12½-lb. tins, $2.25 f.o.b. Montreal.

TORONTO.

May 21.—The passing week is easily one of the best selling weeks of the present season, and ranks high for trade among the weeks since the opening of the year. All over the country travelers report good business in the paint trade. Not that the weather has been any too favorable, but the painting time is so far advanced that any and every fair day is taken advantage of. Jobbers say paint sales are in advance of last year up to the present, but much more business would certainly be done had the spring been more favored with good, dry weather.

Ready-mixed lines are particularly active and just now are going out more freely than at this season in any previous year. Paris green, too, has been frequently asked for. That line shows a stiffening in the market, though no actual price change has taken place. In fact, all the market quotations of a week ago hold good. Turpentine is still irregular.

TURPENTINE — The spasmodic jumps of "turps" in the south has made the loal market very irregular. While the quotation remains at 56c for single barrels, it is known that spirits turpentine can be had for 55c from at least two Toronto houses. The probable course of the market is uncertain. At present turpentine is cheaper than it has been for six years back, and is about half the price it was two years ago. There has been a falling off in the use of pure turpentine, due to the number of substitutes offering, so that judging from the present outlook if the local market follows the trend of the southern quotations (and it does more or less) there will be an advance, but a very slight one.

LINSEED OIL—No change has come over the market. Raw is at 59c and boiled at 62c per gallon, in barrel lots.

FOR THE SAKE OF YOUR TRADE IN 1914

don't sell poor paint.

It may look good in the can, and for a few months on the house, but it won't stand Time's test. Your customer is bound to find out how poor it is, and though he may not remember the brand of paint, he will remember he bought it from **you.**

With an eye to future business, sell

"English" Liquid Paint

the base of which is 70% Pure White Lead (Brandram's B.B. Genuine) and 30% Pure White Zinc. "English" Paint looks good after other paints have been replaced.

Then your customer will realize that it is the best paint he has ever used—and he'll remember that **you** sold it to him.

Just send us a postal card for prices and selling plans.

INTERNATIONAL VARNISH COMPANY, Limited

TORONTO

MAKERS OF FINE VARNISHES

BRANCH OF STANDARD VARNISH WORKS

NEW YORK CHICAGO LONDON BERLIN BRUSSELS

Foreign oils are still running high, but Argentine and Indian seed appears to be fairly plentiful and a good crop is anticipated here in Canada and across the line. If stocks continue to hold out, famine prices will not be looked for, but, then, neither will there be any appreciable decline before the fall, when new oil is offered the trade.

PARIS GREEN—While 17¾c is yet asked for 25-lb. drums, and a great deal of Paris green has gone out at that price, there is a stiffening tendency to the market. However, hardwaremen and painters are pretty well stocked up, so that there is no great hardship anticipated should prices make a big jump.

WHITE LEAD—The scare of a week ago has not yet had any effect, nor is there any talk at present of an advance. Both red and white lead are about in the same position they were a fortnight ago, when a gradual stiffening tendency was abroad, due to the splendid demand. No. 1 is $5.40 and $5.65; pure white from $5.80 to $6, and a superior line is offered at $6.25. Genuine red lead is still quoted at $4.50 for casks and $4.75 to $4.80 in 100 lbs.

GLASS AND PUTTY—Import orders are yet being received, though some fair shipments have been made to the trade. The movement, however, is not expected to be free until September, as window glass is essentially a fall line. Putty is fairly free in demand.

STAINS AND VARNISHES — All summer lines have been especially active this week. Wall finishes, floor paints, oils and wax; whiting, and ready-mixed paints of all kinds. Prices unchanged.

PETROLEUM—The seasonable lines are coming more freely to the front and demand for lubricating oil's and gasolene is increasing almost daily. Illuminating oils are still steady. Prices are unchanged from last week.

VALUE OF ADVERTISING.

Writing in the American Paint and Oil Dealer in the value of retail advertising in general, Frank Farrington says the following in regard to the paint dealer: "Not more paint and oil dealers fail to succeed than other merchants, but enough in any line lack just that little of making good, which is the difference between profit and loss. My own business experience has acquainted me more or less with the paint and oil lines, and I know that the retailer selling those goods has some difficulties in the way of advertising that are not met with in the pushing of goods that appeal to people in a different way. A man is perhaps less ready to turn in his spare moments to read about articles that are associated in his mind only with his working hours or with the drudgeries of life.

"However, the paint and oil trade has the distinct advantage of being engaged in the sale of goods that are necessities to thrifty, self-respecting people—that they have to have. The past months of reduced trade have shown the man with necessities to sell the decided preference of the public at such times for the things that they need. They have got along without the luxuries, and while they have cut into the necessities, they have not eliminated them entirely, as they have many lines of goods.

"It helps very materially to know at the outset that you are going to advertise goods that the property-owning, home-loving people admit that they need. In the matter of paint alone, most of our customers admit that they need the paint. It is only a question with them of what kind of paint, and of buying it now.

"Of course, the demand for paint even can be very greatly stimulated, and the right kind of advertising can be made to induce people to use paint who previously had not thought that they needed it.

"It is certain that advertising will pay in the paint and oil trade better than in many other trades. Competitive advertising is not as good nor as prolific. The field is not so well worked."

TURPENTINE ADVANCED.

Just as we go to press it is announced that turpentine has advanced in Toronto to 58 cents for single barrels, 57 cents for two barrels and 63 cents for five gallon lots.

PAINT NOTES.

Alex Craig, painter, Montreal, is dead.

A. Barbeau, painter, Quebec, has been registered.

The Beaver Oil Co., Outremont, Que., has obtained a charter.

Gould & Malcolm have the painting contract in Robt. Maybee's new residence at Toronto.

T. M. Blackwood, Montreal, has the contract for painting two houses for J. T. Fisher, Westmount.

J. Casey, Toronto, will do the painting in W. T. Harris' $10,000 residence now building at Toronto.

The painting and glazing in W. McLaughlin's new residence at Toronto will be done by F. C. Davies.

The Intercolonial Railway's paint shop at Moncton has been removed to the new, large plant now building there.

Chris. Sonne, Montreal, has the contract for painting and glazing four houses at Westmount for W. L. Chipchase.

The American output of turpentine last year was valued at $14,000,000, and the rosin was worth $18,000,000. This was materially increased by adulteration.

If you haven't begun to freshen up your paint departmen, do so at once. The demand will set in very soon if it has not already reached you.

The extensive nature of one day's mailing output of advertising matter from the CANADA PAINT COMPANY, MONTREAL, may be judged from the fact that it took three heavily loaded vehicles recently to convey the load to the post office. Nine such team loads in all were mailed during one week, representing about 200,000 illustrated booklets.

To save time at the post office the bags were sorted and stamped in the mailing office of the CANADA PAINT COMPANY, and sent direct to the various districts throughout Canada to which they were addressed, thus avoiding a second handling at the Montreal post office. The whole of the heavy work involved was not done through any advertising agency, but was prepared, printed, arranged and shipped entirely by the Company's own staff. Requests for the various booklets of the Company have been received from all parts of the Dominion, and from Great Britain and the United States.

SHRP-SHAVR SAFETY RAZOR

25c.

There is no better razor sold at ANY PRICE

We do it to Sell our Blades

Sold under a positive guarantee. Your money back if you want it.

Shrp-Shavr Razor Co

Smith Hardware Co., Limited
2 & 4 Lemoine Street
Montreal, Canada

We sell it at 25c. to create a quick and large market FOR OUR BLADES because we make the BEST blade. In fact, "it's all in OUR BLADES." The profit to the retailer as well as to the manufacturer is in the continuous sale of blades.

The frame or blade-holder is beautifully SILVERPLATED, and the adjustment is absolutely correct. It fits the face. The blade can be adjusted or released instantly. But you don't shave with a razor frame whether it costs $5.00 or 25c., the blade is the thing.

Our proposition is a revelation and revolution in safety razor selling. The SHRP-SHAVR is the ORIGINAL 25c. RAZOR.

Amatite ROOFING

Most roofings are made of only *one layer*, but Amatite is made in *five layers*. The bottom layer is wool felt, the next is real Coal Tar Pitch, the third is wool felt, the fourth is pitch again, into which is embedded the fifth layer, namely, the *mineral surface*.

If the weather should, in the course of years, wear away the mineral surface and dispose of the layer of Pitch (which is the most waterproof substance on earth,) it would still have to penetrate a layer of felt and another layer of composition *and* another layer of felt before the roof would leak.

It is easy to see why Amatite lasts so long when you realize how it is made.

That mineral surface *requires no painting* or coating whatever, and will take the brunt of the weather without renewal or attention or care.

Send for a sample of Amatite. It's free.

FAIRBANKS STANDARD

SCALES

ALL KINDS ——— ALL SIZES

¶ Every scale a perfect weighing device. From the smallest to the largest, accurate, strong and reliable.

¶ Accuracy means account keeping, a square deal to your customer and to yourself.

¶ Strength means long life. Fairbanks Scales have lasted for years and still are in daily use.

¶ Reliability means satisfied customers and a general feeling of trust.

¶ You cannot afford to be without Fairbanks Standard Scales for your spring trade. Remember there is 75 years' experience and a world-wide reputation behind them. This reputation is yours if you sell a Fairbanks Scale.

NORTH BROS. MFG. CO., Philadelphia, Pa., U.S.A.

Get After the Merchant in Your Town

Do you know that our Metallic Ceilings and Walls are the most sanitary and artistic interior coverings a merchant can have in his store? They prevent the dust and dirt falling—a continual nuisance with plaster and wooden ceilings and add so much to the appearance of the store—so many varied, artistic designs suitable for any class of business to select from.

Further, our Metallic Ceilings and Walls are fire and moisture proof and will greatly reduce insurance rates. They are very economical—in fact will last a lifetime. We use only the highest grade steel plate—every design being carefully and deeply stamped—absolutely no bulging—the best metallic ceiling on the market.

Get after this business—convince your fellow merchants of the many advantages of Metallic Ceilings and Walls, and then send measurements of their stores for estimates.

We are manufacturers of Eastlake Metallic Shingles, Metallic Siding, Lath, Cornices, Skylights, Ventilators, Finials, Pressed Zinc Ornaments, Eavetrough, Conductor Pipe, and Fireproof Windows and Doors.

WRITE FOR CATALOGUE

"Do you know this firm is the oldest and largest sheet metal building material house in Canada? I guess their policy, 'Protection to the Trade,' has helped them a lot."—*The Philosopher of Metal Town.*

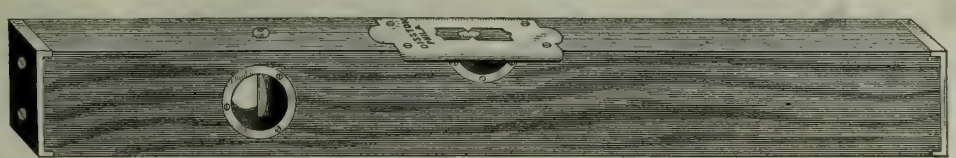
DISSTON PLUMBS AND LEVELS

We illustrate here a few new lines just brought out. If you are interested, drop us a post card, and we will send you illustrations of 18 new designs. All of them show great improvements and have strong talking points.

No. 16½ Adjustable Plumb and Level—Double stock cherry, arch top plate, two side views, solid ends, all trimmings nickel-plated. Polished. A recent improvement in this level consists of an extension to the sides of top plate, which makes a hand-hold or grip for lifting the level. Assorted, 26 to 30 inches.



Half Dozen in a Box

Plumb and Level—Solid cherry stock, natural finish, brass top plate fastened with brass screws, two brass-lipped side views, two brass-lipped plumb views, both plumb and level glasses and set in glass tubing.

No. 30—Adjustable Plumb and Level—Assorted, 26 to 30 inches.
No. 31— " " " —Assorted, 18 to 24 inches.

One in a Card Board Box

No. 26—Plumb and Level—Double stock cherry, brass top plate with extension for hand-hold, brass lipped side view, solid brass ends. Polished. Assorted, 26 to 30 inches.

One in a Card Board Box

No. 89—Mason's Adjustable Plumb and Level—Arch top plate, two side views, level glass, plumb glass and iron plumb bob. Polished. 42 inches.

Here is a Device

that will increase your sales of padlocks.

It is a highly-finished hardwood case, 12 x 24 in., and forms both a display board and stock case. The board exhibits 20 well-known "Miller" Padlocks in five rows, all the locks in each row selling at the same price. These prices range from 15 to 75 cents each. Behind the display board the space is large enough to contain the stock of locks.

Two assortments are put up in this way. Each assortment contains the same locks but in different quantities.

No. 1000 assortment contains 12 dozen "Miller" Padlocks.

No. 1001 assortment contains 6 dozen "Miller" Padlocks.

This case will sell padlocks for you. It contains a full line in a compact space, giving you all the variety you require. Try one of these cases. We can fill up the case again whenever any line is sold out.

This case is patented and is the only one of its kind on the market.

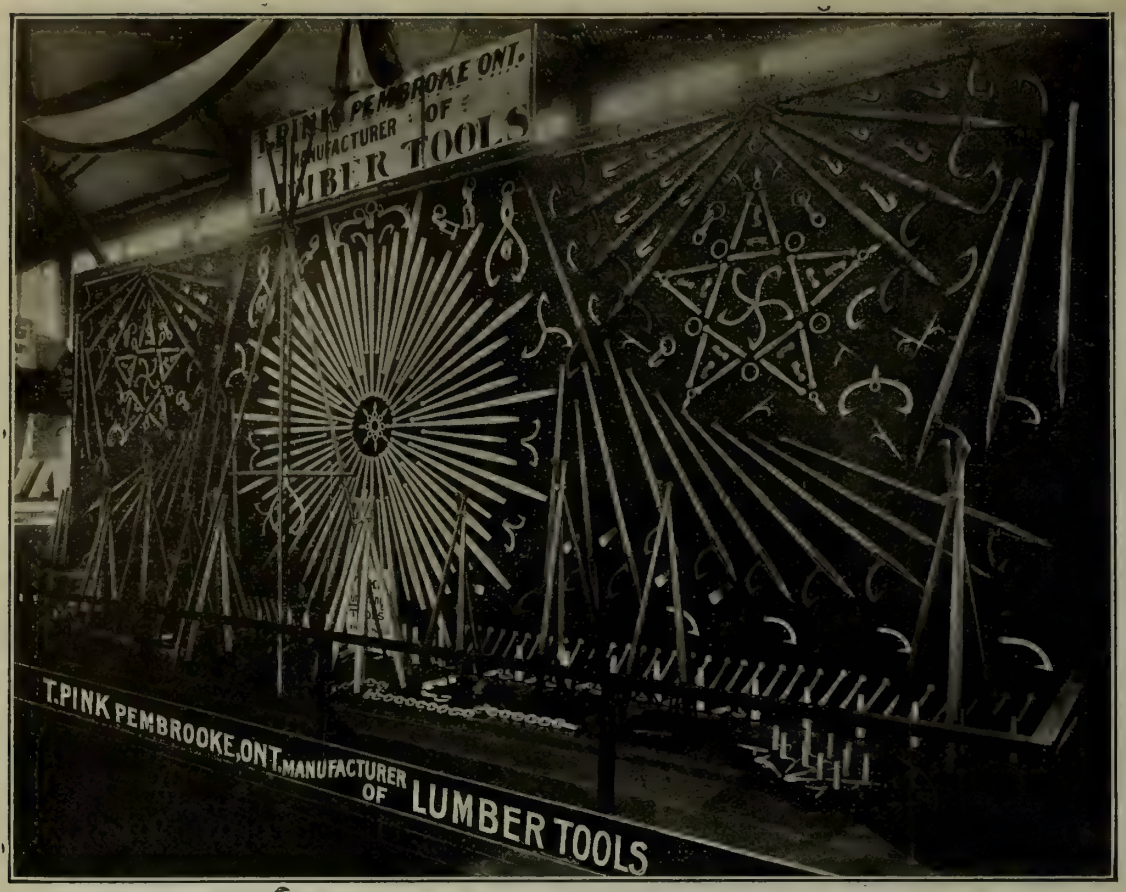
Push the Samson Line

Tools that can be depended upon to give satisfaction; that will make of the "chance" purchaser a steady customer, and that show a good margin of profit. You can get the cream of the trade by getting such goods as you can thoroughly recommend and keeping them well in evidence. The "Samson" line of

Farm and Garden Tools

are selling everywhere so freely as to easily put them in the front rank for quality and satisfaction. We get the best we can out of the best materials and workmanship, and give to the store making a feature of "Samson" goods a reputation for reliability that means more business.



Push "Samson" Farming Tools with good display and good advertising. Their quality and value deserve all the prominence you can give them.

WYANDOTTE
Cleaner and Cleanser

INDISPENSABLE IN

Dairy, Kitchen, Lavatory and Laundry

Read the opinion of H. H. Dean, B.S.A., Professor of Dairy Husbandry, Ontario Agricultural College, Guelph, Ontario.

To Whom it May Concern:

"This is to certify that we have used Wyandotte Dairyman's Cleaner and Cleanser in our Dairy School and Dairy Department of the Ontario Agricultural College with very satisfactory results, and we can confidently recommend it to dairymen for cleaning and cleansing purposes."

Many others, equally prominent, have written unsolicited and enthusiastic testimony as to its value.

Words of unqualified approval from such authorities require no comment.

"*Nothing is clean that can be made cleaner.*"

LONDON **TORONTO**

Crescent Brand
Registered

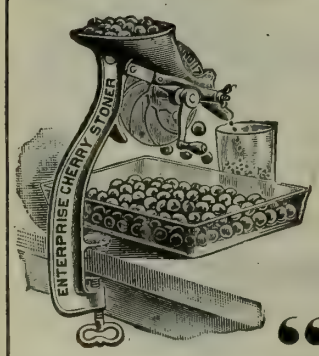
DON'T BE "AN EASY MARK"

Any jobbing house can tell you that there are dealers here and there who will take anything at all; good, bad or worse, with no regard for brand or quality just so long as it is the "article" they ordered from the traveller.

Of course, we all know that if it wasn't for this class of merchant the manufacturer of inferior goods would go out of business—but, Mr. Merchant, don't you let anybody think for a minute that you're that kind of a business man.

You don't intend to be a "dumping ground" for these inferior goods.

When you want a Hinge, you want the very best kind of a Hinge—



A CRESCENT BRAND HINGE

The up-to-date Hardware man knows what he has to pay for and doesn't take chances. There are several kinds of Hinges and Butts, and those of quality and merit bear the **"Crescent Brand."**

Canada Steel Goods Company, Limited

A Quick Seller—Connor's Winner Rotary

The driving shaft of the Winner Rotary runs entirely on steel roller bearings. They carry the weight and do most of the work.

The clothes are put into a new position by the dolly being raised and lowered with every revolution.

The large corrugations on Wash-Board surface are another "Winner" feature.

The cover opens the full width of the tub, giving the operator every advantage in handling the clothes.

Nicely finished in light oak graining, with vermilion striped hoops, and castings bronzed and green japanned.

More of this machine sold than all the other Rotary Washers we ever made, and we have been in the business for over a quarter of a century.

Have you seen our new catalogue? A post card will bring it.

The Celebrated "Dreadnought" Milling File

A substitute for Files which is revolutionizing File Work. A great cost reducer; a simple and radical improvement on the ordinary style of hand files; it cuts from 300 to 500 p.c. faster than an ordinary file; it is self cleaning; it can be sharpened four times; it cuts equally well all metals, also wood and marble; its cutting edge outlasts from five to ten ordinary files; although practically a rasp, it leaves the surface smooth. N.B.—The Dreadnought is adaptable to every job in which ordinary files can be used, expediting the work and doing it better, and for numerous jobs usually milled in machines. Gold Medal, Franco-British Exhibition, 1908. Gold Medal, International Exhibition, Madrid, 1907

Low Down High

For all merchants that carry merchandise on shelves enquire of E. R. BASE, Toronto

A Few Testimonials

Rockford, Ill., May 27, 1908.

Mr. S. B. Martin, Dalton, Ohio,
Dear Sir,—Ladder is very satisfactory—the new track holds up and were we fitting a "string of stores" we should place your ladder in each one of them.
Very truly,
Hunter Hardware Co.

Toronto, Ont., Sept. 28, 1908.

Mr. S. B. Martin, Dalton, O.
Dear Sir,—We are well pleased with the "Low-Down-High" Ladder you installed in our warehouse some weeks ago. We find same works very easily and smoothly and makes the work of filling orders from the shelves a very easy matter compared with the old style of ladders. We will be glad to receive quotations for Ladders for other parts of the Warehouse.
Yours truly, T. Woodbridge & Co.

HAMILTON (22 Calibre) RIFLES

Money Makers

Models 27 and 027

Prices $2.00 and $2.25

We Specialize on Boys' Rifles

We build our rifles under patents exclusively our own and confidently claim to make the **best rifle ever built for the money.**

MODEL No. 27 is an efficient sporting rifle, with hammer action, of few parts and exceedingly simple, using 22 calibre short or long cartridges. The barrel is bronze, rifled and steel jacketed, finished in blue black gun finish. Breaks down for loading and ejecting shells. Flat stock and forearm of gun of gum wood. A beautiful model, symmetrical and well balanced. Barrel is 16 inches long, length of rifle over all, 30 inches. **Price $2.00.**

MODEL No. 027 is exactly like No. 27, except the stock and forearm, which are of genuine walnut, turned and beautifully finished. **Price $2.25.**

Other models are Nos. 15 at $2.00, 19 at $2.50 and 23 at $3.50, each a winner in its class.

Our continuous advertising in the boys' papers will bring the business to you, as every boy will want one and you should have a stock on hand. **Write for catalogue and net trade prices.**

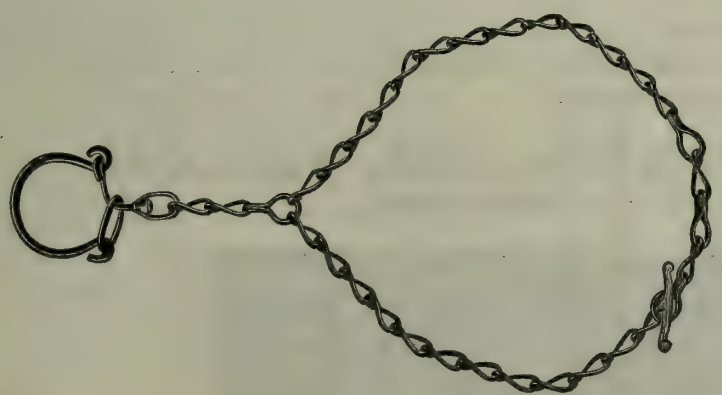
The Greatest Boon to the Man Who Shaves Himself

DOUBLE-ACTION STROPPING MACHINE



FOR ORDINARY OR SAFETY RAZORS

The majority of men who do not shave themselves will testify it is because they cannot keep their razor sharp. This Double-Action Stropping Machine does away with any such difficulty and makes shaving a delight. No other Stropping Machine will sharpen both sides of the blade evenly and correctly.

Write for our free booklet "Some Pointers for Gentlemen Who Shave Themselves."

McGILL CUTLERY CO. **P.O. Box 366, MONTREAL**

Our Electric Welded Chains

have shorter links than the knotted chains and are also smoother. They are thus more flexible and easier on the animal. No kinks of any kind to catch the hair. We guarantee they are 50% stronger.

They cost no more; so why not insist upon your dealer supplying them?

McKinnon Dash and Metal Works Co.

ST. CATHARINES, ONT.

Why Not You?

Lots of dealers have made a wonderful stride in their business by selling Genasco Ready Roofing.

It is so easy to sell that it doesn't take much effort on the dealer's part. Selling is easy because Genasco is made of Trinidad Lake Asphalt—everybody knows how that waterproofs and lasts.

Ready Genasco Roofing

is extensively advertised. We spend thousands of dollars every year to tell people what Genasco is—and what it is made of.

The thing you should do is to let them know that you sell Genasco. Other dealers have done this and increased their business. Why shouldn't you get your share, too?

Mineral and smooth surface Genasco roofings. Thoroughly guaranteed.

CONGO — The only Roofing Guaranteed by a SURETY BOND

IT PROTECTS YOU ABSOLUTELY

A GUARANTEE WITHOUT A LOOPHOLE

When we used to say that Congo 3-ply would last ten years people laughed and replied that "Every body claimed that." When we offered to *guarantee* such service they said "Guarantees mean nothing—the buyer can never enforce them."

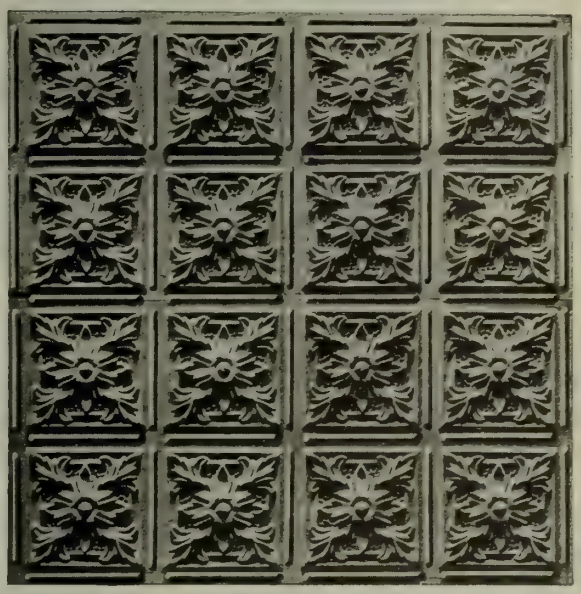
So we went to the National Surety Co. and paid them a large cash premium to issue a Surety Bond *with every roll* of Congo Roofing.

These bonds give our customers a real, substantial guarantee *as good as a government bond.*

If the customer's own lawyer drew the guarantee he could not devise an instrument that would give any better protection.

It is because Congo is so tough, perfect and durable that the National Surety Company is willing to stand back of it. They know that we use the *best materials* and the *best methods* and that we watch and inspect every roll. Then we wrap it for domestic use just as carefully as if it were destined for Madagascar or Thibet, and you get perfect, undamaged rolls, every inch of which you can use.

The man that buys Congo gets the most value for his money and *takes no chances.*



We will send you a copy of that guarantee on request—also a sample of Congo Roofing free.

"White Mountain" Ice Cream Freezer

MADE WITH CRANK OR FLY WHEELS

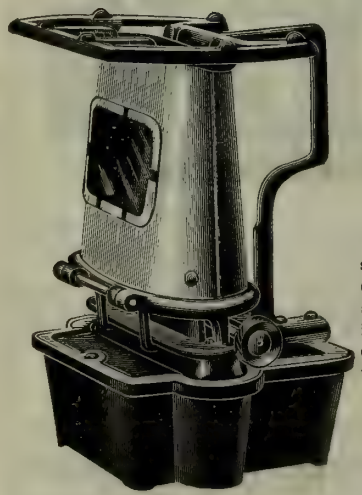
This is universally the favorite family ICE CREAM FREEZER, because it combines more excellence than all other family freezers made. It is easy to operate, because the parts fit perfectly and therefore run smoothly.

It is exceptionally durable. The tubs are built very strong, and will not warp, leak or crack, and the cans are made of thefinest quality bright charcoal tin-plate.

SECTIONAL VIEW
Showing Duplex Dasher and Double Scrapers

"Model" Refrigerator

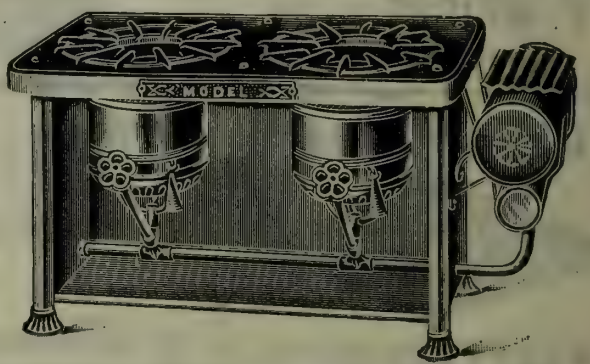
The "Model" is a moderate-priced Refrigerator, but compares favorably with the more expensive lines, and is much better value for the money than many of the so-called high-grade refrigerators.



It is made of Hardwood, finished in Golden Oak; has heavy solid bronze locks and hinges and is lined with galvanized iron, while the insulation is superior to many of the higher-priced refrigerators.

The linings are made of metal and are removable for cleaning. This is an especially valuable feature.

Door on Provision Chamber and Lid are both, in the inside, lined throughout with metal. In order that Drip Pan may readily be drawn out or placed in position, the "Model" is constructed with a swing base.



"Golden Star" Lamp Stove

CAST-IRON OIL TANK
4-INCH BRASS BURNER
ALL CAST-IRON PARTS JAPANNED

This is a heavy and durable stove, with convenient handle for carrying. The burner is set high, and plenty of air spaces surround it to prevent odors from overheated oil. The chimney is bright tin with mica illumination.

"Model" Wickless Blue Flame Oil Stove

HEIGHT, 14 INCHES. AN IDEAL SUMMER STOVE.
Reliable Easy to Operate Easily Cleaned

Hardwaremen and Their Methods

Ideas Gathered in Canadian Hardware Stores and Suggestions for Other Merchants to Adopt—Contributions Solicited From Merchants, Clerks or Traveling Salesmen.

A PRICE CUTTER WORSTED.

He bore the marks of rusticity upon his clothes; and still more upon his face. Spatterings of mud told that he had driven far; but his slow, slouching gait as he entered a hardware store at Chatham, Ont., indicated that he had not been in any great haste in his perambulations about town, and that he had probably been hanging about since morning.

"Good afternoon," remarked the hardwareman, in his mild tones. "What can I do for you?"

"Got any 'mmunition?" queried the rustic.

"Yes."

"How much 're y'r shells?"

"That depends," rejoined the hardwareman. "How many do you want, and what kind."

" 'Bout 25," rejoined the countryman. "They'll cost you 50 cents," remarked the hardwareman, urbanely.

"Smokeless?"

"No—the ordinary kind. Smokeless are 65 cents?"

"Too much, rejoined the rustic, with a sad shake of the head. Get 'em cheaper out in Baytown," he added, naming a village of some 1,200 people, about 15 miles distant.

The hardwareman smiled, but said nothing. The would-be purchaser's face gradually took on a surprised and disappointed look. Evidently, "he was was waiting for the hardwareman to question him as to prevailing shell prices in Baytown. He waited quite a while, and at last himself spoke reluctantly.

"How much d'you s'pose I'd pay in Baytown for those smokeless shells?" he queried.

"Sixty-five cents—maybe seventy," rejoined the hardwareman, with perfect calm.

The buyer was taken aback.

"Fifty cents," he declared, with terrific emphasis. "Fifty cents for 25, or $1.75 a hundred."

The merchant was unimpressed.

"Sixty-five cents," he said, mildly, "is the price in Baytown, and it's the price here. If they were selling at 50 cents, it would pay us to pay our fare out there, and bring them back with us."

"Certainly—selling at 65 cents," muttered the rustic, with lowering voice and rising temper. "Why, I can buy them in Higgar's Corners for 65 cents; but they're always high in those country stores."

"Shall I sell you some of these at 65?" queried the merchant. quietly.

"N-no—too high," grunted the customer as he slouched toward the door.

"By the way," queried the hardwareman, without, a smile, "what kind of shells were those smokeless that you got in Baytown for 50 cents?"

"Trap shell," rejoined the man.

"I thought so," commented the hardwareman, without a smile.

"I suppose you have them like that every day?" I queried, as the door closed upon the rustic.

"Every day," remarked the hardwareman. "They come in and try to bluff us with the story that someone else is selling cheaper. Why, they never use smokeless powder in trap shells. A trap shell wouldn't stand it.

"Then why would that man come here for his smokeless shells if he could get them in Baytown for 50 cents?"

"Our shells are put up right, and I know what it costs, and if we could get smokeless at 50 cents in Baytown, it would pay the maker to go out there and buy them, and quit filling them himself.

"The Baytown hardwaremen aren't very communicative as a rule," went on the hardwareman, "but one of them whenever he is in town drops in to see me and we have quite a talk, and by the time we get through, he knows how things stand here and I know how things stand out there, pretty well. If I am out there I call and have a chat with him. It's a good scheme. It helps us both.

"If I hadn't been on friendly terms with the Baytown hardwareman, possibly I'd have swallowed that fellow's yarn. Probably not, because it's fiction on the face of it. But if I had, and had cut shells down to his price, or anything near it, I'd have been hurting two innocent men—the Baytown man, and myself—and there's no telling when the cutting would have ended, or how far it would have spread.

"As it is, that man will, like as not, be back before night to pay me 65 cents for those shells, or to buy ordinary shells, the kind he probably uses, at 50 cents. In the meantime, he'll likely go to all the other hardwaremen in the city, trying to buy 65 cents worth of shells for 50 cents. If he were to succeed and save fifteen cents, the saving would be only apparent, if the time he puts in is counted; but that's a side issue and the fellow's own business. However, I don't imagine he'll succeed. We've talked over these experiences in the association time and again, and—well, I think the hardwaremen understand the price cutting business pretty well, and know that the first and worst step in the wrong direction is made when a man sells an article for less than what it is worth, just because some thief in the disguise of a purchaser comes to him and tells a cock and bull story of being able to buy the article at a lower price elsewhere. If the hardwareman would only stop to ask—"Why didn't you buy it when you could get it so cheap?' many a price war would be saved.

"Yes—I have them every day. They always tell me that they can buy cheaper somewhere else. Now it's an ax. and again it's a sap pail, and a third time it's a stove. I know what my article is worth; and that's my price. I know what it costs me to buy from the wholesaler or manufacturer, what it costs me to place the goods in my warehouse or store, what percentage to add for selling expenses and what for my own margin; and the sum total, when I reach it, is as fixed and changeless as the laws of the Medes and Persians.

"It's a very good scheme, anyway, to banish from one's mind the idea, so deeply rooted in the minds of many, that a rival hardwareman is your enemy; and, instead of passing by his store as though smallpox dwelt therein, I really like to drop in and—well, just talk things over."

V. L.

CLERK WITHOUT A SALARY.

A striking feature in H. Occomore's Stove and Tinware store at Guelph is the system of marking the prices on goods. Every article in the store is marked plainly with the price, and wherever it is possible to do so, on shelves and in show cases, the price tickets being printed large enough to be read quite easily from a distance. Everywhere a customer looks he can see price cards "10 cents," "15 cents," "25 cents" and so on. There is something outstanding about the way these price cards are placed up—You can't help but take notice of them and often it would seem that it was the price that attracted the attention of the customer to the article—the ordinary condtions reversed. Hardware and Metal was impressed with this feature of Mr. Occomore's busy store the other day and took occasion to ask Mr. Occomore about it.

"Oh, that's another of my clerks. That system of putting the prices prominently on every article in the store—at least—it just takes the place of a clerk. It always tells a customer just what he wants to know and it is not necessary for the other clerks—the ones who draw salaries and go away to lunch—to answer so many questions," was the reply, " I find too," he went on " that the price cards attract the attention of the customers to the goods. Yes, I am confident that this is just as good as an extra clerk."

H. S. N.

Monel Metal: A New Copper and Nickel Alloy

A Brief Description of the Properties of this Metal—Interesting as to its Possibilities in the Future of Engineering and for the Manufacture of Plumbing Supplies—First Found in Canada—Results of Tests.

A new alloy in the metal world is known as Monel metal, which is a natural alloy of nickel and copper. This metal was first found in Canada, having been discovered nearly four years ago by the Canadian Copper Co.'s metallurgists while endeavoring to avoid the necessity of separating the nickel from the copper as found in the ores of their Sudbury mines.

The metallurgists found that the alloy obtained by reducing these two metals together, merely removing the iron, sulphur and gangue matter from the ore, possessed many valuable properties, having the strength of steel with greater ductility, and the freedom from corrosion of nickel itself.

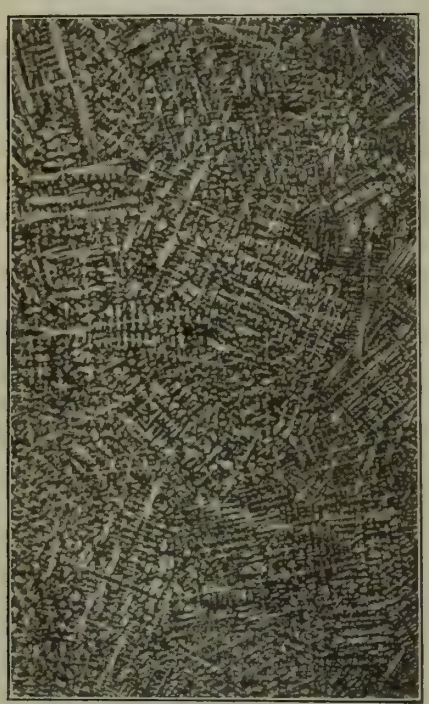

Fig. 1.—Cast Metal 15 Diams.

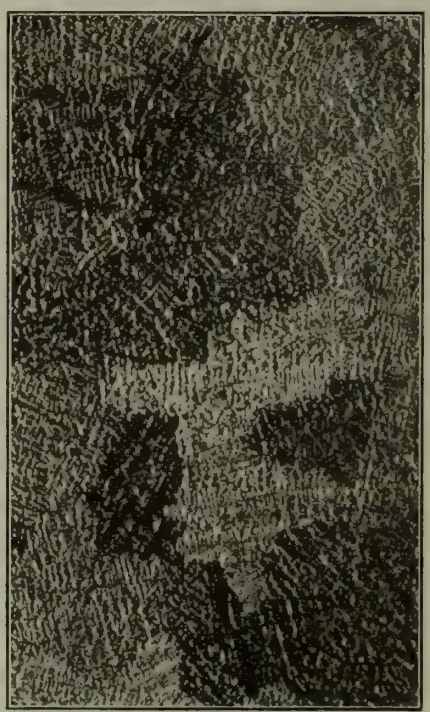

Fig. 2.—Light and Dark Parts Show Size of Crystalline Grains.

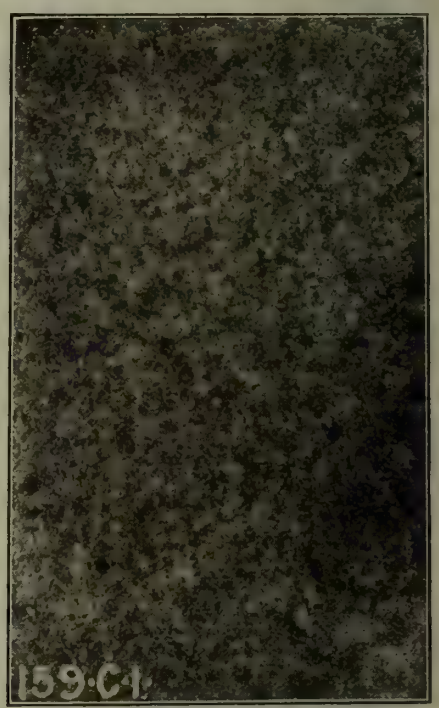

Fig. 3.—75 Diams, Rolled, Etched Light.

Monel metal, which was named after Ambrose Monel, president of the International Nickel Co., is a combination of nickel and copper in proportions, very approximately as they occur in the ores. These proportions are 68 to 72 per cent. nickel to 25 to 29 per cent. copper. The alloy contains a little iron, about 2 per cent. and slight traces of sulphur and carbon. It is easily rolled at temperatures of from 900 degrees to 1,200 degrees C. and can be finished hard or soft similar to sheet copper.

Monel Easily Polished.

In appearance the metal is silver-white and is easily polished to a high finish which finish will remain almost indefinitely. Its non-corrodibility has been demonstrated by a 56-day test with 40 degrees of sulphuric acid, which produced no loss whatever.

The metal may be as easily drawn and cast as it is rolled and among the possible uses of the hot-rolled, appear such as roofing, ventilators, smoke stacks, ship plates, etc., the cold rolled sheets being used in making hospital equipment, watch cases, knives, forks, spoons, and similar articles.

For castings which are subject to severe strain or shock, it is admirably suited, as has been demonstrated by its use in making propeller wheels, cast solid hub and arms.

When drawn into wire or rolled into bars it is adaptable to valve- stems, shafts, piston rods, resistance wire, rustless screens, screws, rivets etc. When made into bolts it is better than steel for the reason that on a bolt of Monel metal the threads are very much less liable to strip. Monel bolts, half-inch diameter, are 30 to 35 per cent. stronger than steel bolts of the same size.

Suitable for Plumbing Supplies.

The new metal is being made in sheets by the American Sheet & Tin Plate Company, to be used largely by sheet metal workers, and it has also been subjected to practical tests for the construction of range boilers and sinks. The metal has many excellent qualifications for this purpose. It has much greater tensile strength than copper, consequently boilers of the same thickness of metal may be subjected to a much greater hydraulic pressure with safety. It is possible also for it to be drawn into shapes such as boiler heads and pantry sinks.

An important feature of the metal is that having so large a constituent of nickel it can be polished to have the same bright surface found in nickel plated articles without the expense of nickel plating. This adapts it admirably to boiler and sink construction, as well as to bar fixtures, and, being a harder metal, it is capable of standing rougher usage without showing dents, and promises to wear longer. Being of the same material all the way through it can be kept polished as long as it lasts.

Stronger than Steel.

The accompanying illustrations are exact size reproductions of micro-photographs of the cross section of pieces of cast and rolled Monel metal. Figs. 1 and 2 are of the same cross-section, but in Fig. 1 the light is directly on the section while in Fig. 2 the illumination is at an angle. The light and dark patches show the size of the crystalline grains. Figs. 1 and 2 are magnified 15 diameters. Fig. 3 is a micro-photograph of the cross section of a rolled specimen magnified 75 diameters and etched lightly.

In working the metal in a lathe or similar machine it gives as satisfactory results as does mild steel without chattering. As the metal draws perfectly into a smooth tube it is very well adapted to use in condensers and flash boilers such as are used on automobiles and in motor boats. Experiments and tests are now under way to determine the physical constants of the metal, its electrical qualities and the effect produced by varying amounts of iron, silicon, carbon and copper.

What Hardwaremen Should Do in June

Although the retarding of the spring demand through the unfavorable weather has been very unfortunate, for there was every reason to anticipate at one time an early season, one great lesson is to be learned from this, and that is the merchant must never rely solely upon the natural flow of consumption. He must be always endeavoring to force the demand, so that if the circumstances be unfavorable he has established an extra pull upon the desires of his community. The dealer who has persistently thrust his wares forward, who has by interesting displays tickled the appetite of consumers, and who has diligently advertised in some form or other counteracts in no small way the effects of a backward spring. He may not do the amount of trade that would have come to him if conditions had helped ; but he leaves behind the man who has solely relied upon the natural spring stimulation to business. Some merchants have done well during May, others have complained of conditions being against them. In the one case trade has been gone after, in the other case it has been left alone. Whether a coming season promises well or not, the merchant should never relax his efforts, for the sun may not shine when he most expects it.

Hardware Millinery Displays.

With the trade more than ever convinced that the women folk are the predominating buyers of the future, merchants should take up seriously the millinery display. Some very novel effects can be procured by ordinary hardware lines, and it is novelty that the dealer must continually strive to attain. Especially is such a display appropriate in June—the month when weddings are so popular. With the help of a regulation millinery form or two, and some stands most ingenious effects can be made. It is surprising the artistic hats that can be formed from dish pans and small baskets. A white dish pan trimmed with white crepe paper with a dog collar as a band and a butcher's knife as a feather makes a most presentable hat, while others can be made from wooden dough trays with seine netting as a veil ; inverted sauce pans with bows of white paper, wash pans trimmed with fly flaps and blue paper; and inverted colanders with white crepe paper, and trimmed with dogs collars. In fact, with ingenuity this list can be extended, and with the expenditure of little money, the merchant can produce styles and trimmings that will create the wonder of the womenfolk, and cause the milliner to be quite envious. Of course the window must be done artistically or the whole effect will be lost. Either do it well, or not attempt the design at all. With present day millinery designs some hardware articles can be made most excellent imitators.

In conjuction with such a display a tin show window could be run, and an assortment of kitchen utensils that a bride could not possibly resist. Tin and granite ware, and other similar utensils, are not displayed with the frequency they should be. Some merchants have the idea that these lines do not lend themselves to display. But this is a mistake. A most attractive window can be made out of common kitchen ware, and after all they deserve attention as they are always in use.

Make Silverware Prominent.

The merchant should also bring forward his cutlery and silverware. Cutlery is generally recognized as a component part of the hardware industry, but silverware is still doubtfully regarded by some merchants as being somewhat out of their business. This is a great mistake as any progressive merchant will point out. Years ago when the average store was far from being the well appointed and ornate establishment it is now, the dealer may have had some doubts as to the carrying of lines, similar to silverware, which require careful handling and clean surroundings. Besides men were then then the chief buyers. But all this has been changed. The grease and dirt has gone. Artistic trimmings, and brightly polished counters and show cases are the rule and not the exception, and the women folk are using the hardware store in ever increasing numbers. Silver ware therefore is not now out of the scope of a dealer. He is the natural outlet for the trade, and that progressive men are recognizing this can be seen from the increasing number carrying silverware lines. The time will come when every hardware man will have his silverware department, and a well assorted one too.

Art of Window Dressing.

During the month refrigerators, ice cream freezers, water coolers and filters can be shown. Hammocks, too, should be given a special display, and with these run garden seats and tables. With artificial grass and a figure if possible, and other little accessories, several smart designs can be shown, the main point being to suggest how much pleasure, rest, and comfort can be attained from the use of such articles. The great art of window display is suggestion. It is not the articles themselves, but the suggestion of the comfort and convenience which they produce that give force to the design.

Sporting Goods.

Sporting windows should be continued through the month. The summer exodus will have commenced. Boating, canoeing, tennis, croquet will be in full swing. Baseball, lacrosse and cricket accessories should also be displayed, for although the season for these games has already started, balls, bats, mitts, sticks, etc., are continually being wanted. Although fishing tackle is always in demand the late starting of the fishing season is an added reason for pushing these lines well. The camper out and picnicing parties should also be well looked after. Here again there is another example of the value of suggestion. The camping out window must radiate enjoyment. Observers must be made to realize fully the bliss of a sojourn away from the hurly burly of business worries and the polluted atmosphere of conjested habitations. Let them think of murmuring streams and placid lakes, of a collarless existence amid invigorating surroundings. We would again point out the value of catering to the automobilist. A large number of accessories can be easily carried, and as automobiling is rapidly increasing in favor, a most profitable trade could be worked up. Pay attention to the bicyclist also. He is a developing member of the community, and the hardware dealer is the right man for the trade.

Workingmen's Gloves and Mitts.

In these days, when the profit on staple goods has been so severely cut, the merchant should always be on the look out for lines that have not been common to the hardware store, but which can be easily carried at a good margin of profit. In this respect he should certainly consider the advisability of stocking a good line of working men's mitts and gloves. An increasing number of hardwaremen are stocking these lines especially in Eastern Ontario, but it is astonishing that their example is not more general considering the fact that the wearers of these gloves are constant customers at the store. The carpenter who buys tools, uses gloves. He has to get them somewhere, why not at the same store. The bricklayer, the driver, the bridge maker—in fact all trades want their special mitts and gloves. The dealer need not carry a complete line, he can stock those which suit his class of trade. Saddlers and harnessmakers carry gloves that are wanted for drivers, and the hardwareman with his wider scope can make a good department of these lines. The trade is not cut up, there is a good margin of profit, and above all the articles can be easily handled.

Hardware Letter Box

Any questions on trade subjects will be answered by the editor in this department. Do you want any address, any special line of goods, anything relating to the hardware trade? Ask us. Letters from manufacturers, jobbers, travelers, retailers or clerks are solicited. Suggestions for trade improvement or discussions on trade evils are invited.

Barndoor Hangers. — "Merchant" asks: Who are the manufacturers of reliable barndoor hangers?

Taylor-Forbes Co., Guelph, are a reliable firm making these goods.—Editor.

Henry Gilles, hardwareman, St. Jacobs, Ont., writes: "Could you tell us where we could buy a one-horse street sprinkling wagon, (second-hand) in good working order?"

Perhaps some of our readers could inform us.—Editor.

PAYS TO STOCK METAL ROOFING.

The Shaw Hardware Co., Wallaceburg, always carry a stock of the more staple lines of metal roofing such as corrugated siding and roofing, steel shingles and regular siding, and find that when the builder or farmer comes to inquire about these goods, he can see exactly what the goods are and invariably loads up his wagon with what he requires. There is no delay or bother about waiting for goods to arrive at the station and the farmer never makes a trip to town to find that the goods have not arrived. Then by having the goods always ready to load on the farmers wagon, the firm secures an order for whatever else is needed in the hardware line.

PUBLISHED EVERY SATURDAY.

WATCHING THE WRONG COMPETITOR.

Many merchants, and particularly those doing business in country districts not fortunate in having a newspaper as an advertising medium between themselves and their natural consumers, are often greatly worried by the inroads of mail order houses. They find that the very people whose accounts they carry for one, six, and sometimes twelve months, send cash to the mail order houses, and there purchase half their goods. They know that they can sell just as cheaply and often cheaper, under the prices named in the catalogues of the big houses.

This is a problem which has puzzled many of them and they find it difficult to get at the root of the trouble.

In nine cases out of ten the cause lies in the lack of energy and diplomacy on the part of the merchants. They get into a rut and stay there. They do not utilize their faculties to advantage in overcoming this disadvantage and much too frequently do they watch the wrong competitor. They believe if they can sell as cheaply as the opposition across the street or on the next concession line, cut prices when he does, pay the farmers' wives a cent more for eggs than other merchants, they are on the fair road to success and are going to attract a greater share of the trade than their local competitors.

These wrong ideas have been the cause for many a downfall when success might have been achieved. Instead of booming their own businesses by impressing upon their natural customers the quality of their goods and the values they are getting for their money, they keep their eyes fixed on what the merchant on the next corner is doing.

The outcome of this is that a price on a certain article is cut by one of the number and the rest follow in his footsteps to the detriment of the manufacturer of that article and their own profits. The time soon comes when it is discovered a profit cannot be made; they either purchase a substitute or give up handling it. The manufacturer loses business and the merchant loses profits. The effect is far-reaching.

An essential accompaniment to the success of a country town or village is enterprise among the merchants. They have got to do the booming if they want to secure business and the securing of business means the building up of a place more attractive to the farmers and with greater prestige in the commercial arena. Where merchants judiciously advertise their goods in their home town there will be found few vacant stores and empty houses. They have to be alive to not only their own interests, but to the interests of the whole community. They must see that the money earned in their own district is spent in their home town and to do this there must exist good-fellowship and good-will among them.

Cutting each others' throats at the expense of allowing the money to go to the mail order houses is undoubtedly poor policy, and if carried on to excess spells failure for those who practise it.

CLEAN THE BACK-YARD.

Fire underwriters' inspectors are now on the warpath looking after the conditions of warehouses and back yards of stores. No doubt during the past winter there has been an accumulation of barrels and boxes around many stores and with spring here the chances of fires breaking out are by no means mitigated. The inspectors will probably order the removal of all combustible matter, as well as other rubbish around the back lanes, and merchants who do not comply with the request may regard their tardiness should a fire occur; they may have difficulty in obtaining their insurance.

Apart from the safety that the removal of rubbish from the back yard provides the merchant, the change in appearance a little brightening up brings is well worth the trouble. The merchant who prides himself on cleanliness, as all merchants should, must not stop at the rear door of the store. He must use the broom, the rake and the wheelbarrow and clear away all dirt and decaying substances and make the back yard of his store as clean, comparatively speaking, as his show window, store floor or front doorstep. Sanitary conditions are absolutely necessary, even if cleanliness and fire protection are not taken into consideration.

PRICE CUTTING.

Possibly the most foolish of all fool things in retailing is price-cutting. One merchant comes out with a low price on some staple article and at once every other retailer in the same line goes him one better with a deeper cut. Then the war has fairly begun, and before it is over prices have gone all to pieces and every one of the competitors has lost money and none of them has reaped any benefit from their insane rivalry. Nothing but bitterness arises from such folly.

If you have faith in your goods, hold up the price and talk quality first, last and always. If you have no faith in them, get a line that you can have faith in. You owe it to the manufacturers of honest materials to maintain prices, for a cut price is a confession that you think the goods are not worth what you have been asking for them. Of course, a merchant can give his stock away if he wants to, but that is not business.

THE DEADLY HOUSE FLY.

Hardwaremen who sell screen doors and wire cloth will be interested in a report issued by the Merchants' Association of New York, based upon numerous observations of the relation of flies to intestinal diseases, in which it was shown that the greatest number of flies occurred towards the end of July and beginning of August, and that the deaths from intestinal diseases rose above the normal at the same time at which flies became prevalent; culminated at the same high point, and fell off with slight lag at the time of the gradual falling off of the prevalence of the insects.

Publicity should be given these facts in every country paper and every editor having the welfare of the community at heart will readily give space to articles on the subject and advise the use of screens on windows and doors. Give the editor the information contained in this article and show him the necessity of preventing the spread of contagion by having stores and houses unscreened and the result should be a material increase in the use of screens and a corresponding improvement in the health of the community.

The house fly, which has hitherto been considered as a harmless creature, or, at the worst, simply a nuisance, has been shown, as the result of scientific researches, to be in reality, judged from

the standpoint of disease, a most dangerous insect. Dr. L. O. Howard, in his recent investigations of the economic loss through insects that carry disease, devotes a chapter to the house fly as a carrier of typhoid bacteria. At the outset emphasis is laid upon the fact that the term "typhoid fly" is open to some objection as conveying the erroneous idea that this fly is responsible for the spread of typhoid only. As a matter of fact, the insect is dangerous from every proint of view, and is liable to spread the bacteria of all the known intestinal diseases. The true connection of the so-called house fly with typhoid fever and the true scientific evidence regarding its role as a carrier of that disease, have only recently been worked out. Celli in 1888 fed flies with pure cultures of the typhoid bacilus, and inoculations of animals were also made, proving that the bacilli which pass through flies are virulent.

Dr. George M. Koeber, in his report on the prevalence of typhoid fever in the District of Columbia, has drawn attention to the danger of the contamination of food supplies by flies that have been in touch with typhoid patients. The prevalence of typhoid fever in the camps of the United States army during the Spanish war brought about the appointment of an Army Typhoid Commission, which found: First, that the flies swarmed around the sanitary quarters of the hospital, and then visited and fed upon the food prepared for the soldiers in the mess tents. Secondly, that officers whose mess tents were protected by screens suffered proportionately less from typhoid than those whose tents were not so protected. Thirdly, that typhoid fever gradually disappeared with the approach of cold weather and the consequent disabling of the fly in the fall of the year. The final conclusion was that the fly carries the typhoid bacilus either by the adherence of infected matter to its feet, or within its own digestive organs.

In 1899 Dr. Howard made a study of the typhoid or house fly, in its relation to country and city sewage, and he made a further investigation of the species of insects that are attracted by food supplies in houses. In this investigation he found that the typhoid or house fly constituted 98.8 per cent. of the whole number of insects captured in houses throughout the whole country, under the conditions indicated above. The importance of this insect as a carrier of the dreaded disease in army camps, as shown in the Spanish war and in the Boer war and in the camps of great armies of laborers engaged in gigantic enterprises, like the digging of the Panama Canal, is obvious. But it is certain that, even under city conditions, the influence of this fly in the spread of disease has been greatly underestimated.

A certain species of mosquito has been demonstrated to be the cause of the spread of malaria. Yellow fever is caused by another kind of mosquito; and now we know that the supposedly harmless house fly is an active agent in the distribution of intestinal diseases. In view of these facts, Dr. Howard's contention that this familiar household insect should henceforth be known as the "typhoid fly" would seem to be well made.

INTEREST THE CHILDREN.

Getting the children interested is one of the tricks the modern merchant plays to increase his business. It serves not only as a present business-getter, but some day those children will be grown-up folks with money in their pockets. It will, therefore, pay the aggressive hardware merchant to awaken a lively interest in his store among boys and girls by setting aside a Saturday on which they may visit and inspect his "Special Exhibit for Children," prearranged for the occasion, and consisting of such toys as are usually carried by the up-to-date hardware store, like boys' tool chests and tools, sleds and coaster wagons, sporting goods, etc. Inexpensive personal invitations should be sent to as many of them as possible in your town and vicinity, at least two weeks before the exhibit, so as to arouse their curiosity and to get them to talk about it among their friends. Of course, their mothers must be invited, but, if they cannot come along, the children should come themselves, and they will be shown everything just as if they were grown-ups, without being expected to buy. The children go, and are shown so many new and pretty things that they are converted into real drummers for that store. The merchants who have tried the scheme pronounce it a great success.

DOES WEALTH GIVE HAPPINESS?

It is a generally accepted fact that every man, young and old, enters business with the idea and ambition of scoring success. The term "success" is broad in its interpretation and meaning and includes many things, as honesty, a good name, fair values, an efficient service, commodious premises—and the daily receipts or profits. The world is, however, too inclined to spell success as an abundance of cash. Accepting, only for the sake of argument, the popular verdict it is equally interesting to hear someone say that affluence does not bring happiness or enjoyment. If that is true then there are a great many people in this wide world laboring under a strange delusion and a fatal fascination.

Discussing this attitude on the part of the public, an authority offers some interesting observations. "If riches," he adds, "do not mean a certain amount of pleasure, if they give the possessor nothing but turmoil, trouble, anxiety and uneasiness of mind, spirit and disposition, do you suppose there would be such a general desire to cling to wealth or to add to its store year by year? If a man of means has nothing but fear, mental anguish and untold misery as his daily portion—which many allege—there is not a millionaire in the land who would not unload all his holdings and rid himself of every bit of his capital to-morrow, for the sake of securing that sublime peace and contentment which are supposed to be, in a particular degree, the lot of less favored individuals. Every man goes into business with the desire of making more than a bare living or finding employment.

"Some will come along and tell you that, if you have enough to drink and eat and clothe yourself and a warm, comfortable house to live in, you are just as well off as the man who has his thousands, as he, like you, has only one mouth to fill and one body to clothe and keep warm; and that, if you are in what is called fairly well-to-do circumstances, you are as much favored as your rich brother. He can array his form in the finest raiment and satisfy his gastronomic longings with whatever delicacies fancy dictates or imagination paints; you cannot, as your pleasure is spoiled or interfered with by having to stop and consider the cost. He can buy a home of whatever style and architecture and in whatever locality he pleases; you cannot, as the price is too great. He can stay wherever he desires, travel when and how he likes; you cannot, as there is the barrier of expense. Every luxury, every convenience, every material aid to comfort and cheerfulness are possible with the man who does not have to stop and wonder whether he can afford it and weigh everything in a dollar and cents scale.

"Herein lie a few differences which no system of philosophy can shatter or sophistry destroy. This is why all men seek opulence, and by opulence is not meant idleness, aimlessness, meanness, tyranny, profligacy or dissipation.

"Riches honestly acquired and properly used do confer upon the possessor particular privileges and special powers which contribute to happiness and other things which go to make existence joyful and the one who declares otherwise is generally willing to be converted if he or she meets fortune while straying along life's highway."

CANADIAN METAL MARKETS

See Itemized Market Quotations on Page 74.

MARKETS IN BRIEF.

Montreal.

Copper—Advanced ½c.
Lead—Now $3.60.
Tin—Firmer.

Toronto.

Turpentine—Advanced 2c.
Linseed Oil—Advancing.
Steel—Up about $2 a ton.
Copper—Up ½c.

THE MARKET SITUATION.

There has been a much better tone to the primary markets this week. Tin has shown a firming tendency owing to the stronger stand taken by large holders in the English market, and somewhat heavier buying in New York owing probably to anticipated tariff changes. Copper has also shown up more strongly. The English market advanced, while New York became firmer under the strong indifference of holders to sell. Business is reported quiet, but undoubtedly the market is optimistic, and this is encouraged by the good tone to iron and steel, and the general improvement in trading all the way round. Spelter continues to show strength, not only in the English market, but St. Louis, where figures have gone over the $5 mark. Lead is fluctuating with a tendency to show a little higher figure. Iron and steel conditions in the Old Country are about the same. Cleveland warrants are now quoted at 48 shillings and threepence. Orders in the United States iron and steel markets are somewhat quieter, but the furnaces and mills are well filled with business and are not actively looking for fresh work. The recent improvement in the tone is maintained, and prices are held steadily.

MONTREAL.

May 28.—A brighter tone is observable in the metal markets this week. Buying shows improvement, while firmer figures in the primary markets have strengthened all quotations, except lead, which has dropped 5c per 100 lbs. Copper has advanced ½c, and tin and spelter, while unchanged, are very firm. Inquiries are also better, and it looks as if users who were responsible for the good buying some time back are in the market again. While the smaller consumer is still disinclined to place his orders ahead, some of the larger interests are covering their requirements for a considerable time to come. First hands are still busily shipping away metal as it arrives, while booking has improved for fall delivery. Owing to light stocks consumers want no time lost in getting their metal.

Copper is in better demand, and the increase in quotations will probably stimulate a stronger interest in the metal. Spelter is also selling well.

PIG IRON—Trade continues to show good movement. Orders for future requirements are swinging in well, and a busy season promises up to the end of navigation. The lightness of stock is shown by the anxiety that users have to get their stuff as soon as it arrives. The improving tone to the markets in the Old Country has tended to stimulate the buying ahead, as higher prices are already being obtained for deliveries extending into the fall. We continue to quote: imported pig, Clarence, $16.75 to $17; Middlesboro No. 3, $16,-50 to $16.75; Summerlee No. 1, $18.75 to $19; No. 2, $18.25 to $18.50.

COPPER—With firmer prices in the primary markets, and an encouraging improvement in the local demand, copper has been advanced, after a long period of unchanged prices, ½c for ordinary jobbing lots, and the price is now 14½c. Inquiries have improved, and it looks as if the firmer state of the market was making users take a little more interest in the situation. Stocks are not large, and consumers are not anxious to be squeezed. The firmer tone in the primary markets seems not so much based upon increase in legitimate consumption as to another wave of confidence as to the immediate future. Producers are still apparently indifferent to sales.

TIN—The jobbing price of 32½c still obtains for tin although the market is very firm. Orders have shown an improvement despite the interruption of the holiday, and the tone of the market is much brighter than it was last week. The primary markets have also been stronger, although apparently there is no improvement in the volume of business being done with consumers. It is reported from New York that there is a better feeling in regard to trade in general and that this has probably influenced the tin market. Buying in London has also been more steady. There is one thing certain—that the metal is not to be relied upon, and conditions must be taken as they appear each day.

SPELTER—Spelter is unchanged at $5.75 with the demand good, and consumers taking keen interest in the market. The English market has advanced under a strong consuming demand and stocks in firm control. The market has also advanced at St. Louis, and has gone over the $5 mark. Of course the tariff is playing a strong point here.

LEAD—A slight sagging in lead has resulted in a cut of 5c per 100 lbs., making the price $3.60 for ordinary jobbing lots. Trail following is about $3.50. Trade is fair, but there is little character to the demand. The English market has fluctuated with perhaps a firmer tendency on the whole.

SCRAP METAL—The market is quiet with little stock offering. There are no changes in prices, and we quote: Heavy copper and wire, 11c; light copper, 10c; heavy red brass, 10c; heavy lead, 2¾c; scrap zinc, 3c; wrought iron, 11c; machinery cast, $14.50.

TORONTO.

May 28.—A brighter prospect seems to be ahead for the metal situation. Certainly this passing week has been much better than any since the opening of May. As a consequence all the metals with the exception of lead are slightly higher, and even lead during the past two days has been firming up.

Steel has advanced between $1 and $2 a ton at Pittsburg, the advance being noted on Wednesday evening last, and it is more than likely that Canadian prices will also advance, though prices here have not been cut to the extent they were across the border. Copper has taken a hitch and has gone up half a cent.

Pig Iron—The lower prices quoted last week continue to rule at present, though the market is firm and strong. Business is constantly increasing. Canadian foundry is $19.25; No. 3 Middlesboro' is $19.50; and Cleveland $21.

COPPER.—The primary markets have advanced greatly during the week, London alone raising the price over a pound sterling a ton. This has had an effect locally and the quotation now fluctuates between 14¼c to 14½c. Consumption all over the world is increasing. England this week took 1,000 pounds (60 cars) daily. At that rate U.S. copper men are picking up about a quarter of a million dollars a day. The uses to which copper is put are increasing, and the factories utilizing the red metal are getting busier. This brings the production and consumption figures closer together with a consequent firmness in the copper market.

LEAD.—This metal has had a spasmodic career this week. Across the border lead has been climbing, but locally up to Thursday morning the metal had shown a decline of 5 cents. Yesterday it took a brace and recovered itself and to-day is firmer, and is even expected to advance. Pig lead is much sought after these days, though lead products, with the exception of paints, are not much in demand, and in the case of lead pipe and sheets, is giving way to iron and galvanized pipe and metal roofing. The quotation is still $3.65.

TIN—This metal is unchanged in price and condition from last week. The quotation is 32c and the market is fairly active.

SPELTER.—Firm, active and showing a higher price tendency about covers the situation as regards spelter. This metal continues to give satisfactory results and the amount of trading passing is improving weekly. It is the least spasmodic metal on the market. Last week's quotation, $5.75, still rules.

SHEETS AND PLATES.—Very active business is now being done with satisfactory results. Importations are coming in freely this week, and stocks are fairly large. Prices are unchanged.

OLD MATERIALS.—As with the new metals, all scraps are showing improvement. Prices remain at last week's quotations. Dealers are paying for heavy copper and wire, 11c; light copper bottoms 10c; heavy red brass, 9¾c; heavy yellow brass, 8¼c; light brass, 6¾c; tea lead 2¼c; heavy lead, 3c; scrap zinc, 3c; No. 1 wrought iron, $10; machinery cast scrap, No. 1, $14; stove plate, $12; malleable and steel, $8; old rubbers, 7c.

HARDWARE MARKETS

MONTREAL.

May 28.—The interruption of the holiday did not affect the movement of trade, which has shown a much livelier tendency during the week than for some time past. Jobbers are uniformly busy, and they have the satisfaction of knowing that the volume done up to now is much better than for the same time last year. The backward state of the seeding, especially in Ontario and Quebec, has undoubtedly affected the consuming demand, and some dealers are rather discouraged over the reluctance of the farmers to buy. Considering, therefore, the trade that is being done by the jobbers, it would seem that but for weather conditions bumper business would have resulted. The weather now being experienced should soon make amends for past misdeeds. The Northwest is quietly but steadily improving in its buying.

All spring lines are in demand. Hose is now going well again, and so are ice cream freezers and refrigerators. Orders for immediate delivery in harvest tools are being received, but the season will probably be late in this as in other lines. Bolts and nuts continue to move splendidly, and evidently there is plentv of construction work going on. Gardeners' tools, carpenters' tools, and builders' hardware are prominent lines.

No important changes are announced in prices. The markets generallv are firm. Although no change is yet announced it is expected that prices will shortly advance in halters, skate straps soles and heels and other leather goods. A heavy increase has taken place in the price of green hides brought about by their scarcity, the kill of western cattle having fallen below that of former years. The tanners have put up their prices, and manufacturers will probably follow.

BUILDERS' HARDWARE — Builders' hardware continues to be a most prominent selling line. The better building conditions have stimulated the local trade, and orders are swinging in well. Lock sets, escutcheons, bolts and nuts are most prominent. We continue to quote: Door sets and escutcheons, 50 and 10; escutcheon pins, steel, 50 · brass, 55; spring hinges No. 20, $9 per gross.

SPRING GOODS—There has been a stimulation in spring lines owing to the better weather conditions, although the late seeding has kept back trade. Still jobbers are satisfied with the business moving. Hose has become very brisk again, and stocks are getting short. Lawn mowers are also selling well. The warm weather has encouraged the demand for ice cream freezers and refrigerators. Repeat orders for screen doors and green wire cloth are coming in steadily and well. With farmers feeling more assured as to their crop prospects there would be little to cavil at in the trend of trade. The market is firm, and we quote: Screen doors, stained, $7.80; grained, $8.10: screen hinges, $9 a gross; poultrv netting, 60 and 2½; green wire cloth, $1.70 in 100 feet rolls.

HARVEST TOOLS—Although the lateness of the season is keeping back the movement of harvest tools, an improvement is noticed in the bookings, while some orders have come in for immediate delivery. We continue to quote: Hay fork pulleys, $1.60 to $8.50 a dozen; hay carriers, hay rakes, etc., 55 off.

MINERS' SUPPLIES—The demand shows a little stimulation, but the line appears quieter than at one time seemed probable. We continue to quote: Miners' picks, 17c a pound; prospectors' hammers, 20c; pick handles, $1.85 a dozen; drilling hammers, 6c a pound; crowbars, 3½c; drill steel, 8c.

BOLTS AND NUTS—The demand for bolts and nuts continues most active, and it is evident that consumption must be exceedingly good. We continue to quote. Discounts on carriage bolts, ⅜ and smaller, 70; machine bolts, ⅜ and less 60, 10 and 10; coach screws, 75; stove bolts, 80 and 7½.

SCREWS—Screws are still selling well for all sizes most commonly in use. We continue to quote: 85 and 10 off for flat head, bright; 80 and 10 off for round head, bright; 75 and 10 off for flat head, brass, and 70 and 10 for round head, brass.

SPORTING GOODS—Guns and ammunition are commencing to move more freely again. Fishing tackle is in active demand, while there is now a better call for baseball and lacrosse outfits. Yachting supplies are still quiet.

WIRE—No change is reported this week in wire lines. There is still the same rush for goods and shipping is inclined to be congested. We quote: Barb wire, car lots and mixed, $2.50; small lots, $2.55: plain twist, car lots, $2.80; small, $2.85. Galvanized wire No. 9, $2.25 in straight and mixed car lots, and $2.30 small lots, f.o.b. Montreal. Coiled spring fencing, $2.45; straight and mixed car lots. and $2.55 small lots. Plain wire, bright, annealed and annealed and oiled, $2.25 base. Other lines $2.30 f.o.b. Montreal.

TORONTO.

May 28.—The hardware jobbers continue to report splendid business. The fine weather of the week past has strengthened demand. Even the holiday induced business rather than acting as a damper. The situation over the country is generally regarded as satisfactory, more especially in Western Ontario and the Western Provinces.

The mining regions of Northern Ontario are again in the field with orders, though booking only is at present being placed, delivery being held up owing to the impassable conditon of the roads. However, the districts far from railway points are expected to be able to receive the goods in July, and in anticipation of this some good bookings have been made of mining tools and builders' hardware.

The goods most in demand just now are summer lines, like screens for doors and windows garden tools, lawn goods, and builders' hardware. These lines have been moving remarkably well and some repeat orders are fully as large as the initial bookings placed earlier in the season. It looks like a bumper business for May.

BUILDERS' HARDWARE.—All the articles classed under this heading and all articles in any way related to builders' hardware, are selling remarkably well. Hardwaremen, jobbers and manufacturers say they are experiencing a greater demand than they anticipated, and in not a few cases it has been found necessary to work into the night to fill orders. Prices are unchanged on the general lines, and if anything tend to firmness. Lock sets of all kinds are meeting with favor.

SEASONABLE GOODS. — Summer lines have had a great call this week. The few continued fair days opened up demand with something like a rush. Screens have been fair sellers for six weeks past, but just now it appears as though no hardwareman had any in stock. Repeat orders are just as big as opening orders booked some time ago. Door and window screens and wire cloth are going out with almost every order. Hose has at last wakened up and lawn mowers are just as free sellers as for the month past. Garden sets and tools are still in demand, and a fair trade prospect seems to be ahead for refrigerators, ice chests and ice cream freezers.

SPORTING GOODS.—Buying is still active. Fishing outfits are going more freely than at any time since the opening of the year. Outdoor games have kept up the demand for baseball and lacrosse outfits. Football supplies seem to have weakened, but the gun and ammunition season is opening well.

HEAVY GOODS.—Nails, bar iron and pipe are creating records in the way these lines are moving at present. The building outlook if not yet up to boom prospects is not far short of them. Not only cities, but the smaller country sections and newer settlements in the mining regions in the north country are calling for large supplies. No price changes have yet taken place, but some structural steel lines across the border have advanced between $1 and $2 a ton this week. Steel plates are very firm. Nails are more than ordinarily active and screws are beating all sales records of the past.

U.S. IRON TRADE.

Cleveland O., May 27.—The Iron Trade Review says: More optimism is being shown in the iron and steel industry than for several years. By individual action, several companies have

signalized their satisfaction with the business booked by raising their prices above those of their competitors, thereby practically withdrawing from the market. It is believed, however, among prominent interests that conditions, even if sustained, will justify only conservative price advances until the summer season shall have been passed and the industry shall have gained a strong impetus for the future.

The activity among buyers for the past four weeks has been encouraging. Some of the steel companies were not specially prepared for a marked revival and were obliged to exercise rapid policies in adjusting production to the current demands. In one instance, a round tonnage of prompt pig iron was purchased from merchant companies.

The semi-finished steel market shows evidence of steady and widespread consumption. Steel makers with finishing capacities have been utilizing more and more of their Bessemer and open hearth output for their own operations. Some of them accordingly are finding difficulty in filling the specifications from patrons on term contracts, so that they are avoiding making any promises of immediate shipment on new business.

Operatons of important steel interests whose products are of a diversified nature, continue favorably to reflect the heavy run of current orders. This week the Carnegie Steel Co. has active 73 per cent. of its blast furnace, steel works and finishing mill equipment. Of the blast furnace, 43 out of 59 stacks are blowing. The bar mills are running at 90 per cent. of capacity, and the plate and shape mills at 80 per cent. The activities of the Jones & Laughlin Steel Co. and the Republic Iron & Steel Co. and other companies are no less extensive.

Hardware Trade Gossip.

Ontario.

J. J. Metcalf, hardwareman, Shelburne, paid a buying visit to Toronto this week.

Fire in Sanderson Pearcy's paint warehouse at 65 Adelaide Street West, Toronto, did $150 damage on May 25.

J. S. Brunton has purchased the hardware stock and business of Fred Adams at Barrie, and will at once put in a complete line of hardware.

Alexander Morris has purchased from the National Mfg. Co., Pembroke, the site of their factory which was destroyed by fire last November. Mr. Morris has in contemplation the starting of a new industry which will employ quite a number of hands.

The sun shining through the window of the hardware store of George A. Wells at Toronto, last Sunday afternoon, ignited some fireworks in the window, and in the resultant explosion the windows at the front of the store were blown out, and the building set on fire; $700 damage was done to the stock and $650 to the building.

The hardware business carried on by T. I. Thompson for the past twenty-two years at Owen Sound, will henceforth be known as T. I. Thomson Limited, having been incorporated as a joint stock company, the change being deemed advisable by reason of the large growth of the business. The members of the company are T. I. Thomson, president; Leonard Ferguson, vice-president and manager, and T. W. Thomson, secretary-treasurer. The formation of the new company will involve no change in the business which will be carried on in the same premises, which has been a hardware stand continously for fifty-five years, when it was established by the late A. M. Stephens.

Quebec.

J. N. Warminton, manufacturer's agent, Montreal, has returned from a trip to the Maritime Provinces.

T. J. Wall of A. G. Spalding & Bros. athletic goods, Montreal, has been on a trip to Toronto and western points.

Godfrey S. Pelton & Son, mfrs. agents, Montreal, have removed from 201 Coristine Buildings to 203 St. Nicholas Building.

George Caverhill, of Caverhill, Learmont & Co., Montreal, has been elected a director of the Montreal Light Heat and Power Co. Mr. Caverhill is a director of the Montreal Street Railway, Richelieu & Ontario, Dominion Steel Co., Royal Victoria Life, Montreal Loan and Mortgage, and several other concerns.

A cutlery and hardware store has been opened on Bleiry Street, Montreal, by Jas. A. Jackson, who for some time past was in charge of these departments for The Robert Simpson Co., Toronto, and previously in sales department of Lewis Bros., Montreal. Mr. Jackson has had a wide and varied hardware experience, having been connected with some of the leading retail and wholesale hardware firms of Pittsburg and Cleveland.

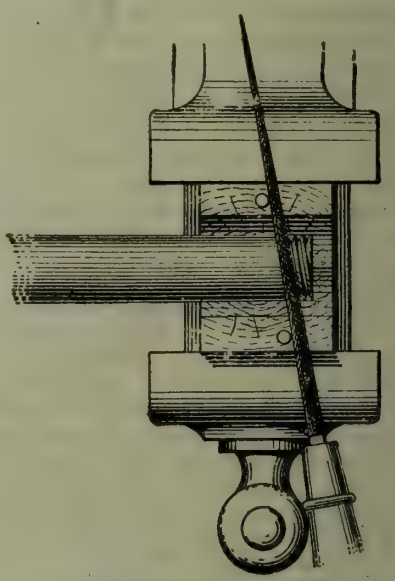
Western Canada.

J. H. Walsh, hardware merchant, Osage, Sask., has assigned.

Johnson Bros., hardware merchants, of Boissevain, Man., have taken a leaf out of the book of the mail order houses, and, in addition to their newspaper advertising are now issuing a catalogue every month.

Andrew Dykes and Ernest A. Dykes, Winnipeg hardwaremen, trading under the name of E. A. Dykes & Co., have dissolved partnership. E. A. Dykes and Chas. F. Rutley have bought the stock and fixtures and have removed them to Rosetown, Sask., where "Dykes & Rutley" will open a hardware store.

DISPLAYING HOUSE TRIMMINGS.



Merchants often have considerable difficulty in evolving a good method of displaying small house trimmings and other similar conveniences. They are lost to view if placed on the floor of the window with other goods, and in themselves do not help in any general display. Assembled together, however, the various articles, if arranged neatly, make a very good and artistic design. M. Philbin, St. Catherine Street, Montreal, shows a number of trimmings in a very neat way. At the back of the window he has a small two-sided screen standing at an angle to the pane. On this is hung in regular rows, and in symmetrical sizes small bright articles such as bolts, butts, hinges, slip locks, angles, screw hooks, drawer pulls, screws, hooks, and various other brass commodities. The whole design looks very well, and is undoubtedly a neat way of displaying these articles.

F. J. A.

THREAD CUTTING WITHOUT A DIE.

It sometimes happens that the threads of a bolt or a pipe break off and must be cut without the aid of a screw-cutting die. This can be accomplished very easily with the aid of an ordinary half-round file and a little patience.

Take a block of wood and fasten it in a vise. Make a V groove in the block deep enough for the center of the pipe to come a little below the surface. If the pipe is long, it will be better to

Thread Cutting Without a Die.

make two of these blocks, so as to keep it steady. Now into this groove place a pipe with thread same as wanted, and on one side of the block drive in a nail. Place the flat side of a half-round file against this nail and see that it forms the same angle with the pipe as the thread does. Then drive in another nail on the opposite side of the block, so that it will touch the flat side of the file. Now remove the pipe and replace with the one to be threaded. Hold the file with the smooth side against the nails and while filing keep turning the pipe. The pipe should be rocked backward and forward. That is to say, on the forward stroke of the file turn the pipe in the opposite direction, thereby insuring a much better thread.—J. A. Bergstrom, in the Scientific American.

BUSINESS FOR SALE.

GENERAL hardware stock in city of Montreal, splendid location, stock $1000. Exceptional opportunity. Good reason for selling. Apply Box 10, HARDWARE AND METAL, Montreal. (23)

HARDWAREMEN IN UNIFORM

No. 7.

Major James L. McAvity, of the 62nd Regiment, St. John, N.B., has had a rather remarkable career in the Canadian militia. Although only forty-one years of age, he has spent more than twenty-five years in military service and as a hardwareman he might be said to have been born in the business, as his father is a member of the firm of T. McAvity & Sons, which business was established more than eighty years ago and is now one of the leading hardware houses in Lower Canada.

The first step Major McAvity made toward military training was in 1879 when he joined the Grammer School Cadets and three years later he was attached to the Hampton Squadron of the 8th Hussars, the crack cavalry regiment of King's County. He joined the St. John Rifle Company in 1884 and continued a member of that organization until May, 1888, when he got the provisional appointment as junior lieutenant in the 62 Regiment. He qualified for the position in the following year and in 1891 was promoted to lieutenant. He was a member of the Bisley team of that year and gave a good account of himself. In 1897, he resigned his commission and went to the Yukon but on his return was gazetted in the regiment on March 3, 1905, as captain and in 1907 he was promoted to the rank of senior major. During the past year he was put in command of the regiment on Colonel M. B. Edwards being granted six months leave of absence to travel abroad.

Major McAvity commanded the regiment on the occasion of its visit to Quebec to attend the Tercentenary Celebration and also at its annual inspection last fall.

He has been a member of the staff at Camp Sussex during the last three years, usually as orderly officer to the officer commanding.

The major has always taken an active interest in riflle shooting and has been a member of the executive of both the Provincial Rifle Association and the Dominion Rifle Association for some years. He also holds the office of president in the St. John County Rifle Association and the 62nd Fusiliers Rifle Association. To show his interest in rifle associations, he last year gave two service rifles for competition in the corps under his command. He has a private collection of rifles of considerable value.

On the retirement of Colonel Edwards in July next. Major McAvity will assume charge of the regiment.

Major McAvity has shown himself thoroughly efficient in all matters pertaining to drill and discipline and the men of his regiment speak of him in the highest terms.

His training as a hardware man was received in the firm of T. McAvity & Sons and he is now proprietor of the McWean & Holt Company, contractors and manufacturers of general railway equipment and castings, stoves, ranges, etc. The business has been rapidly developed since Mr. McAvity assumed control and new shops were built during the past year to meet the growing trade. The company's foundries are situated on the City Road and on Albion Street and the retail store and stove warerooms, on Union Street, St. John.

MAJOR J. L. McAVITY,

A Member of a St. John Hardware Family who has a Military Record.

WRITE TO-DAY—MAIL TO-MORROW

Verbatim copy of a letter which, being type-written in the heat of an indignant moment, was reserved for reconsideration next morning, and—then not sent at all :—

Johnes smifh Esx, wool Excjanje, coFeman Stseet, e.C., deasn MR. Smith ; I Umbertan from yoyr managing clerk, mr. I am? deat Sir, Yours faityfully, J. Jallington-Jones.—Business.

PLENTY OF STOCK.

A proprietor of a store was a man of most excitable temperament, and was forever scolding his clerks for their indifference in the matter of possible sales.

One day, hearing a clerk say to a customer, "No, we have not had any for a long time," the proprietor, unable to countenance such an admission, began to work himself into the usual rage. Fixing a glassy eye on his clerk, he said to the customer:

"We have plenty in reserve, ma'am, plenty downstairs."

Whereupon the customer first looked dazed, then burst into laughter and quit the store.

"What did she say to you?" demanded the proprietor of the clerk.

" 'We haven't had any rain lately.' "

Trade Gossip from Eastern Canada

Quebec and Maritime Trade Gossip—Destructive Fire at Jas. Robertson Co.'s Montreal Factory—Successful Hardware Salvage Sale—Industrial Boom in Nova Scotia—$5,000,000 to be Spent Improving Dominion Iron and Steel Plant at Sydney.

NEWCASTLE, N.B.

May 27.—The lumbering, milling and woodworking firm of H. & F. D. Swim, of Doaktown, have dissolved. The business with the exception of some timber limits, is taken over by Henry Swim. Frank D. Swin will go into business for himself.

The Beveridge pulp mill in Lower Derby, which already employs one hundred and fifty men is being extended by the addition of a couple of wings.

A new Roman Catholic church is about to be erected in Millerton, as well as a number of dwelling houses.

A. E. Wry Co., of Sackville, propose erecting a boot and shoe factory.

The English company which has bought the oil wells at Memramcook, are working their property at Legere's Corner, McGinley's Corner, and Guildville.

H. H. S.

MONTREAL.

May 27.—The sixth annual meeting of the Montreal Engineers' Club, held last week at the club's premises on Beaver Hall Square, was marked by a handsome presentation to the chairman of the house committee, C. M. Strange of Lewis Bros., Montreal. Mr. Strange has been active in the management of the club since its formation, but he was very much surprised when the president, P. W. St. George, called him up to receive a handsome solid silver tea set and a beautiful case of three cut-glass decanters as a token of the club's appreciation of his efforts on their behalf. There was a record attendance, and the presentation aroused the greatest enthusiasm. Mr. Strange made a fitting reply. Both Mr. St. George and Mr. Strange were re-elected to the executive.

The factory and offices of the Jas. Robertson Co., the Canada Lead Works, William Street, were practically burned to the ground by fire early on Saturday morning, only a small portion of the premises at the back being saved. It was a tremendous conflagration, the big buildings burning like a torch, while the destruction of the shot tower, which was in the centre of the block and rising to a height of about 60 feet, added to the spectacular effect. Soon after the firemen had arrived it was seen from the fierceness of the flames, which went over the large area like a prairie fire, that the premises could not be saved, and the greatest attention was paid to the protection of the surrounding buildings which were mostly old residential houses of wood. The fire was, however, kept within the bounds of the Canada Lead Works, and outside of this little damage was done. Although practically everything was gone, the sheet lead plant, the babbit metal works, the brass foundry, the shot tower, the lead pipe and metal warehouses and the plumbers' supplies, John Robertson, president of the company, James Robertson, vice-president, and Alex. Robertson, director, who were at the fire, at once commenced to take active measures to cope with the disaster. Offices were taken in St. Anne's Street, and arrangements made to carry on all orders as promptly as possible. In fact the firm announced that business will go on as usual, Mr. John Robertson, seen by Hardware and Metal immediately after the fire, said that there would be no interruption to business. The damage he estimated would be about $225,000, which was covered by insurance. The vaults containing the books and papers were undamaged.

Charles Robertson, secretary of the Jas. Robertson Co., has been for some time confined to his house by illness.

C. M. STRANGE, MONTREAL.

HALIFAX.

May 22.—Business continues fairly good in some lines of hardware. There has been quite a demand for garden and haying tools.

H. H. Bennett, who purchased all the hardware stock saved from the H. H. Fuller & Co.'s fire is now disposing of it at retail, and the bargain hunters are out in force. Sales of the different lines are made each day, and the crush is so great at times that the store door has to be locked to keep the crowd out. Fair prices are being obtained for the stock. It is reported that the firm will not resume business again, but it has not yet been definitely decided.

Business promises to boom in Nova Scotia this year. There is great activity all round in the building line, all the industrial plants are workin~ full time, and the coal mines output will be very large.

Londonderry, N.S., is to have a steel plant, and preparations for the erection of the same have been begun. The site has been selected and work on the foundation will be started at once. It is the intention of the company to build

a small steel casting plant of about five tons capacity, for a beginning, this to be increased later should the demand for the output warrant it. For this purpose a brick building with steel frame will be erected, 100 feet in length and 50 feet in width, with an addition or lean-to thirty feet wide. The company also intend to put in an electric lighting plant, with sufficient power to light all their works, and with a view to extending the benefit to the rest of the town as soon as needed. A large amount of capital has been invested in the property.

In Cape Breton, the Dominion Iron and Steel Co. propose to expend about five million dollars in improvements to its plant. The company expects to begin construction work very shortly. Representative of English, Belgian, American and Canadian firms are now in Sydney looking over the grounds with a view to tendering for the construction of the Steel Company's new battery of coke-ovens. The work will be in hand this summer and it will be pushed vigorously.

The Nova Scotia Steel Company also propose to make improvements to their plant, but what these will be have not yet been definitely decided upon.

Items of Interest Gathered in Ontario

Early-closing at Kingston—Death of Prominent London Hardwareman — Chatham Merchants Oppose Programme Advertising—Brantford Hardwareman Prosecuted for Selling an Air-gun to Boys.

KINGSTON.

May 18.—The carelessness of a clerk dropping a match in the cellar on Saturday last, was responsible for about $500 worth of damage, at the hardware store of Simmons Bros. The clerk went to the cellar for some oakum, which was kept in a dark corner. In lighting a match, he broke it on his trousers, the lighted part flying into the inflammable merchandise. Employes of the store, by the use of the store hose, rendered the fire department able service. It was very fortunate that Simmons Bros. fitted out their store with all the precautions against fire, for if it were not for the presence of the fire-proof walls, the blaze must have spread to the next cellar, which is filled with gasolene, coal oil and turpentine.

A movement is on foot, taken up by the young people's societies of the different churches, to have the shops and stores in the city close early on Saturday night. It is desired to have the stores close at 9 p.m. Saturday, and if possible, at 8. The matter was thoroughly discussed at a big mass meeting of the societies, held Monday night. The societies claim that it is cruelty to make young ladies work fourteen hours a day in a store. The merchants appear willing to close early, that is, if they will all agree to do so.

The project for a sulphuric and nitric acid industry for Kingston has fallen flat. Dr. Hemstock, who came out from England, has given up the venture and says that he has been forced to do so because of the trust formed by the Michael Company, which has a large plant at Tweed, and an office in Detroit. The trust renders it impossible for a separate concern like that of Dr. Hemstock, to enter the market. Hence there was no business in prospect for the local plant.

Angrove Bros., sporting goods, have a fine display of bicycles in their window, along with their sporting goods.

E. G. B.

BRANTFORD.

May 18.—The attention of the local fire department has been called to the custom of leaving large amounts of combustible oils in certain parts of the business district, in an unsafe condition. A by-law will be introduced to force better protection.

The Paris Agricultural Society is asking for tenders for a new exhibition building, 100x60 feet, of corrugated iron.

Norman Willits, recently appointed official bad debt collector for the Retail Merchants' Association, has been in Guelph for the past week, getting pointers from D. G. Scroggie, who occupies a similar position there.

The Beaver Oil & Gas Co., according to a statement made by I. L. Goold, a director, is preparing for material improvements on their property.

A local hardware dealer was up in the police court to-day for selling air guns to boys under age. He was required to pay the court costs, and was dismissed with a warning.

The sale of linoleum, which was commented upon by the Guelph correspondent of Hardware and Metal last week, is a paying line that the local hardwaremen could easily take up. Here the trade is mainly left to the dry goods men and furniture dealers, who pick up much trade which the hardwaremen could as profitably handle.

The master plumbers of this city express themselves as being heartily in favor of the holding of a convention of the Ontario master plumbers at Windsor, while the U. S. master plumbers meet at Detroit, and at least four have expressed their intention of being present, should one be called. They are also heartily in favor of uniform legislation covering the entire province, instead of the present method, or in many instances, entire lack of proper inspection.

ST. THOMAS.

May 27.—The heavy rains that have fallen in this district have retarded seeding to a great extent, but general business among the farming community keeps up fairly well, in fact, most dealers claim a better business than last year. The building trade still keeps going ahead. Architect Darrah has many plans underway, his office being as busy as a bee-hive. The city and county committee have decided on improvements to the Registry Office to the extent of $6,600.

Every contractor in the city is busy with new work and hardly able to handle repair work, so that several who cut out contracting are getting this class of work, which pays better.

Claud Willets, who has been with Ingram & Davey for the past four years, and who has had the management of the paint department in the new store, has severed his connection with that firm and will move to Leamington, where he has bought the business carried on by Fred Mettam.

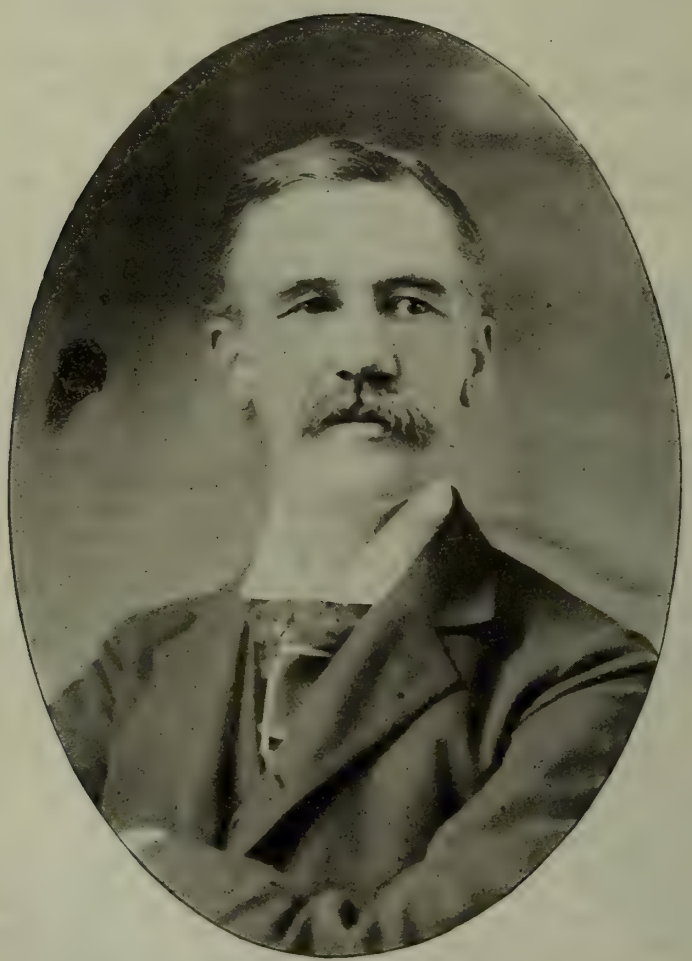
Contracts for the new phone building were let the past week, and work will be pushed rapidly. It is expected that the building will be ready by Aug. 1.

Ingram & Davey report a big trade in sporting goods, and with their enlarged stock they are securing trade that formerly went to Toronto.

The tenders for the erection of the sewage disposal tanks, were opened Friday night and the contract awarded to S. S. Harper, of this city, for $13,490. There was a difference of $5,863 between the highest and lowest tenders and $803 between the two lowest.

T. F.

LONDON.



May 25.—John Bowman, a one-time prominent hardware jobber of London, died suddenly at his home on May 19 from a cold contracted last winter. The immediate cause of death was heart disease. He was 58 years old and came to London from London, Eng., when a boy.

Mr. Bowman's connection with the hardware trade extends back to the time he was 16 years of age, when he left school to enter the employ of T. & J. Thompson, wholesale and retail hardwaremen, in London. His work then brought him into touch with the details of the business, and ten years later when he entered the employ of Adam Hope & Co., Hamilton, he had already won recognition as a capable hardwareman. After seven years experience in the metal business with the Hope Co. Mr. Bowman returned to London and opened a coal office, shipping by rail and vessel to all Canadian ports. The business expanded, and in 1887 hardware was added and the firm's name was changed to

Bowman, Kennedy & Co., which continued until 1897, when it was dissolved and the John Bowman Hardware & Coal Co. established. That firm failed five years ago.

In 1903, Mr. Bowman was elected vice-president of the Canadian Wholesale Hardware Association, and the following year he was advanced to the presidency. He was also at this time president of the London Board of Trade.

In 1880, Mr. Bowman was married to Miss Alicia Taylor, daughter of the late Henry Taylor, and besides her is survived by two sons, William and

THE LATE JOHN BOWMAN.

Percy, of this city, and three daughters, Misses Mabel, Marguerite and Constance, all at home. His father, Wm. Bowman, two brothers, Prof. James H. Bowman and Charles Bowman, and two sisters, Misses Emma and Elizabeth Bowman, all of this city, also survive.

The plumbers of this city will run an excursion to Detroit via C.P.R., on Saturday, June 19.

Col. Gartshore, vice-president and managing director of the McClary Mfg. Co. has returned from a five weeks' trip through the Canadian West. He was right through to the coast and found indications good everywhere.

F. T. Y.

CHATHAM.

May 18. — There ought to be a big contingent of master plumbers from this city attend the proposed convention of Ontario Master Plumbers, at Windsor, the last week in June, at the same time as the U. S. National Master Plumbers' Association hold their convention in Detroit. Interrogated as to their willingness to attend, several readily assented, should the suggested convention be called.

J. C. Wanless had a very effective spring window display this week. The bottom of the window is covered several inches deep with grass. The centre of the stage is occupied by a big lawn swing, while sprinkling cans, hose, nozzles and other lawn incidentals help to fill in, several hammocks, hung vertically, forming the background. On Saturday, and occasionally after school hours on week days, several children swing leisurely to and fro, more or less oblivious of the crowd which, the minute life is thus injected into the display, is sure to block the sidewalk. It is an odd thing about window displays, any animal, from a boy down, is sure to attract a crowd to a show window. While the most artistic window display will draw only a small crowd at a time, the sidewalks will be fairly blocked to see a few ordinary chickens or rabbits, or a couple of white mice.

W. A. Barr & Co., Merlin, make an important sideline of implements, being agents for the Dominion Carriage Co., Toronto, and looking after McCormick and Deering repairs.

Robt. Ross of Leamington, who recently secured the contract for looking after the plumbing department of D. H. McKay, Kingsville, will also continue business in Leamington, having shops in both towns.

W. A. Barr & Co., Merlin, are putting a new corrugated galvanized iron roof on their store.

J. E. Guild, Highgate, has the contract for a new metallic roof for the Hotel Victoria. Mr. Guild has been actively pushing the metallic roofing and siding business, and with considerable success.

H. M. Sweggles, hardwareman, of Comber, spent a few days last week with his father in Wayne, Mich.

Incidentally, on the suggestion of ex-president Wm. Anderson, it was decided to have notices printed for posting in the offices of the members of the Association, to the effect that they will not make use of programme and other "illegitimate" advertising and will not purchase tickets at their places of business. This is in accordance with the resolution of the association to this effect passed some two years ago, the printed notices making it easier for merchants to "turn down" programme solicitors and ticket sellers. Mr. Anderson added that he would later bring up the matter of calendars, with a view to securing concerted action on the part of the association.

D. H. McCay, who recently bought out S. L. McKay's hardware business at Kingsville, has secured the services of Mr. Ross, of Leamington, to look after the plumbing department.

Extensions of the C. W. & L. E. electric line, now connecting Chatham with Wallaceburg, on the north, and Lake Erie on the south, are contemplated, and will likely be forthcoming.

May 25.—The gunsmithing and sporting goods store of W. H. Nichol was entered from the rear last night by burglars, who carried away several big guns and three or four revolvers. The marauders apparently got away in a row boat. Strong hopes are entertained of catching them.

The city by-law governing transients and peddlers was revised last week, the point having been raised in connection with a recent prosecution that the $100 license fee hitherto imposed was prohibitory and was in fact intended to be prohibitory. The new scale of fees is as follows: one or two horse rigs, $100; push carts and other vehicles, $50; packs and other receptacles except baskets $25; baskets, $15: persons taking orders on behalf of other persons living outside the county, $50. Furthermore, certain classes of peddlers are excluded from King St. and the market square. Ald. Brackin, who is also solicitor for the man Favata, who was recently prosecuted, made a strong plea for the fixing of the push-cart fee at $25 instead of $50; but was effectively answered by Mayor Westman. Merchants are hopeful that now the by-law

has been definitely fixed, the city will go ahead and enforce it, with a view to determining if possible the hazy question of the city's powers in such matters.

John Carver, for some time past an employe of Stephens & Douglas, has left for Detroit, where he has secured a situation.

The case against the Chatham Gas Co., charged with selling unpurified gas has been again adjourned, and a settlement is being negotiated. It has been pointed out that the government regulations apply solely to gas sold for illuminating purposes, and that fuel and cooking gas is not required to be purified.

Mayor Westman, of Westman Bros. has been working diligently to secure a Chatham-Detroit boat service, in place of the steamer City of Chatham, which was recently sold for service on the northern lakes. The Chatham Navigation Co. wish to purchase a boat, but so far none have been found to answer all the requirements.

Though it should be difficult for so large an article as a push-cart to long remain lost, strayed or stolen, Mayor Westman's is an exception. It vanished fully a month ago, and the police have not yet been able to locate it.

Jas. W. Fleming & Sons, of Blenheim, have been awarded the contract for the plumbing, gas fitting and similar work for the new Presbyterian manse here.

W. D. Samson, hardwareman, Blenheim, on Friday celebrated the 30th (pearl) anniversary of his wedding. The anniversary was made the occasion for a pleasant at-home tendered by Mr. and Mrs. Samson to their friends.

An interesting gas question has been raised in Blenheim. At the time natural gas was introduced, the point was raised that the product had to be purified for illuminating purposes. At the suggestion of the company, a clause was inserted prohibiting the company from selling gas for lighting, the town readily agreeing since the gas would otherwise compete with the municipal electric light plant. Patrons who took gas for cooking and fuel, however, proceeded to instal lighting fixtures; and the technical point is raised that, having bought and paid for the gas, it is theirs to use as they see fit.

Chas. Long, Wallaceburg, who has been conducting a gasfitting business for W. C. Crawford, of Tilbury, has severed all connections with the latter, and is now carrying on business for himself at the same stand.

J. W. Husband, hardware merchant, of Wallaceburg, was taken suddenly ill at his store last Thursday afternoon, and had to be taken home. At last reports he was rapidly recovering.

Garnet Wells, formerly of Wells & Wells' hardware store, Dresden, has bought the coal, wood and cement business of George Baker. V. L.

FORT WILLIAM.

May 25.—Building permits in Fort William for the months of January, February, March and April total $1,548,675, distributed as follows: January, $17,050; February, $315,625; March, $56,000; April, $1,160,000. This includes two elevators one church and one business block of importance.

In May the permits include a $30,000 building for the Dominion Bank, and a $10,000 building for the wholesale butchers, Gallagher, Holman & Lafrance, and a wholesale plumbers and steamfitters building which is being erected by a combination of local men. Excavation is now completed for both bank and the Gallagher, Holman & Lafrance buildings.

Hardware men are making a special effort in selling fishing tackle, J. & T. M. Piper advertising it extensively, and Gerry Bros. being in the field offering a ten dollar prize to the man who catches the largest speckled trout this season and a five dollar fishing tackle for the man who catches the largest fish of any kind. The only restriction put upon the competition is that the fish must be weighed on the scales in Gerry Bros. store. J. R. L.

News from West of Great Lakes

New Hardware Co. in Crow's Nest District—Active Railway Construction at Saskatoon—Brisk Building at Calgary and Victoria.

SASKATOON.

May 15.—J. F. Cairns has returned from a business trip to Winnipeg.

The west window in Cairns' store is being utilized this week for the display of screen windows and doors and an assortment of crockery.

Andrew Caldow, representing Benjamin Moore & Co., Toronto, was in the city this week, in the interests of his firm.

Henschel & Co., of Rosthern, are re-building their store. D.G.R.

May 21.—J. F. Cairns, general merchant, has issued a spring catalogue covering all the departments in his store.

J. H. Ashdown, of the Ashdown Hardware Co., of Winnipeg, was in the city this week on his way west to Calgary and Nelson, where he will visit branches of the big wholesale concern. Mr. Ashdown was shown round town by Mayor Wm. Hopkins, proprietor of the Hopkins Hardware Store, and J. Noel Niven, the firm's Saskatoon representative. This was the pioneer hardwareman's first tour through this district. While in town he intimated that in the future he might possibly locate a wholesale branch of the business here.

A. R. Mann, of the Northern Construction Co. and D. Campbell, superintendent of construction, were in town this week in connection with construction work on the Saskatoon to Calgary branch of the C.N.R. The grading gang have begun operations south-west of the city and it is expected that steel-laying will be started very soon. A good deal of material is now stored in the yards ready for the work to begin.

On Tuesday the ratepayers of Saskatoon voted down a money by-law for $30,000 to be used in the purchase of a market site and the erection of buildings thereon. A by-law for $5 000 for temporary city offices carried. $10,000 will be spent in road-making machinery and $36,000 in extensions to the electric power plant and buildings. A by-law for the erection of a collegiate institute at a cost of $125,000, carried by a large majority.

Tenders are being called for this week on the Union Bank building to be erected at the corner of 2nd Ave. and 21st St. The building will be two storeys, of Tyndall stone and brick with a frontage of 75 feet by 35 feet. The plans were prepared by Darling and Pearson, of Winnipeg and Toronto, and a member of the firm is expected in town this week to let the contract. It is expected that the block will be ready for the staff to move in early in the fall.

Two drinking fountains which were placed in the streets are being connected up with the city water supply and will be in operation shortly.

The wheat in this district is now showing well above the ground. The spring was a very favorable one and seeding operations were got through with rapidly. The seed bed is in good condition and the soil in first-class shape for rapid growth. The crop conditions at the present time are very favorable. D. G. R.

VANCOUVER.

May 18.—The question of securing waterpower to meet future civic exigencies is now being discussed by the city council. A sub-committee brought in a report recommending that options be secured, without money considerations, on water powers within a radius of fifty miles of the city, for a sufficient length of time to enable an engineer to make report and for the council to submit a by-law to the ratepayers. It was pointed out by a member of the committee, that at the present rate of growth, the city's water supply is good for fifteen years, but in 1918 the city will have the option of purchasing the electric system of the B. C. Electric Railway, and if this is taken up then power should be ready to operate it. Still, it was argued that there is much uncertainty regarding power and by that time other means of propulsion may have been discovered or developed. In the interior of the province, the Couteau Power Company is making arrangements for present profit, and a representative is interviewing towns in

the Okanagan and within a reasonable distance of Shuswap Falls, to see if they will take power. It is proposed to establish a plant at the Falls, and this preliminary enquiry is being instituted to arrive at some idea as to how much will be required.

A license has been granted as an extra provincial company to the Crow's Nest Hardware Company, which has its offices in Frank, Alberta, just east of the British Columbia boundary. It will do business in other towns in the Crow's Nest Pass district, the attorney for the province being Louis W. Kirks, hardward merchant, of New Michel.

J. Rodway, who is going to erect a store to carry on a general hardware, tinware and furnace business, paid the record high price for property in Grandview, the name given the southern east end part of the city. He paid $4,700 for a 33-foot inside lot on Park Drive, the main thoroughfare in that section.

May 22.—"Pretty busy to-day" is the general remark when the Hardware and and Metal man asks merchants how things are going. It is a good sign, and when men are busy they have no time for complaints. Ordinary annoyances are overlooked, for when a man has all that he can do he is good-natured enough to pass over small matters when not altogether right.

Another sign of activity is the way in which the local shipyards are working. The ways are always filled, and vessels are waiting their chance to get on for annual overhauling. In North Vancouver, the Wallace Company has overhauled several tugs and small steamers, besides constructing scows and fishing dories. At the Vancouver Shipyards in addition to overhauling work, two launches are being built, one for F. S. Barnard, Victoria, and the other for W. R. Jones, this city.

The open shop principle was strongly declared for at a largely attended joint meeting of the Employers' Association, building contractors, plumbers and fitters, electrical contractors, sheet metal contractors and other allied trades. The following resolution was unanimously passed. "That this meeting is of the opinion that it is not in the best interests of the building trades or beneficial to the city in general that the card system should be recognized in any way, and we pledge ourselves to assist each other in every way possible to carry on our business on the open shop principle, which gives an opportunity to every capable man to earn a living whether a member of a union or not."

Permits to the value of $72,890 were issued last week, and with the exception of a stable or two and some alterations to the Pioneer Laundry, all were for dwellings, ranging from $1,000 to $4,000. The largest was for $5,900.

Tenders for cement sidewalks opened at the meeting of the Board of Works, on Tuesday evening, were very close, and Palmer Bros. secured a large contract at 11 7-10 cents per square foot, the next best being 12 cents. M. P. Cotton will do the block paving on five blocks on Georgia street for $61,053. His closest competitor offered to do the work at $61,357.

W. H. Leek, of Leek Bros., heating engineers, J. J. Banfield, insurance and real estate dealer, J. N. Ellis, lawyer, and others are interested in a project to supply buildings with steam heat from a central generating station, and have organized the Vancouver Steam Heat Supply Company. They are now asking the city council for permission to open streets and alleys to install their system of pipes. Speaking of the matter Mr. Banfield said the formation of such a company had been talked about for a number of years. One of its great advantages was that it would lessen the cost of fire insurance. It could be served cheaper than any other form of heating and would tend to do away with the smoke nuisance which must become worse in a growing city like Vancouver. Mr. Leek stated that Mr. Eddy, of Chicago, had been looking into the proposition, and it was considered that better and more convenient connection could be got if the streets were used for the pipes. The company could supply heat more cheaply than the individual, and it would do away with the cost of keeping a janitor and fireman in large buildings and the condensation from the steam would belong to the user. In Seattle, he said, the city charged nothing for the use of the streets. The company in Vancouver was composed entirely of local men. It was not their intention to put in a pressure system, as they could not supply power to compete with electricity. The steam would be drawn through the pipes by a vacuum, and the amount used would be gauged by the water into which it condensed, as so many pounds of water made so many pounds of steam. Mr. Leek said he was looking into the question of using the city incinerator for generating purposes. That was a new point, as he knew of no city where it had been done. Before anything is done by the city council, the company will submit a full and written statement of what it would ask for in the way of privileges.

VICTORIA.

May 20.—Victoria's building permits for the week ending May 15 numbered the same as those of Vancouver for the same period, 27 in all. The total value of the Victoria buildings was $119,230, that of Vancouver $69,650, making almost $50,000 more, for the week, than Vancouver. The activity in building continues and many permits are being issued daily. The most noticeable point is the large number of dwelling houses going up. The local contractors have their hands full.

Among the business blocks to be built in the near future is a fine one for Dr. E. Hall. The building will be modern throughout, of three storeys in height and will be mostly used for offices. One of the others is a large addition to the present Dominion Hotel. The additions planned are for four storeys which will give a uniformity to the block. The building will be 70 feet on Blanchard street and 64 on Yates, with shops on both streets. Ten large sample rooms are to be put in for the use of commercial travelers coming to Victoria. Baths are to be put in every room. Building in this section of the city is going on in great style, four new blocks are either in process of construction or are planned for the next few weeks.

At the council meeting this week Alderman Humber moved the resolution of which he gave notice some days ago, calling for the preparation of plans and estimates for five public conveniences and the selection of sites for them by the mayor and three aldermen. All the council believed this was a matter which needed urgent attention but voiced the opinion that there would be no money available this year to do the work. Ald. Humber said he considered the matter so important that he would introduce a by-law to borrow $10,000 if necessary, when an estimate of the cost was received from the engineer. A committee was formed to select sites.

In the municipality of Oak Bay, building permits have been issued to the amount of $33,000 this year. The by-law to raise $30 000 to provide for the laying down of a water distribution system was passed by 66 to 1. Work is to commence at once. A meeting is to be held to arrange for the ordering of the pipe a preference being given to English pipe.

There is a very large increase in the assessment of real estate reported to the city council by the city assessor. The total this year is $28,330,460, an increase of $3,689,595 over last year. This is the largest yearly increase and the value of real estates amply justifies it.

A large lumber and shingle mill is to be erected at Esquimalt. A very good location has been secured and a spur line will connect the mill with the E. & N. Ry., which passes close to the site The first outlay will be somewhere between one and two hundred thousand dollars. Another mill is also to be built by C. H. Dickie on Quamichan Lake and will tap a very large timber country.

W. B. C.

NEW WESTMINSTER.

May 15.—A movement is being agitated in New Westminster for early closing on Wednesdays and Saturdays during the summer months, but there is considerable opposition among the merchants. At a meeting, when the matter was discussed at some length, C. Bryson, on behalf of the hardware men, said they were compelled to close on Saturday, and it was a better day for them. A. James said Wednesday was impossible, and the hardware men would stick to Saturday. George S. Blakely also championed the cause of Saturday closing for the hardware men, saying that Trapp & Co. had a large farmers' business which had to be attended to. Another objection taken against the Wednesday closing was that

the government offices and banks were open on that day. Finally, a resolution to close up if the whole town closed up, was unanimously passed. A committee of clerks will get signatures, and arrangement for the inauguration on June 1st was left to a committee of merchants.

May 22.—H. Stead and B. W. Sparks have purchased a waterfront lot from the city with the intention of starting a shipbuilding yard in the near future.

All the hardware merchants here have agreed to close their stores from one o'clock until seven on Saturday afternoon during June, July and August and probably September. No definite action has yet been decided by the merchants in other lines of business with regard to a weekly half holiday.

B. D. F.

WINNIPEG.

May 25.—O. C. Reinecke, manager of the Dahlstown Metallic Door Co., of Jamestown, N.Y., has been in the city during the week in the interest of that firm. Mr. Reinecke is trying to dispose of the Canadian patent, which he values at $100,000.

During Mr. Hyman Miller's four months visit to England and the continent, from which trip he recently returned, special cognizance was taken by him of the industrial and commercial condition of Great Britain.

"Business in England," he said, "is in a much more depressed condition than it has been for years. This is a result of the dumping of cheap products in Great Britain, and which allows German goods to flood the market, much to the detriment of the English manufacturer and workman. There are numerous industrial institutions in Great Britain to-day which have either closed their doors or are working on short time with thousands of operators out of employment."

The annual meeting of the Winnipeg Board of Trade was held on May 20, when officers were elected for the ensuing year. H. M. Belcher, the retiring president, before leaving the chair to be succeeded by E. D. Martin, made some encouraging remarks in his review of the past year's work.

The Sherwin-Williams Paint Co. are opening a branch warehouse in Vancouver. Mr. Fallis, the Winnipeg manager, has just returned from that city and reports excellent prospects for the trade in British Columbia.

It is obvious that the credit system cannot be inaugurated at once in the retail hardware business, but the cash system is gradually gaining ground. It is generally felt, however, that the cash system is not being introduced as quickly as it might be, owing to the laxity on the part of many retailers in not protecting the trade in reporting "bad pay" customers. At one time in this city there was a book preserved by the united co-operation of the hardware dealers in which the names of bogus customers were kept. At present this book is mislaid, and no effort is being put forth to safe-guard the trade in this regard. It is not the wish to make public all the inner workings of the hardware merchants association, but it can do no harm for the customer to know that there is a black page in a black book, somewhere, where his name should be inscribed if he deliberately athwarts the payment of honestly contracted debts. Every retailer longs for the millenium when his business will be on a cash basis, but nothing short of co-operation in such matters as that which has been pointed out, will lead the trade to any standard of excellence.

L. C. H.

CALGARY.

May 20.—The Bank of British North America are making very extensive improvements to their present building on Eighth Avenue. The alterations call for an expenditure of $30,000. Darling & Pearson, of Winnipeg, are the architects in charge.

There have been a number of lots on Eighth Ave. changing hands at very high figures. The Ellis & Grogan property has been sold to The Molsons Bank at $1,000 per foot, and the D. J. Young property changed hands at $1,200 per foot.

Things are developing much better than expected for the forthcoming exhibition. The majority of those exhibiting last year, have already re-engaged their space, and it is expected that the managers will have as difficult a task in providing accommodation as last year.

H. R. Dudley Smith will build a $2,350 residence on Seventeenth Ave. west.

Bert A. Stringer has been granted a permit to build a $4,000 residence on American Hill.

Batchelor, Marshall & Skarin have been awarded the contract for $40,000 worth of cement walks at Lethbridge.

Excavation has begun for another large business block on Eighth Ave. west. J. S. Mackie is the builder. The building will be 50x120, four storeys in height, with store front and cost in the neighborhood of $40,000.

A. R. A.

Catalogues and Booklets

Manufacturers or jobbers sending printed matter for review, should draw attention to the new lines listed; and retailers sending for catalogues or other matter, should write on their regular printed letterhead and mention this paper to make clear that they are in the trade.

Metal Building Material.—"Illustrated Price List No. 70," is the title of the latest catalogue issued by the Metallic Roofing Co., Toronto, illustrating and describing tools, metal shingles, roofings, sidings, eavetroughs, conductor pipes and ventilators. The catalogue is printed in both English and French, which, while a novel idea, should prove useful to hardwaremen living in a French-speaking community. Some important information is given respecting roofing in general and metal roofing in particular, and a series of instruction lessons on laying metal coverings on various styles and sizes of roof is given pretty fully. Among a number of other claims held out for the Metallic Roofing Co.'s output are that its roofing is fire, lightning, rust and storm proof.

Empire Light.—The catalogue of the Empire Light Co., Montreal, illustrates the various types of lamps turned out by this company. The range is a wide one and shows how this method of illumination has been applied to various purposes of lighting. The Empire light is a system by which ordinary coal oil is vaporized and burned in a mantle, the light being enormously increased and consumption of oil greatly decreased.

Harris Rotary Ventilator.—The catalogue issued by the J. W. Harris Manufacturing Co., Montreal, is an interesting little booklet, describing the uses and advantages of the Harris Rotary Ventilator. The chief feature of this ventilator is that its motive power is derived not only from the slightest current of air, but by the difference of temperature within and outside the building. The ventilator can be fitted on any kind of building, and used for any kind of ventilation. The ventilator is fitted with a screw on the inside by means of which a constant current of air is established.

Tanks of Steel.—The Steel Trough & Machine Co., Tweed, Ont., makers of steel troughs, tanks, cisterns and dairy supplies, has issued, in pamphlet form, a small catalogue, descriptive of their manufactured goods. Beginning with a comparison of life in the country with that in the city the catalogue tells how farm living is modernizing itself with heating appliances and waterworks systems. It is with the latter class of work that the Tweed company is more directly concerned. However, barn and farm-yard tanks and cisterns are also made by the company, as well as animal troughs, milk tanks, cattle stanchions and feed cookers. Steel street sprinklers are a prominent line and grain feed boxes and barrows, pails, nail bins, wagon springs and a great many other lines of articles made from metal are products of this company.

Measuring Tape.—Keuffel & Esser Co. of New York, and 252 Notre Dame West, Montreal, have issued a new and compendious catalogue of their drawing materials, surveying instruments, measuring tapes, etc. Many fine illustrations with clear descriptive matter lift the book from the ordinary run of catalogues, and make it a number that engineers, surveyors and others should keep by them. The extensive lines of the company are interestingly dealt with, and altogether the catalogue contains same 540 pages. In dealing with tapes reference is made to the new Keco finish. In old style steel tapes the graduations and figures are hard to notice, but with this finish a dense even black tape line is given which shows up with great clearness the markings on the tape. In addition the Keco finish wears well, guards against rusting, and obviates the necessity of greasing the line to protect it.

The Belleville city council have been asked by the Board of Education to submit a by-law to the ratepayers for the issuing of $70,000 by debentures for the erection of new school buildings.

SISAL AS A ROPE MATERIAL.

The sisal or heniquen plant of Yucatan, according to Plymouth Products, has been used for its fibre for many centuries, but the present development of the industry dates back but comparatively few years, during which time great progress has been made in putting it upon a highly practical basis as regards both the cultivation of the plant and the preparation of the fibre. Labor-saving machinery is now used in place of the old hand methods for extracting the fibre,

The cultivation of the heniquen is now carried on principally upon large farms or plantations known as haciendas, many of which have made their owners enormously wealthy. In starting a field of plants the suckers or hijos are set out in rows, and cultivation is carried on once or twice a year to keep down the weeds. The appearance of the fields of sisal and of the growing and matured plants may be seen from our illustrations. When the plant has been growing about five years some of the long sword-like leaves will be ready to cut, those around the base of the plant maturing first. The time for cutting is indicated by the leaves assuming a nearly horizontal position, instead of the more upright one of the younger leaves, at which stage the fibre is at its best. Then the natives with their corbas go through the fields and cut off the matured leaves, trim the sharp thorns from the sides and ends, and tie up the leaves in bundles of fifty, ready to be carried to the cleaning mill.

The plant continues to yield a supply

Hanks of Manila and Sisal Hemps.

of leaves for a period of from ten to twenty years. The end of its usefulness is marked by the appearance of the flower stalk or "pole," and the plant soon dies.

Most of the large haciendas are supplied with portable tracks, and small cars carry the bundles of freshly-cut leaves from the fields to the cleaner house, where the pulp is scraped from

Manila Hemp Growing.

the fibre by the powerful cleaning machinery.

The bundles of leaves are taken up on an elevator and along a carrier, which feeds them into the machine. The grip chains of the carrier hold the leaves, while the scraping wheels clean the pulp from the fibre, first one end of the leaves being cleaned and then, as they are carried farther along, the second wheel cleans the other end. This leaves the bundles of the fibre still in the grip of the carrier, which takes it out of the machine, as shown in the picture. It is then carefully hung in the sun to dry. When thoroughly dry the fibre is taken to the press and made into bales weighing about 350 pounds each.

Manila rope is frequently adulterated with cheaper and inferior fibres and so sisal in its turn has its inferior imitators, the most common of which is known as istle, a fibre which also grows in Mexico, as well as in other parts of the world.

HOW TO FILE SAWS.

Get a strong, close-fitting clamp Brace it firmly, or, better, get a clamp that does not need to be braced. Do not adjust the clamp, but always use it set level and plumb. Get a saw jointer and never file a saw until it has been joined.

Choose a file that is straight and sharp on the corners, as against a file that is warped and blunt cornered. Get a six-inch file; a small file is too light to cut steadily and too short for a true, steady stroke. The angle of the two files is the same, and a fine-toothed saw does not require a small grindstone.

Use an irregular shaped handle on the file. This may prevent its turning in the hand knowingly and cutting the teeth at a ruin rake. A long handle will give direction, steadiness and uniformity to the stroke. Push the file full length with a firm, steady pressure. Grasp the handle firmly so that it may not turn in the hand. Hold the file hand in exactly same posititon throughout and the rake of teeth will be the same. In turning the file so as to wear each side equally, observe to get the rake to correspond with the rake of the previous work. Wear all sides the same or at some stage of the job a sharp side will cut too much or a dull side will cut too little.

After joining, some teeth will show a larger flat place where the point should be than others. These teeth were longer than the others and also larger at the base. Here is where the eye must measure distance. File these teeth first, cutting from the face or back as may be necessary to correctly space the points with relation to each other. In doing this, pressure upon the file must be directed against the place to be cut, and carefully held away from perhaps a badly dwarfed tooth. In doing this use the sharp side of the file where the cutting is to be done, and, if necessary, grind away the sorrigations on one side of the file, that the smaller teeth may be protected.

A small board laid back of the clamp, with lines drawn to indicate the bevel of the cutting edge, will aid in guiding the execution of this important detail.

In filing a saw, stand at the point facing the heel. Do not sit down, you will be much steadier on your feet. Lay the file at a sharp angle, fully forty-five degrees across the blade and tipping slightly toward the point. This position will be awkward for a while, but it will become natural in time. It has the advantage of giving the operator full view of his work, and no wire edge is left on the point of the tooth. These wire edges are the delusive dull point that even the trained operator too frequently tries to file away.

As to the care of a saw, no particular instructions are necessary. As a rule, the keen cutting edge is more often raked off in handling tools in and out of the chest than elsewhere. A workman so careless to thus dull his tools is not likely to be benefited by calling his attention to it, and unless a workman is grossly careless it would not occur.

There is such a thing as being "nail wise," and some workmen appear to have a sort of second sight in the matter of knowing where a nail is hidden in his course. As a matter of fact, such workmen are simply wide awake, yet it is probable that few anticipate a nail that they have not at some previous period encountered a nail under very similar conditions. If your correspondent remembers where he has cut nails it will not be worth much to him as a knowledge of how to care for a saw.

The Free Methodists, of Peterboro, Ont., have purchased a site on which they will erect a church in the near future.

CONDENSED OR "WANT" ADVERTISEMENTS.

RATES.

Two cents per word first insertion; one cent per word subsequent insertions.

Five cents additional each insertion where box number is desired.

Contractions count as one word, but five figures (as $1,000) are allowed as one word.

Cash remittances to cover cost must accompany all advertisements. In no case can this rule be overlooked. Advertisements received without remittance cannot be acknowledged.

RULES FOR COPY.

In addressing replies care of HARDWARE AND METAL don't fail to give box number.

Replies addressed to HARDWARE AND METAL boxes are re-mailed to advertisers every Monday, Wednesday and Friday.

Requests for classification will be followed where they do not conflict with established classified rules.

Orders should always clearly specify the number of times the advertisement is to run.

All "Want" advertisements are payable in advance.

ARTICLES FOR SALE.

Don't keep any fixtures or tools around your store for which you have no further use. They are worth more to-day than they will a year hence. Don't keep money tied up which you could use to secure discounts from your wholesaler.

CASH REGISTER, high grade, nickel plated. Registers one cent to twenty dollars. Perfect condition guaranteed. Half price, $55.00. The R. O. Smith Co., Orillia, Ont. (23)

ELLIOTT-FISHER STANDARD Writing-Adding Machines make toil easier. Elliott-Fisher Limited, 513, No. 83, Craig St. W., Montreal, and 129 Bay Street, Toronto.

THE WALES VISIBLE ADDING AND LISTING MACHINE is superior to any other machine for these reasons, among others:—Visible Printing, Flexible Keyboard, Columns Space Bar, Automatic Clear Signal, Adjustment for Carbon Copies, Eliminating Keys, enabling the operator by the mere pressure of a key to add without listing or list without adding. 30 days free trial to responsible people. Write us for free illustrated catalogue. Adder Machine Company, Wilkesbarre, Pa.

ARTICLES WANTED.

If you cannot afford to buy a new counter, show case, screw cabinet, store ladder, or some other fixture which you could use to advantage, try a "Want Ad." under "Articles Wanted," and you may get what you want at a bargain price.

WANTED—Horning press. Apply 530 Delaware Avenue, Toronto. (24)

WANTED—Toggle Press. Apply Box 844, HARDWARE AND METAL, Toronto. (24)

AGENTS WANTED.

This is the problem of many manufacturers who are anxious to get a foothold in Western Canada. It will be easily solved if HARDWARE AND METAL is given the opportunity to solve it.

WANTED—Manufacturer's agent for Nova Scotia and New Brunswick, with hardware experience. Address, Box 325, Montreal. (23)

BUSINESS CHANCES.

FARM FOR SALE OR EXCHANGE for stock of hardware. 177 acres, famous Red River valley, 35 miles south of Winnipeg, 5 miles north of Town of Morris. Good graded road to town. This land is high and dry and first class soil. Price, $17 per acre. Address, Box 848, HARDWARE AND METAL, Toronto. (22)

HARDWARE BUSINESS FOR SALE in good live town 100 miles east of Toronto. Address Box 841, HARDWARE AND METAL, Toronto. (24)

MISCELLANEOUS

ADDING TYPEWRITERS write, add or subtract in one operation. Elliott Fisher, Limited, 129 Bay Street, Toronto.

A MARKET OF BUYERS, backed up by money to spend, is open to you in the Busy Man's Magazine. Every territory in Canada is represented. If you have something to sell, want to buy something, a condensed advertisement in the Busy Man's Magazine will put you in touch with the classes you wish to reach. Four cents per word will carry your message from Atlantic to Pacific. Send copy of your advertisement along with order to cover cost of insertion before 10th of month preceding date of publication. Your announcement will appear under a special heading. BUSY MAN'S MAGAZINE, Montreal, Toronto, Winnipeg.

AN EXTRA 1 PER CENT.—A National Cash Register will earn at least an extra one per cent. profit for any retail merchant. The National Cash Register Co., F. E. Mutton, Canadian Manager, cor. Yonge Street and Wilton Avenue, Toronto, Ont.

CUT DOWN YOUR PRINTING BILLS one half, by installing a "Writerpress." Your office girl or boy can with it print your circulars, price lists, etc., at the rate of 1500 to 2000 copies per hour. Best machine ever made for printing facsimile typewritten letters. Prints from printers' type, half-tones, etc. Retail stores could greatly increase their business by using a WRITERPRESS to run off circulars and letters, sending them out to their customers and probable customers announcing special sales, etc. Send for illustrated catalogue and samples. The Canadian Writerpress Company, 33 John St. South, Hamilton, Ontario.

HIGH CLASS COLOR WORK; Commercial Stationery, Posters. The Hough Lithographing Co. Limited, Office—No. 3 Jarvis St., Toronto, Telephone, Main 1576. Art, Good Workmanship; Business Methods.

IF YOU are looking for a side line to add to your business there is none better than COLUMBIA GRAPHOPHONES. Double Disc Records (which means two records for a single price) and Indestructible Records (that will not break or wear out no matter how much you abuse them). The Columbia Phonograph Company is the only firm that manufactures both Disc and Cylinder Machines and Records, therefore, a Columbia dealer has the advantage over all others, as he can furnish his customers with what they want, while his competitor has to sell them what he has or lose the sale, which he generally does where there is a Columbia dealer. Are Columbia goods sold in your town? If not, why not? Do you want the exclusive agency? (remember exclusive). You had better write to-day or someone else in your town will read this advertisement and beat you to it. A postal will bring catalogues and full information free. Write to-day. Do it now. Toronto Phonograph Company, Limited, Exclusive Columbia Jobbers, 40 Melinda St., Toronto, Canada.

KEEP AN ACCURATE ACCOUNT of your employes' time. The Bundy Autograph Time Recorder is the ideal Time Recorder for retail merchants. It is the only machine where one employe cannot register for another, as each employe signs his name and the employer knows the signatures of his men. Whether you employ a few or hundreds of hands, we can supply you with a machine suited to your requirements. Write for illustrated catalog. International Time Recording Co. of Canada, Limited. Office and factory, 11 Alice Street, Toronto.

SAVE 50% OF THE COST OF HANDLING merchandise by installing a Beath System of Overhead Carriers. Saves valuable floor space because the trackage is on the ceiling and greatly facilitates the loading of cars, drays, etc., and for handling goods in and about the warehouse and factory reduces the cost of labor because far less warehouse help is required. Systems for all kinds of businesses, large or small. Write us for illustrated catalog. W. D. Beath & Son, 193 Terauley St., Toronto. (tf)

YOUR CHEQUE CAN'T BE RAISED to any amount above that which you intend it to cover if you use the PROTECTOGRAPH. This device stamps a line such as "Not over ten dollars, $10," with acid proof, indelible ink, which penetrates right through the fibre of the paper. This device is being used by 90% of the Banks of Canada and the United States, as well as the treasuries of both countries. Write for full particulars and price. W. E. Parker & Co., Sole Canadian Agents, 37 Yonge Arcade, Toronto, Ontario. (tf)

SITUATIONS VACANT.

You can secure a "five-thousand-a-year" manager, or a "five-hundred-a-year" clerk, by stating your wants under "Situations Vacant."

WANTED—Experienced paint and glass traveler State previous experience and salary expected. Box 9, HARDWARE AND METAL, Winnipeg.

WANTED—A traveling salesman for the province of New Brunswick by wholesale hardware house of Montreal. Only A1 men need apply. Address Wholesale, Box 2310, Montreal. (tf)

WANTED—At once, manager's assistant for retail paint department. Only experienced men need apply. Ashdown Hardware Co., Retail Store, Winnipeg, Man. (22)

WANTED—A good smart boy with one or two years experience in the retail hardware trade. Apply, stating wages expected, to N. H. Bowers, Massey Station, Ont. (22)

WANTED—Tinsmith, inside work. Apply 530 Delaware Avenue, Toronto. (24)

BUSINESSES FOR SALE.

Somewhere in Canada is a man who is looking for just such a proposition as you have to offer. Our "For Sale" department brings together buyer and seller, and enables them to do business although they may be thousands of miles apart.

FOR SALE—Hardware, stove and tinware business, with tinshop tools. Stock about $4,000. Can be reduced to suit purchaser. This is a good growing business in a splendid section of country. Good reasons for selling. Apply Box 832, HARDWARE AND METAL, Toronto. [23]

SITUATIONS WANTED.

Travellers, clerks, or tinsmiths, wishing to secure new positions, can engage the attention of the largest number of employers in their respective lines, by giving full particulars as to qualifications, etc., under "Situations Vacant."

SALESMAN, assistant buyer or manager, or other position of responsibility, with wholesale or jobbing house, by man of twelve years experience and at present with one of principal jobbers. Box 850, HARDWARE AND METAL, Toronto. (23)

TECHNICAL BOOKS

A MARKET OF BUYERS, backed up by money to spend, is open to you in the Busy Man's Magazine. Every territory in Canada is represented. If you have something to sell, something you want to buy, a condensed advertisement in the Busy Man's Magazine will put you in touch with the classes you want to reach. Four cents per word will carry your message from Atlantic to Pacific. Send copy of your advertisement along with order to cover cost of insertion. Your announcement will appear under a special heading. BUSY MAN'S MAGAZINE, Montreal, Toronto, Winnipeg.

ESTIMATING, by Edward Nichols, Architect.—140 pp., 35 illus. Cloth binding. Containing invaluable information for the use of Architects, Contractors, Builders, Carpenters, Plumbers and Heaters, Painters, Roofers, Cornice-Makers, and other workers in the building trades. This handbook tells just how to go about the task of making an estimate intelligently. Price $1.00. MacLean Publishing Co., Technical Book Dept., 10 Front St. East, Toronto.

HARDWARE STORE BUSINESS METHODS—Forty subjects of the greatest interest and value to hardware merchants are discussed, including Rules and Regulations for the Store, Good Buying, Stock Taking, Collecting Accounts, Changing a Credit into a Cash Business, Starting in Business, Profit Figuring System. Price $1.00, postpaid. The MacLean Publishing Co., Technical Book Dept., 10 Front St. East Toronto.

HARDWARE WINDOW DRESSING—This book, just off the press, contains 256 pages (8x11 inches) and over 200 illustrations with full working descriptions. Every display is the work of an expert. It illustrates and explains how hardware windows may be dressed to sell goods. Price $2.50 post paid., The MacLean Publishing Co., Technical Book Dept. 10 Front St. East, Toronto.

MENSURATION FOR SHEET METAL WORKERS, by Wm. Neubecker.—This new book gives the principles of the art of measure, showing its practical application in solving problems, in finding the areas, dimensions or capacities of the diverse sizes and shapes of sheet metal products. It is of infinite value to all sheet metal workers. 72 subjects and 70 figures. Price 50 cents, postpaid. The MacLean Publishing Co., Technical Book Dept., 10 Front St. East, Toronto.

THE ROOFING, CORNICE AND SKYLIGHT MANUAL.—Consists of 3 articles: Tin Roofing, including flat and standing seam roofing; Cornice Work, describing equipment for country shop and method of developing patterns; Skylight Construction, treating of a skylight without a ventilator and also with a ventilator in the top. 175 pages, 170 illustrations, 13 plates. Price $1.50. MacLean Publishing Co., Technical Book Dept., 10 Front Street East, Toronto, Canada.

Development of the Tungsten Lamp

A Practical Treatise Showing the Application, Characteristics, Efficiency, Life and Performance of Tungsten Filament Lamps.

The successful development of the tungsten lamp is one of the most important achievements in the history of electric lighting, and the rapid introduction of these lamps into general use is significant of their advantages. A short time ago the tungsten lamp was only a promising laboratory experiment, but its improvement has been very rapid, so that at present it possesses many good points, particularly in the quality of its light and the economy with which the light is produced.

Tungsten lamps are produced in a number of different sizes and styles. These lamps are similar in general appearance to the carbon filament lamps and are furnished in several capacities in standard lamps. These lamps have the remarkable efficiency of 1¼ watts per candle-power.

The tungsten lamp emits a light of very superior color and quality which closely resembles pure daylight. The whiteness of its light, due to the extremely high temperature at which the filament operates, has alone been sufficient to bring the tungsten lamp into high favor.

Tungsten is one of the rare metals and is found in various ores in combination with other metals. It is extremely hard and its melting point is 750 degrees C. This makes it an especially suitable material for lamp filaments. Its specific resistance is low, so that a considerable length of filament is required in 100-128-volt lamps, but its resistance increases with increase of temperature and therefore the current does not vary with the change in voltage in the same degree as in the carbon filament.

Tungsten lamps have an equally long life when burned on either direct or alternating current circuits. The 25-watt lamp which gives about 20 candle-power, comes nearest to the standard 16-candle-power lamp in size and can be used advantageously to replace the latter, and it is claimed that it gives 25 per cent. more light and requires less than half the current consumed by the standard carbon lamp. The 40, 60 and 100-watt lamps provide for various intensities of illumination as may be desired, and they may also be substituted for 2, 3 and 5-light clusters respectively, giving a good general illumination with a low current consumption.

Characteristics.

The three most important characteristics of the tungsten lamp are its high efficiency, long life and uniform brilliancy throughout its life. These features combine to make the tungsten lamp one of the most economical electric lighting units ever produced. The reduced current consumption per candle-power of these lamps is equally advantageous to both the consumer and the central station, as it reduces the monthly bills of the former and enables the latter to take on a large number of new customers without providing an increase in generator or feeder capacity.

A further and highly important advantage of the tungsten lamp to the central station is that it enables the latter to compete with gas lighting on the basis of cost. In every central station territory there is a large percentage of

25 Watt Tungsten Lamp.

possible customers who adhere to gas mantle lighting. Heretofore electric lighting has been handicapped in its competition with gas on account of the cheapness of the latter but the tungsten lamp can now compete on equal terms, and it will therefore prove of great value in increasing the service of the central station.

The efficiency of a lamp depends upon the temperature at which the filament is operated and the unusually high efficiency of the tungsten lamp which, as previously stated, is about 1¼ watt per mean horizontal candle-power, is made possible by the extremely high melting point of tungsten. This permits these filaments to be operated at a temperature which would vaporize any other material of which filaments are made. Unlike all other lamps, the initial efficiency of the tungsten lamps does not decrease appreciably with the life of the lamp. Numerous tests have shown that the diminution of candle-power during the life of the lamp is very slight and Westinghouse tungsten lamps maintain practically their initial brilliancy up to the time that they burn out.

The nominal average life of tungsten lamps when used on either direct or alternating current is 800 hours, although this life is often greatly exceeded. It will be noted that this life is about double that of the high efficiency carbon lamp.

The tungsten lamp maintains practically its initial candle-power and efficiency during its whole life, the drop in candle-power being inappreciable up to the time the lamp burns out. The resistance of the tungsten filament increases with increase of temperature, therefore these lamps are not very sensitive to variations in voltage. The current does not change in direct proportion to the voltage and this makes the fluctuations in candle-power with variations of voltage relatively small. This property is manifestly advantageous on circuits having poor regulation, as a moderate change in voltage will not noticeably affect the lamps. For example a drop in voltage of 5 per cent. will reduce the candle-power of a tungsten lamp about 15 per cent.

Tungsten lamps are rated according to the total number of watts consumed, instead of the candle-power. The lamps are tested for voltage at a uniform efficiency of 1¼ watts per candle-power. This method of rating insures the lamps burning with a uniformly brilliant appearance. The slight variation of candle-power and total wattage which may occur in the lamps is unnoticeable and is of no importance in comparison to the advantage of having all the lamps burn at a uniform temperature.

Illumination.

The quality of the light from tungsten lamps is a pure white which resembles clear daylight. Under this light, colors appear in their true value, and slight distinctions of shades and colors are as readily appreciated under the light of a tungsten lamp as th y are by daylight. This makes the tungsten lamp of great value in places where it is necessary to match colors accurately, as, for example, in dry goods stores.

The C.P.R. are planning additions to the depot in Brandon. Estimated cost, $10,000.

It is stated that the Michigan Central Railroad will commence shortly the erection of a new depot at Windsor, estimated to cost $75,000 to $100,000, and a new 25-stall roundhouse.

Western Canada Market Situation

Our Western Correspondent Reviews the Market Outlook—Hardware Quotations Corrected by Telegraph up to Noon on Friday.

The rural merchants are not busy at the present time, owing to the extensive seeding being done in all parts of the country. As a consequence the wholesale trade is not heavy for immediate shipment to rural points, although orders for fall shipments are fair. No one is discouraged over the present situation, since all are agreed that a good crop is best in the ultimate for the general trade. What the wholesalers are losing from the rural merchants, they are gaining from the city merchants. Dealers are replacing vacancies made by the rapidly moving seasonable goods by issuing orders for fall stocks.

The general tone of the trade is very good. The writer caught a local dealer at his books early one morning, in the act of making the comparison of the past week's trade with the same week one year ago. He said he should feel encouraged, as it was fully 40 per cent. better. Paints and lawn fixtures were the chief items on his books, as they have been with the average merchant.

Winnipeg Quotations.

WIRE—Barbed wire, 100 lbs., $3.15; plain twist, $3.40; staples, $2.90; annealed wire, $2.90 base; oiled, 10c extra; bright iron, $3.10 base; brass spring wire, 29c base; plain galvanized, wire, 6, 7 and 8, $3.50; No. 9, $3.10; No. 10, $3.60; No. 11, $3.70; No. 12, $3.30; No. 13, $3.40; No. 14, $4.25; No. 15, $4.75; No. 16, $5.

POULTRY NETTING—57½ per cent.

HORSESHOES — "MRM" and "Bell" iron. No. 0 to 1, $4.50; No. 2 and larger, $4.25; snowshoes, No. 0 to No. 1, $4.75; No. 2 and larger, $4.50; steel, No. 0 to No. 1, $4.85; No. 2 and larger, $4.60; featherweight, $6.

HORSENAILS—"MRM," cold process—No. 3, $4.30; 4, $3.80; 5, $3.55; 6, $3.30; 7, $3.05; 8, $2.85; 9, $2.75; 10, 11 and 12, $2.65 in 25-lb. boxes.

WIRE NAILS—$2.80 Winnipeg and $2.35 Fort William.

CUT NAILS—$2.90 per keg base.

SCREWS—Flat head, iron, 80, 10, 10, and 10 per cent.; brass, 75 per cent.; round head, iron, 80 per cent; brass, 70 per cent.; coach, 67½ per cent.

Edited by
THE LITTLE PAINT MAN.

Additional Trade and a Snug Profit This Year.

I've said it before, but it's worth repeating—good specialties afford a splendid opportunity for quick sales and good profits.

Now, here's a bang-up, good specialty that every dealer in this country should sell—Sherwin-Williams Taxite—probably the most satisfactory paint and varnish remover that has ever been offered for sale. It's as far ahead of the old-fashioned method of burning off old paint or varnish coatings as the locomotive is ahead of the stage coach, and a little missionary work among painters and householders will bring you additional trade and a snug little profit at the end of the year. Here are just a few of the advantages of handling Taxite.

The Little Paint Man

SELL TAXITE

Every can of Taxite you sell represents a bill of goods for refinishing—and if you're right on the job, you should make this sale, too.

Taxite is a good seller all the year 'round.

Taxite is so simple to operate that by following the directions printed on each package, the customer cannot fail to secure satisfactory results.

Taxite is heavy bodied and can be used on upright surfaces as well as on horizontal surfaces, this being a great advantage over the great majority of preparations for this purpose on the market.

It does not interfere with the drying or durability of subsequent finishing coats.

We have some good enclosing slips and other attractive advertising features that will help you make sales. 585

BUILDING AND INDUSTRIAL NEWS

For additional items see the correspondence pages. Information is solicited regarding building and industrial news, the incorporation of companies, establishment or enlargement of mills, factories or foundries, municipal waterworks and sewerage systems, railway or mining news, etc.

Industrial Activity.

A veneer mill is to be erected at Mansonville, Que.

C. Jobin & Co. will erect sawmills at St. Augustine, Que.

The Deseronto Iron Co. at Deseronto, Ont., is again in operation.

Odleifson & Thornsteinson are erecting a sawmill at Gimli Ont.

C. H. Dickie, of Duncans, will build a lumber mill on Quamichan Lake, B.C.

A $20,000 addition will be put up at the Arrowhead Lumber Mills, Kamloops, B.C.

J. H. Lavelle and W. J. Hickey, are about to start work on a new box factory at Welland, Ont.

The Prince Albert saw mills have started operations. Seven hundred men are given employment.

The Provincial Steel Works at Cobourg began active operations on May 8. It is just about six months since the first sod was turned.

Plans are stated to be under way for a large lumber and shingle mill on Esquimalt Harbor. The names of those behind the project have not yet been divulged.

The St. John Board of Trade are negotiating with Bonnel & Hardy, of London, Eng., who are looking for a site for the erection of a large paper mill.

Inside of two months time Port Arthur expects to have the biggest stone cutting plant in Canada. The Stanworth, Martin Co. will greatly enlarge its present plant.

The Nordin Co. will build a large up-to-date woodworking factory and lumber mills at Tide Head, near Campbellton, N.B. A large quantity of machinery has been ordered from Sweden.

R. J. Watson, Dominion Government Timber Agent, is erecting a sash and door factory in Revelstoke, B.C. The management of the factory will be in the hands of his son, Gordon Watson and O. West.

Architect Darrach is preparing plans for a cement roller mill for S. V. Wilson, of Union, Ont., to be erected on the former site. The mill will be modern in every respect, and will be operated by water power.

The gas range trade is exceptionally brisk, the demand being the greatest at present in the history of the company. About 1,000 men are employed by McClary's in London, and about 250 in the different warehouses throughout Canada.

A number of Pittsburg capitalists are considering London as the possible site of a large manufacturing concern. The plant when established will be a large one, employing 600 men. The authorities refuse to divulge the name of the company.

A. MacLaren, president of the North Pacific Lumber Co., whose mills at Barnet, B.C., were recently destroyed by fire, states that the erection of a more modern mill will be begun immediately. The new mill will cost about $350,000.

The Palmer piano factory at Uxbridge erected a little over a year ago, and which has been unoccupied since the failure of that company, has been sold by the town to a company being formed in Toronto with a capital of $25,000 to manufacture caskets.

It is reported that the general business of the Canadian Pacific Railway, on the Pacific Coast Division, is in excess of what it was at this time last year. This applies chiefly to freight, and is caused by the greater revival in the lumber shipping to the Northwest.

J. H. Brown, a Montreal mining engineer, has purchased the Galena property at East Bay, C.B., and is in Sydney looking over sites with a view to erecting a smelting plant for the refining of precious metals. Mr. Brown has just finished a similar plant at North Bay.

The industrial committee of the St. Thomas council are considering the prospects of securing an industry manufacturing an attachment to reaping machines. The company is not asking for a bonus, simply a sufficiency of land on which to place their buildings and a few other concessions.

The lumber mills of Vancouver Island are now finding it necessary to operate their plants continuously to their full capacity. The Genoa Bay Mill, owned by the International Lumber Co. is preparing to open up after being shut down for twelve years. Much the same condition of affairs is apparent elsewhere. At Shawinigan and Cowichan Lakes the mills are exceedingly busy, much more so than has been the case for many months.

Nineteen new grain elevators are to be built in Alberta this summer, and work is to commence in about two weeks' time. The elevators will be built by the National Elevator Co., of Buffalo, which is extending its operations into Western Canada. The points decided upon are Macleod, Granum, Claresholm, Staveley, Nanton, Cayley, High River, Crossfield, Carstairs, Red Deer, Alix, Erskine, Stettler, Camrose, Bawlf, Daysland, Killam, Strome and Sedgewick.

Fort William, already famous for its elevators, seems destined to become still more famous for in addition to the large elevators already in course of erection by the Grand Trunk Railway Co. the Consolidated Elevator Co. are making preparations for the erection of another house in the vicinity of the present one at Westfort and a company headed by Mr. D. W. Black is negotiating for a site on which to erect a cleaning house. A little to the west of the Consolidated elevator the walls of the Western Elevator are beginning to show above the ground.

Business is improving rapidly in the manufacturing concerns at Amherst, N.S. Rhodes, Curry & Co. are turning out large numbers of cars. The boot and shoe factory is busy. The Hewson woollen mills are filled up with orders, particularly in the knitting mill. The success which has attended the manufacture of fine worsted suitings at Amherst is bringing the Hewson mills more prominently before the trade. Orders are coming rather freely at Robbs', and new men are being taken on. The Victor wood works have a busy summer before them. Christie Bros. & Co. are improving their plant.

Municipal Undertakings.

Owen Sound ratepayers carried the waterworks by-law.

Barton township, Ont., citizens ask for a sewerage system.

The construction of a number of sewers is contemplated at Belleville.

The extensions to Hull's waterworks system are estimated to cost $18,000.

Battleford, Sask., business men are asking for a fire protection system. Such a one would cost about $30,000.

Niagara Falls, Ont., ratepayers have approved a by-law to raise $1,800 for the construction of a low level sewer on Main Street.

James Heatley's tender for the construction of extensions to the Brampton water works system was accepted, it being the lowest.

Fernie, B.C., ratepayers have approved a by-law to raise $100,000 for the purchase of the present waterworks system and extensions thereto.

The contract of Carriere & Wilson for the extension of the Hull waterworks to cost about $7,000. was confirmed at a recent meeting of the city council.

Engineer Childs, of Calgary, Alta., has completed his report on proposed gravity water system and estimates the cost at $290,090, exclusive of reservoir.

The by-law to raise $10,000 for water extensions at Kamloops received its preliminary readings. On motion of Ald. Brown the amount was increased to $15,000.

A trunk sewer will be built on Pacific Avenue, Eighteenth Street and Rosser Avenue, Brandon. Work will commence on it at once and when it is completed $47,000 will have been expended.

The Montreal roads committee have sent in requisitions for $2,500,000 for public work, to be completed this summer. Included in this amount are sewers, $133,000; pumping plant, $55,000.

Aylmer is willing to pay one-third of the cost for the installation of septic tanks in connection with her sewerage system, provided that Ottawa and Hull bear the remaining two-thirds of the amount.

The by-law to raise $74,000 to install a water and light system will be submitted to the ratepayers of Claresholm, Alta., shortly. If the by-law carries, the town will install a gravity water system.

A new waterworks system to supply Prince Rupert will shortly be installed. Negotiations at present are proceeding between the provincial government and the G. T. P. with regard to the financial arrangements.

At a recent meeting of the Moose Jaw council, a by-law was introduced to raise $40,000 for the construction of a reservoir at Snowy Springs, and for improving the means of bringing the water to the city.

As a result of the negotiations which have been carried on during the past month between the city and the Esquimalt Water Works Co., the city will make an offer to the company for its undertakings at Goldstream.

Tenders for relaying the pipe line from Prince Albert to Goschen were received as follows: McVean & Craig, $3,237; Welsh & Campbell, $4,900; George Pickering, $4,348; Boulton & Company, $4,000; George J. Fanell, 60

cents a foot. McVean & Craig's tender was accepted.

The Guelph sewage committee at their last meeting prepared a report recommending that they be given power to start right ahead with the work of laying the sewerage beds at an estimated cost of $25,000.

The undertaking was stopped during the winter months, but it is now expected that it will be completed by July. The conduit is to supply the city with an additional fifty million gallons of water per day. It is of concrete, and, being far underground the water will not be contaminated by dust and drainage, to which the present aqueduct is subjected. The cost of the new conduit will be $680,000. As soon as the work is completed the Water Committee will call for tenders for the laying of the "intake" pipe at Lachine, away out into the middle of the St. Lawrence.

The contract for supplying Kamloops with water pipe has been awarded to an English firm, the agents of whom are the Burton Saw Co., Vancouver. The shipment will be here in September and the work of extending mains and taking a water supply across Peterson Creek will then be rushed to completion. There were many tenderers for the pipe, the price of the English firm being $45.10 per ton of 2240 pounds f.o.b., Kamloops. This was considerably below the others and it was estimated that a saving of $500 would be effected. The contracts for the hydrants, valves and boxes will be awarded later.

Work has again been commenced on Montreal's big new waterworks conduit, which runs from Lachine to Montreal.

Contracts for the construction of the Toronto filtration plant on the Island and for equipment for the filtration plant were awarded by the Board of Control. The contracts totalled $635,089, or $114,911 less than the Engineer's estimate, $750,000. The contract for the construction of the plant was given to Dill, Russell & Chambers of Toronto, at $568,128.60. In the case of the electrically-driven stage pumps there were four tenders lower than that of Allis-Chalmers-Bullock Co., Montreal, but Engineers Rust and Hazen reported in favor of the Allis Co. because its guarantee of efficiency was the highest. The Canada Foundry Co., which was given three of the contracts, was a little higher than a Glasgow firm, but the local firm was preferred because of being local. There were five tenders for the construction of the plant.

General Building Notes.

Winnipeg Odd Fellows will erect a $35,000 temple.

W. J. Craig will erect at Toronto a $35,000 warehouse.

W. Tatley, Montreal, will build four houses to cost $14,000.

R. P. McLennan is building a $25,000 residence at Vancouver.

H. L. Stevens will erect an $8,000 mission house at Toronto.

Erskine Smith will erect a $15,000 apartment house at Toronto.

The Bank of Montreal's new branch at Toronto will cost $45,000.

The Northern Canada Supply Co. is building warehouses at Cobalt.

A. B. Brown, Toronto, will build three dwellings to cost $11,000.

The Imperial Bank will build this year a branch at Prince Albert.

An addition will be built to the provincial asylum at Selkirk, Man.

Jas. H. and Jno. L. McGuire will build a $250,000 hotel at Ottawa.

A new Masonic Temple will be erected at Ottawa, Ont., at a cost of $50,000.

F. L. Beecroft, Toronto, will build two pairs of dwellings to cost $10,000.

Henry Gaffney, Toronto, will build six pairs of dwellings at a cost of $28,000.

Geo. Lighthall will build a big apartment house at Montreal, to cost $75,000.

Three attached dwellings to cost $12,000 will be built by Albert Mass, Toronto.

The Protestant Orphans' Home, Ottawa, will be renovated at a cost of $2,000.

Two pairs of dwellings to cost 910,000 will be built by E. G. Switzer, Toronto.

At Toronto R. Mackey will build three pair of dwelling houses to cost $12,000.

Three pairs of dwellings to cost $12,000 will be erected at Toronto by H. J. Clarkson.

A. H. Bartlett, Brandon, is getting plans for a big apartment building to cost $60,000.

The Ruthenian Greek Church, Winnipeg, will erect a parish dwelling at a cost of $5,000.

A new power house to cost $45,000 will be build on McGill University grounds, Montreal.

Victoria's building permits for April were $50,000 more than in the same month a year ago.

Chas. Tellean, Vancouver, B.C., will build a $25,000 hotel on Vancouver Island at Campbell river.

Three attached stores and dwellings to cost $12,000 will be built at Toronto by McKinney & Johnson.

Tenders are being received by W. T. Williams for the new Merchants Bank building at Medicine Hat.

The Bank of British America has purchased a site on which to build a banking office at Oak River, Man.

The James Bay Athletic Assn. will probably commence the construction of a new $75,000 building at Victoria.

Chaffey & Verhoeven, Winnipeg, have been granted a permit for a three storey office building. Estimated cost $7,000.

The Standard Bank will build an eight storey office building at Toronto. Work will begin in the course of a month.

Bannerman & Horne, Victoria, will erect a $20,000 block. Construction will be commenced as soon as plans are completed.

The contract for the alterations and additions to the National Bank at Montreal has been awarded to J. B. Pauze & Co. at $126,498.

It is stated that Montreal capitalists are interested in a project to rebuild the Iroquois House, at St. Hilaire, Que., at a cost of $200,000.

The following building permits were recently issued at Winnipeg: A. C. Galbraith two houses, $4,000; E. Kuhn, house, $1,000; A. W. Cassidy, house, $1,000.

Chas. Mills, Hamilton, has been granted a permit for the erection of a three storey brick building on Jackson street for the Y. W. C. A. Estimated cost $36,000.

Montreal during April granted 231 building permits, representing an expenditure of $1,016,856, as compared with 139 permits worth $267,065 during April, 1908.

Oldfield, Kirby & Gardner, Winnipeg, will build a two-storey office on the site between the post office and the Northern Crown Bank. The total cost of the building will be approximately $50,000.

Recent building permits at Vancouver are: J. G. Rauch, $1,200; Fairview Manufacturing Company, $400; Thomas McGivern, $250; Swedish Lutheran church, $1,500; Mrs. R. Copeland, $200; T. Kornega, $4,000.

It is reported that the Northern Crown Bank will erect a new office in Red Deer. The Canadian Bank of Commerce has also purchased lots where it is expected a large and up-to-date building will soon be reared.

Smith Bros. & Wilson, Regina, have the contract to erect a stone building for E. C. Corbeau. Stoney & Van Egmond, have awarded contracts to W. M. Lambert for Geo. Peacock's residence, and the warehouse for Peart Bros. Hardware Co. to McGregor & Black.

Recent building permits at Ottawa are: N. F. Ballantyne, $5,500; A. W. Grant, dwelling, $3,300; Mrs. C. Stewart, dwelling, $4,500; C. H. Putnam, dwelling, $2,000; Wm. Stuart, additions and alterations to buildings, $3,500; Wm. Coats, apartment, $2,500; Daniel Douras, dwelling, $2,500; George Gormley, dwelling, $4,000.

Among the new buildings to be erected at Calgary are the following: Theatre to cost $20,000; three-storey apartment block, $50,000; $20,000 hotel in East Calgary; four additional storeys to Winnipeg Paint and Glass Co.'s block; International Harvester Co.'s warehouse and office building, to cost $9,000, and a grain exchange.

Peterboro's building permits continues to come in encouragingly. The following were taken out during the past week: Jos. Gray, dwelling, $1,800; Jos. Gray, dwelling, $1,800; Geo. Quinn, dwelling, $1,700; W. H. Baker, dwelling, $3,000; Jas. E. McIlmoyle, $2,000; W. J. Henry, dwelling, $1,000; Anthony Taylor, dwelling, $1,250; Alex. Choninard, dwelling, $800.

Public Buildings.

A new Roman Catholic church will be erected at Westboro, Ont.

A new wing will be added to the registry office at St. Thomas, at an estimated cost of $6,600.

The Saskatoon Concrete Co. have the contract for the erection of a schoolhouse at Lake Patience.

The Dominion Government has completed the purchase of post office and armory sites at Strathcona.

The Vancouver Exhibition Association will take tenders for the erection of the main building at Hastings Park.

A new line of polishes has been put on the market by the Brodie's Manufacturing Company, Montreal, among them being the British plate powder, the British metal polish, and the British furniture polish, all of which can be handled by hardwaremen. They claim there are no acids in these polishes, and they do not scratch.

The Retail Paint Trade

THE FOLLY OF DELAY.

The folly of leaving off ordering until the last moment has been brought home to a good many merchants during the month. The consuming demand has suddenly sprung in upon them, and a hasty order requesting shipment the same day has been followed by a week or so of waiting for the goods. The result has been that the merchant has either lost sales or he has put a strain upon the good will of his customers that is not in the best interests of the store. Probably the merchant is at first more inclined to blame the manufacturer or jobber than he is himself. This is only natural. He writes a letter of complaint saying that being an old customer he was surely within his rights in expecting that his goods would have been sent off the same day as the order was received. And the merchant would have cause for complaint if his order had been the only one that had to be shipped on the particular day in question. But there were other merchants who were just as old customers, who had likewise left off ordering until the last moment and who wanted their goods shipped equally as quickly. The result has been that manufacturers have had their shipping departments in a state of congestion, and it simply came to the point of first come, first served. The merchant, therefore, who has waited some time for his paints, just when he most wanted them, has only himself to thank, and on consideration he will realize this.

During April we harped from time to time upon the advisability of dealers ordering their goods well ahead. We pointed out that it was not so much the ability of the mills turning out the stuff, as the over-straining of the shipping facilities. It is an easy matter for delay to occur in the despatch of paint. The goods may leave the factory all right, but the train or the boat may be held up, while there is a limit to the capacity of either. It was apparent from the bookings during April that many dealers were waiting until the last moment—until the demand was already knocking at their doors—before they filled up their stocks, and we, therefore, advised every man who wanted to be on the safe side to look after his probable requirements in good time.

What is the use of a merchant extensively canvassing his district, and pushing a paint campaign for all it is worth, if at the end, when the people are ready to paint, he has to put them off with the lame excuse that his stock is on order! That is sufficient to nullify the value of all his previous efforts. The man who decides to paint wants to do it at once, and if he cannot get his paints at the store he intended to, then he probably goes elsewhere. It is the man with the goods who makes the most of his opportunities, and it is the man who

THE particular dealer we want to get in touch with this time is the man who is tired of handling the kind of paints and varnishes and enamels that don't pay shelf-rent—the dust-catcher kind nobody ever calls for twice, and few people even once. There's news for that dealer in the selling-power of FLOORGLAZE (the king of solid - color floor enamels), GRANITINE (the floor finish that wears amazingly) and quite a few other lines of ours that make good.

If that dealer wears your hat it will pay you to ask us questions this very day.

Send for Sample Can of FLOORGLAZE, or GRANITINE

Stocks at Toronto (6 Morse Street), Winnipeg (108 Princess Street), and Vancouver (550 Beatty Street)

IMPERIAL VARNISH & COLOR CO., Ltd., TORONTO

IMPERIAL

WROUGHT PIPE

We make Pipe that gives satisfaction.
The reason for it is plain.

Material is the best quality of strips that we can procure.

These strips heated to the proper degree enable us to make a perfect weld.

Threading is taken care of in such a way as to ensure the threads being full and accurate.

Every length is tested to 500 lbs. hydraulic pressure, and any showing the slightest defect thrown out.

All the leading Plumbers use "M.R.M" Pipe.

MADE BY

The Montreal Rolling Mills Co.

took no chances of shipping congestion, but who placed his order well ahead, who is reaping the most benefit from the present demand!

Once bitten, twice shy, and it is to be hoped that dealers who have, and are being held up for their goods, will remember the lesson another time. It is better to run the risk of overstocking a little, rather than turn away customers who not only want paint now, but will want it on future occasions. It is a wise business principle to take time by the forelock.

Paint and Oil Markets

MONTREAL.

May 28.—Despite the intervention of the holiday, business has been exceedingly brisk, and the whole tone of the market is very firm. In spite of the backward spring a great deal of painting must have been done as manufacturers report their mills taxed to the limit, while there is no cessation to the flow of orders. Shipping facilities have been congested owing to so many dealers leaving off their ordering until the last minute, but things are now getting into better shape. There is no change to report in the markets. The demand has been steady for most lines. Conditions seem to favor an advance in linseed oil shortly.

TURPENTINE—There is a steady demand for turpentine from all parts of the country. The market is, in consequence, very firm, but there are no changes in quotations. We repeat 55c for single barrels net 30 days.

LINSEED OIL—The demand continues very good, with supplies equal to all calls. There are no changes from last week's prices, but the firmness of the oil in the English market, if kept up, may lead to an advance in figures in the Canadian market at any time. We quote: Raw, 1 to 4 barrels, 59c; 5 to 9 barrels, 58c; boiled, 1 to 4 barrels, 62c; 5 to 9 barrels, 61c; strictly net, 30 days.

GROUND WHITE LEAD—There has been an improvement in ground white lead orders, and the market is brighter in tone. There is no change in prices, and we quote: Strictly pure, $5.50 to $6, according to brand, and No. 1, $5 to $5.50 f.o.b. Montreal.

RED LEAD—Orders are showing stimulation, but supplies keep plentiful. For ordinary lots quotations are unchanged, but inside prices can be obtained for larger orders. We quote: Genuine red lead in casks, $4.50; in 100-lb. kegs, $5; less quantities, at $6 per 100 lbs.; No. 1 red lead, casks, $4; kegs, $4.50, and smaller quantities, $5.50.

WHITE ZINC—The market shows a little stimulation, but there is not much character to the demand. There are no changes in quotations. Dry V.M. Red Seal, 7½c; Red Seal, 7c; French V. M., 6c; Lehigh, 5c; white zinc, ground in oil, pure, 8½c; No. 1, 7c; No. 2, 5½c.

VARNISH—Improving industrial conditions have stimulated the call for varnishes, while the firmer price to gums has helped to give a better tone to the markets. Household, implement, and carriage varnishes are having a good call.

PUTTY—Putty continues in good demand at unchanged prices. We continue to quote: Standard putty, 850 lbs., in casks, $1.65; in 100-lb. drums $1.90; bladder putty, 400 lbs., in barrels, $1.90; in 100-lb. cases, $2.05; in 25-lb. drums, $2; 25-lb. tins, $2.05; 12½-lb. tins, $2.25 f.o.b. Montreal.

TORONTO.

May 28.—Trading this week is even better than last week, and despite the holiday the volume of paint lines moving is greater than for any week of the year. All seasonable lines are moving equally well. Encouraging reports are as well coming in from all sections of the country and evidently the paint business is beginning to boom in earnest. Painters everywhere are now busy, and hardwaremen handling large paint stocks are enjoying a good trade.

Turpentine has again advanced locally, though outside markets continue trading at a lower figure than prevails here. Lead is still held firm, though pig lead is again easy this week. Linseed oil is slated for an advance.

TURPENTINE—The local market has again advanced, "turps" now being quoted at 58c for single barrels; 57c per gallon for 2 to 4 barrels, and 63c for 5-gallon lots. The advance is due to small arrivals in the south because of the continuous wet weather. Although the above is given as the market quotation, turpentine may still be had as low as 55c in Toronto, the price which is said to be prevailing in other Canadian centres.

LINSEED OIL—Steadily increasing demand is being made for oil, and the market is getting firmer. Quotations are unchanged, but jobbers seem to anticipate an advance, owing to the larger orders and the depletion of stocks as well as the scarcity of seed at present. In fact one house already quotes an advance of 4 cents. English oil cannot now be imported to compete with the native oil because while foreign markets have raised the price of oil the Canadian product generally remains stationary. Raw is 59c for 1 to 4 barrels, and boiled is 62c. Larger quantities are selling one to two cents lower than this.

PARIS GREEN—This line is yet moving actively and stocks in the hardwaremen's hands now should be fairly large. The price is an attraction, 25-lb. drums being rated at 17¾c.

WHITE LEAD—Jobbers continue to speak of an advance, though as yet none of the Canadian markets quote any change. Pig lead is easier in Canada and England this week, though across the border there is a slight advance. It is this international lead trust that has led painters to anticipate an upward tendency to lead lines among the paints.

There is satisfaction as well as money, in handling

"English" Liquid Paint

—the satisfaction of being able to meet the growing demand.

Our vigorous newspaper advertising this spring is sending hundreds to their dealers to ask for "English" Liquid Paint.

—the satisfaction of **knowing** that you are selling the best paint made. Every can of "English" Liquid Paint bears a formula label, guaranteeing that the white base of the Paint, is 70% Pure White Lead (Brandram's B.B. Genuine) and 30% Pure White Zinc. Neither you nor your customer has to guess what the ingredients of the paint may be.

—the satisfaction of satisfied customers. They like the way "English" Liquid Paint goes on, and they like the way it stays on.

Just write us a postal card for prices and selling plans.

Moore's House Colors A Pure Linseed Oil Paint

It is a paint that meets with approval, a paint that makes the customer come again, a paint so satisfactory in results as to create more painting and the desire to paint, that causes the seller as well as the user to become enthusiastic.

Moore's paints are moderate in price, but are perfectly pure. Their quality is not questioned. They are lasting, durable and attractive, and withstand the attack of wind and weather, rain or shine as any other preparation does--They are the kind that create permanent and pleased patrons.

INTERNATIONAL VARNISH COMPANY, Limited

TORONTO

MAKERS OF FINE VARNISHES

BRANCH OF STANDARD VARNISH WORKS

NEW YORK CHICAGO LONDON BERLIN BRUSSELS

No. 1 is $5.40 and $5.65; pure white from $5.80 to $6. and a superior line is offered at $6.25. Genuine red lead is still quoted at $4.50 for casks and $4.75 to $4.80 in 100 lbs.

GLASS AND PUTTY—The movement of glass to the hardware trade is as yet quiet, except in cases where import orders were booked earlier in the year. Prices hold firm, though these are not high, compared with two years ago. Putty is a little freer in delivery at unchanged prices.

STAINS AND VARNISHES—These articles, with all summer lines, are in seasonable demand. Floor paints and ready-mixed lines, too, are selling well. Prices are firm and unchanged.

PETROLEUM—Summer oils are moving freely just now and hardwaremen are stocking up for the season's trade. The prices ruling are the same as those prevailing last season.

TURPENTINE TRUST CONVICTED.

The jury in the case of the so-called "turpentine trust," on trial at Savannah, Ga., brought in a verdict of guilty on May 10, though the names of the two indicted corporations are omitted, and the verdict applies only to the five individual defendants, E. S. Nash, president of the American Naval Stores Co.; Spencer P. Shotter, chairman of its board of directors; George Meade Boardman, of New York, its treasurer; J. F. C. Myers, vice-president of the company, and Carl Moller, of Jacksonville, Fla., manager of that company and also Jacksonville manager of the National Transportation and Terminal Co. The sixth defendant, Charles J. Deloach, was found not guilty at the direction of the court.

A motion for a new trial will be made. The verdict finds the five individual defendants guilty of conspiring to monopolize interstate trade. The surprise the verdict caused in the courtroom and in Savannah was complete. It was generally believed that a verdict would favor the defendants, and that if it did not a recommendation to the mercy of the court would be made. The maximum sentence is a fine of $5,000 and a term of one year in prison.

The testimony on which the conviction was based was in part as follows:

Evidence intended to show that resin which was shipped by the American Naval Stores Co. to soap and varnish manufacturers had been regraded and that an apparatus designed to heat naval stores in the Jacksonville, Fla., yards had been experimented with, the object being to increase the volume of spirits by expansion, were offered by the prosecution.

Through the statements of former Foreman Walter O'Keefe, of the Brooklyn navy yards of the National Transportation & Terminal Co., the prosecution elicited the information that in fourteen months the grades of 50,000 to 60,000 barrels of resin were raised in the yards, through the simple process of rubbing out the old grades and substituting new ones on the barrels. The witness stated that Percy Ketcham, then manager of the yards, employed him and gave him personally orders to raise certain grades on certain quantities of resin. He stated his employment was confirmed by George Meade Boardman, treasurer of the American Naval Stores Co. O'Keefe said sometimes his orders to raise grades came from the New York office of the Naval Stores Co.

THE GOSPEL OF PAINT.

The Gospel of Paint as it has been preached in advertising, has wrought wonders in this country. In sections where paint was seldom used it is now a matter of course. In sections where it was generally used in the old days the uses have been greatly extended. Paint brightens homes and lives. It is, in many ways, the cheapest decorative material. It saves property by preserving materials and fittings. The lightening of woman's work has been perhaps best of all—for paint gives better sanitary conditions and saves an enormous amount of cleaning.

In the old days a few merchants could supply all the paint materials necessary for the annual or semi-annual painting season and the field was limited generally to the point necessary for the exterior of house and barns. Now, the economy and satisfaction in the touch of varnish here, mixed paint there, a little gilding or some enamel work in another place, have been so convincingly taught by the manufacturers of these various products that the field of the retail dealer has been greatly widened.

PAINT NOTES.

T. M. Blackwood, Montreal, has the painting contract in J. T. Fisher's residence at that city.

Gould & Malcolm will do the painting and glazing in Robt. Maybee's new residence at Toronto.

Blackburn & Sons, at $1 150, have the painting contract at the new Avenue Road school, Toronto.

The painting and glazing in W. McLaughlin's residence at Toronto, will be done by F. C. Davies.

The painting and glazing in the new house being erected at Toronto for W. T. Harris will be done by J. Casey.

Chris. Sonne, Montreal, has the painting and glazing contracts for four houses being erected at Westmount for W. L. Chipchase.

J. O. Hare's tender at $573 for painting and graining at Stratford's Collegiate Institute has been recommended for acceptance.

Bruno & Navert, Montreal, at $1.585, received the contract for painting and glazing the new Catholic school at Pt. St. Charles.

The painting and graining in the Shakespeare Ward school, Stratford, will be done by A. E. Cash, whose tender amounted to $512.

The painting and glazing contract at the new Winnipeg shops of the Transcontinental has been awarded to the Taylor Paint & Decorating Co.

About Linseed Oil

It is a good thing to look carefully to the oil you buy. It would pay many buyers very well to pay a couple of cents a gallon more to get oil free from sludge, clear and good drying. When one realizes that two gallons of settlings in the bottom means about three cents a gallon loss, he comprehends what we mean.

Ramsay's
Pale Boiled Oil
Double Boiled Oil

have long been a standard in the market. Noted for their drying qualities and light clear color, they do no injury to the palest tint. Their action is correct, and they drain out to the last drop in the barrel. We boil our own oil. That's why it is right and the reason you save when you buy

Export Trade

Represents the Great Future Market for American Goods

Manufacturers that cultivate the field **NOW** are assured of the largest share of this trade in the future.

Our service, the greatest single power in Export Trade, enables manufacturers to get their products prominently before the trade abroad. An efficient service, covering all export markets at minimum of expense.

The aim of the **American Exporter** is and has always been the up-building of a world-wide demand for American machinery and goods. Issued in two editions each month, one in English, and other in Spanish **(Exportador Americano.)** The two together cover all countries that import American goods.

It is the only journal of foreign circulation which regularly publishes its exact circulation every month in its editorial pages.

Stronger evidence of the AMERICAN EXPORTER'S strength in its chosen field could not be brought forward than the phenomenal growth in its advertising pages during the past three years. The AMERICAN EXPORTER in net volume of advertising business carried three years ago 52 pages of net advertising; two years ago 88 pages; one year ago 116 pages; carries to-day 122 pages. Its number of regular advertisers three years ago was 325; two years ago 400; one year ago 550; and to-day 650. It is seen that notwithstanding a "panic," there is a growth in the last 12 months.

An increasingly important feature of the **American Exporter** is the Foreign Trade Service maintained on behalf of its advertisers. This service includes the sending of our representatives into foreign markets to study conditions in the interest of our clients, the furnishing of selected names of possible customers or agents in any country, commercial ratings on prospective foreign customers, translation of foreign correspondence from and into any and all languages resulting from or pertaining to the advertiser's announcements.

Representative space regularly in the **American Exporter** gives you all the export advertising you need, for this publication covers every foreign market for your goods. This publicity. coupled with our Foreign Trade Service, provides you with the necessary facilities for conducting intelligently an export trade.

May we send more particulars?

THE BUILDING BUSINESS IS BOOMING

Every newspaper, every issue of HARDWARE AND METAL, bears eloquent testimony to the number of structures going up in all the leading cities and towns. There is a large amount of structural steel required just now. We want a representative in your district—one who is on the spot. You do not have to make any investment. It is an opportunity for you, Mr. Hardwareman, and no risk. Drop us a line about our proposition. DO IT NOW.

"The Englishman's Home"

is SAFE if ALL his family can use a RIFLE.

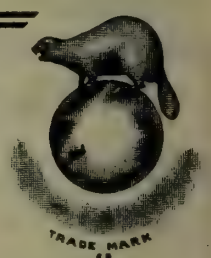
THE ONLY RIFLE MADE IN CANADA is the famous

ROSS RIFLE

In Going After Big Game, the important force is the **RIFLE.**

Our New Sporting Models delight the keen shot.

For Range Shooting the marksman cannot afford to be without a **ROSS MARK III RIFLE.**



We have the written testimony of the best riflemen in the world, and the **ROSS RIFLE** has stood the severest tests in the best rifle matches of the world, **BISLEY** especially being loud in praise of the **CANADIAN RIFLE.**

The Sporting Rifles retail at $25 up and sell themselves. Try a sample order.

HANDSOME CATALOGUE ON APPLICATION.

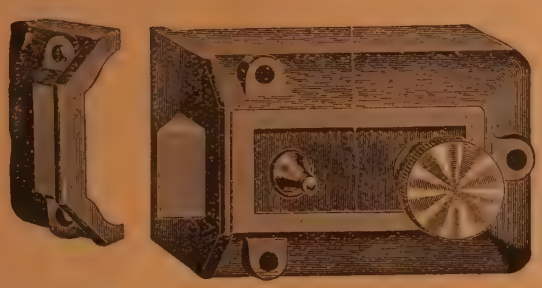
HANDLE ONLY THE BEST

Our Rakes are Leaders and Stand the Test

Eureka Field Hay Rakes
Lawn Rakes
Wood Hay Rakes
Bushlin Pattern Knock-Down Rakes



All the teeth in our rakes are made of hickory wood, and each tooth is fastened with a wooden peg which prevents them falling out. We fit most of our rakes with either straight wood or wire bow.

Our rakes are made from standard materials and all goods are carefully graded.

NORTH BROS. MFG. CO., - Philadelphia, Pa., U.S.A.

SATISFIED CUSTOMERS

Higher quality in any article means satisfaction to the user—not only satisfaction but economy, especially in Metallic goods, and a satisfied user is a permanent customer.

Metallic for exterior uses such as Shingles and Siding must be of the very best steel—so well galvanized that it is absolutely proof against rain, snow and rust.

Our "Eastlake" Metallic Shingles are made of **cold,** rolled steel. It is a much tougher, more wear-and-weather resisting piece of steel than the **hot** rolled article which is generally used. "Eastlake" Shingles are proof against all tests of the weather. Roofs covered with "Eastlake" Shingles 25 years ago are in as perfect condition to-day as when they were laid.

The four lock shingles take four times as long to lay as "Eastlake" and then are not weather-tight. Just examine them—notice how little overlap there is—only about an inch and a quarter—not enough to keep out the drifting snow and rain. Nothing less a than three inch lap is perfectly weathertight, and the "Eastlake" is the **only** shingle that has that much.

So why experiment with your customers—give them a shingle that is, and has proven itself to be, the best on the market. You will find all our goods of the same high quality and manufacture.

We manufacture Artistic Metallic Ceilings and Walls—Steel Siding—Lath—Cornices—Skylights—Ventilators—Finials—Eavetrough—Conductor Pipe—Corrugated Iron—Fireproof Glass Windows and Doors, and Pressed Zinc Ornaments.

"Hold your trade by satisfying your customers—it is the only road to a successful business."
—The Philosopher of Metal Town.

TRADE Gillette MARK

KNOWN THE WORLD OVER

WE SELL THE "GILLETTE" FOR YOU AS WELL AS TO YOU

We don't consider our part of the transaction complete when we ship you the razors and get your money — not until YOU have sold them and got YOUR money back—with a neat profit.

We don't sit back and wait for you to find buyers, either—we send the buyers to you.

How?

By making the best razor the world has ever seen, and telling all the world about it.

The GILLETTE was the first perfect safety razor made, and it has been the best ever since. Every man who uses a GILLETTE becomes a walking advertisement for it—and there are now over two million of them.

For years we have been advertising the GILLETTE as no other razor was ever advertised, until now the man who thinks of safety razors is almost certain to think first of the GILLETTE.

What is more to the point, he is very likely, sooner or later, to buy a GILLETTE. We are advertising liberally now throughout Canada to make him buy it sooner.

Stores that display the goods and use the GILLETTE signs, literature and trade helps are getting the business.

Aside from the sales of the razors, the business in blades is a steady income to the dealer.

Are you getting the GILLETTE business of your community—or is some other dealer?

The Gillette Safety Razor Co.

OF CANADA, Limited

OFFICE AND FACTORY - 63 ST. ALEXANDER STREET

MONTREAL

Here is a Device

that will increase your sales of padlocks.

It is a highly-finished hardwood case, 12 x 24 in., and forms both a display board and stock case. The board exhibits 20 well-known "Miller" Padlocks in five rows, all the locks in each row selling at the same price. These prices range from 15 to 75 cents each. Behind the display board the space is large enough to contain the stock of locks.

Two assortments are put up in this way. Each assortment contains the same locks but in different quantities.

No. 1000 assortment contains 12 dozen "Miller" Padlocks.

No. 1001 assortment contains 6 dozen "Miller" Padlocks.

This case will sell padlocks for you. It contains a full line in a compact space, giving you all the variety you require. Try one of these cases. We can fill up the case again whenever any line is sold out.

This case is patented and is the only one of its kind on the market.

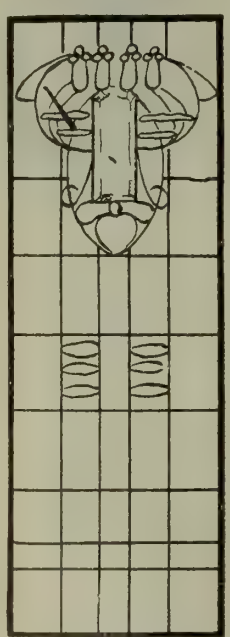
DON'T BE "AN EASY MARK"

Any jobbing house can tell you that there are dealers here and there who will take anything at all; good, bad or worse, with no regard for brand or quality just so long as it is the "article" they ordered from the traveller.

Of course, we all know that if it wasn't for this class of merchant the manufacturer of inferior goods would go out of business—but, Mr. Merchant, don't you let anybody think for a minute that you're that kind of a business man.

You don't intend to be a "dumping ground" for these inferior goods.



When you want a Hinge, you want the very best kind of a Hinge—

A CRESCENT BRAND HINGE

The up-to-date Hardware man knows what he has to pay for and doesn't take chances. There are several kinds of Hinges and Butts, and those of quality and merit bear the **"Crescent Brand."**

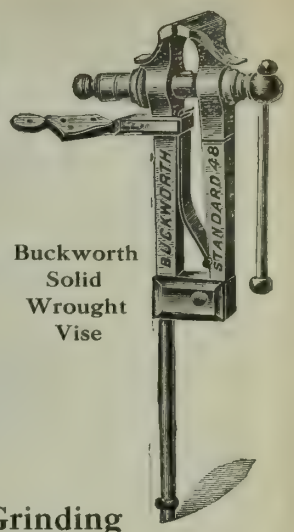
BUCKWORTH

Solid Wrought General Blacksmiths' and Clip Horn Anvils, with Crucible Steel Face : : :

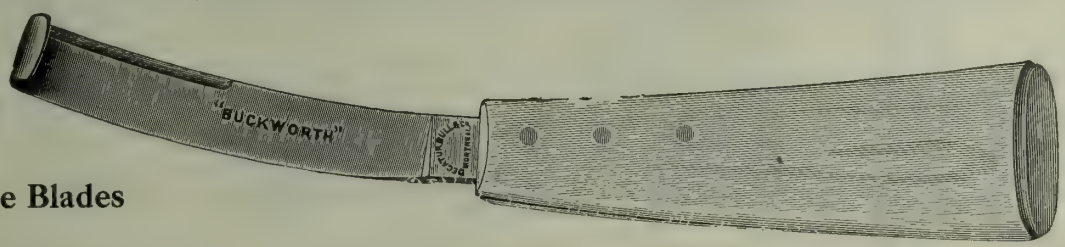


We call special attention to our Farrier's Clip Horn Anvils. These Anvils are the result of years of careful study on our part of the Farrier's wants, and we are now able to present an anvil that is perfection.

With years of experience and careful study of the advantages and disadvantages of the various makes of anvils on the market, we here present an anvil which is as near perfect as it is possible to be. The size of face, length and fullness of horn and depth of drop have all been considered. We defy a better shaped anvil for general blacksmithing.

Every genuine **BUCKWORTH** Anvil is made of the best Wrought Iron and faced with the best Crucible Cast Steel, carefully tempered and tested to secure absolute uniformity. The **BUCKWORTH** Anvil is made by the latest improved methods. Top and bottom are each one solid piece and only one weld at the waist.

The steel faces to these anvils are all put on in one solid piece.



NOTE.—That every genuine **BUCKWORTH** Anvil is stamped the name **BUCKWORTH** together with the word "original" on a hammer.

ONEIDA COMMUNITY, LTD. - - - NIAGARA FALLS, ONT

Here You Are—A Real Hummer of a Proposition to Boost Those Dull Summer Sales

Don't talk about things being dull when you have **such** an opportunity of making money with little effort.

The Auto Lantern Globe is a mighty good proposition for you **as a summer line**, and if you sell it,—**simply get after the trade that is there for the asking,**—your summer sales will be eminently satisfactory.

Just look ; See those whom you can sell to :

Owners of Motor Boats and Launches of all Kinds
Summer House Owners who Always Need Lanterns
Farmers who are Bound to Use Lanterns Always
Merchants who have to Make Night Deliveries
Factorymen who demand a SAFE Lantern Globe
The Ordinary Householder who Needs at Least One

Now, don't YOU think that these people would like to hear from you, an up-to-date merchant, that **in YOUR store** you have a lantern globe which is the last word in modern make, absolutely safe, and a giver of 150% **more** light than the average lantern.

Isn't it logical that they'd be interested, **especially the summer people.** You can just bet **yes.** Then why not get this business, why not simply call their attention to the **Auto Lantern Globe**, the globe that is made of metal, with an aluminum finish ? The globe that **will not break ;** the globe that **prevents fires and explosions ;** that will fit **all** makes Tubular Cold Blast Lanterns.

And the Auto Globe is **SO CHEAP** that everybody can afford to buy it. Sales are **easy.**

This Summer Trade Will Well Repay Your Looking Into

COMMUNITY

GALVANIZED

SASH CHAIN

Community Galvanized Sash Chain is made from the best quality of rolled steel stock; made on special machinery of our own manufacture. It is carefully hot galvanized and guaranteed not to rust. The tensile strength per square inch of cross section has a higher fusing point than bronze, copper or any of the alloys used in the manufacture of other sash chains. It will not stretch or melt at temperatures that will melt chains made of other metals, and they will remain in place after the most severe fire tests.

We have standardized the numbers of our Sash Chains to correspond with the weight of double hung sash that they will safely carry.

No. 80, for sash weighing 80 lbs.
No. 100, for sash weighing 100 lbs.
No. 130, for sash weighing 130 lbs.

Tensile strength more than six times that required.

"White Mountain" Ice Cream Freezer

MADE WITH CRANK OR FLY WHEELS

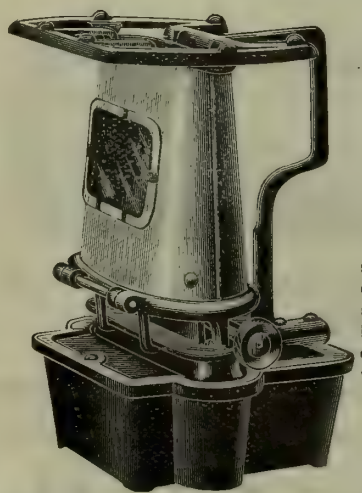
This is universally the favorite family ICE CREAM FREEZER, because it combines more excellence than all other family freezers made. It is easy to operate, because the parts fit perfectly and therefore run smoothly.

It is exceptionally durable. The tubs are built very strong, and will not warp, leak or crack, and the cans are made of thefinest quality bright charcoal tin-plate.

SECTIONAL VIEW
Showing Duplex Dasher and Double Scrapers

"Model" Refrigerator

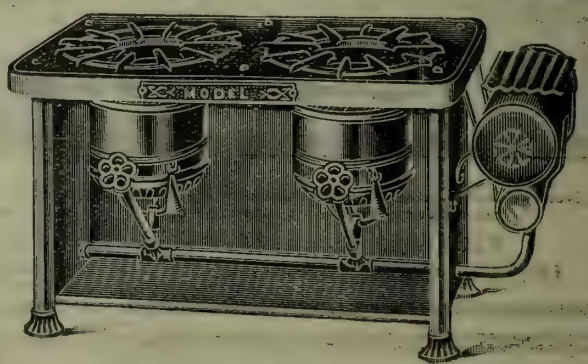
The "Model" is a moderate-priced Refrigerator, but compares favorably with the more expensive lines, and is much better value for the money than many of the so-called high-grade refrigerators.



It is made of Hardwood, finished in Golden Oak; has heavy solid bronze locks and hinges and is lined with galvanized iron, while the insulation is superior to many of the higher-priced refrigerators.

The linings are made of metal and are removable for cleaning. This is an especially valuable feature.

Door on Provision Chamber and Lid are both, in the inside, lined throughout with metal. In order that Drip Pan may readily be drawn out or placed in position, the "Model" is constructed with a swing base.



"Golden Star" Lamp Stove

CAST-IRON OIL TANK
4-INCH BRASS BURNER
ALL CAST-IRON PARTS JAPANNED

This is a heavy and durable stove, with convenient handle for carrying. The burner is set high, and plenty of air spaces surround it to prevent odors from overheated oil. The chimney is bright tin with mica illumination.

"Model" Wickless Blue Flame Oil Stove

HEIGHT, 14 INCHES. AN IDEAL SUMMER STOVE.

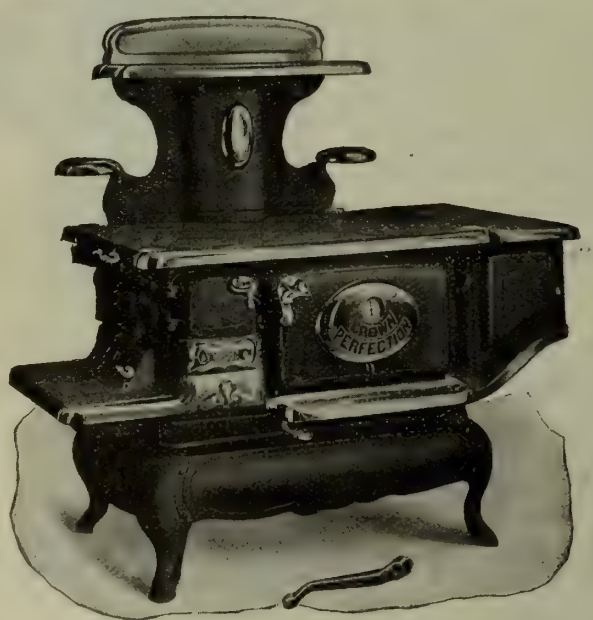
Hamilton Jewel Gas Ranges

THESE ARE THE RANGES YOU SHOULD HANDLE



1. BECAUSE they are equipped with Jewel Adjustable Needle Valves, the most perfect gas valve ever constructed.
2. BECAUSE they are fitted with two-piece slotted burners which can be easily removed for cleaning.
3. BECAUSE both the main top and oven bottom are made of cast iron (not sheet steel) and will neither burn out nor rust out.
4. BECAUSE the Graves Patent Safety Lighter is used to light the oven burners. The dangerous Pilot light is discarded and explosion made impossible.
5. BECAUSE the ranges are mounted on five-inch nickel-plated feet, making it easier to sweep under them.
6. BECAUSE you don't have to wait for repairs in case any are needed. No customs entry, no duty, no delay.
7. BECAUSE they are equal in approved up-to-date features, mechanical construction and handsome finish to anything produced on the American continent, and FAR SUPERIOR to most imported U. S. ranges.
8. BECAUSE they are made in over 100 VARIETIES and you can get any style you wish.

One of the Best Paying Departments

Sporting Goods so Considered by Many—Opportunities Open for the Development of Trade — Experience of One Hardwareman With Sporting Goods.

Starting late owing to the unseasonable weather which prevailed in the early part of May, the sporting demand has picked up wonderfully, and dealers in various parts of the country report good business. Fishing tackle was somewhat slow to move at first, owing to the ice on the lakes, but the goods are now going splendidly. Baseball and lacrosse outfits are in good request now that the various clubs have started their schedule of matches. All the way round the sporting season promises to be a good one, and merchants who have laid themselves out to cater to the demand will reap a satisfactory profit.

One hardware merchant recently remarked to Hardware and Metal that he looked upon his sporting department as one of his best paying branches. He remembered the time when he first stocked a few lines of sporting goods with fear and trembling, thinking that he was probably only adding to his dead stock. But having taken the lines he determined to push them for all they were worth. He ran good windows—as good as he could with the stock he had—and displayed the other portion of his stock in a prominent part of his store. He also kept track of all new clubs being formed, and dropped a little circular to the officials telling them that if they wished to secure the success of the club they would do well to drop in and see the writer. To his surprise he began to experience a growing demand for his goods, and eventually his sporting department became one of his best paying branches. His store became recognized as a good one by players, and as he did not fail to extend his lines as the demand increased, he added to his reputation, as a sporting goods dealer. There is no reason why any other merchant should not make an equal success of a similar department. An intelligent appreciation of the sporting inclinations of the community show that baseball outfits are not extensively stocked where there is no baseball played, or likely to be, and so on in other lines; good window displays, and a comprehensive stock of those goods which are and should be in demand, are the main factors to success.

The stock question is a very important one. It is a well known fact a sportsman is most impatient. He does not like to wait for his goods. A fisherman, for instance gets an invitation to go for a fishing trip on the day after the receipt of the invitation. He hurriedly looks over his tackle. A new rod is wanted, new bait, and so on. If he finds that the merchant from whom he generally buys has not these things in stock, he cannot wait. He goes to another store, and probably that store will retain his patronage in future. It is the same in other sports. The enthusiast does not like to be disappointed. It is essential, therefore, that the dealer should not let his stock become depleted. He should look over his various lines from time to time, and if there is a shortage, he should not hesitate to order.

Be Active in Forming Clubs.

Be careful not to overstock, but overstock rather than a customer should have to go to another store for his goods.

In carrying a sporting goods department there is this great advantage that the merchant makes friends with many a young person who in time will become a householder and probably a good buyer of ordinary lines of hardware. It is only when a young man settles down that he thinks seriously of hardware, and if he has been in the habit of buying his sporting goods from a certain store he will in all probability continue to buy his hardware from it. In this way the hardware merchant kills two birds with one stone. Besides if he has identified himself with the sporting taste of the community he becomes a good sportsman in the eyes of all, and no stronger word of praise could be awarded. A good sportsman is liked by everyone, in business or in pleasure, and the merchant who is classed as such by the community can rely upon a profitable connection.

For a variety of reasons, therefore, the merchant should encourage the formation of clubs, and if possible donate a prize or two. It is, however, a mistake to bestow this encouragement on those sports which are already well established, although a little nursing will not be amiss. Where baseball, lacrosse, trap shooting, or any other game is well established, and the merchant is getting all the trade that he can expect, he should direct his attention to any tendency towards advancing other games. It must not be forgotten that the dealer will find it more to his interests to help create a demand than to watch those influences which are already working directly in his behalf. If sportsmen in the vicinity are talking of a baseball league encourage the idea. If they want to form a lawn tenis club, or a golf club, the merchant should get interested. Push forward the scheme by personal efforts, offer to get rules and other information on the subject, and incidentally show samples of good lines.

Camping Outfits Show Fair Margin.

With the development of camping-out parties and canoeing trips, merchants located near lakes or rivers should pay increasing attention to the fostering of the demand. There is a good profit on canoes and camp outfits, especially as sale probably leads to a demand for other articles. The trade of the canoeist is well worth having, as in all probability he will not only purchase paddles, cushions, etc., but in time become a regular customer for rifles, fishing rods and other equipment necessary for a cance trip. There are many cases where sportsmen send their orders for crafts to outside stores when a local store carrying a good line would secure the trade. In other cases maybe the sale of a single canoe would induce the sale of a dozen. These are points well worth the consideration of the hardwareman. But merchants who have not already taken in a stock of canoes, their accessories, and a supply of camping-out goods must bear in mind that the surounding conditions have a considerable amount of bearing on the case and must be thoroughly looked into before a conclusion has been reached.

KEEP RIMS FREE FROM RUST.

Rims should be kept free from rust, to facilitate the removal of the covers when tire trouble occurs. Tire experts agree that powdered graphite and glycerine make the best preparation to apply to wheel rims for the prevention of rust. This is compounded by taking a small quantity of powdered graphite and mixing it with glycerine until it becomes a thick paste then it can be applied with a brush. Graphite and linseed oil paint is another preparation for this purpose. If tires are removed about once a month, the casing examined inside and out and soapstone applied to the rims of the wheels, the removal of a tire or the replacement of a tube or casing will cease to be a hardship.

OIL OR GREASE ON FLOORS.

Sporting goods dealers are sometimes confronted with the problem of removing oil or grease from their floors. The most practical method for removing oil and grease from any floor is the use of a hot, saturated solution of common washing soda. This is prepared by dissolving as much of the soda as possible in a quantity of hot water. The solution can be made up in quantity and stored in a barrel or elsewhere. When about to clean the floor, the solution should be heated to near its boiling point and applied hot, supplementing its unaided action by a vigorous sweeping with a stiff broom or brush. Washing soda can be purchased in 25-pound quantities for about four cents per pound.

Retail Hardware Convention at Milwaukee

Canadian Delegates Present for the First Time—Very Instructive Gathering Attended by Delegates From About Thirty States—Secretaries of State Associations Discuss Plans of Organization—National Association Has 11,500 Members and $13,000 in its Treasury.

The tenth annual convention of the National Retail Hardware Association of the United States was held at Milwaukee, Wis., May 25, 26 and 27, about 150 delegates being present from 27 state organizations, and nearly half the delegates being accompanied by their wives. Vice-President M. S. Madole, Napanee, and Secretary Weston Wrigley, Toronto, represented the Ontario Retail Hardware Association as special guests, and Fred C. Lariviere, Montreal, was also a visitor at the gathering, all three Canadians being extended the privileges of the floor as delegates during the meetings.

The opening morning of the convention was a sort of love feast, in which many reminiscences were given of the first convention in Chicago ten years ago and the great results attained and changes made during the interval. The Canadian delegates were called upon, the delegates rising in honor of the visitors, President Stebbins expressed his satisfaction at having representatives present from Canada for the first time, and Secretary Wrigley, in responding, pointed out the importance of the development of fraternal feeling between the retail hardwaremen in Canada and the States as legislation adopted in one country soon becomes law in the other. The establishment of rural mail delivery in the United States ten years ago and its inauguration in Canada last year was instanced. Likewise, the copying of the Canadian Lemieux Act in the U. S. It was further pointed out that the adoption of a parcels post system by the U. S. Government would soon be followed by similar legislation in Canada favorable to the mail order houses. Mr. Wrigley drew attention to the fact, however, that nothing so drastic had ever been proposed in the U. S., as the c.o.d. feature of the parcels post bill proposed by Postmaster-General Lemieux three years ago, and withdrawn on account of the active opposition, led by the Ontario Retail Hardware Association..

The officers' reports showed receipts amounting to $49,000, expenses of $36,000, and a balance on hand of over $13,000. One new state had organized during the year, making 27 now in line, and membership had increased about 1,500, bringing it close to the 12,000 mark. Every speaker testified to the great help the mutual hardware fire insurance companies had been in securing new members. Pennsylvania, for instance, had only 94 retailers in line a year ago, whereas over 500 are now enrolled as a result of a canvass made by solicitors for the hardware mutual fire insurance companies. Minnesota has 80 per cent. of the hardwaremen in the state enrolled as members of the association; Wisconsin has 75; North Dakota 75; Nebraska 65; Illinois 60; Michigan 60, and other states from 40 to 50 per cent. Ontario is not in bad shape, therefore, with about 30 per cent, without being able to offer the benefits of mutual insurance to members.

Considerable time at the meeting of secretaries was given to an explanation of the system of collecting accounts so successfully used by about 150 members of the Ontario association. The plan will be adopted by many of the state associations across the line. Much discussion also took place on the best plans for conducting exhibitions in connection with conventions, and some valuable pointers were picked up for use in future conventions in Ontario. Another meeting of the secretaries is to be held at Chicago in July.

Two very able addresses were delivered at the convention by Sharon E. Jones, of Indiana, and George W. Hubbard, Michigan, and these, along with other information, will be reproduced in coming issues of Hardware and Metal.

The results of the convention were well summed up by Sharon E. Jones at the closing session of the convention, when he said:

"I can see an improvement in your faces at each convention. I can see an improvement in my own—in the mirror. I can see an improvement in my store, it is better kept, my books are clearer of debts, my insurance policies are safer, my advertising is brighter, my buying is closer and my sales more profitable. There is no doubt about it, it pays to spend a few days each year in the company of successful merchants such as are found at our retail hardware conventions."

TO BUILD BIG STEEL MILLS.

The Algoma Steel Co. at Sault Ste. Marie has placed orders at Pittsburg for $500,000 worth of heavy steel machinery to be delivered as quickly as possible. It is the intention of the Philadelphians and Londoners back of this plant, says a despatch from the latter city, to have two immense steel mills in Canada turning out bars and other steel products by Nov. 1 next. The nature of the machinery ordered shows that the mills to be erected will be rivals worthy of even the biggest and best Pitsburg mills. The mills will be by far the largest in Canada, and will be enabled to compete for business in the Northwestern States with the Pittsburgh mills which have at present to pay 1,500 miles of freight rates, as well as holding their own Canadian trade.

W. G. Franz, general manager of the Lake Superior Corporation at the Soo, admitted that the above-mentioned machinery has been ordered, and also stated that his company is negotiating with two Pittsburg concerns for the structural material for their projected structural steel plant, which will be erected this season. In addition to this the company will construct 2 more blast furnaces and a huge coking plant, making a total expenditure for improvements and enlargements which will run up well into the millions. The intention of the reorganized company is to make the Canadian Soo the source of supply for steel rails, farming machinery and structural steel for the entire Canadian northwest.

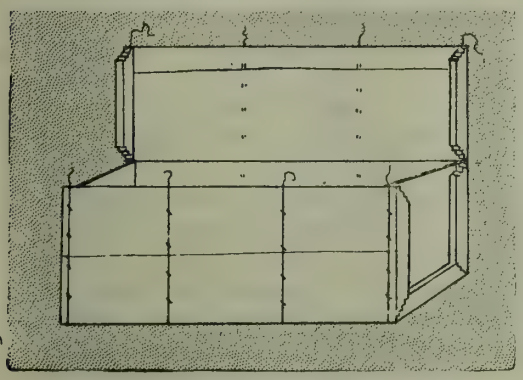
Chas. D. Warren, Toronto, president of the Lake Superior Corporation, said he was unable to confirm all the statements appearing in the daily press. "We are, however, considering the extension of the steel plant by adding a constructural mill. That will be decided in the very near future, with other matters that we have under consideration at the present time. The company will be in a position to make a more definite statement within thirty days. At present we are working the plant with a view to deciding the changes we propose making. Until this work is concluded we will be unable to say what will be the outcome."

WHEN IN OTTAWA.

Ottawa never had an hotel that was so perfectly equipped in every detail as the Hotel Cecil, of which Walter B. Walby is the proprietor. A quarter of a million dollars was spent in making the hotel up-to-date in every respect, and to-day the dining room, cuisine, bar, bedrooms, represent the last word in modern hotel building and management. Electric lights, running water, hot and cold in the bed rooms, electric elevators, fine sample rooms, make the Cecil the ideal hotel for the traveler. Its central location, corner Sparks and Bank Sts., is something further in its favor. The commercial traveler must go a long way to find a finer hostlery.—Avt.

FISH NETS IN CANADA.

Canada now imports annually nearly $700,000 worth of nets, trawl lines, gilling thread in balls, head ropes barked marine and net morsels of cotton, hemp or flax, and deep-sea fish nets. Cotton netting is most extensively used, and the average price is 10 cents per pound. The United States supplies a little more than one-half the imports and Great Britain nearly all the balance.



TO MAKE GUNSMITH'S GLUE.

A good glue for the gunsmith is made by disolving four ounces of good glue in 16 ounces of strong acetic acid by exposure to gentle heat. This is not exactly what one would call a liquid glue preparation—it is only semi-liquid. It may be kept for any length of time desired, and, when wanted for use, a slight warming up is all that is necessary.

Novelties and New Goods

WIRE BOUND BOX.

The wire bound box is a new idea to Canada, although in the States it has been manufactured for some time. As

Wire Bound Box Showing Fasteners.

the name implies wire is solely used to hold the wood together, and by this means not only is there an economy in lumber, as the boards need not be so thick as in the ordinary nailed box, but there is a great increase in strength compared with the ordinary style package. The whole idea is very ingenious. The boards of the case are fastened by staples to special cleats. The binding wires (which may be two or more, the number depending upon the strength required) are stitched to the boards and cleats the whole forming a box blank. It is then folded into its shape. The ends are put in and the case is complete —the wire making a hinge for the lid. The case is closed and fastened by twisting together projecting wires. The ends may be sealed making it impossible to remove any of the contents without leaving such evidence that the fact is promptly detected. The recessed ends formed by the sides make the box easy to handle. One great point is that these boxes can be shipped knocked down and flat, thus saving freight, cost of trucking, and storage room. The box is quickly set up, and being scientifically constructed combines the maximum strength with minimum weight. The wire bound box is being constructed by the Montreal Box Company, 56 Wellington Street, Montreal.

"PERFECT" FRUIT STEP LADDER.

What looks like an ideal ladder for the picking of fruit—and one that may be used also for general purposes—is the "Perfect" ladder here illustrated. Having a wide base it is claimed that it can be used with safety on uneven ground, and the supporting section being pointed is able to take a grip and hold it in position. By turning this pointed portion of the ladder upward it can rest among the branches of the trees, thus making easy the gathering of fruit. As an ordinary step ladder it can be used by two persons at the same time. The "Perfect" ladder is made in three sizes and is manufactured by The Stratford Manufacturing Co., Stratford, Ont.

Two Ways the Perfect Fruit Step Ladder Can be Used.

Catalogues and Booklets

Manufacturers or jobbers sending printed matter for review, should draw attention to the new lines listed; and retailers sending for catalogues or other matter, should write on their regular printed letterhead and mention this paper to make clear that they are in the trade.

Disston Wall Hanger.—A new, simple and substantial wall hanger, which is now being distributed to retail hardware men, is that put out by Henry Disston & Sons, Philadelphia and Toronto, to draw attention to their saws. It is a shield-shaped tin with lacquered back and rolled corners. The front is colored in red, yellow, blue and white, with the words "we sell Disston saws." A small brass chain for hanging on hook or nail is attached to the top, and while the hanger occupies little space it should attract attention.

Pease Furnaces.—A very complete catalogue is the 1909 general price list published by the Pease Foundry Co., Toronto. It is a booklet of over a hundred pages and it contains in detail descriptions of all the varied heating lines manufactured by the company. First there is a chapter devoted to the company itself, what they manufacture and how they conduct their business. This is followed by descriptions of their warm-air furnaces, the various parts of which are described minutely by word and illustration. Registers and furnace fittings have their place in the catalogue and a fair sized section of the book is devoted to steam heating lines. An interesting section is the chapter giving general information in regard to warm air heating. There is, too, a special telegraph code that may be used for ordering goods, together with a compact and complete index.

METAL WINDOW SCREENS.

A popular line being shown in Chicago stores is a window screen made with a stamped metal frame in place of the usual wood frame used on screens marketed in Canada. Black wire cloth, which is gaining popularity in Canada, has practically superseded green on the American market. The metal frames are claimed to be more durable and more sanitary than the wood.

MAIL ORDER JOBBERS COMING.

Inside of one year it is probable that a branch of the mail order jobbing business of Butler Brothers, Chicago, New York and other American cities, will be doing business in Winnipeg and possibly in Toronto also.

Speaking to Hardware and Metal in Chicago last week, a representative of Butler Brothers stated that for a long time his firm has been studying the Canadian situation and had been issuing a special Canadian catalogue. Recently the decision was made to establish one or more branches and two special representatives are now in Canada working out the details. Winnipeg is practically decided upon for a branch warehouse and Toronto is also being considered. The firm has already established twenty-two warehouses and it is planned to double this number during the next two or three years.

Butler Bros., according to a statement made to Hardware and Metal's editor, did a business last year amounting to more than the combined business turnover of Sears, Roebuck & Co., and Montgomry, Ward & Co., the two largest mail order catalogue houses in the world. When Sears, Roebuck & Co. were reorganized two years ago their prospectus claimed a turnover of $40 000,000 annually. Last year, according to our information, they did a business amounting to $55,000,000, while Montgomery-Ward's turnover was about half that sum, or $27,000,000. Consequently Butler Brothers' turnover in 1908 amounted to about $85,000,000 and by comparing this with the T. Eaton Co.'s departmental store and mail order turnover in 1908, said to be about $28,000,000, the enormous volume of business done by the Chicago firm can be realized.

Butler Brothers sell by catalogue to retailers and do not employ traveling salesmen. They state that they handle specialties and cheap goods for bargain counters and do not stock staple lines. They handle all lines of merchandise, but, judging from their catalogue for June, 1908 dry goods and hardware make up their chief lines. Of about 400 pages, 125 are devoted to dry goods, clothing and notions, while 106 are used to describe hardware, sporting goods, tinware, cutlery, woodenware and brushes. About 40 pages are given to glassware, etc., 40 to books, stationery, toys, wall paper, etc., and about 20 pages to grocery sundries. The firm state their policy to be to discourage customers stocking new lines in opposition to other retailers, but they have no objection to selling a customer any articles listed in their catalogue for personal use. This policy was outlined as a result of statements that objections were made by retailers that sales were made to persons outside the retail trade.

The effect of such a big corporation with original business methods coming to Canada is hard to fortell, but now that it can be definitely stated that they are to locate at least one branch here the trade will watch future developments with interest.

SPLITTING UP THE TRADE.

The old adage about not putting all one's eggs in one basket may be good advice for some occasions, but it does not always apply. This is an age of specialization and the man who scatters his shot very often misses his target and ends up with an empty game bag.

The successful stove merchant of today concentrates his efforts upon one (or possibly two) reliable makes of stoves. He selects a line, which he can conscienciously recommend and he backs it up with his best selling efforts. He studies the line, knows his goods, and by buying in large quantities often receives special consideration from the manufacturer he buys from. Such a merchant has many advantages over the dealer who has a conglomerate selection from half a dozen foundries, bought in small lots and their being too many lines in stock for the dealer to study and sell intelligently. The same argument applies to roofing and other articles as truly as to stoves. A retailer who carries a varigated stock has not the same opportunity as the dealer who concentrates on one line.

And so with the manufacturer. The roofing or store manufacturer, who sells to the consumer, cannot expect the trade of the retailer. And the razor manufacturer, who sells to hardwaremen, drugists, booksellers and even gents' furnishers, cannot expect the same enthusiastic support from the hardwareman as is given to the manufacturer who confines his sales solely to the retail hardware trade. Some manufacturers endeavor to overcome the difficulty by maintaing a standard selling price but they run the danger of making the business so unprofitable that no branch of trade will put energy into making sales.

The problem of concentrating on one method of making sales is important alike to manufacturer, jobber and retailer, and if business is to continue along established lines, the organizations representing the various branches of the trade should co-operate to eliminate causes for friction and discourage tendencies to divide the trade into new sub-divisions.

METAL BUYING.

Divested of the speculation that has held quotations in the primary markets in tin and copper, and on several occasions recently advanced the price, there seems little character to the legitimate consumption in these metals. It is reported from New York that the jobbing trade has been very dull, and although it may be taken for granted that on the whole consumption is improving, there is no doubt that trade is not in the shape that we would like to see it, or that could be reasonably expected after such a long period of conservative buying. Industrial activity is improving in the States, greater confidence as to the future is expressed, but yet the average consumer of metal is extremely cautious. He will not buy more than from hand-to-mouth. Speculators in Wall Street, and producers, can talk as optimistically as they like, but the time is not yet ripe for the average consumer. He is not certain as to the stability of the markets, and so long as speculation controls the situation, and the supply exceeds the demand, he is not likely to look ahead for future requirements.

Undoubtedly there has been a great improvement in iron and steel in the States and iron and steel reflect trade conditions. But this improvement has

been exaggerated in many quarters, and statements as to the wonderful business being done must be taken with a grain of salt. As a matter of fact orders both for pig iron and finished steel are lighter than they were, but this is only natural after the recent improved buying. Consumers for the time being, in the absence of any great industrial boom are pretty well covered. Furnaces and mills have plenty of work in hand, but the situation must not be exaggerated.

With the copper production as it is at present, and judging from statistics published as to consumption, there must be a heavy margin between the supply and the demand, despite reports emanating from speculative quarters as to the rapidly diminishing surplus of stocks. Of course these reports may induce heavy speculative trading, and tempt some of the large consuming interests, but although the markets may advance the position of copper is not any safer as the metal does not disappear in speculative trading. It comes on the market again. Of course if legitimate consumers were tempted to break in strongly, then the case would be different. But the average consumer is a little wary just at present. Conditions do not warrant any plunging. His trade, although improving, is not so bulky that he cannot look after it by ordering metal as he wants it, and there is no shortage in supplies.

Only a heavy revival of industrial activity, and a steady advance in the market quotations, will tempt the average consumer, who after all is the backbone of the metal markets, to buy more heavily and ahead of requirements. Once he is assured as to the stability of the markets, that the day of lower prices is over; and that metals are in for a steady advance, then he will lose his present conservative attitude. But there must be less speculation in copper and tin if this is to happen.

COUNTRY PUBLISHER CHAMPIONS EATON.

The Kincardine Review has taken a very shortsighted stand in endorsing the giving of the school book contract to the T. Eaton Co. The Review criticises The Printer and Publisher for objecting to the contract being given to the Eaton firm on a basis, which means injury to every retailer in Ontario, but The Printer and Publisher comes back with a poser asking, Col. Hugh Clark, the publisher of the Review, what he would have to say if a Kincardine dry goods or hardware merchant set up a small printing outfit in his cellar and put in a tender for the town printing at a figure far below cost in order that he would secure some advertising as a price cutter.

Kincardine merchants, who extend advertising support to the Review editor, should not be slow to make him realize that his first interest should be to develop his home town, and this cannot be done by encouraging his readers to send to Toronto or Montreal for supplies.

Too many country publishers and merchants have been lax in opposing the tendency to direct business to the large centres. The publisher has as much at stake as the merchant and, if he only realizes it the farmer and property owner is likewise equally interested with the local merchant in building up the country town.

At present the bookseller is most directly affected by the granting of the school book contract to the Eaton firm, but, as has been pointed out, all branches of trade are likely to suffer as a result of cheap school books being used as a bait to secure orders for hardware, dry goods, groceries, etc.

Elsewhere is reproduced an appeal issued by the Booksellers Association asking merchants to write a letter to their local M.P.P. The appeal is along practical lines and every hardware man in Ontario, should not only do as requested, but should also take pains to make his local editors understand where the real interests of his community lie. There may be other editors as shortsighted as the Review man.

FOR SHORTER HOURS.

Merchants are realizing now-a-days more than ever before that an afternoon off once a week or an occasional rest from business does not make them much farther behind at the end of the year. Summer is now in sight and wholesalers as well as retailers should think about early closing, giving themselves and their clerks an extra hour, on some days at least, during the week.

In many towns and cities the merchants arrange among themselves to close an hour earlier during the summer months and few regret it. The time is past when the store is kept open every night till every late straggler has passed the door—usually neglecting to do any purchasing. As years went by an hour was occasionally cut off the day's work until now six o'clock has become practically the universal closing time.

Shorter hours means better service from clerks and more promptness from customers and few merchants can honestly claim a loss by any slight consideration in this respect.

WHY YOU SHOULD PROTEST AT ONCE.

To the Retail Merchants of Ontario:

Every retail merchant in the Province of Ontario should feel it a duty to join the Great Chorus of Protest against the action of the Ontario Government in awarding the contract for publishing the Ontario Readers to the T. Eaton Company, Toronto, for the following reasons:—

(1) The T. Eaton Company took the contract at a low figure just for the sake of the advertisement. Their name will appear in the books as publishers and the books will go into practically every home in Ontario.

(2) A discount of 20 per cent. is given to all purchasers, be they merchants or school children. The retailer gets no advantage.

(3) The Public, when sending to Toronto for books, will undoubtedly take the opportunity to order other goods mentioned in the Eaton catalogue. This is just what the Eaton Company are after.

(4) The Ontario Government apparently went into the contract without considering the injury they would cause the retail trade.

(5) The Eaton Company are not publishers and should never have been considered as such.

(6) Unless vigorous opposition is aroused other provinces will make similar arrangements with the Eaton Company and will thus strengthen the position of the big company.

Protest to your member and the Hon. Dr. Pyne, Minister of Education, Toronto, at once or not later than June 10. Send a letter preferably, otherwise a post card.

If you receive no reply within a week be sure to write again and let them know you mean business.

The above is a copy of the circular being sent out this week by the Booksellers' Association of Ontario to the retail trade. Every dealer in the province is urged to adopt the suggestion contained in it.

CANADIAN METAL MARKETS

See Itemized Market Quotations on Page 66.

MARKETS IN BRIEF.

Montreal.

Tin—Unchanged.
Copper—Firm.
Turpentine—2c advance.
Linseed Oil—3c advance.
Ground White Lead—10c per 100 lbs.

Toronto.

Linseed Oil—Advanced 4c.
Turpentine—Shaping higher.
Wire—Firmer.
Sash Cord—One cent advance.

THE MARKET SITUATION.

The tone of the primary markets has not been so good this week. Speculation in copper in the English market continued, but prices were not held so firmly. For the time being New York played second fiddle, although, of course, figures in the latter city reflected the buying across the Atlantic. Wall Street seems to have done some manipulation, but whether the legitimate consumers bite remains to be seen. Sellers, however, continue very firm in their views. Tin has been easier with consumption in New York very quiet. Doubts are now being raised as to the canning outlook, and the tone of the market is not so bright as it might be. Tin, however, recovers easily, so far as speculation is concerned. Spelter continues to maintain its steadiness in the English market under the control of the syndicate, although consumption is inclined to be dull. Stocks are light. St. Louis has advanced. Producers are refusing to quote, except at higher figures. Consumption is improving, but the great bull point seems to be the tariff. An improvement is noted in Cleveland warrants, which are now quoted at 49 shillings, an advance on last figures of ninepence. There is an improvement in iron and steel generally, and things look brighter in the Old Country. Pig iron continues to advance in the States. This seems due more to sentiment than to actual business, as orders are quieter than they were, which is only to be expected considering the recent good business. Furnaces are busy, but not rushed. The buying of finished steel is lighter again, but there is good business moving.

MONTREAL.

June 4.—Trading for the week has shown marked improvement, with the result that prices have been all held firmly, despite fluctuations in the primary markets. The local advance in copper seems to have brought about increased interest in the metal, and not only has buying improved, but inquiries become stronger. Tin also improved in consumption, while spelter has been going out freely. Buyers are still maintaining a strong conservative attitude, and are purchasing on the light side. Confidence in the markets has not yet been fully established, and neither can it be said that the primary metal situation is in such a shape as to invite any such confidence. The strength of the real consumption demand is lost in the speculation that has been going on, and until the primary markets show signs of stability it cannot be expected that consumers will be anxious to commit themselves.

First hands are transacting a fair amount of business. Some of the heavier buyers are in the market again, and inquiries are increasing for fall business. The weakness in London and New York is likewise keeping things back in this direction. There is still the same anxiety to get metal as soon as it arrives in port, which shows how low stocks are, and incidentally the healthy position of the markets should they comemnce to strengthen steadily.

PIG IRON—Orders are coming in freely, and there is an encouraging tone to the market generally. Buying ahead continues to improve, no doubt induced by the better tone to the English markets, and the fact that higher prices are obtaining for future delivery. Conditions in the States are also influencing the larger buyers, while Canadian furnaces are firm in tone with increasing business offering. Altogether the market is in good shape.

TIN—There is no change to the jobbing price of tin, despite the fact that the primary markets have been showing weakness again. Business has been very good, and we continue to quote 32½c for ordinary lots. Buying has not been of the heavy description, but orders have been numerous, and there is evidently a steady consumption of the metal. The state of the primary markets preclude much interest being taken in the metal, that is, so far as future requirements are concerned, and users have little confidence. Plenty of manipulation has been going on in London, while New York is credited with very dull consumption. There is some nervousness over the canning season, and this, with the tariff question and the amount of tin visible does not make prospects look any too bright.

COPPER—The market has kept firm under an improved demand, and the jobbing price of 14½c has been unchanged. If anything, buying has been heavier, and it is evident that much better business will be done if conditions continue to strengthen, undoubtedly the advance last week of ½c induced a greater amount of interest in the metal. Stocks are on the light side, and consumers are ready to buy more heavily if they think prices are going to soar. The The heavy speculation in the English market, which for the time being controlled the New York market, caused prices to strengthen in the latter market, but there is doubt as to whether increased consumption had much to do with the higher figures. The whole advance may have been worked for Wall Street purposes. Producers are still, however, confident as to the future, and there is no reduction in production.

SPELTER—Spelter is firm and unchanged at $5.75. The demand continues good, and the whole tone of the market is very satisfactory. The English market continues to hold prices in a firm way. There is apparently but little spelter in stock, and as the market is largely under the control of the zinc syndicate prices are well kept up, although the demand is on the quiet side. German consumption has improved, and there has been buying on American account.

LEAD—Orders have improved, and trade for the time being is much brighter. There is no change in price from last week, and we quote imported pig $3.60 for ordinary jobbing lots, and Trail at $3.50. The English market has been sagging again under poor consumption, and plenty of metal in sight.

SCRAP METAL—Buying has improved a little, but the market have not shown much character. We quote:—Heavy copper and wire, 11c; light copper, 10c; heavy red brass, 10c; heavy lead, 2¾c,; scrap zinc, 3c; wrought iron. 11c; machinery cast, $14.50.

TORONTO.

June 4.—While trading this week has been satisfactory it has not kept pace with the general industrial revival that is sweeping the continent. Local metal men say they ought to be busier than they are. The situation is improving, however, though slowly. Iron and steel lines are showing to better advantage than for 15 months past. Pig iron has not advanced in price, but it is decidedly firmer, and manufactured steel lines are holding strong at the advance quoted last week. Shipments of this latter metal are apt to be delayed in delivery so heavy has been the booking of orders during the few weeks just past.

Copper remains firm, but lead and tin are slightly easier. Old materials have taken a spurt and buisness is better than at this time two years ago, though on account of the low prices prevailing not so much money is made to-day as in 1907. Old red and light brass and zinc have gone up and so have old rubbers.

PIG IRON—Betterment in the iron trade is more marked, and with the increase of orders the market has become firm. Canadian production is increasing and the industries are taking iron more freely. While profits will be small this year, still the balance will be on the right side of the ledger. Judging from the way buyers are asking for immediate delivery stocks must have been allowed to run down. Prices are at the

figures quoted last week: Canadian foundry, $19.25; No. 3 Middlesboro, $19.50, and Cleveland, $21.

COPPER—The red metal is yet firm, and now shows a whole month of good business to support the theory that copper has turned for the better. 14¼c remains the quotation, though some small sales went at 14½c. The visible supply is still very high, but demand is increasing all the while.

LEAD—This metal is slightly easier again this week, but dealers say there is no chance at present for lower prices. The market quotation is at $3.65 for imported pig. Consumption is not so great now and stocks at present are stated to be high in England. The reverse is the case in the U. S., where prices are 75c higher than in Toronto. The trust bogey, too, helped boost prices across the line, but some of the prominent lead men disavow any knowledge of the so-called trust.

TIN—The market quotation remains at 32c. While the price is firm there is an easier tone to the selling. The supply is not too great and this is expected to keep the metal rather steady, whatever fluctuation takes place being regarded but temporary in character.

SPELTER—There is continued development in the spelter situation and the market keeps steady with the price at $5.75.

SHEETS AND PLATES.—Production abroad increases and just now the mills are as active as in 1907. Prices remain locally unchanged. Inquiry is frequent and sales are good, much better than last year.

OLD MATERIALS—Nearly all scrap lines show advances, especially brass, copper and zinc. Old rubbers, too, are up ¾c above a week ago. Dealers are paying for heavy copper wire, 11c; light copper bottoms, 10c; heavy red brass, 10¾c; heavy yellow brass, 8¼c; light brass, 6¼c; tea lead, 2½c; heavy lead, 3c; scrap zinc, 3¼c; No. 1 wrought iron, 10; machinery cast scrap, No. 1, $14; stove plate, $12; malleable and steel, $8; old rubbers, 7¾c.

METAL NOTES.

The Riviere du Loup Electric and Iron Works, at Fraserville, Que., is in liquidation.

The production of copper in Canada last year was 55,781,992 pounds compared with 46,356,382 pounds in 1907.

The Grand Trunk Railway has bought 700 tons of steel rails from the Pennsylvania Steel Co., for its United States lines.

The iron and steel concerns in the Pittsburg district, which reduced wages two months ago, restored the old scale on June 1.

Edward Brush, vice-president of the American Smelting and Refining Co., says his company knows nothing of the reported world's lead trust.

The Manitoba Bridge Works, Winnipeg, will supply the iron work used in the construction of the Transcontinental Railway shops at that city.

HARDWARE MARKETS

MONTREAL.

June 4.—Orders are coming in freely, and with the better weather conditions and the more encouraging reports from the farming districts generally, a much brighter feeling is observable among the trade. Travelers report that while dealers are still inclined to buy from hand-to-mouth, they are taking more interest in the markets, and in their requirements for the latter part of the summer. In fact bookings, generally, show an improvement, and apple parers, cherry stoners, fruit presses, preserving utensils, lanterns, cow ties, guns and ammunition are being ordered for future delivery. Repeat orders are coming in well for the ordinary summer lines. Ice cream freezers, refrigerators, and water coolers are moving briskly. Lawn mowers are good sellers, while the strong call for hose continues. Harvest tools are now being ordered well for immediate delivery. If anything bolts and nuts are a little quieter.

The markets are firm and unchanged. Leather goods have not yet been advanced, although the market has gone up. The price, however, is very firm. Altogether the tone of the markets is very bright, and manufacturers and jobbers seem much more satisfied with prospects. The Northwest shows improvement every week, and the fall is expected to bring forth heavy buying, that is presuming the harvest goes along all right.

BUILDERS' HARDWARE—Builders' hardware, if anything, is a little quieter than it was. The consuming demand has not generally been quite so active as anticipated, and dealers are not yet ready to order fresh stock. Considering the way the line has been moving this is not wholly unexpected. The recent wet weather undoubtedly retarded the building season. There are no price changes and we quote: Door sets and escutcheons, 50 and 10; escutcheon pins, steel, 50; brass 55; spring hinges No. 20, $9 per gross.

SUMMER LINES—The tone of the markets shows much improvement, and general summer lines are moving briskly. The various shipping departments are working at full pressure, for although orders may lack bulk to a certain extent they make up for this in numbers. Apple parers, fruit presses and preserving utensils are commencing to move for future delivery. Hose is still a good seller, while the warm weather has quickened the sale of ice cream freezers, refrigerators, ice picks, water coolers, screen doors, and green wire cloth. The market continues firm and we quote: Screen doors stained, $7.80; grained, $8.10; screen hinges, $9 a gross; poultry netting, 60 and 2½; green wire cloth, $1.70 in 100 feet rolls.

HARVEST TOOLS—The demand for harvest tools has improved, and orders are now swinging in well for hay carriers, rakes, and pulleys. The season has been late, but the present rate of progress will soon make up for lost ground. We quote: Hay fork pulleys, $1.60 to $8.50 a dozen; hay carriers, hay rakes, etc., 55 off.

MINERS' SUPPLIES—An improvement is noticed in miners' supplies, and some good size orders have come in. The markets are unchanged and we quote: Miners' picks, 17c. a pound; prospectors' hammers, 20c.; pick handles, $1.85 a dozen; drilling hammers, 6c. a pound; crowbars, 3½c.; drill steel, 8c.

BOLTS AND NUTS—The demand is not quite so active as it was, the steady buying having somewhat replenished stocks for the time being. Nails are selling well. We continue to quote: Discounts on carriage bolts, ⅜ and smaller, 70; machine bolts, ⅜ and less 60, 10 and 10; coach screws, 75; stove bolts, 80 and 7½.

SCREWS—Screws are moving well, especially locally. We continue to quote: 85 and 10 off for flat head, bright; 80 and 10 off for round head, bright; 75 and 10 off for flat head, brass, and 70 and 10 for round head, brass.

WIRE—Wire lines are still moving well. The demand shows no signs of letting up, and manufacturers and jobbers are busy shipping. There are no changes reported, and we quote: Barb wire, car lots and mixed, $2.50; small lots, $2.55; plain twist, car lots, $2.80; small, $2.85. Galvanized wire No. 9, $2.25 in straight and mixed car lots, and $2.30 small lots, f.o.b. Montreal. Coiled spring fencing, $2.45; straight and mixed car lots, and $2.55 small lots. Plain wire, bright, annealed and annealed and oiled, $2.25 base. Other lines $2.30 f.o.b. Montreal.

TORONTO.

June 4.—The hardware trade continues to advance, the recent warm weather being provocative of much new business and bringing in repeat orders for seasonable lines. Manufacturers are running their shops to the limit trying to keep up with orders, but in some cases, as garden, farm and building tools, delivery has to be delayed. The demand was rather sudden and while the makers were not exactly caught napping their estimates of this year's trade were somewhat astray.

Grass cutters, screens, hose and the hundred and one small things required about the house and garden in summer time have gone out in goodly numbers this week, and quite a big demand is being made for refrigerators and ice cream freezers. Gas stoves, too, are beginning to go out more freely; and inquiry is being made for camp outfits and summer cottage supplies. A line that is not new, but which is asked for frequently, is cutlery. The wedding month has brought about an inquiry that should stir up sales. Sporting goods are active.

Prices on the whole are unchanged, and if anything tend to be firmer. Wire is still at the high quotation of ten days ago, and the prospect is that it will go higher. Sash cord has gone up a cent. On the other hand saws are easier, and guns, too, are not so firm.

BUILDERS' HARDWARE.—The demand that has been made for this line is almost unprecedented and manufacturers and jobbers say they misjudged

in their calculations as to the season's trade. They are gladly disappointed, however, saying that while they tried to stimulate trade by optimistic talk just now the business briskness is forced on them. All lines hold firm in price, and as stocks are low there is no appearance of lower prices in prospect. Sash cord is the only article with changed quotation. That has gone up a cent from 26c to 27c.

SEASONABLE GOODS.—The list of summer goods that are seasonable increases as the time goes by and the hot weather comes nearer. Lawn, garden and the smaller farm and barn utensils are going out just as steadily as during the past six weeks, and so are screens for doors and windows. Refrigerators and ice cream outfits are opening up well, and demand is made for summer heating lines. No price changes are noticed. Cutlery for June presents is changing hands.

SPORTING GOODS.—Just now sales are steady. Fishing outfits are selling particularly well. Guns and ammunition are asked for pretty generally. Single-barreled guns in the U.S. are down 50 cents each. Local jobbers say that as Canadian prices have been down to the low figure now quoted across the border there is no change here and that there is no prospect of an immediate change.

HEAVY GOODS.—Nails are keeping up with screws in volume passing out in sales. Perhaps they are beating them out. The factories are working overtime in trying to fill orders, but they are two weeks behind in delivery. Structural bar iron is in great demand, and rods and pipes are very active. No new prices are slated.

U. S. IRON TRADE.

Cleveland, O., June 3—The Iron Trade Review says: Closing a month of exceptionally heavy tonnages in the aggregate of orders entered for immediate rolling, the iron and steel industry has moved into June with brightened prospects. The month of May saw the highest point up to the present time reached by the recent revival of buying vigor in the market. The total specifications in the different finished products received in that period were considerably in excess of those of the preceding month, and, in frequent cases, the new orders placed upon mill books were heavier than the shipments made. This condition has resulted in some falling behind with deliveries.

Efforts have been made by some companies to determine the speculative element that has entered into the recent buying movement, which is a factor that is recognized as having an important bearing upon the maintenance of current activity. The result of such investigations has usually been favorable, as it has been ascertained that the material shipped is moving freely to ultimate consumption.

Blast furnace and finishing mill operations in the Pittsburg and Chicago districts continue to increase. The Carnegie Steel Co., in the past week started its No. 4 furnace at its Ohio works, giving it 44 active stacks out of 59; this is a numerical percentage of about 74, but from the standpoint of actual capacity is about 80 per cent. of full output. Additional open hearth furnaces were also put on at South Sharon. The company is now operating all its merchant mil's with the exception of Greenville, and all its steel works ioutside of Columbus and Sharon. The National Tube Co. has started two blast furnaces at its Riverside plant, and will resume with some of its tube mil's in a few days, making the first activity in this works in 20 months.

Practically all the steel and blast furnace interests in the Pittsburg, Mahoning and Shenango valley districts, which have reduced the wages of their workmen 10 per cent, restored the former schedules June 1.

Hardware Trade Gossip

Ontario.

The tinware business of the late C. N. Alair, at Welland, is advertised for sale.

The Lehigh Portland Cement Co., of Belleville, has increased its capital by $500,000 to $1,500,000.

The capital of the Expanded Metal & Fireproofing Co., Toronto, has been increased from $100,000 to $250,000.

G. A. Binns, Newmarket, is building a new store and expects to move about Sept. 1, his former store having been leased to another tenant. The new building will be of reinforced concrete with pressed brick and plate glass front, two stories and basement, with modern fittings and with freight elevator from the basement.

C. M. Harper, of the firm of John Harper & Co., Willenfall, England, has been spending this week in Toronto with Thomas Mortimer, 64 Wellington street west, representative of the firm in Canada. The Harper Co. manufactures many classes of builders' cabinet hardware, cast iron toys, etc., as well as a line of oil and gas stoves and hot plates, a feature of the gas goods being a coating of enamel giving it a similarly smooth finish to high grade kitchen enamelware. Mr. Harper will return to England in about a fortnight.

Quebec.

R. E. Harris, president of the Nova Scotia Coal & Steel Co. has been visiting Montreal.

E. L. Delany, vice-president of the Coyne & Delaney Co., Rodney Street, Brooklyn, N.Y., manufacturers of brass and copper goods, has been visiting Montreal.

J. C. Dietrich, Jr., who has represented for several years the firm of Shurly & Dietrich, Galt, in Quebec and Maritime Provinces, is to be married on June 23 to Inez, daughter of Mrs. Robert H. Wilson, Victoria, B.C.

Among the members attending the convention of the American Foundrymen's Association at Cincinnati, were W. H. Bennett, Jenkin Bros.' Valve Co., Montreal; T. J. Best, Warden-King, Montreal, and J. R. Meadowcroft, the Garth Co., Montreal.

The Eadie-Douglas Co., agents for the Leeds Fireclay Co., England, have just been awarded the contract for the architectural terra cotta for the new McArthur building and the Bank of Nova Scotia, at Winnipeg, as well as for the Jacobs building, in Montreal.

Western Canada.

Angus McLeod, hardwareman and implement agent, at Leney, Sask., has closed his branch store there.

W. T. Gill, Virden, Man., has gone to Eyebrow, Sask., to assume the management of the hardware and lumber business of the Imperial elevator there.

Maritime.

Y. C. Cosman, who has been carrying on a tinsmith business at Dorchester, N.B., for the past few years, has accepted a position with the Record Foundry Co., of Moncton, as one of their travelers for the Maritime Provinces.

COAL OIL ECONOMY.

To users of coal oil for lighting purposes the following hints on the care of lamps and wicks while not original may prove useful.

Remember that a low flame means a poor wick, and a smoky flame a poor draft.

Put in a new wick—the old one may be clogged from constant use.

Particles of charred wick may obstruct the air holes. Wash the burner in hot soapsuds, or use a new one with large air draught. Anyone knows that a stove will smoke without good draught. A lamp is no different, and the richer the oil the more smoke with poor draught.

The taller the chimney the better draught. On a new chimney the heat will bring out a haze on the glass which should not be confused with smoke; it is due entirely to the ingredients in the glass, and after a few nights' burning disappears.

Shallow bowls give best results, the oil being nearer the flame.

To get best light use scissors daily.

To give any oil a fair test, empty the bowl completely and fill with fresh oil and observe the above suggestions.

Contracts will be let soon by the Dunnville, Wellandport & Beamsville Electric Railway, which proposes to build a 22-mile electric railway to connect these three towns. It is proposed to begin work at once.

Trade Gossip from Canada's Eastern Provinces

St. John Hardware Stores to Close Saturday Afternoons During Summer—Maritime Board of Trade to Hold Convention at Charlottetown—Big Smelter to be Located at North Sydney.

ST. JOHN.

June 2.—The outlook in building circles is very bright now. Among the new buildings to be commenced this month will be a school costing about $20,000; a brick addition to the St. John Railway Co.'s building to be used as a showroom for electrical and gas stoves and fixtures; a new branch for the Bank of New Brunswick, a brick store on Peters street for O. B. Akerley, an engine house for the fire department at West St. John and a new residence costing about $10,000 for F. P. Starr, as well as a number of wooden residences and smaller buildings. Among the buildings throughout the province are: Stone block for W. H. Higgins, Moncton; Masonic hall, school and courthouse at Woodstock; schools at Petitcodiac and Centreville academy and remodeling church at Newcastle and branches for the Bank of New Brunswick at Fredericton, Grand Manan and at Summerside, (P.E.I.)

The contract for building the new court house at Woodstock has been awarded to R. A. Corbett, of St. John.

A new refuse furnace is being constructed at John E. Moore's sawmill, Pleasant Point. The furnace will be 120 feet in height and 20 feet in diameter. The iron work is being built by the St. John Iron Works and the mason work is in the hands of A. Burns.

The hardware clerks of the city will have the half holiday on Saturday during the months of June, July and August, as in the past few years. The agreement has been signed by W. H. Thorne & Co., T. McAvity & Sons, Emerson & Fisher, Smith, Robertson & Foster, J. Le Lacheur, S. Hayward Company, James Robertson Co., A. W. Adams, J. Splane & Co. and James Knox. The latter three firms are ship chandlers. A proposal was made to have the half-holiday extended to October 1 but as there was some objection it was dropped.

The business of the H. H. Dryden Co., of Sussex, manufacturers of tinware, has been wound-up by the equity court and Herbert B. Chadbourne of Toronto and G. Geo. Clarke were appointed liquidators. The principal creditor is the Thomas Davidson Company of Montreal.

W. E. H.

HALIFAX.

June 1.—Builders' hardware is in good demand this season and the sales so far have been good, not only in this city, but throughout the province. Building operations all round continue to show a general increase. There is a heavy demand for cement and the sales are reported to be large. The spring orders for hardware have almost all been filled and the rush is now pretty well over for the time being. The price list is steady, but the prospects are that wire products will be advanced materially before very long.

The ratepayers of the Town of Shelburne, N.S., have decided by a small majority vote, to install an electric lighting and power plant at a cost of $30,000.

Richard T. Kinsman, aged 55 years, who had carried on a plumbing and tinsmith business in Halifax for many years, died this week.

The town council of North Sydney, has granted a free site, free water and exemption from taxation for a period of thirty years to J. H. Brown, of Montreal, a mining engineer, and his associates, to erect a reduction and smelting plant for the smelting of ores, the plant to cost in the vicinity of one million and a half dollars.

George W. Stuart, mining engineer, Truro, and J. W. Regan, Halifax, have been in North Sydney this week in the interest of capitalists who are investing, and an extensive report has been prepared for the parties. Specimens of the ores have been sent away for analysis. Mr. Regan endorsed the scheme proposed by Mr. Brown and thought that enough ore, which extends over areas of seven miles in length and over one thousand feet wide, is available to supply smelting works for years. The erection of such a plant would give mining of ores in Cape Breton and Newfoundland a stimulus. The proximity of coal and the natural advantages of the harbor of North Sydney for importation of ores are incentives to capital to locate there.

The outlook for business in Cape Breton is most promising and the merchants of the various towns are looking forward to a very prosperous year. All the collieries are working full time and the pay rolls of the miners are very large. There is an abundance of ready cash in circulation and in consequence business all round is reported good. The big industrial plants, such as the Dominion Iron and Steel works, the Sydney Cement Co.'s works, and the Tar and Chemical Co.'s works are all running full time, and giving employment to thousands of men, both of the skilled and laboring classes.

The Dominion Steel Co.'s proposed expansion at its plant will also give employment to a large number of men, and as a result business must naturally benefit thereby. The expenditure of several million dollars on construction work is hailed with delight by the business men of the "Pittsburg of Canada," and a renewal of the boom times of several years ago is predicted. In addition everything is bright and prosperous at the collieries. The shipments of coal are very heavy so far this season, and they will likely continue until the close of navigation. There is also a large amount of building operations going on in the mining towns. The Dominion Coal Co. recently awarded a contract to the Rhodes, Curry Co., of Amherst, for the construction of thirty cottages for the miners. The construction of these is to be proceeded with at once. Many fine private residences are also in the course of erection, and others are being contracted for. Barring labor troubles, everything gives promise of a banner year in the mining districts of Cape Breton.

Interesting Trade Items Gathered in Ontario

Big Hotel Building at Ottawa—Novel Window Display at Peterboro and Guelph—Chatham and Brantford Merchants Making Progress with Their Collection System.

GUELPH.

June 1.—Although it is still early in the season, there is at least $120,000 worth of building all ready either well under way or clearly in sight. The total is built up a good deal by the new Winter Fair extension at a cost of $40,000, and the new St. James Ward school at a cost of $20,000.

Hardware merchants of this city are strong on window dressing, but it has been generally admitted that H. Occomore, in a window he had last week, broke all records for an interesting display. At least, it attracted more attention and comment than any window in this city for a good many years. It was a sort of burlesque of some fine millinery windows just across Wyndham Street, and the humor and art in it were so generally appreciated that it was written up in both local dailies and talked about in surrounding towns, so that Occomore's store got a lot of free advertising through it. With a big wooden meat chopping bowl inverted and trimmed with dusters and a length of covered rubber gas pipe, the shoppers had an excellent take-off of one style of the fearful and wonderful creations of the present millinery. Dark green waste paper basket turned upside-down trimmed with toilet paper, and a wreath of nail brushes, with the bristles facing outwards, represented the peach basket style. Another equally

cleverly made imitation was ticketed, "The Cossack," and so on the whole big window was filled with really clever imitations which kept the people laughing and yet attracted their attention to the woodenware and brushes with which the display was made. It was particularly timely, since the whole city had just been started talking hats by the local ministers asking the ladies in all city churches to remove their large headgear.

The sale of refrigerators, screen and screen doors is being pushed by the majority of the hardwaremen here, while garden tools and fishing tackle are also selling well, although the season has been a late one.

H. H. Occomore has been granted the contract for the roofing of the new Winter Fair building extension at $1,600, McCormack & Robinson got the tinwork contract for the same building at $190.

G. A. Richardson's windowful of gas, coal oil and gasolene stoves gives many timely suggestions to shoppers. Its attractive arrangement is worthy of note.

H. N.

CHATHAM.

June 1.—The collection department of the R. M. A. is now fully under way. Merchants have been diligently engaged in resurrecting their "dead" accounts, and turning them over to the association. Collector Murdock is now making his daily rounds, and is getting in some pretty good licks at the slow pay fraternity. One hardwareman reports that the collector has already gathered in for him from old accounts more than enough to pay the initial fee several times over. There seems to have been a lot of money due in this city which was just waiting for an aggressive collector to go out and gather it up.

The executive of the association are engaged on a scheme for handling collections outside the city limits. The question of outside collections was raised when the scheme was under discussion, but apparently there was no precedent. It may be left to Chatham to create the precedent by evolving an effectual system of handling country collections.

A significant comment was recently made by a banker, who declared that he considered the failure of a merchant to make use of the local system of looking after his own credits and collections would be ample justification for a bank to refuse him credit.

It was originally intended to pay Collector Murdock and Secretary Powers fixed salaries, regardless of the number of members; but to-night the association decided to allot the secretary three-eighths and the collector five-eighths of the membership fees. This will be, it is felt, an incentive for the bringing in of new members. The system begins with a membership of about 60 members.

The merchants in the adjoining town of Walaceburg are contemplating the formation of an association and the inauguration of a similar system for handling collection.

C. R. Bowers, Deleware Avenue, was recently awarded the tender for new plumbing fixtures in the fire hall, the contract price being $225.

Clarence Higley has left for Blenheim, where he has taken a position on W. D. Samson's hardware staff.

C. E. Myers, the Blenheim hardware and bicycle dealer, has purchased from George Thompson the two-storey store and residence building which he has been occupying.. Some improvements are understood to be contemplated.

Van Tuyl & Fairbank, of Petrolia, have just completed an unique job, in the shape of the new galvanized iron dome for the top of the town hall tower. The dome is nearly 7 feet high, and is made of 26 gauge iron. Until now these domes and caps have always been made out of town, but the firm recently installed machines capable of handling this class of work. Wm. Cooper, foreman of the tinsmithing department, supervised the job.

W.E.P.

PETERBORO.

June 2.—The Peterboro Hardware Co. have opened a new store in addition to their present establishment and are confining the articles on exhibition there to ice cream freezers, refrigerators and screen doors and windows. This company has a timely window exhibition of silverware with a quiet hint that gifts for June brides could not be selected with better taste than from these handsome articles. The display is enhanced by a rich setting or background.

The Purity ware by-law has been the subject of much discussion by the business men and ratepayers. This company propose to manufacture enamel ware and galvanized ware, etc. Strong opposition has been presented by James Kendry, manager of the Auburn Woollen Mills. The objection raised is that the names of the gentlemen who will underwrite the stock is being witheld for the present. Mr. Kendry wanted their identity given to the citizens. R. G. Kingan, of the Peterboro Hardware Co., is one of those who is supporting the by-law, which if carried out to the letter will undoubtedly mean a fine factory for the city.

GALT.

June 2.—A. D. Dame has resigned his position as sales manager with the Galt Art Metal Co. He has not made any decision regarding his future field of operation.

Geo. Stevens will erect a new brick block on Ainslie Street to replace the frame building which was badly damaged by fire on May 24.

The Galt Hardware dealers have been making extensive window displays of brushes, brooms and other household necessities.

Gmelin & Co. have secured the contract for the tinsmithing work on the new Central school. The roofing contract goes to J. A. Rae, of Galt, and the metal ceilings to the Preston Metal Shingle & Siding Co.

Foremost among those agitating for a half holiday during the summer months are the hardware clerks, and it is to the credit of the merchants themselves that as yet they have offered no objections to the proposals.

"We are selling more paint this year than for some years past," said W. J. McMurtry to-day. Everybody seems to be cleaning up and repainting this spring, and I guess by the middle of summer you won't be able to recognize the old town."

The Fraser Hardware Co. have gone extensively into fishermen's supplies.

B. E. C.

BRANTFORD.

June 1.—Although this is the first day of June, "the month of weddings," none of the hardwaremen have so far shown any windows of special wedding gifts. This is a line that hardware dealers could well handle, and a neatly trimmed window of cut glass, cutlery, chafing dishes and silverware would do a great deal to bring the custom to the wide-awake merchant.

The Schultz Bros.' Co., building contractors and lumber merchants, are branching out, and have commenced the manufacture of motor boats, launches, canoes and row-boats. They will also build portable houses for mining districts. boat houses, camps, etc.

The Supreme Heating Co., Welland, has received a contract from a western firm for 700 ranges and 200 furnaces—the entire output for the present year.

Efforts are being made for the formation of a company to take over the business of the Brantford Emery Wheel Co. and secure the enlargement of the buildings and equipment. The company in question is making a superior article for which there is a large demand by manufacturers, and there is room for further expansion.

The Merchants' Protective Association, newly organized for the prevention of "dead-beating," reports that their collector, N. Willits, is already doing effective work. There are at present 112 merchants interested, and each pays a fee of $10. Many persons, with accounts long due, are paying up, or are promising to pay in amounts as they can. and the value of the fee has been returned manifold. Similar steps for the appointment of a collector may be taken in Paris, and a general meeting has been called upon to discuss the matter. Should it be found impossible to maintain a collector there, an effort will be made to join with the Brantford merchants, and have the local collector spend a day each week in the neighboring town.

Some of the local stores have commenced the annual Wednesday afternoon holiday, during June, July and August, including all the grocers and butchers. A number will, however, remain open all the time.

A. W.

CONDENSED OR "WANT" ADVERTISEMENTS.

RATES.

Two cents per word first insertion; one cent per word subsequent insertions.

Five cents additional each insertion where box number is desired.

Contractions count as one word, but five figures (as $1,000) are allowed as one word.

Cash remittances to cover cost must accompany all advertisements. In no case can this rule be overlooked. Advertisements received without remittance cannot be acknowledged.

RULES FOR COPY.

In addressing replies care of HARDWARE AND METAL don't fail to give box number.

Replies addressed to HARDWARE AND METAL boxes are re-mailed to advertisers every Monday, Wednesday and Friday.

Requests for classification will be followed where they do not conflict with established classified rules.

Orders should always clearly specify the number of times the advertisement is to run.

All "Want" advertisements are payable in advance.

ARTICLES FOR SALE.

Don't keep any fixtures or tools around your store for which you have no further use. They are worth more to-day than they will a year hence. Don't keep money tied up which you could use to secure discounts from your wholesaler.

CASH REGISTER, high grade, nickel plated. Registers one cent to twenty dollars. Perfect condition guaranteed. Half price, $55.00. The R. O. Smith Co., Orillia, Ont. (23)

ELLIOTT-FISHER STANDARD Writing-Adding Machines make toil easier. Elliott-Fisher Limited, 513, No. 83, Craig St. W., Montreal, and 129 Bay Street, Toronto.

MISCELLANEOUS

ADDING TYPEWRITERS write, add or subtract in one operation. Elliott Fisher, Limited, 129 Bay Street, Toronto.

A MARKET OF BUYERS, backed up by money to spend, is open to you in the Busy Man's Magazine. Every territory in Canada is represented. If you have something to sell, want to buy something, a condensed advertisement in the Busy Man's Magazine will put you in touch with the classes you wish to reach. Four cents per word will carry your message from Atlantic to Pacific. Send copy of your advertisement along with order to cover cost of insertion before 10th of month preceding date of publication. Your announcement will appear under a special heading. BUSY MAN'S MAGAZINE, Montreal, Toronto, Winnipeg.

CUT DOWN YOUR PRINTING BILLS one half, by installing a "Writerpress." Your office girl or boy can with it print your circulars, price lists, etc., at the rate of 1500 to 2000 copies per hour. Best machine ever made for printing facsimile typewritten letters. Prints from printers' type, half-tones, etc. Retail stores could greatly increase their business by using a WRITERPRESS to run off circulars and letters, sending them out to their customers and probable customers announcing special sales, etc. Send for illustrated catalogue and samples. The Canadian Writerpress Company, 33 John St. South, Hamilton, Ontario.

DICTATING to the Dictaphone saves 50 per cent. We will prove it to you if you will send us a post card for full particulars. Toronto Phonograph Co., Limited, Dictaphone Dept., 40 Melinda Street, Toronto, Canada. (tf)

HIGH CLASS COLOR WORK; Commercial Stationery, Posters. The Hough Lithographing Co. Limited, Office—No. 3 Jarvis St., Toronto, Telephone, Main 1576. Art, Good Workmanship; Business Methods.

IT PAYS FOR ITSELF—The money you are now losing because you haven't a National Cash Register, would pay for one in a short time. The National Cash Register Co., F. E. Mutton, Canadian Manager, cor. Yonge St. and Wilton Ave., Toronto, Ont.

KEEP AN ACCURATE ACCOUNT of your employes' time. The Bundy Autograph Time Recorder is the ideal Time Recorder for retail merchants. It is the only machine where one employe cannot register for another, as each employe signs his name and the employer knows the signatures of his men. Whether you employ a few or hundreds of hands, we can supply you with a machine suited to your requirements. Write for illustrated catalog. International Time Recording Co. of Canada, Limited. Office and factory, 11 Alice Street, Toronto.

SAVE 50% OF THE COST OF HANDLING merchandise by installing a Beath System of Overhead Carriers. Saves valuable floor space because the trackage is on the ceiling and greatly facilitates the loading of cars, drays, etc., and for handling goods in and about the warehouse and factory reduces the cost of labor because far less warehouse help is required. Systems for all kinds of businesses, large or small. Write us for illustrated catalog. W. D. Beath & Son, 193 Terauley St., Toronto. (tf)

YOUR CHEQUE CAN'T BE RAISED to any amount above that which you intend it to cover if you use the PROTECTOGRAPH. This device stamps a line such as "Not over ten dollars, $10," with acid proof, indelible ink, which penetrates right through the fibre of the paper. This device is being used by 90% of the Banks of Canada and the United States, as well as the treasuries of both countries. Write for full particulars and price. W. E. Parker & Co., Sole Canadian Agents, 37 Yonge Arcade, Toronto, Ontario. (tf)

SITUATIONS VACANT.

Price $1.50. MacLean Publishing Co., Technical Book Dept., 10 Front Street East, Toronto, Canada.

Between Lake Superior and the Pacific

Activity in Building at Regina—Half Holiday Agitation at Saskatoon—Fine New Buildings at Calgary—Victoria Extends its Water System.

WINNIPEG.

June 1.—J. H. Ashdown left the city recently on a three weeks' tour of the west. At present he is in Calgary arranging the establishment of a wholesale house in that city.

L. C. Marr, who has been a buyer for A. S. Smith, of Moosomin, Sask., has been engaged by the Miller-Morse Co., of this city, to represent them on the G.T.P. line west.

The Manitoba Bridge and Iron Works of Winnipeg have been awarded the contract for structural steel for the Great West Life Assurance Company's new buidling at Winnipeg, amounting to 650 tons. This is said to be the second largest contract for steel building construction in Winnipeg awarded this year.

W. W. Anderson, head of the builders' hardware department in the Ashdown retail house, visited several cities and towns throughout the west recently and was greatly impressed with the enormous building operations in many places, particularly in Lethbridge, Saskatoon and Regina.

G. E. Graham, manager T. Eaton hardware department, Winnipeg, returned to the city a few days ago from Europe, where he spent the past three months in the interests of his department. L. C. H.

PORTAGE LA PRAIRIE.

May 31.—The by-law fixing an assessment of $5,000 for a period of twenty years upon the proposed plant of the Waterloo Manufacturing Company, manufacturers of threshing machinery, of Waterloo, Ont., has been passed by the citizens. A branch was established in Winnipeg some time ago, but prohibitive realty prices interefered with the extension of the Waterloo buildings, hence the removal to Portage la Prairie.

CALGARY.

May 29.—C. A. Godfrey, manager for the Gurney-Tilden Co., Vancouver, is a visitor to the city. He is on the annual tour of inspection through British Columbia and part of Alberta. He has been making inquiries regarding the advisability of establishing a large warehouse in Calgary from which operations may be directed throughout Alberta and the eastern part of British Columbia.

P. Burns is having erected a large brick and stone business block the corner of Eight Avenue and Second Street East.

The G. F. & J. Galt Co., have purchased 75-foot frontage on Tenth Avenue, on which is to be erected a warehouse five storeys high, with basement, and the foundation built to carry the building up three storeys higher when necessary.

J. H. Ashdown, ex-mayor of Winnipeg, is a visitor to our city this week. Mr. Ashdown speaks in glowing terms of the advancement of Calgary since his last visit here. A.R.A.

SASKATOON.

May 28.—The tender of Sam Brown, of Winnipeg, has been accepted on the Saskatoon branch of the Bank of Montreal, to be erected on 2nd Avenue.

Another big contract let this week is for the erection of an implement warehouse for the International Harvester Co., on 22nd Street. Carter, Halls and Aldinger, of Winnipeg, were the successful tenders. The price given is $75,000.

An agitation is at present on foot to secure a half holiday for the stores every Wednesday afternoon during July and August. Both the local retail clerks' association and the storekeepers have petitioned the city council to put through a by-law to that effect. Some of the storekeepers are in favor of Thursday afternoon and this point has yet to be settled. The matter is under consideration now. D. G. R.

REGINA.

May 31.—Judging from the the building permits that have been taken out up to date there is every indication that the present will be a very busy season in Regina. The spring was somewhat backward and for that reason building did not commence quite as early as usual, but the permits taken out in March and April show a very marked increase over last year. The building permits issued in March, amounted to $72,730 as compared to $8,005 in 1908. In April the total for 1909 was $71,875 as compared to $31,098 in 1908. The total for the four months from January to April inclusive in 1909 is $150,650 as compared to $43,103 in 1908. A very satisfactory feature about the building permits taken out this year, is the large number of dwelling houses that are being erected. In all 42 dwellings are being erected at the present time of which number 21 are estimated to cost $3,000 or over. The figures given in taking out a building permit always rather under estimate than overestimate the value of a building. It will be seen therefore that a really good class of residence is being erected at the present time and that the citizens have confidence in the permanency of their city.

The only large building for which a permit was taken out up to the end of April was the Willoughby & Duncan Block on Scarth Street. This building has a frontage of 100 feet, 80 feet deep, three stories high with Mansard roof. On the ground floor will be five stores and the two floors above these will be laid out in office suites, each suite comprising two private offices and one general office.

There are several other large buildings projected, but the plans are not yet quite complete. One of these will be for the Heintzman Piano Co., on Scarth Street, just south of the Willoughby & Duncan Block.

Another large business block is to be erected on the corner of Eleventh Ave. and Cornwall Street by F. N. Darke, facing the Masonic Block and Darke Block, which were erected two years ago. This will complete a series of first-class buildings on Eleventh Avenue between Cornwall Street and Scarth Street leading up to the New Post Office.

Work on the Legislative Buildings is being rapidly pushed ahead and a very large staff of men is employed on these. It is estimated that the walls will be completed this year. H.C.L.

VICTORIA.

May 27.—Victoria's growing population creates many new and larger needs. One of the first and most imperative of these is water. It has been a problem here for some time how best to meet the larger demand. A large supply of new pipe was purchased, small mains were taken out and larger put in. At a cost of about $12,000 a water tower of 120 feet in height has been built, and this will give sufficient pressure to supply the higher sections of the city. The tank itself contained in the top of the tower is 40 feet high by 22 feet in diameter, having a storage of 100,000 gallons. The tower is built on the highest point of the city, in the finest residential section, and has been designed with the object of making it as ornamental as possible, in view of the surrounding residences. Buttresses ornament the sides and about seventy to eighty feet from the ground a small balcony has been built around the outside. The tower is built of concrete entirely, while the tank is constructed of concrete on the outside, with steel inside, lined again with concrete. A few towers of this sort are being used in the States.

To further augment the water supply a large reservoir has been built on a hill at the back of the city. The reservoir is almost square, each side being about 360 feet. The depth is 26 feet. These dimensions give a total capacity of 16,000,000 gallons. The walls and bottom are covered with a heavy layer of concrete to make the structure watertight. With the new pipes laid and others to be put down, the water tower and the reservoir, Victoria hopes to eliminate all danger of a water famine. The supply of water meters recently received have been installed and a further supply has been ordered. This large amount of work has been very beneficial to all branches of trade, from the number of men employed, also the large amount of material used, the plumbing and hardware trade coming in for a good share of it. W. B. C.

SAVE MONEY

By Using Our

Corrugated or Plain Round Conductor Pipe

made in 2", 3", 4", 5", 6" diameter by 8′ and 10′ lengths without a cross seam. You can buy this perfect pipe for much less than you can make up pipe in 30′ lengths. Our Eave Trough is the best; it is machine made on a steel die and every length is the same.

Western Canada Market Situation

Our Western Correspondent Reviews the Market Outlook—Hardware Quotations Corrected by Telegraph up to Noon on Friday—From Hardware and Metal's Winnipeg Office.

The retail trade is all that could be desired at the present time. The dullness which prevailed during the fore part of the season has brought about this reaction, and builders and paint contractors are endeavoring to recover lost time. Paint sales are very heavy, and local manufacturers report the heaviest season in the history of the trade. It is difficult to find a dealer who has time to talk about the trade. One merchant stated that the increase in business was not as interesting to him as the change in the tone of the trade. Customers are buying freely without the usual urgency on the part of the salesman.

Household hardware lines are moving well, particularly camp outfits. Seasonable goods such as lawn fixtures and mowers and sporting lines are marketing well. The wire market is stronger this week as well as the general lines.

We quote a decline of 45c in pressed spikes.

Winnipeg Quotations.

WIRE—Barbed wire, 100 lbs., $3.15; plain twist, $3.40; staples, $2.90; annealed wire, $2.90 base; oiled, 10c extra; bright iron, $3.10 base; brass spring wire, 29c base; plain galvanized wire, 6, 7 and 8, $3.50; No. 9, $3.10; No. 10, $3.60; No. 11, $3.70; No. 12, $3.30; No. 13, $3.40; No. 14, $4.25: No. 15, $4.75; No. 16, $5.

THE LITTLE PAINT MAN.

DO YOU KNOW THE SHERWIN-WILLIAMS AGENCY?

Say now, honest, Brother, do you understand just what the Sherwin-Williams Agency actually is? A man said to me the other day: "I had always thought that the Sherwin-Williams Agency was a mighty good one, but I had no idea that it was such a remarkable business proposition until I sat down with two of their representatives and they began to point out feature after feature and explain the advantages to a dealer in having the agency. They showed me first of all the quality of the goods, then the completeness of the line and the strength of the advertising. That decided me. I told them I wanted that agency for my business." YOU can have no idea what the S-W. Agency really is until you have had it explained to you. Write us a letter and we will see that you get full particulars—and it will put you under no obligations whatever.

The Little Paint Man.

?

If there were no other advantage in the Sherwin-Williams Agency save the exceptional quality of the goods, it would pay you to have the agency.

But the S-W. Agency is a combination of high-quality goods and the best paint and varnish advertising in the country.

It is a proposition which includes strong and effective advertising and selling helps, such as personal letters to property owners, advertising in the national magazines, electros for newspaper advertising, effective window trims, a splendid line of inside advertising, as well as special advertising features and special campaigns which we get out from time to time.

We are also creating a demand for S-W. Products, by advertising in 180 of the best weekly newspapers throughout the Dominion this Spring and Fall.

Our agency is founded on the principle of co-operation. We work for you and with you in making sales after you have the goods on your shelves.

BUILDING AND INDUSTRIAL NEWS

For additional items see the correspondence pages. Information is solicited regarding building and industrial news, the incorporation of companies, establishment or enlargement of mills, factories or foundries, municipal waterworks and sewerage systems, railway or mining news, etc.

Industrial Activity.

The Brantford Emery Mfg. Co., proposes to erect a new plant.

Johnson Bros., Brandon, will build a new restaurant at a cost of $10,000.

Finch & Finch, Victoria, will erect a four storey block at a cost of $15,000.

It is stated that a contract has been let for a $15,000 hotel at St. Lambert Quebec.

The Imperial Bank will shortly start upon the construction of a new building at Fernie, B. C.

The Pacific Fish Co. are erecting a number of warehouses on Queen Charlotte Island, B.C.

Permits has been issued to the Twin City Co., Edmonton, for a $15,000 factory and warehouse.

The Otis-Fensom Elevator Co., will enlarge its plant at Hamilton, to give employment to 600 men.

Over one thousand employees of the Canada Car Co. at Montreal have started work on full time.

E. D. Rorison & Son, are building a saw and shingle mill near Eburne, B.C., at a cost of $100,000.

R. J. Watson, formerly of Burke's Falls, Ont., is building a sash and door factory at Revelstoke, B.C.

The construction of the Dain Mfg. Co's. plant at Welland will be begun at once and completed this year.

The Western Dry Dock and Shipbuilding Co., have decided to locate at Port Arthur. They will employ 300 men.

Shepard & Morse's sawmill, Ottawa, which has been closed for some time, has resumed operations at full capacity.

Geo. Clare, M.P., is at the head of a company which proposes to operate a plant at Preston for building automobiles.

J. H. Preston is increasing the capacity of the planing mill at Medicine Hat, recently taken over from the Medicine Hat Lumber and Mfg. Co.

The Alberta Government will start work immediately on the new telephone exchange at Lethbridge. A two storey brick dwelling will be erected.

Schultz Bros., Brantford, will enlarge their plant and add to their lines the making of motor boats and portable houses.

The staff of the rod mill of the Dominion Iron and Steel Co. at Sydney has been put on double shifts. This means that the output for the summer months is to be doubled.

The Winnipeg Excelsior Mills is a new company just formed for the manufacture of excelsior or wood fibre for packing. It will erect a plant with a capacity of six tons daily.

The Carter-Halls-Aldinger Co. have been awarded the contract for the twelve storey office block to be erected at Winnipeg by J. D. McArthur. The contract price is stated to be $250,000.

The Ogilvie Co., have made a contract with the Barnett McQueen Co., of Fort William for the construction of a 300,000 bushel grain elevator to be built next the company's mill at Winnipeg.

The by-law to loan John a Minchner and others $20,000 for 20 years for the erection of another furniture factory was submitted to the ratepayers of Strathroy and carried by a large majority.

E. W. Backus, who is interested in the establishment of a pulp mill at Fort Frances, Ont., stated that a company, which formerly operated a large flour mill at Montevideo, Minn., and which had lost everything by fire, were thinking of locating in Fort Frances.

The annealing furnaces of the Canadian Sheet Metal Corporation at Morrisburg, are being dimantled and larger ones substituted. Two additional rolling mills are being set up. The galvanizing plant is to be rebuilt with a larger capacity ,and a roofing plant will be added to the equipment. These additions will enable the company to handle larger sizes of tin plate, and the present output of the mill will be more than doubled. The operating force will be considerably augmented.

Municipal Undertakings.

Galt & Smith, Toronto, have been engaged to report on a sewage disposal scheme for Nanton, Alta.

The Barrie Council have reported in favor of submitting a by-law to raise $30,000 for sidewalks and sewers.

By a majority of 84 the by-law to raise $20,000 for a system of waterworks at Gravenhurst was carried.

The Provincial Government and the G.T.P. are arranging to instal a new waterwork ssystem at Prince Rupert.

The by-law to raise $25,000 to repair and complete the Carman, Man., waterworks system was carried by a large majority. It is intended to go ahead with the work as soon as possible.

Railway Development.

The C. N. R. propose laying 600 miles of new track this season in the west.

Construction work has begun on the electric line that will connect Cobalt and Haileybury.

The Niagara, St. Catharines and Toronto electric road propose extending their line from Welland to Port Colborne.

It is estimated that $85,000,000 will be spent on actual railway construction work in Western Canada this year. Of this amount the C. P. R. plans to spend $20,000,000; the J. J. Hill lines, $15,000,000; the C. N. R., $11,000,000; and the G.T.P., $10,000,000. There are a number of newer lines also under charter, which propose to build.

General Superintendent Price, of the Canadian Pacific, states that contracts have been let for work on six branch lines in the western division, involving the construction of about 270 miles of new track. The lines include that running east from Hardisty, one east from Stettler, one north from Cheadle to Alix, one from Kipt to High River, all in Alberta, and one west from Weyburn, Saskatoon.

The most important of the new C.N.R. lines to be built this season is an extension from Vegreville to Calgary, 235 miles. Other new branches are: An extension from Maryfield, Sask., southwesterly one hundred miles; Gose Lake extension, 65 miles west from Saskatoon; extension from Russell westward twenty-five miles; from Prince Albert, thirty miles west; from Ochre River, through St. Rose du Lac, a distance of twelve miles, a branch line twenty miles north; and from Oak Point, a branch twenty miles north from Morinville.

General Building Notes.

B. G. Killoran will erect a $10,000 business block at Haileybury.

Funds are being raised for the erection of a new Y.M.C.A. building at Oshawa.

C. M. Cookson has secured a site for the erection of a business building at Victoria.

The Yorkton Storage and Forwarding Co. will erect a distributing warehouse at Yorkton.

The new Y. M. C. A. building proposed to be erected at Toronto is estimated to cost $400,000.

McKee & Weir have a permit for the erection of three brick veneer dwellings, at Peterboro, to cost $4,500.

Permits for dwellings have been issued at Oak Bay, B.C., to the following: D. R. Elcorn. $2,500; M. Carlin, $2,950; M. Carlin, $2,950.

Besides new buildings in Montreal and Westmount, the Y. M. C. A. propose erecting a $50 000 branch structure in the northeastern section of Montreal.

Contractor Grant, of Winnipeg, will shortly begin the erection of an apartment block, near the Parliament Buildings, at Edmonton, at a cost of $150 000.

The contract for the big warehouse for the International Harvester Co., at Saskatoon, has been let to Carter, Halls & Alindger Co., Winnipeg. The price is $75,000.

Eustace G. Bird, Toronto, has awarded to Nucross Bros., Boston, Mass., the general contract for a new bank building for the Royal Bank at Winnipeg. Approximate cost $200,000.

The following are recent permits issued at Montreal: Mrs. John Trottier, five dwellings, $10,000; Mrs. R. Prefontaine, detached house, $7,000; J. L. Primeau, three dwellings, $3,800; A. Gravel five dwellings, $3,000; L. Sauve, six dwellings, $4,000; P. J. Dumont & Co., four dwellings, $4,000; G. W. Faust, three dwellings, $4,000.

Cutting Patterns in the Tin Shop

ROOF FLANGE.

To make pattern for roof flange, first draw centre line A B and circles C, D of plan the size required. One-half plan is all that is necessary. As shown by 1 H, both half-circles must be divided into the same number of squal spaces and lines drawn from the points of one circle to the other as shown. Next, draw the elevation of flange, first drawing line EF, which represents the pitch of roof; then draw line G, which represents the required height of the flange; then draw one half-circle C1, and divide same into the same number of equal spaces as one-half circle C in plan. Draw lines from all points in one-half circle C1 of elevation, intersecting line G. Next draw lines from all points in one-half circle D of plan, intersecting line EF. Then draw from these points lines at right angles to line EF, and take the distance of lines L, M, N, O of plan, and place them on lines L, M, N, O in elevation. Drawing lines through the interesting points will give line J, which is one-half plan of flange on roof line. Then draw lines from points on line G to points on line EF, also the dotted lines as shown.

To construct triangles draw lines from points on line EF indefinitely at right angles to centre line AB, as base lines of each triangle as shown. Take the distance of each numbered line in plan and place on base line of triangles of the same length, but longer than the straight lines. Draw lines from points on base line to line K, thus giving the true length of each angle for pattern. To make one-half pattern draw the same as explained in previous lessons, for the distance of the spaces for large end of flange in pattern, take the spaces shown on profile J in elevation.

J. L. GRAY.

NOVEL BUSINESS CARD.

The following advice is given on a business card, issued by a western furnace man and tinsmith. On the face of his business card containing this information is the injunction to look on the other side:

Don't connect your furnace to a poor chimney.

Don't install your furnace in less than a 7-ft. cellar—better 8.

Don't let your ash pit fill with ashes or you will burn your grates.

Don't blame your furnace if your grates burn out; blame yourself.

Don't condemn your furnace until you have consulted your furnaceman. If he knows his biz he will either make it work or tell you the reason why.

Don't listen to every little breeze that comes along. Consult the man that makes a specialty of furnace work, same as you would your physician in sickness.

Don't think because it looks like a furnace it is. There are some "would-be's," some "has beens," some "never will be's," some "never should be's," and lots of good ones.

Don't take anything but the best. Price is a small item in comparison to comfort derived from the best.

LITTLE GIANT WATER MOTOR.

P. E. Boivin, Granby, Que., is putting on the market a water motor—the Little Giant—which is a very simple yet durable machine, and runs on ordinary water pressure. It will operate all kinds of light machines such as washing mashines, ice cream freezers, cream separators, sewing machines, meat choppers, and other household utensils. The motor screws directly on to the faucet, and is no trouble. It is not an expensive article, and is well worth the attention of dealers. Mr. Boivin is also manufacturing an ice creeper—the Featherweight—which is light, simple, durable, easily adjusted, and will not come off.

C. S. Jackson, Bridgeburg, has sold his hardware business to W. R. Krafft. Mr. Krafft will continue his grocery business in its present location and will carry all his hardware stock in the Jackson store.

The sunshine of prosperity brings out the hay-makers and drives to cover the muck-rakers.

The Retail Paint Trade

KEEP UP THE WORK.

Presuming that the hardware merchant is having a fair share of the paint demand that is now obtaining—and he should have a fair share if he has conducted his campaign with vigor—he should by no means slacken off in his efforts to push his lines. The man who is content with the trade he is doing never goes far ahead. It must not be forgotten that the property owner who paints his house this year, will not do it next year. Another man must be found to take his place, and so on. Very few people paint extensively every spring, and therefore the merchant, while he may be doing a roaring trade now, must look to the future. Apart from the fact that any advertising work done from now on renders his next spring campaign all the easier, the merchant must not forget that the paint demand is not confined to the spring alone. Paint should be prominent all the year round. There should be a summer campaign just as energetic as a spring or a fall one. Paint should be preached at all times.

In these circumstances therefore, the merchant should not forget his future trade. Keep the circulars going calling attention to the merits of paint. The reading of these may be varied to suit the times, but the main topic harped upon should be the necessity of paint. If possible the merchant should point out examples of what has been achieved by his paint. If any property owners have made their houses look practically new with paint, tell the readers of circulars to go and view the houses themselves, explaining at the same time how, for a small sum of money, these people have added to the value of their property as a selling proposition, how they have insured against deterioration, and how they have made their habitation 50 per cent. more cheerful and imposing.

Then there should be no slackening off in the paint displays. Do not let the old cry, "I am too busy," have any influence. There is no advertising medium so valuable as the paint display. Keep the windows up to the mark. Change them frequently. Do not let customers become so accustomed to the same window that they no longer take any notice of it. Do not let the dust accumulate on the tins and obscure the brilliancy of the cards and hangers. There should be no dust where there is paint. It is an easy matter to change the displays so that there should be something fresh for passers-by to notice and on which to comment. There is enough material from the manufacturers to alter the display frequently, while the originality of the merchant can do wonders.

One very novel idea was recently shown by a merchant, and although it was rather elaborate, its effect in attracting attention fully repaid the trouble taken in setting it. The design

BOLTS & NUTS

The reason "M.R.M." Bolts are giving such satisfaction to those using them, is owing to the care and attention to detail in their manufacture.

Material is the best to be had.

Heads are well made and set up.

Threading full and accurate.

Nuts fits perfectly.

A stock of "M.R.M." Bolts and Nuts is essential in every up-to-date Hardware Store.

Montreal Rolling Mills Co.

is not difficult to imitate especially if the merchant, or one of his clerks, is at all resourceful, and has a certain amount of ingenuity. The whole window was taken up with this display. A long shallow tank filled with colored water to represent the sea, extended almost the length of the window. It was surrounded with trimmings made of heavy paper and painted with water colors to represent stone. Kalsomine and burnt lumber give the desired effect. Sand was sprinkled over the paper and the appearance was that of a bleak and rocky shore. In the background appeared a lighthouse made of cardboard. The window panes were red, and an automatic switch light came on and off at night. In the water floated a yacht. On a high rock, beside the lighthouse, stood a large sign, painted in red and black and reading: "There is danger in using poor paints. We sell only good." Standing around the edge of the shore were cans of boat paints, canoe enamels, etc. As can be understood, this was most effective, and would repay any merchant the trouble in preparing it.

Another display, not so elaborate or striking, but very pretty in its way, can be made from cans of paint, colored ribbons and show cards. Place the cards on a table or stand in the centre of the window space. Place the show cards on the floor in such a manner that they can be easily read. Have different colored paints and tie a ribbon of the same color to each can, and let it hang down in a graceful curve to its corresponding show card. It may be necessary to cross the ribbons, but as each should be different there would be no difficulty in following them with the eye from card to can and vice versa. Let the colors harmonize, and the effect will be pleasing, especially if the cards and cans are not huddled together. Designs such as these show how easy it is for any merchant to give effective displays and what a wide range of subjects can be worked up.

Paint and Oil Markets

MONTREAL.

June 4.—Local conditions have greatly improved both as regards weather and shipments. The marked stimulation of business in all lines is exceedingly gratifying, and is naturally having the effect of stiffening prices all the way round. The North West is buying much more freely, and some heavy consignments have gone out this week to the large centres. In these circumstances a very bright feeling exists, especially as owing to small stocks a continuance of the demand is anticipated by the manufacturers.

Turpentine and linseed oil have advanced this week, while ground white lead is stiffening under a good demand and higher prices are expected. Red lead is however still feeling the effects of abundant supplies.

TURPENTINE—Owing to the increased demand for turpentine—a demand which has sprung up rather suddenly from all parts of Canada and the United States prices have gone up 2c per gal., with it is said higher prices in sight. We now quote turpentine 57c for single barrels, net 30 days.

LINSEED OIL—With the fine weather and a stimulated demand, stocks have been reduced very materially, and owing to the firmness and higher figures prevailing in the primary markets, quotations have been advanced 3c. per gal. We now quote: Raw, 1 to 4 barrels, 62c. 5 to 9 barrels, 61c.; boiled, 1 to 4 barrels 65c.; 5 to 9 barrels, 64c.; strictly net, 30 days.

GROUND WHITE LEAD—Orders have been placed more liberally than for some time past, and consequent on the advance in linseed oil quotations for ground white lead pure and all grades have been advance 10c. per 100 lbs. We now quote: Strictly pure, $5.60 to $6.10 according to brand, and No. 1, $5.10 to $5.60 f.o.b. Montreal.

RED LEAD—Despite improved business, stocks remain over abundant, and prices continue to be shaded for good size lots. For ordinary requirements no change has been made in figures. We quote: Genuine red lead in casks, $4.50; in 100-lb. kegs, $5; less quantities, at $6 per 100 lbs.; No. 1 red lead, casks, $4; kegs, $4.50, and smaller quantities, $5.50.

WHITE ZINC—White zinc shares to some degree in the increased bookings for white lead, and much better trade is reported. We quote: Dry V.M. Red Seal, 7½c.; Red Seal, 7c.; French V. M., 6c.; Lehigh, 5c.; white zinc, ground in oil, pure, 8½c.; No. 1, 7c.; No. 2, 5¾c.

VARNISHES AND JAPANS—Carriage factories and railroad shops are experiencing better trade, and are in consequence buying more freely. In addition the general trade is stocking up more freely than for some time past. All lines, therefore, are showing brisk shipments with prices firm.

PARIS GREEN—The call for Paris green is on the quiet side. The warmer weather has not yet had the anticipated effect of stimulating trade to any marked extent. We continue to quote: 1-lb. cartons, 18c.; 1-lb. tins, 19c.; 50-lb. drums, 17c.

PUTTY—One of the features during the week has been the strong demand for putty. The supply being abundant, however, there are no changes in quotations: Standard putty, 880 lbs., in casks, $1.65; in 100-lb. drums $1.90; bladder putty, 400 lbs., in barrels, $1.90; in 100-lb. cases, $2.05; in 25-lb. drums, $2; 25-lb. tins, $2.05; 12½-lb. tins, $2.25 f.o.b. Montreal.

TORONTO.

June 4.—A fine record has been made in the paint trade this week. The fair weather has induced splendid buying, and hardwaremen have placed and are placing some good repeat orders. From all sections of the country come reports

THE GUARANTEE FORMULA ON THE CAN

helps you wonderfully in selling "English" Liquid Paint.

It removes the lingering doubt from the minds of painters and house-owners, and convinces them that

"ENGLISH" LIQUID PAINT

in all its 45 shades is really made with the ideal white base — 70% Pure White Lead (Brandram's B.B. Genuine) and 30% Pure White Zinc.

This guarantee formula and the big newspaper advertising we are doing this spring for "English" Liquid Paints, makes them splendid sellers.

But "English" Liquid Paints do more than sell—they satisfy the users, and help dealers to build up permanent trade.

Just write a postal card for prices and selling plans.

BRANDRAM-HENDERSON, LIMITED

An Endorsation That Counts

When painters and decorators generally approve of and recommend a product you can rest assured that there is merit, quality and genuine worth behind it. The product so favored is

MURESCO

THE HIGH GRADE WALL FINISH

Many painters and householders use nothing but Muresco for water color wall finishing. They know by experience that it will not rub off, crack or peel; that one coat of it gives better results than several coats of any cold water kalsomine.

Muresco is a hot water finish and we are glad to proclaim the fact. Experience shows that kalsomine particles will only dissolve ***right*** in boiling water. You can corrall the painters' trade by pushing Muresco.

MAKERS OF FINE VARNISHES

Branch of

STANDARD VARNISH WORKS

NEW YORK CHICAGO LONDON BERLIN BRUSSELS

of good business and travelers, retailers and jobbers are jubilant at the way stocks are moving into consumption. While painters have not been so busy as anticipated, so far this season, they are not disappointed, and are blaming the wet weather of the past month for any decrease in work. They expect, however to have a busy Fall.

Ready mixed paints are moving well and another spurt in floor and wall finishes has materialized. Prices are maintaining themselves in all lines, and a decidedly finer tone is abroad. Especially is this so in regard to white and red lead, the advanced prices of pig lead in London and New York leading men to opine that higher prices on lead paint lines are ahead.

Turpentine is unsteady, though the market is firmer than a week ago, and the outlook seems to presage higher prices. Linseed oil has been advanced four cents by the association. This, of course, was expected, and the advance was hinted at during the past three weeks in this column.

TURPENTINE. — There is again a tightening of the market in the south and with the rapidly increasing demand in the United States prices have advanced across the border. This has brought about a firmer tone to the local market and it may be that prices will go higher before another week goes by. We are still giving 58 cents as the market quotation for single barrels, but the actual range of prices is from 56 cents to 60 cents. The low price shows an advance of a cent during the week, and jobbers are none too anxious to sell large quantities at that figure.

LINSEED OIL.—The advance of four cents, which has just taken place is general and the market is firm at the new quotations . The association meeting confirmed the new prices, which will likely hold until September at least, when the new flaxseed comes on. Raw oil is 63 cents and boiled 66 cents for single barrels, one cent less being asked for larger quantities. Despite the advance sales are just as numerous as a week ago.

WHITE LEAD.—Unchanged, though much firmer, is the market in lead lines. Paint men say prospects favor advances in all lead products due to the light supply of the raw material and scarcity of pig lead. This opinion is not generally held, however, and some jobbers seem to think the so-called world's lead trust has frightened them. Prices are low enough certainly, and if a change comes, all agree it will make for advances. In the meatime last week's quotations still hold. No. 1 is $5.40 and $5.65; pure white from $5.80 to $6, and a superior line is offered at $6.25. The demand for genuine red lead is of fair proportions. The market is unchanged as to price, $4.50 for casks and $4.75 to $4.80 in 100 lbs., being the quotations.

STAINS AND VARNISHES. — These and all Summer lines, which are particularly seasonable just now, have increased in demand. They are expected to be good sellers for three months yet.

GLASS AND PUTTY.—The movement of glass is slow. The import demand has dropped off, and direct sales are easy just at the present. Putty is steady and unchanged in price.

PETROLEUM.—Conditions and prices unchanged. Gasoline is the busiest in movement just now.

DISPLAYING WALL PAPER.

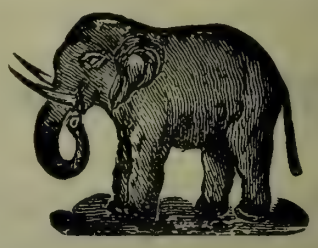
A dealer selling wall paper says that he finds the show window is a first-class place to display wall paper. We find, he says, that we get the best results by changing the windows every twenty-four or forty-eight hours. We build a rack across the back of the window about five feet high, and then drape one roll each of several different patterns from the top of this rack to the lower front part of the window. Across the bottom of the window we set a sign which reads as follows: "Every morning at nine o'clock the patterns in this window will be changed. Watch for the new designs to-morrow morning." In this manner we can display the larger part of our different patterns in the window, leaving them in the window only a short time so that the strong light does not affect them.

We have also used this scheme of displaying papers in the window; on one day we put in patterns suitable for a kitchen, together with a sign reading, "Wall paper that is suitable for your kitchen; watch the display to-morrow for the dining room. Each day we display different patterns suitable for the several different rooms in the house."

We have a dozen frames made out of light lumber, eighteen inches wide and six feet high. These are neatly made and varnished or painted. A complete pattern of different papers is fastened upon these frames, the ceiling at the top, border or room moulding in the middle and the side wall at the bottom. We had a number of signs printed at the local printing office, which we fastened upon these, giving the price of the paper and some short saying similar to the following: "We think this pattern a very pretty one for the dining room, don't you? Only 40c a roll. This pattern pleases other people and should please you. Take it home at 50c a roll." These neat advertising signs we placed in some of the local millinery and dressmaking establishments, where women were constant visitors, and other prominent places about town. Our name was printed neatly across the bottom.

PAINT NOTES.

Chabot & Lavoie, painters, Quebec, have been registered.



Delorme & Charbonneau, painters, Montreal, have dissolved partnership.

Dennis & Co., Toronto, have been incorporated to carry on a general decorating, painting, wall papering and glazing business. The capital is $40,000, and the incorporators are W. J. Dennis, A. H. Gidley, Geo. Roby, E. Roby and Fred. Stevenson.

About Linseed Oil

It is a good thing to look carefully to the oil you buy. It would pay many buyers very well to pay a couple of cents a gallon more to get oil free from sludge, clear and good drying. When one realizes that two gallons of settlings in the bottom means about three cents a gallon loss, he comprehends what we mean.

Ramsay's Pale Boiled Oil
Double Boiled Oil

have long been a standard in the market. Noted for their drying qualities and light clear color, they do no injury to the palest tint. Their action is correct, and they drain out to the last drop in the barrel. We boil our own oil. That's why it is right and the reason you save when you buy

Ramsay's Oil

A. RAMSAY & SON CO.
MONTREAL
Est'd 1842 The Paint Makers

DON'T SELL POOR PAINT

It is profitable neither to merchant nor user. It is just as easy to dispose of any article that possesses quality and merit. In the end you satisfy your customer lastingly, not temporarily.

NEW ERA PAINT IS GOOD PAINT

Your customers will realize it after one trial and remember that you sold it to them. For wear, finish, appearance, brilliancy, service and covering surface there is no other prepared paint that quite equals NEW ERA.

HERE IS ITS COMPOSITION
Pure White Lead ; Oxide of Zinc; Pure Linseed Oil ;
Turpentine and Turpentine Japan Dryers.

SELL the POPULAR

WHEN it comes to floor paints the old reliable Senour formula is best—without doubt. It has stood the test of time. Constant walking over a certain spot severely tests floor paint. Of course you can wear through any paint—but your customers will have such a long time wearing down

SENOUR'S FLOOR PAINT

that they will have forgotten **when they** bought it—but they **won't forget WHERE** they bought the most durable paint they ever saw or heard of. There's just the point—that is just why Senour's Floor Paint is so popular. It's the superior wearing qualities that win. Your trade don't want the fuss and mess of painting floors several times a year. Please them by selling only the popular Senour's Floor Paint. We supply you free with color cards and advertising. Write us for terms.

Hardware Store Business Methods.

Price $1.00

220 Pages, Bound in Cloth.

The authors of the articles in this book are for the most part practical and progressive Hardware merchants. The embodiment in these articles of the experience of such able and enterprising men and the suggestiveness of the principles and maxims presented make this volume of infinite value to that trade. NINE of the FORTY subjects discussed are:

Rules and Regulations for the Hardware Store.
The Hardware Buyer.
Good Methods in Stock Taking.
Prices and Catalogues.
Collecting Accounts.
The Merchant and His Employees.
Changing Business Conditions and How to Meet Them.
Profit Figuring System.
Starting in Business.

SEND $1.00 TODY, and the book will be mailed by return.

So-Called Rubber Roofing

Many merchants think that **RUBEROID** is a "rubber" roofing.

It is not. It contains no rubber.

For a roofing which contains rubber will not withstand the weather.

Rubber rots under exposure.

Ruberoid permanently withstands heat, cold, rain, ice, snow. It resists acids, gases and fumes. It is so nearly fireproof that burning coals thrown on a roof of Ruberoid will set fire neither to the roofing nor to the timbers beneath.

Ruberoid roofing owes its wonderful properties to our exclusive product, Ruberoid Gum.

This gum is as flexible as new rubber. But unlike rubber, exposure does not rot it.

That is why the first Ruberoid roofs, laid in 1892, are still durable, still weather-tight,

RUBEROID

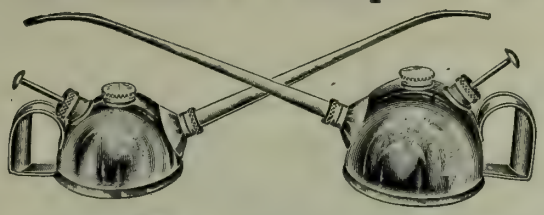
Trade Mark Registered

Ruberoid was the first ready roofing. To-day there are three hundred substitutes

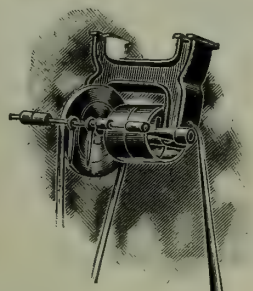
These substitutes are known as "rubber" roofings, or have names which sound like **RUBEROID.**

Pronounce it RUE-BURR-OID but spell it R-U-B-E-R-O-I-D.

But not one of these substitutes can use our exclusive Ruberoid gum. Not one of them can possibly be so good as Ruberoid.



Please be fair with your customers—fair with yourself. Explain that "rubber" roofings are merely substitutes; that there is but one genuine Ruberoid—known by the trade-mark which is stamped every four feet on the underside of each roll.



Our international advertising campaign is now in full swing. We are sure to have inquiries for Ruberoid from those who live near you. Be prepared to fill the demand which we create. A postal card will bring our dealer's plan, and will explain how we willingly stand the expense to make sales for you. Address Dealer's Department 92B.

Send for a Free Sample

Amatite ROOFING

If you will write to-day for a free sample of Amatite, the end of your roofing troubles is in sight. It is the one roofing that *needs no painting* after it is once laid on the roof.

If you would sit down and figure out exactly how much it costs to paint a smooth surfaced roofing during its life, you would find that the cost of this paint is *more* than the roofing itself. Amatite, on the other hand, has a real mineral surface, and we sell the goods on the broad statement that it *needs no painting of any kind.*

The man who puts Amatite on his buildings is insured against leaks and trouble for many years to come. Send name and address for a sample and booklet, which will prove conclusively how much better Amatite is than the old-fashioned "rubber roofings" which require constant painting and care to keep them tight.

EASTLAKE METALLIC SHINGLES

Best by Test

Make **all** your customers permanent ones—do not experiment, sell them goods that you **know** will give satisfaction—goods that have **proven** themselves.

25 years ago, after months of experimenting and designing by our experts, in deciding on just the right requirements, we began manufacturing **"Eastlake"** Steel Shingles. We have never changed the first design—in fact time has shown that it could not be improved upon. We can show you roofs that were covered with "Eastlake" shingles the first year and are in perfect condition to-day. Is not this proof that we selected the right design and used the best material—a 25 year actual test proves them the best.

Tell your customers you know "Eastlake" shingles are the most satisfactory in every respect—fireproof, weatherproof, durable and easiest and quickest to lay. You are backed by the oldest and largest sheet metal building material firm in Canada—a firm that has always "protected the trade."

The same high quality material and manufacture has placed all our goods in the front rank. **Steel Ceilings** and **Walls, Siding, Lath, Cornices, Skylights, Ventilators, Finials, Conductor Pipe, Eavetrough** and a complete line of Architectural Metallic Goods.

Lookaround you—go after those unsatisfactory roofs, send us measurements for estimates.

"To my mind AN ACTUAL TEST is much safer than one of those PAPER GUARANTEES that will not hold water."
—The Philosopher of Metal Town.

COVERTITE ROOFING

We Couldn't Improve the Roofing So We Improved the Package

Each Roll of Covertite Roofing is now equipped with metal ends, held on in such a manner that the most severe handling cannot dislodge them, yet they are easily removed when the roofing is used. It is impossible for the ends to be torn off in transit and the caps, nails and cement which are packed in the core of each roll lost out, as is so often the case with other packages.

Start the season right with a good Roofing

COVERTITE

is the best roofing in the best package ever placed on the market. Our name is on every roll which is an absolute guarantee to dealer and user. We will fill a small trial order at quantity prices. You can have all one square rolls if you like. Made in 1, 2 and 3-ply thickness. The first reliable dealer in each city to place an order gets the business for roofing.

AutoStrop SAFETY RAZOR

There is absolutely nothing that will give your customer real satisfaction, but Value.

Amongst all your assets you have none as valuable as a satisfied customer.

The AutoStrop Safety Razor ensures greater satisfaction than any other razor on the market.

Prove our assertion by using the razor yourself.

OPEN CASE

Demonstrate the razor to your customer and you will be able to show that the AutoStrop has all the merits of the best, and two or three more which are most important, and which bring it ahead of all others without exception.

Demonstrate its self stropping arrangement, show how it can be stropped and cleaned without unscrewing or taking anything apart, point out that it is the most economical to use.

Why, you'll sell it against all others. You will have a satisfied customer.

Write us at once for sample and terms

Water Filters Prevent Disease

"Hygienic"—Made of glass and brass nickel plated

Acme No. 8—Made of glass and zinc nickel plated

Hardly any city or town has pure water in the springtime, and the easiest way to make it pure is to filter it.

The ***Seed*** water filters are made on the same principle as that employed in the water works filtering plants where the water is passed through crushed quartz and charcoal.

Seed filters are conveniently made and easily looked after. They fit any kitchen or bathroom bibb cock whether plain or threaded. To clean them they are merely reversed on the tap and the water running through cleans the charcoal and quartz. ***Seed*** filters should be used on every faucet from which water is drawn for drinking purposes.

Are you selling filters in your town?

The price is low and the profit large.

They are a good selling line. Ask our travellers to show you samples or write for illustrations and prices.

No 2—Made all of brass nickel plated

No. 3

No. 3—Made all of brass and nickel plated. Smaller than No. 2.

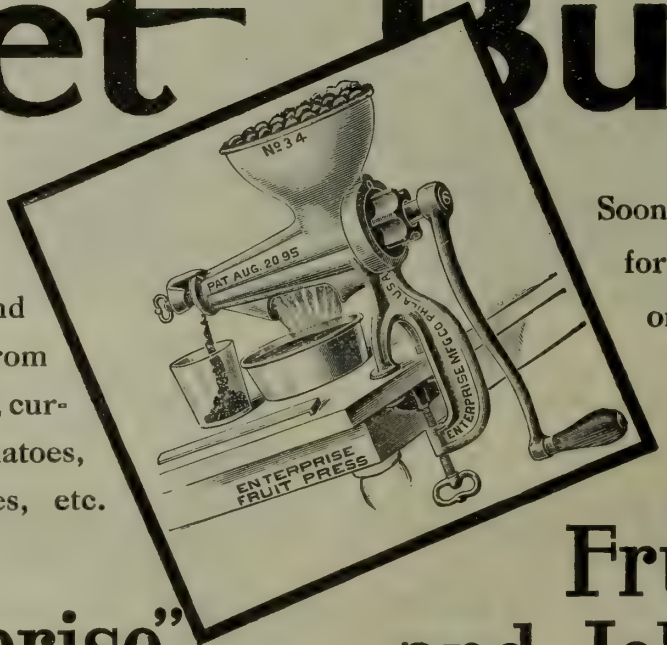
DON'T BE "AN EASY MARK"

Any jobbing house can tell you that there are dealers here and there who will take anything at all; good, bad or worse, with no regard for brand or quality just so long as it is the "article" they ordered from the traveller.

Of course, we all know that if it wasn't for this class of merchant the manufacturer of inferior goods would go out of business—but, Mr. Merchant, don't you let anybody think for a minute that you're that kind of a business man.

You don't intend to be a "dumping ground" for these inferior goods.

When you want a Hinge, you want the very best kind of a Hinge—



A CRESCENT BRAND HINGE

The up-to-date Hardware man knows what he has to pay for and doesn't take chances. There are several kinds of Hinges and Butts, and those of quality and merit bear the "**Crescent Brand.**

Brantford Roofing Agents

Have a Four-Times Advantage

Over Other Agents

The Brantford Roofing Agent has four chances of getting the order to the other fellow's one. : Equipped with four different styles of Brantford Roofing there is very small chance of an order getting by the Brantford Agent. He has Brantford Asphalt to secure the order of the man who wants a roofing with an Asphalt saturation. : : : : : :

He has Brantford Rubber (a roofing of quality—not an imitation) to supply the man who desires the best Smooth Surface, Pure Asphalt Roofing on the Market. : : : : : : When you are offered a very cheap Rubber Roofing, stop, and consider that the genuine good quality Rubber Roofing cannot be supplied at their prices—a poor Roofing is dear at any price.

"Brantford" "Roofing"

He has Brantford Crystal to take the order of the man who believes that a thick mineral surface, no paint roofing is best for his requirements. : : : : : : He has Brantford Mohawk for the man who desires a good, sturdy roofing at a low cost. : Don't let the other fellow get the Brantford Roofing Agency. Get it yourself, and secure a four-times advantage over him. Sit down this very minute and ask us to send samples, dealers' catalog and co-operation sales plans. Remember, we don't compete with our agents, but instead render them the kind of assistance that finds prospects for them and clinches sales.

How to Save Money in Fencing

"IGEL" BARB WIRE

Ordinary Long Barbed Wire is DANGEROUS
Many valuable cattle have been ruined
by Long Barbed Wire
"IGEL" Short Barbed Wire is NOT DANGEROUS, quite as effective, and Cheaper.

Manufacturers: Felten & Guilleaume, Lahmeyerwerke-Actien-Gesellschaft, Carlswerke, Mulheim-on-Rhine.

For Particulars apply to Watson Jack & Company, Montreal.

UPSIDE DOWN

or any other way you will find that the

DILLON HINGE STAY FENCE

will stand the test. Every time you put a severe strain on the wires of the ordinary fence—the fence is lowered and disfigured.

With the hinge stay there is no injury to the strand wires as the fence gives at the hinges and it is impossible to bend the stays. Its attractions are the quality of wire, hinge in the stays and prices.

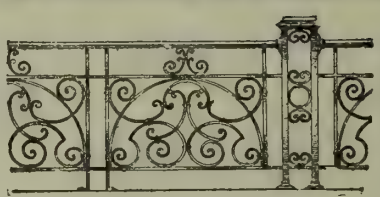
SHRP-SHAVR SAFETY RAZOR

25c.

There is no better razor sold at ANY PRICE

We do it to Sell our Blades

Sold under a positive guarantee. Your money back if you want it.



Shrp-Shavr Razor Co
Smih Hardware Co., Limited
2 & 4 Lemoine Street
Montreal, Canada

We sell it at 25c to create a quick and large market FOR OUR BLADES because we make the BEST blade. In fact, "it's all in OUR BLADES." The profit to the retailer as well as to the manufacturer is in the continuous sale of blades.

The frame or blade-holder is beautifully SILVERPLATED, and the adjustment is absolutely correct. It fits the face. The blade can be adjusted or released instantly. But you don't shave with a razor frame whether it costs $5.00 or 25c., the blade is the thing.

Our proposition is a revelation and revolution in safety razor selling. The SHRP-SHAVR is the ORIGINAL 25c. RAZOR.

Martin's Store Ladder
Low Down High

For all merchants that carry merchandise on shelves enquire of E. R. BASE, Toronto

A Few Testimonials

Rockford, Ill., May 27, 1908.

Mr. S. B. Martin, Dalton, Ohio,
Dear Sir,—Ladder is very satisfactory—the new track holds up and were we fitting a "string of stores" we should place your ladder in each one of them.
Very truly,
Hunter Hardware Co.

Toronto, Ont., Sept. 28, 1908.

Mr. S. B. Martin, Dalton, O.
Dear Sir,—We are well pleased with the "Low-Down-High" Ladder you installed in our warehouse some weeks ago. We find same works very easily and smoothly and makes the work of filling orders from the shelves a very easy matter compared with the old style of ladders. We will be glad to receive quotations for Ladders for other parts of the Warehouse.
Yours truly, T. Woodbridge & Co.

The Celebrated "Dreadnought" Milling File

A substitute for Files which is revolutionizing File Work. A great cost reducer; a simple and radical improvement on the ordinary style of hand files; it cuts from 300 to 500 p.c. faster than an ordinary file; it is self cleaning; it can be sharpened four times; it cuts equally well all metals, also wood and marble; its cutting edge outlasts from five to ten ordinary files; although practically a rasp, it leaves the surface smooth. N.B.—The Dreadnought is adaptable to every job in which ordinary files can be used, expediting the work and doing it better, and for numerous jobs usually milled in machines. Gold Medal, Franco-British Exhibition, 1908. Gold Medal, International Exhibition, Madrid, 1907

HAMILTON (22 Calibre) RIFLES

Money Makers

Models 27 and 027

Prices $2.00 and $2.25

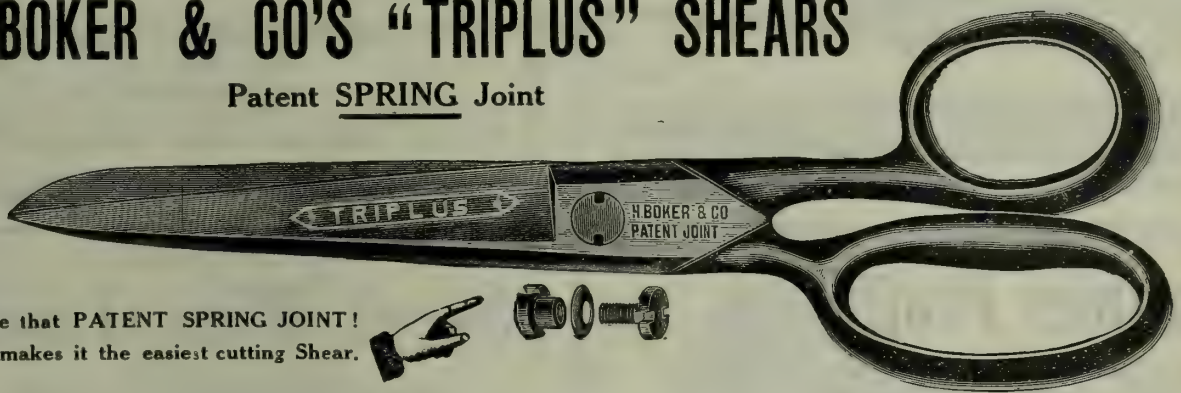
We Specialize on Boys' Rifles

We build our rifles under patents exclusively our own and confidently claim to make the **best rifle ever built for the money.**

MODEL No. 27 is an efficient sporting rifle, with hammer action, of few parts and exceedingly simple, using 22 calibre short or long cartridges. The barrel is bronze, rifled and steel jacketed, finished in blue black gun finish. Breaks down for loading and ejecting shells. Flat stock and forearm of gun of gum wood. A beautiful model, symmetrical and well balanced. Barrel is 16 inches long, length of rifle over all, 30 inches. **Price $2.00.**

MODEL No. 027 is exactly like No. 27, except the stock and forearm, which are of genuine walnut, turned and beautifully finished. **Price $2.25.**

Other models are Nos. 15 at $2.00, 19 at $2.50 and 23 at $3.50, each a winner in its class.



Our continuous advertising in the boys' papers will bring the business to you, as every boy will want one and you should have a stock on hand. **Write for catalogue and net trade prices.**

CONGO NEVER LEAK ROOFING

THE GUARANTEED ROOFING

One of the most attractive features about Congo is that you get a genuine Surety Bond with EVERY ROLL. This Bond is issued by the National Surety Company. EVERY roll of 3-ply Congo is guaranteed for a period of TEN YEARS if printed directions are followed.

Thus the buyer is protected for a long time by the strongest guarantee ever issued, backed by a Surety Company whose bond is as good as the Government's.

That Congo is made of the right stuff—durable and lasting, is attested to by the fact that the Surety Company was willing to back it, and for so long a period.

Congo is really a better purchase than ever before.

In addition to the Surety Bond, we furnish with every roll GALVANIZED CAPS, instead of the tin caps or nails supplied by others The galvanized caps can't rust or bend or break. Liquid cement is also furnished free.

We mean to get the roofing trade of the country and think these SPECIAL FEATURES will come pretty near landing it.

Send to-day for free Sample of Congo and a copy of the Guarantee Bond.

Enterprise in Selling Metal Ceiling

A City of 18,000 Population Where Nearly Every Store Has Metal Ceilings—Any Hardwareman Can Do Almost As Well If He Goes After The Business Intelligently—Tin Roofs For Fire Protection—Methods Of Securing Trade Through Contractors.

The Hardware Trade. published at St. Paul, tells of a place near that city where but two or three stores in the entire city of 18,000 people are not covered with metal ceilings. This is simply because one local hardware man interested himself in pushing metal ceilings, with the result that he not only made very handsome profits in his business, but he did most of the work through the winter when outside work is very quiet. This single concern must have erected in the last five years considerably above a hundred ceilings in its own town.

Metal ceilings are clean, durable, economical and remarkably attractive. In fact, very few up-to-date stores are being erected now without them. The very best thought and artistic effort in the whole country has been expended in originating handsome designs in stamped metal and it is possible at the present time to get something very artistic in decorative material, where years ago only plaster and narrow boards could be considered. The first named is perishable and soils very easily and the last named is prohibitive on account of its expense and is also very inflammable.

Hardware merchants have an opportunity to develop business if they have the enterprise to grasp it. There are times when trade is dull, days when the proprietor or senior clerk can be spared from the store for a few hours without loss of trade. Why not, in such a time, make a canvass of the merchants in your town with a catalogue showing attractive designs of metal ceilings and roofings. The hardware merchant buys bunting and other material for window trimming or store decoration—why not suggest to the dry goods man that he improve his store by putting up a decorated ceiling.

A tour of the stores in town should result in a lot of business as well as in getting beter acquainted with fellow tradesmen. And what is said of making a canvass of the stores applies equally well to the property owners and farmers. Many buildings in town and outside need new roofing or siding and the merchant who is progressive enough to go out looking for this business is more likely to secure it than the dealer who sits in his store and waits for the plums to drop into his basket.

GIVE CONTRACTORS A COMMISSION.

E. K. Spinney, Yarmouth, N.S., has been very successful in developing sales of metal ceilings and walls in his district. As a jobber, he cannot make a direct appeal to the consumer other than to do all in his power to educate the master builders in his territory to the advantages of using metal goods. These he supplies with catalogues showing the materials and designs manufactured by the firms he represents and he finds this an effective method. He reserves them a commission on all goods they sell, and being interested financially in extending the use of the goods, they induce many customers to specify metal roofing, etc.

Another method he adopts is to enclose slips advertising goods in all invoices sent to customers.

Mr. Spinney says: "For an article that has become so popular and that is within the reach of people in moderate circumstances, the best advertisements come from the people who are using the goods themselves. They naturally discuss with their neighbors any new material of this kind and if it pleases and gives satisfaction, as this material apparently does, it induces other people to use it."

MONEL METAL IN CANADA.

B. & S. H. Thompson & Co., Montreal, are the Canadian agents for the monel metal sheets manufactured by the American Sheet and Tin Plate Co., Pittsburg. This new metal, which was recently described in Hardware and Metal, is causing a great amount of attention from sheet workers, as it possesses distinct advantages over copper sheets, especially so far as roofing is concerned. In sheet metal form alone its scope is a very wide one. Being a new metal there is naturally a paucity of general information on the subject, and the Canadian agents are willing to give information and furnish samples and prices of the product.

TIN ROOFS FOR FIRE PROTECTION

Just as the furnacemen have sent broadcast the information that the Collinswood, Ohio, disastrous school fire did not originate, as was at first reported, from the heating apparatus, all roofers should point out the damage from fire which could be avoided if tin roofs cover buildings, suggests the Metal Worker in a recent issue. This information should be impressively brought to the attention of intelligent men who are erecting buildings. This coupled with the fact that a lower insurance rate is given commonly on buildings having tin roofs should enable the tin roofer to secure the contract at a fair price even when competing with other roofing materials of lower cost. The facts are on the side of the tin roofer and he should cultivate the salesmanship which will enable him to present convincingly the information and secure the contracts. The tin roof has so many advantages when all things are considered that the roofers of the country should start this year in concert proclaiming its merits and protect the property of their customers while benefiting themselves. Whatever may have been the basis for the complaints of the roofers in the recent past, there still remain indisputable facts as to the merit of the tin roof which justify all efforts to extend its use in building construction.

SHEET METAL ROOF IN FIRE.

The protection afforded by sheet metal roofing in the event of a fire attacking a building on which it has been placed was shown recently at Norfolk, Va. The building was occupied by the Norfolk Veneer Co., and was covered by a high grade sheet-iron, No. 28 gauge. It is stated that there was considerable amount of salvage of machinery from the fire, which unquestionably there would not have been had not the building been provided with a sheet metal roof. Whole sheets of the roofing remained intact despite the flames and afforded a covering for such of the contents of the building as escaped destruction.

INTERESTED IN CANADIAN BUSINESS.

The Wheeling Corrugating Co., Chicago, Ill., one of the large independent concerns operating its own rolling mills at Wheeling, West Virginia, are developing a market in Canada for their varied products, which include all kinds of sheet metals and products, such as roofing plates, shingles, ceilings, conductor pipe, eave trough, galvanized and hollow ware. J. Torbit, who has the export trade in charge, is enthusiastic about the possibilities of Canadian development and states that his company's announcement in the spring number of Hardware and Metal, brought them in touch with some very desirable customers. According to Mr. Torbit, the United States Government specifies coke plates for roofing on all Government buildings, next to this being the old style tin roofing so long in use in the United States, and following this the more reasonably priced galvanized roofing.

Mr. Torbit intends spending his summer holidays in Canada this season.

A General Review of Conditions

An Address by A. C. Bartlett, of Hibbard, Spencer & Bartlett, Chicago, Before the National Retail Hardware Association—The Jobber's Side of Various Trade Problems Outlined.

The evolution of hardware, and the progress of its marketing have followed the same course of development from local home production to the wide range of exchange which has marked the general progress of civilization and better living in this and other countries. Crude utensils and implements have given place to well-made and highly finished tools and machines, and the early methods of barter are superseded by the newer methods of merchandising.

The hardware business began in the dark and dirty corner of the general store, emerged by degrees into daylight and lamplight of an approximate equality, and finally, adandoning its companions, started upon a career of its own, with a full-fledged hardware sign over the front door. The casual and superficial observer reaches the conclusion that the business is now engaged in a recessional movement, but a careful study of the conditions will warrant a different conclusion, that it is forging ahead—is making progress in the right direction.

The Tail Wags the Dog.

It is true that in the large cities the department store has made inroads upon the business which formerly went to the exclusive hardware establishment, but, on the other hand, the great bulk of the trade, represented as it is by the country retail merchants, has been extended and increased by added lines which, under previous allotments, belonged to other branches of merchandising. In other words, what was formerly considered the tail of business has begun to wag the dog. It has been discovered that not only can the hardware store be made more attractive in appearance, and therefore more readily and cheerfully visited by prospective buyers, if its stock and show rooms are not exclusively devoted to nails, barbed wire, pitchforks, strap hinges, screws, carriage bolts and kindred articles. Naturally, the more profitable lines are those which can be displayed in the front window, in glass cases, and upon a well appointed division of floor space, and which require the better salesmanship to insure their prompt sale. Articles, notably those classified as machinery, which were formerly sold by demonstrators and canvassers at high price and great expense, are now part of the regular hardware stock and are sold in the ordinary course of trade. Paints and glass have disappeared from the drug store and appeared in the hardware store because they easily belong with building material and trimmings. Cutlery is steadily finding less favor in dry goods, notion and drug stores, and is becoming a larger element in the sales of the hardware merchant, partly because the hardware dealer handles the higher quality and keeps a better assortment, and partly because he has learned the advantage of making a handsome display of this attractive line. Guns, ammunition and sporting goods are no longer divided between the exclussive handlers of these lines and the druggist, but are now generally sold by the hardware dealers. Many decorative articles, and those designated as Yankee notions, add to the artistic effects and to the net profits of the hardware stores.

Evolution in Jobbers' Stocks.

What is true of the retail is equally true of the wholesale stock. One of the great advantages which the jobber possesses over the manufacturer is his ability to supply upon demand a large variety of articles, all of which can be promptly shipped under one invoice, thereby economizing in labor, in time and in transportation expenses. The greater variety which the jobber can consistently furnish, the greater is his advantage over the manufacturer, and the more valuable are his services to his customers. And so the modern hardware jobber is carrying lines of goods which two decades ago would have been considered very much out of place in their present environment; and the retailer is doing his full share towards reconstructing the indices of those volumes which name the articles bought and sold by the various branches of trade.

I recall the question asked by my worthy senior a number of years ago while watching in our cutlery room the instalation of a show case for cut glass ware. "Mr. Bartlett, is it possible that we have come down to this?" This evolution is partly due to the marvelous prosperity and rapid growth in wealth of our people in every section of this great country. With an increased ability to purchase has come a natural desire for better quality and finer goods. Education has been extended into the realm of esthetics by travel, by expositions and by the natural craving for refinement as the human moves farther and farther away from the age of savagery. The family which formerly ate its beans and cabbage from tin pie plates with iron-handled knives and forks is now having its winter strawberries served from a cut-glass fruit dish with a silver spoon.

Jobbers' Special Brands.

The demand for better things has manifested itself not only in the direction of luxury, but in insistence upon higher qualities of staples, of tools, and of what we call shelf goods. This demand has led the jobbers to select the highest grades produced by the manufacturers of various lines and assemble them under a single trade mark or brand, thus enabling the retailer to offer a large assortment of goods, each article of which carries the distinctive mark of high quality. This renders the retail stock self-advertising, for, "Any article of high quality sold to a consumer advertises, without cost, every other article which bears the same brand." This self-advertising feature, and the assurance of substantiality, uniform good quality, are not the only benefits which the retail merchant has derived from the exploitation by the jobber of special brands. It has given him an object lesson in the unwisdom and unprofitableness of supplying his wants as they occur from each and every salesman who happens along at the time those wants manifest themselves. A retail, like a wholesale, stock, made up of lines, each of which carries a variety of brands, is not only unsightly, but unsatisfactory, and is less profitable than one selected with a view to having the articles in each line differ only in size or construction. The, at least, partial control of a brand in a local market, reduces the competition between retailers to a minimum. As an illustration, many of the merchants in this assemblage will remember when the hardware stock was not complete unless it included Ames shovels, an article so well known and so staple that, wherever competition existed, was necessarily sold at a very light margin of profit. No better shovel than that bearing the Ames label is made to-day, but the ratio of its sales has become exceedingly small.

Catalogue House Competition.

Prejudice of the retailer against some manufacturers' brands has resulted from the innovation and competition of the catalogue houses. Naturally, neither the jobber or retailer cares to assist in distributing the product of the manufacturer who openly or surreptitiously supplies catalogue houses with his goods, at the lowest prices charged the largest jobbers. A merchant at Madison, Wisconsin, rightfully contends that he should be placed upon the same general basis of prices as a retailer in the City of Chicago, if he is to successfully compete for the consumers' trade in his own neighborhood; trade, which by the rule of environment and of tributary advantage, belongs to him. The two arguments in justification which the offending manufacturer offers, are, first, that the catalogue houses buy very large quantities and, therefore, the temptation to sell them at low prices is too strong to be resisted, and, second, that

these houses buy and introduce articles which the country retailers cannot be induced to put in stock and display.

If the only distinction made between different classes of trade is to be based upon the ability to purchase quantities, the retail business of this country will soon be centered in a very few catalogue houses, located in a very few cities, and there will be no room or use for the country merchant. That such a condition shall or shall not prevail in the future, is, I believe, within the province of the retailers of this country to determine.

Retailers Have a Remedy.

While, as I have said, there is a well defined prejudice against handling the brands of goods which are passing through each railroad freight station, and each express office, in their route from the catalogue houses directly to the consumer, there is a lack of zeal and of fixed determination on the part of the dealers to absolutely exclude, so far as possible, those brands from their own stocks. Do you realize that if all the members of the associations you represent should earnestly and with one accord discriminate in favor of their friends and against their real enemies among the manufacturers of the general hardware they handle, in twelve months not a catalogue house in the country could advertise an attractive assortment of hardware? Do you realize that as soon as manufacturers of specialties in your line learned that you are really in earnest in this matter, such specialties would be withheld from those houses, and the catalogue business, so far as our branch is concerned, would be absolutely dead? Do you realize that if each of your members would awaken in this community among dealers of other lines of merchandise—dry goods, grocery and general merchants—this sentiment, this determination to use the influence and power which they possess in the interest of their own and their neighbor's business, the trade of catalogue houses in all lines would soon be on the wane?.

One Plan that Failed.

You say this means work. Certainly it means work. persistent, hard work, but is there anything in this world worth having which does not require effort to secure? Is there any greater pleasure in life than that which results from achievements, especially when the obstacles to be overcome are great? The loyal manufacturers and jobbers cannot successfully fight this battle without substantial aid from you who are nearest the consumer. So long as you show indifference regarding the brands you sell, as to whether they are competitive or non-competitive; so far as competing stocks of catalogue houses are concerned; still further, so long as you demand from your jobber the brands of goods which are in evidence in catalogue houses in preference to those of equal or better quality which such houses cannot purchase, so long will you continue to build up the kind of competition which you so emphatically denounce.

The plan which at one time was adopted by both jobbers and retailers (and which is still to some extent in vogue) of insisting that manufacturers who sell to catalogue houses should compel their customers to advertise prices affording a profit to the general retail trade, has proved to be a boomerang. One buyer has repeatedly told me that, without question, he alone has erected two stories upon a new building of a catalogue house by strongly advocating this plan and thereby adding to the profits of that institution. So long as ten per cent. of the manufacturers (and unless the more drastic means are adopted there will always be a greater than ten per cent.) cater to this class of trade, with no selling price restrictions, there will be a sufficient number of items to advertise at or below cost to render the whole assortment attractive. Americans love to be fooled, and none are more susceptible than the buyers of merchandise. Orders sent to catalogue houses for goods advertised at cut prices will carry with them memoranda of all the items wanted by the household and by co-operating neighbors, upon the presumption that if some prices are low, the others are necessarily low.

New Goods Must Be Introduced.

As I said, the second excuse offered by manufacturers for selling to catalogue houses is that they buy and introduce articles which the country retailers cannot be induced to put in stock and display. I believe this excuse is a valid one, and that the indictment could well include city jobbers as well as country retailers. Every merchant is adverse to putting time and labor upon an article which is not known to consumers, although, as a rule, the largest profits are realized upon the sale of new articles which have not reached the competitive stage. I remember hearing some years ago the representative of the manufacturers of Bailey planes say that when his people got out a new plane, they found its introduction next to impossible until the catalogue houses through their wide advertising facilities, had made it popular among consumers.

If all merchants, wholesale and retail alike, would do more real missionary work by way of enlarging their assortments with the latest product of the manufacturers, displaying them in their ware rooms, and talking them to their customers, they would not only, to an extent, relieve the dispensers of catalogues of some of their self-imposed duties, but would increase their own profits. Let me say at this point that I do not believe that there has been so nearly a universal neglect of opportunity by retail merchants in any other direction than in that of advertising. I do not mean bill posting, or unnecessarily newspaper advertising, but rather getting next to customers with something equivalent to personal interest or contact. There are thousands of farmers and mechanics all over the country, each of whom is confident that the head of the catalogue house feels a deep personal interest in his welfare because he has received from him letters filled with warm expressions of friendship and assurances of loyalty to the interest of the particular class of citizens to which the farmer and mechanic belong; and with those letters have come large picture books which must have cost great sums of money to compile and publish. These books are accepted as souvenirs of good will.

Retailers Neglect Opportunities.

In contrast to this method of securing business what are the regular retail merchants doing, Are they studying the prospective wants of their customers, calling upon them, writing letters or sending circulars to show their appreciation of past trade and solicitude for present and future orders? Are they doing as much to "get next" to people with whom they are acquained, as are distantly located strangers to "get next" to the same people? Our house (and I presume other jobbing houses have done the same) undertook to assist a little in this direction by issuing small, illustrated price lists containing low, but still profitable prices which our customers could send out, with their names, and their's only, upon the title page and elsewhere, accompanying these lists with personal letters of their own writing. The main object was to attract visitors to the retail stores. Now our people are in something of a dilemma. There are quite a large number of our customers who tell us that they consistently and conscientiously tried the plan and that the results were surprisingly good. They beg us to continue the issue of these small books and to send new ones periodically. The larger number of our customers have derived little or no benefit from the plan. Investigations lead us to believe that the want of success upon the part of any merchant was due to his putting the books upon his counter and trusting that by some miraculous or automatic process, they would do their own work; or to his dropping them into the waste basket because he did not wish to make the exertion which would be involved in their proper distribution. There may be a hundred better methods for reaching the consumer, but the retail merchant should certainly adopt and employ one or more of the hundred in attracting the attention and thereby securing the patronage of consumers.

Merchandising and morality, commerce and conscience, trade and truth, are in theory bound together by the closest ties of relationship, and in practice, those ties are becoming more generally recognized and observed.

The associations which you have formed and are maintaining not only promise, but assure a constant and more perfect exhibition of those principles of frankness, fairness, unselfishness and integrity which are marking the progress of the business world.

Silverware Department in Hardware Stores

The Improvement in Hardware Store Fixtures During the past Generation Has Made it Possible to Encourage Women Buyers And Add Plated Ware to the Cutlery and Housefurnishing Departments.

There is no doubt that the handling of silver and plated ware is steadily extending among the hardware trade. Very few stores are without the most common articles, while progressive dealers are constantly adding to their lines and in time the general hardware store will carry as complete a department of silver and plated ware as it now does of sporting goods, and that is saying something. And there is no reason why the hardwareman should not extend himself on silver and plated ware. The days are gone by when he felt doubt as to the advisability of adding to his staple lines, or of going far out of the beaten track.

Selling conditions have changed within recent years. The hardwareman has now to face a much keener competition, and in order to do this and prosper, he recognises that he must grasp every opportunity of increasing the scope of his business. The greater the variety of his merchandise, the greater the hold upon his community, and the higher the class of articles sold the better the profit.

Increase Selling Scope.

The change, too, that has taken place in the character of the hardware store helps the merchant in extending his selling lines. The ornateness of the interior decorations, the elaborate show cases, the glass counters and silent salesmen, the ornamental fixings, the artistic trimmings. and the general superiority of the present day store as compared with the typical one of a few years back, all tend to spur the merchant to increase his selling scope. Articles which were incongruous, when counters were laden with staple lines of hardware, when barrels of colors and oils, dusty stoves and ranges made the interior impassible to dainty frocks, are no longer so. One could not imagine silverware being sold in those days, but now it is different. The hardwareman has realised that he must attract the womenfolk into the store and to do this he must add to his attractions, and what greater attraction can he have than a department of silver and plated ware.

The Buyers of the Future.

Undoubtedly the women are the buyers of the future. Nowadays men have neither time nor inclination to do much shopping. They have come to depend upon their wives to do it for them, realising that it is in much better hands. So the women have come to buy the stoves, the general articles that are wanted in the house, the paints and so on. In this the hardwareman has secured one great advantage. A man goes into a store with the single idea of getting the article he wants, and of clearing out as soon as possible. The woman is prepared to be attracted by anything pretty she sees, and if there is nothing forthcoming she is disappointed. The merchant must cater to this, for it is a strong influence in his favor. There is no doubt that hardware merchants can sell silver and plated ware successfully. It is proved by the large stores, and in a more restricted way by the smaller ones. But the very fact that the average store can carry some of the lines proves that the department can be worked up, for silverware buying by the public at the hardware store is yet in its infancy.

Display all the Year Round.

At Christmas the dealer makes a display of his silver and plated ware, why does he not do it all the year round so that customers can become thoroughly familiarised with the fact that he does carry these goods. Present giving is not confined to one season of the year alone, there are birthdays, and marriage days, and other anniversaries which need recognition all the year round, while the housewife is also ready to add to her stock of silverware. If the merchant accustoms his customers to see a silverware department whenever they enter the store, they will remember the fact when they want something of that description. Otherwise the merchant will be lost sight of. There is no reason why the merchant should not handle a comprehensive stock. The appearance of his store is no longer against an adequate display, the womenfolk are coming into his store in increasing numbers, and the fact that the hardware store is well fitted for the distribution of other necessities besides staple lines is becoming generally recognized. Silverware can undoubtedly be made part and parcel of the hardware business, just the same as cutlery, and sporting goods. It simply means cultivation on the part of the merchant, his recognition that the field is there before him, and a comprehensive stock. He must also not forget that to bring out his ware on a few isolated occasions, and then to bury the stock away in tissue paper for the rest of the year, minimises his chances from the outset.

Profit on Silverware.

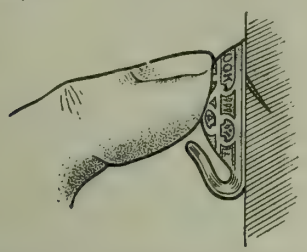
As we have pointed out before, the profit to be derived on silver and plated ware generally is much greater than on most of the staple hardware lines. And this is a consideration when competition has cut so deeply into the profits of the dealer. He cannot get the price for his goods that he did when his store was the only one in the district, or before the mail order house made its appearance. It is imperative that he should always be on the look out for more profitable lines, and in the pushing of his silver and plated ware he has a good oportunity already at hand. A merchant will spend a great deal of time and exert much personal effort to sell a staple line of hardware on which he gets little profit, whereas if he used those efforts to sell a customer a silver or plated article his turnover would be greater, and he would have helped to that extent to encourage a new demand.

No Half Hearted Efforts.

But the merchant if he wants to make a success of his silver and plated ware, must use no half hearted efforts. He must display them on every occasion, and make them a prominent feature of his interior decorations. And what article looks more attractive than silver and plated ware, or helps more in the finish of a pretty window. A good display of these lines sets off the whole store, and their display would raise the tone of the store in customers' eyes, and certainly attract the attention of all who enter the store. Ths time is coming when people will connect the hardware store with silver and plated ware, just as the have always connected it with cutlery and housefurnishings. And the hardwareman in encouraging this trend is helping himself in more ways than one.

HARDWAREMAN WINS HONOR.

The first concert of the Parkhill Choral Society was given on June 1, about 100 singers being under the leadership of E. A. Humphries, a member of the hardware firm of A. W. Humphries & Son. Speaking of the concert the Parkhill Post says: "Every person present whether consciously or not, paid tribute of honor to Ernest Humphries to whose untiring efforts the wonderful success of the affair was due. From the first stroke of the conductor's baton all through the difficult list of songs the members of the Society fixed their attention, without wavering, upon Mr. Humphries and sang with a precision and clearness which delighted every hearer. After the concert, Mr. Humphries was the recipient of the hearty congratulations of people from all parts of the town. The work he has done cannot be other than of the very broadest and most lasting benefit and he has certainly succeeded in giving Parkhill the very greatest musical treat in its history."



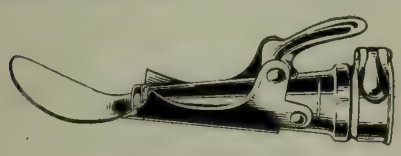
ACCEPTED NEW POSITION.

June 8.—J. Drewe, recently manager of the Calgary branch of the J. H. Ashdown Hardware Company, has joined the staff of the Winnipeg Paint and Glass Company, at Winnipeg. A few weeks ago Mr. Drewe was transferred to Winnipeg and it was understood that he would be manager of Ashdown's Winnipeg branch. The announcement is now made that Mr. Drewe has returned to his old line of paints, oils and glass.

Novelties and New Goods

HANDY WALL HOOK.

The handihook, a most simple and convenient hanger which is being extensively used in the United States, is being put upon the Canadian market by the Manufacturers' Sales Company, Birks' Building, Montreal. The great feature of this hanger is the fact that it needs no hammering or screwing. With a push of the thumb the hook is firmly held—



Method of Attaching Handibook.

so firmly that it will hold up to ten pounds. The handihook is made in a fine brass finish, and is small, neat and ornamental. As can be understood such a convenient hanger has a thousand uses in the home, office, factory, etc. The hook can be fixed anywhere in the wall or woodwork, and owing to the smallness of the pin leaves no ugly marks on removal.

NIAGARA SPRAY NOZZLE.

The Time Saving Coupler Co., 166 Bay Street, Toronto, are now ready to supply the Niagara Spray Nozzle, the latest addition to their line of hose equipment. The nozzle is fitted with the easily worked latch attachment which makes the "time saving" couplers, tap and nozzle adjusters so popular with users of hose for lawn or garden use. It is cast in one piece and is claimed to be absolutely non-leaking. A great advantage of the Niagara is that the force of water is not decreased when the spray attachment is used, the full volume being thrown onto the spoon and

Niagara Spray Nozzle.

a 15-foot spray delivered in such a delicate manner that plants cannot be injured. The life of the hose is lengthened, also, by removing the back pressure caused by reducing the force of the water. The hose attachment, without the spray, on a test made last week on a Toronto street hydrant, threw a stream of water over 60 feet but the force of water was greater than usually secured from a garden or lawn tap. The Niagara Nozzles list at $8.30 per dozen and they have been in great demand for use in parks and large gardens. Mr. Musgrave, manager of the Time Saving Coupler Co., states that hardwarmen in some sections have been slow to take his line up owing to the price being higher than other hose attachments. He states, however, that the salesman who takes the trouble to illustrate the simplicity of the line, talking quality instead of price, will have little difficulty in making sales. In Ottawa, a plumber has secured the agency and sold several large bills of goods to the park commissioners, while in Markoale and other places orders for fire equipment in building have been placed for shipment through the local hardware merchant. There is a wide field, therefore, for the dealer who uses progressive methods of pushing the sale of such a line.

Descriptive circulars will be sent to any hardware merchant on request.

Catalogues and Booklets

Manufacturers or jobbers sending printed matter for review, should draw attention to the new lines listed; and retailers sending for catalogues or other matter, should write on their regular printed letterhead and mention this paper to make clear that they are in the trade.

Hardware Manufacturers' Catalogue.—A modest little 24-page catalogue descriptive of hardware and kindred lines manufactured by the Taylor-Forbes Co., Guelph, was circulated some years ago among the trade, it being the company's first attempt at publicity work. Since then, however, the line of their manufactures has increased and the 1909 catalogue just issued and numbered "H-50," is a large volume of 256 pages filled with illustrations and descriptions of general hardware lines and specialties sold by hardwaremen and made by this company. The book is substantially and attractively bound in blue cloth-covered boards and the letters are stamped in gold. Besides this general hardware catalogue the company has issued separate catalogues for all its varied departments. Twelve pages of the volume are given up to descriptions of the different kinds of lawn mowers and the various parts entering into these machines. But the catalogue is filled with descriptions of other articles—builders' hardware; door pulls and drawer pulls; hooks and brackets; bolts and plates; dampers; cobblers' outfits; tools; kitchen and household utensils, and time and labor saving devices and novelties that will interest the up-to-date hardware man fortunate enough to secure a copy. The volume is restricted to circulation among the trade and hardwaremen wishing to obtain a copy should write a request for the catalogue on one side of their letter heads. The volume is worthy of a place in any hardware store office for reference and it is well worth the trouble of sending for.

Unique Hardware Articles.—The "Industrial Department" of Hardware and Metal some short while ago made mention of the Hardware Supply Co., of Grand Rapids, Mich., locating a Canadian branch at Hamilton. This company are manufacturers of furniture hardware, and in their "Catalog No. 8" give illustrations and descriptions of the various articles made by them. There are door catches, fasteners and bolts of ingenuity and simplicity; and tools, supports and hinges of infinite variety, not to mention other hardware articles used in the making and packing of furniture. Hose nozzles, sprinklers and repairing outfits are other lines treated of in this catalogue. The company expect to have their Hamilton factory ready by August and besides the articles mentioned above will make a line of extension hanger bars for clothing cabinets and a new metal weather strip for windows and doors, a simple contrivance which hardwaremen employing a tinsmith can work up a big sale for if a canvas is made for the business.

Mill Saws and Hand Saws.—In various sizes and styles. Henry Disston & Sons, Philadelphia and Toronto, are issuing their 1909 catalogue. There are the pocket editions in paper, cloth and leather, with the mill and hardware lines in separate volumes, and the standard size combined catalogue in the same grades. The small-sized edition will be found a convenient form for the hardwareman's pocket; and the larger-sized cloth-bound book for the office. The hardware section consists of 204 pages and in it are illustrations and descriptions of hand and wood saws and various builders' tools, each article being minutely treated. The company makes all parts of these tools, even the steel from which they are manufactured is made from the raw state in their works. A number of new hardware lines manufactured since last year's price list was issued are included in the 1909 catalogue.

Kynoch Limited.—The latest price list of Kynoch Limited, Birmingham, England, whose Canadian agents are A. Macfarlane & Co., Coristine Building, Montreal, is an artistically printed booklet showing the company's range of loaded paper shot shells, sporting powders, central fire cartridges, percussion caps, etc. The new smokeless powder Axite, invented and manufactured by the firm is described. Some very fine records have been made with this powder both with rifle and with revolver. Last year Sergt. Perry, who won the King's prize at Bisley in 1904 using Axite cartridges made a record for British Columbia by scoring 138 points out of a possible 140 at Vancouver. A short description of the processes of manufacture adopted by Kynoch Limited, who it is stated in the price list are the only manufacturers in the world who make the cartridge shell, and powder—a most important fact when it is considered how essential it is that every component of a cartridge should be perfectly adapted to the others in order to ensure perfect and regular results, is given in the price list which with its many illustrations, colored and plain, conveys some idea of the extensive operations and manufactures of the company.

PRIVATE BRANDS ON GOODS.

A much discussed problem amongst hardwaremen in the United States is that of the sale of goods bearing the private brand of manufacturers or jobbers.

At the joint convention of American hardware manufacturers and jobbers at Pittsburg this week, this question comes up in the form of the following question propounded by the hardware manufacturers: "Is it treating the manufacturer fairly and honestly to ask him to sell his product under private brands, and then demand that he do not sell goods of his own brand to catalogue houses or to retail houses?" There appears to be a growing sentiment among manufacturers against the sinking of their business individuality under jobbers' trade marks, little value being put upon the good will of the business of a manufacturer who sells his products under the brand of some other concern. And the most successful manufacturers are building up an enormous sale for their goods by enterprising advertising campaigns making the public familiar with their brands and their guaranteed quality by general advertising, while in the trade newspapers they educate the retailers and clerks by expounding the various talking points of their goods. Such campaigns would not be possible without the use of the manufacturer's brand.

The argument in favor of special jobber's brands were presented very ably by A. C. Bartlett a Chicago wholesaler, in an address before the convention of the National Retail Hardware Association, at Milwaukee, a fortnight ago, the address being reprinted in this issue. Mr. Bartlett argues that a retailer handling a conglomeration of goods, bearing numerous manufacturers' brands has not the same selling opportunities as one who has most of his goods bearing the same brand name added by the jobber. He further pointed out that many goods bearing the manufacturer's brands were sold through catalogue houses and, in this way, injury was done the retailer.

Following Mr. Bartlett's address the subject came up in the question box discussion at the Milwaukee convention: "Should dealers sell goods bearing jobbers' special brands?" Two retailers, in the discussion, stated that they had been successful in selling goods bearing such trade marks but the majority opinion was strongly in favor of the retailer selecting some manufacturer's goods in which he could put his confidence and arrange to have his own name added to the line in some form. In this way, it was argued, the retailer could afford to guarantee every tool or other article sold while he would also be advertising his own business.

In view of these varying opinions it will be interesting to study the arguments to be presented in the discussion on the subject of private brands at the conventions at Pittsburg this week. A report of the discussion will be printed by Hardware and Metal and space will be given for a discussion of the subject by any reader of the paper.

THE WANT AD.

Most readers of Hardware and Metal appreciate the advantages of the "want" page of a trade paper which is read by practically every retailer, traveling man, jobber and manufacturer in the country, but a brief reference to its variety of uses may not be out of place.

A London retailer wanted to sell his business a few weeks ago. He spent 46 cents on a want ad. in Hardware and Metal and sold in four days to a wide awake traveling salesman who saw his opportunity.

A hardwareman intended establishing a tinshop in connection with his business and as it was in the nature of an experiment he wanted an inexpensive set of tinner's tools. He secured a little used set at a reasonable price as a result of a want ad.

A Toronto retailer wanted a rack for storing wire cloth. A want ad. brought him the article from a Western Ontario town and he says he would not sell for three times what he paid.

An experienced accountant and implement man wants to get in touch with a hardware merchant in Western Canada with a view of arranging a partnership. He will probably have his want supplied as a result of his advertisement.

A British Columbia firm asked a big manufacturing concern in Ontario to send them an experienced tinsmith. The manufacturer knew of no better way to secure one than by using a want ad.

A retailer who had sold his business wished to secure an agency for a manufacturer. A want ad. brought him in touch with several firms and he is now doing a good business in a Western city.

An Ontario merchant, in remodelling his store, found he had some fixtures he desired to dispose of. A want ad. brought him a customer.

An American manufacturer having a line already introduced to consumers, wants a representative to sell to Ontario hardwaremen. Some traveler who knows the trade will likely secure the agency.

A merchant in Northern Ontario wanted a bookkeeper and secured one through an ad. on the want page.

The list could be extended indefinately but the great variety of wants which can be satisfied have been illustrated. Time and money can be saved through using that modern convenience—the want ad.

THE WESTERN HARDWAREMAN'S OPPORTUNITY.

One evidence of the expansion of Canada is strikingly set forth in an article dealing with railway development in Western Canada in a recent number of The Railway World, a leading U.S. railway journal. According to that article—and there are an array of figures to support the case—$85,000,000 is the estimated amount to be spent in actual railway construction during the present year. The Canadian Pacific alone calls for an expenditure of some $20,000,000, and James J. Hill with his Great Northern and subsidiary lines will spend $15,000 000 on constructing a fourth trunk system across the prairies from Winnipeg. The Canadian Northern intends laying out $11,000,000 in extensions, and fully $10,000,000 will be expended by the Grand Trunk Pacific.

The men behind these projects are shrewd, sound business men, and they are building because they have faith in the country and know that the future will recompense abundantly any outlay they may make now. And they are right. This almost startling boom in railway building is barely keeping pace with the development of the West. The lines were unable to handle the wheat last year, and this year a great many more farmers have gone into the new country to further conjest matters.

Many new settlements are being created and older ones will increase in popu-

lation. The first need of this increased population is habitation—houses will have to be erected—one of the immediate demands made will be upon hardwaremen for builders' hardware articles and tools.

Canadian hardware manufacturers are alive to the possibilities and a goodly share of the hardware to be used in building up the west will be the product of Canadian factories. Retailers and Canadian stove manufacturers will have to fight for their trade, however, as catalogue houses and American stove manufacturers are using every means to secure the cream of the business, leaving only the skim milk (in the form of credit business) for the local merchant.

The Western provinces are the commercial battlefields of to-day and only those who are progressive and use modern methods of selling for cash, advertising to meet mail order competition, maintain attractive stores with clean stocks and neat window displays, talk quality instead of price, and develop a spirit favorable to encouraging home institutions and enterprises, are likely to succeed.

AN UNPROFITABLE LINE.

Hardwaremen who handle shaving goods should take steps to see that they secure better treatment from manufacturers of shaving sticks, hardwaremen being evidently discriminated against by some manufacturers whose soap is listed in jobbers catalogues at $2.50 to $2.85 per dozen for retail sale at 25 cents each. At the same time cut rate druggists and departmental stores frequently quote the $2.50 line at two for 25 cents and the $2.85 line at 18 and 19 cents, less than the jobbers appear to be able to buy at.

Asked for an explanation one buyer for a jobbing house stated that some United States manufacturing concerns have preferred classes of customers, departmental stores being classed as "A," druggists as "B" and hardwaremen as "C" and possibly these shaving stick manufacturers are giving the retail hardwaremen the double cross in the manner referred to.

While it is undoubtedly wise for retail hardwarement to carry a complete stock of shavers' requisites, including razors, strops, brushes and soap, in order to compete with the druggist who has added razors to his stock, there is a limit to which the trade should go and if it is found that there is discrimination in prices, as appears to be the case, it would be wise to seek some manufacturer who will treat the trade fairly and push his product as a substitute for the more widely advertised and higher priced lines.

A RETAILER'S TURN OVER.

Some time ago the public mind, the New York Journal of Commerce points out, became impregnated with the virus that 90 per cent. of all business men fail.

Commercial paper has for this reason never attained the dignity accorded to less volatile security in savings institutions and places where money is loaned. Then again the average retailer is not a financier and the weakness of retailing, wherever it has shown weakness, has generally been at the financial end of the system.

There is really less reason why retailers should fail in business than there is for manufacturers failing, and while we all like to tell that the country store was the first departmental store in the land, every merchant knows that the real strength in the departmental store system lies in the measure of wisdom shown in its financial control.

In February, 1907, long before the country was alive to the dangers that were ahead in merchandising, one of the United States greatest merchants said to a newspaper reporter. "The retailers will have to sell on a decreasing margin of net profits." and that statement in print woke up many a business man in different parts of the country to a realization of what was ahead.

One of the factors in a large jobbing house was asked to explain what the statement really implied, and as he was one of the few men who after 40 years in harness had been able to adapt himself to the new system, what he said seemed very illuminating as bearing on the elements that are gradually displacing personality in trade.

Said he: "No retailer needs to fail if his system is right. He should never carry more than four times his capital in merchandise. He should turn his capital over at least four times a year, as shown by the volume of his sales. As a matter of fact many metropolitan stores turn their capital over six and seven times a year. On a capital of $200,000 the turn over should be at least $800,000. Five per cent. profit on this volume gives $40,000, and 10 per cent. on the capital eats up $20,000 of this amount. The rest can be applied to a capital account or surplus. The struggle will be to keep expenses below 20 per at cent. and the effort will be to sell at 25 per cent. profit. The difference in net profit will depend on the success of the effort and the strength of the struggle. In order to make 25 per cent. on sales it is necessary to add 33 1-3 per cent. to the cost of goods."

These figures are necessarily rough and offhand. There are some stocks that cannot be turned even once a year, but in one department of a well known retail store a few weeks ago stocks were turned over five times in two weeks. There was a run on in that special department. By following the figures of sales closely it is possible to see what goods are being purchased most freely and the success of merchandising lies in knowing what will move best. It is one thing to have a reputation for carrying the choicest goods in the world, it is another to sell the goods the great mass of people want to buy, and to have them for sale when the people want to buy them. The happy medium between these extremes makes great merchants and it also makes great combinations of retail stores not only possible but desirable.

The grouping of retailers for better buying methods is seen in the formation of buying syndicates of all kinds. The desire among them to expand their merchandise accounts and make buying in large amounts possible, is seen in the way in which many of them are seizing the control of stores in different centres The crystallizing of store management is going on everywhere, and it all leads up to the crystallization of the financial management of the stores. Strong personality will always assert itself, but its future efforts will be directed along systematic lines that are now only in the process of evolution in merchandising.

SET A GOOD EXAMPLE.

A country merchant states that, in their desire to develop fat bank accounts, farmers were sometimes inclined to ignore the cash or restricted credit regulation of the stores at which they deal or endeavor to evade it by putting forward all manner of excuses. This points to a condition which should not be encouraged by laxity in business methods.

The merchant whose own course in this respect is exemplary, is in the best position to take a firm stand on the problem. A reputation for payment of accounts with unfailing regularity is an asset to any merchant. Stories of the late Timothy Eaton, which have reference to his own merchandizing, almost invariably recall his unswerving adherence to this principle in business. He paid cash, and required others to do the same. The notable fact about his store was that it gave the people what they wanted and his methods enabled him to do this to their and his advantage.

It would appear, then, that the merchant who establishes a reputation as a cash buyer is fortifying himself with a strong argument against any influence which threatens to create a breach.

Don't forget that satisfaction is remembered long after the price is forgotten—in nothing is this more true than in heating.

CANADIAN METAL MARKETS

See Itemized Market Quotations on Page 74.

MARKETS ABRIDGED.

Montreal.

Tin—Firm.
Copper—Unchanged.
Linseed Oil—1c advance.

Toronto.

White Lead—Advance of 10c on all grades.
Tin—Up ½c.

THE MARKET SITUATION.

Speculation in the primary markets in copper and tin, caused these metals to advance during the week. Consumption seems to be improving, but the lever at present working is undoubtedly speculation. The markets, therefore, should be watched closely. There has been heavy buying in London on American account, but the metal is simply held for manipulation. Copper consumption in New York is reported better, but here again the real improvement is hidden under the speculative wave. The English market has shown excitement engineered probably from Wall Street. Sellers are still disinclined to make sales, and leaving outside the speculation going on there is undoubtedly a feeling of confidence in copper that speaks well for the future of the metal. Spelter is maintaining its steadiness in the English market under the strong control of the spelter combination, while the St. Louis market is still advancing. Lead in the English market has shown more steadiness, but there is so much metal in sight that any improvement in consumption induces unloading. English iron and steel conditions show some improvement, and a brighter tone seems to pervade the markets. Stocks have diminished, and prices generally are maintaining strength if not advancing. Buying is not so heavy in the States as it was, but this is only to be expected after the heavy business in May. Furnaces are well filled with orders, and prices are being steadily held, and in some cases advances. There is a strong feeling of confidence, and the situation is very reassuring.

MONTREAL.

June 11.—Business during the week has again shown decided stimulation. Orders have come in freely from all quarters, and although the average amount wanted is still on the light side, the quick buying makes up the deficiency. There is a very confident tone at present in the trade. The strengthening in the primary markets of tin and copper and the steadiness of the other metals; the increasing industrial activity; and the more reassuring reports as to the crop prospects, have all tended to put matters on a much stronger footing. As a jobber remarked, business conditions are now excellent. There is a greater feeling of confidence, and if things shape the way they are now, there will be nothing to grumble about.

Copper is in very good demand, and inquiries are numerous. Users are keeping close watch on the situation. Not much is known as to the fututre of copper, and those who follow the market closely will be in the best position to protect themselves. The higher figures in the primary tin market also brought forth increased inquiries, and the holding of firmer quotations will induce a lot of new business. Spelter continues to be in very good demand. There has been a strong sale in galvanized sheets, and if the call continues the total consumption for the year will total up a very heavy figure.

There is no change in quotations this week. All the metals are firm, and there is very little cutting to make sales. June has undoubtedly opened out in good shape, and if the present improvement is maintained, the month should show most gratifying figures.

PIG IRON—Consignments of pig iron from the old country are still being distributed as quickly as possible, and there is not much metal offering for those who have unexpectedly run short. Inquiries as to fall contracts are now coming in, and bookings have already been made in some cases up to the close of navigation, at a slightly higher premium. The iron is steadily being consumed, and there are small stocks on hand. Canadian furnaces are transacting good business. There has been some price cutting, but on the whole figures have been held well, and show a firming disposition. The tone of the markets generally is good. The improved situation in the States is also having a strong sympathetic effect on the market here. There is an improving business in structural material, while other steel lines are in active request.

TIN—Although the market is in a very firm condition, no change in ordinary jobbing quotations are announced, and we continue to quote 32½. Prices are held fairly consistently, and unless the primary markets make a decided change one way or the other no alteration is made. Business is very good, and the strengthening of the tone of the market has induced a lot of inquiries. It is evident that while users are still buying as they want the metal, they are quite prepared to purchase more heavily if they think the right time has arrived. In sympathy apparently with the copper market, and a slight shortage in supplies which will not probably last, the primary markets have been showing much firmer figures. Legitimate consumption is stated to be dull in London, but New York is showing more life. Speculation is, however, the strong influencing factor at present.

COPPER—As in the case of tin, copper is very firm. The jobbing price of 14¼ to 14½ is unchanged. The demand is very good, and users are taking much more interest in the markets. There are practically no stocks, as users have been buying all the way along from hand to mouth. It is esential, therefore, that they should watch the market very closely in order not get squeezed on rapidly rising figures. Inquiries are very numerous, but all the same confidence in in the primary markets at present is not very strong. The speculative movement which caused the market to advance last week continued this week. London has been very speculative, largely for American interests. Some heavy business has been done, but unfortunately not for consumptive purposes. The New York consumptive demand is reported quiet, but sellers are not forcing things at all, and the market is showing advancing figures. There is no doubt that things are ripe for a general rally, unless speculation makes consumers shy.

SPELTER — The active demand for spelter continues, and the metal must be considered up to now one of the best sellers of the year. The market is naturally firm, but there is no advance on the old quotation of $5.75. Galvanized sheets are in strong request from all parts, and specifications include delivery up to the end of navigation, and even further if merchants will take them. The English market continues very firm, and the Spelter Syndicate is gradually gaining control of the situation. Fair business reported. The St. Louis market is gaining strength, and the metal is in very firm position all the way round.

LEAD—Orders have improved in lead, and much heavier quantities have been going out. With better business, and the improved conditions generally, lead has naturally been affected, and the market is decidedly strong at $3.60 for ordinary jobbing lots, Trail being still at $3.50. The English market is steady. Better consumptive business is reported, although large arrivals of lead have not helped the markets to maintain strength.

SCRAP METAL—The market is showing more activity, and some fair lots of scrap have changed hands. We quote: Heavy copper and wire, 11c; light copper, 10c; heavy red brass, 10c; heavy lead, 2¾c; scrap zinc, 3c; wrought iron, 11c; machinery cast, $14.50.

TORONTO.

June 11.—The metal trade has not such good business this week, but some lines are showing a firmness that pressages well for the coming fortnight at least. Now this condition does not hold good in all metals. For instance, white metals were rather slow during May compared with the increasing business in other metals, but June opened up much better and this past week is satisfactory. Iron and steel are a trifle slow just now, the former being a little easier in price and the latter much stronger. Copper went up £2 in London, but has dropped again. Tin has advanced and is firm. The move-

ment in iron and steel buying has abated somewhat, but consumption is expanding.

PIG IRON—The market is not so firm as it was before the opening of June, though business continues in fair volume. Prices are easier generally, but they show a fair profit for the smelter. Canadian foundry is at $19 ; No. 3, Middlesboro, $19.25 ; and Cleveland, $20.

COPPER—This metal is active though still surrounded by an atmosphere of speculation. Early in the week London advanced the price £2 and Toronto prices went up accordingly. Since then the primary markets have declined and local quotations are again at last week's figure, 14½c, though copper is firm at that price.

LEAD—More active at unchanged prices is the local lead situation. In fact for fair quantities a buyer could obtain lead about 5c less than the quotation ruling. There is a good feeling abroad, however, regarding lead and there appears to be a tendency to firmness. The local quotation is $3.65 for a hundred pounds.

TIN—The tin market has gone higher and is particularly active and the strongest metal, relatively, of the week. Toronto has advanced the price ½c and now quotes tin at 32½c. Trading has been good.

SPELTER—Very active and as firm as at any time during the past three months. The price has been steady at $5.75 for some time now.

SHEETS AND PLATES—Business continues good. Demand while not so pressing as it was at the beginning is healthy and fair. Inquiry regarding stocks indicate that sales may be large later on.

OLD MATERIALS—A quietness has come over the demand for scraps and waste, though from letters received by dealers consumers are opening up and extending plants that should have been in the market for material ere this. The U. S. customs authorities are still discussing the question of the duty on scrap metals from Canada. Dealers are paying for heavy copper wire, 11¼c; light copper bottoms, 10c; heavy red brass, 10¼c; heavy yellow brass, 8¾c; light brass, 6½c; tea lead, 2½c; heavy lead, 3c; scrap zinc, 3½c; No. 1 wrought iron, 10; machinery cast scrap, No. 1, $14; stove plate, $12; malleable and steel, $8; old rubbers, 7¾c. These prices show an advance in copper wire, heavy and light brass and zinc.

METAL NOTES.

According to a Pittsburgh authority the production of finished steel, with the exception of railroad material, is expected to be greater during June than in any other month in the history of the trade.

The largest copper furnace in Canada 62 inches by 25 feet, has been blown in by the Consolidated Mining & Smelting Co. at its Trail smelter. This gives the company four large copper furnaces, with a capacity of 1,800 tons of Rossland ore daily. Mechanical feeds are being installed on a large lead furnace. This furnace has the distinction of smelting more ore and producing more bullion daily than any lead furnace on the American continent. It makes as high as 98 tons of lead bullion in 24 hours, and the refinery is producing 75 tons of pure lead daily.

HARDWARE MARKETS

MONTREAL.

June 11.—This has been a very good week for hardware. Orders have come in surprisingly well, and in every case customers want delivery at once. It is apparent from the sorting-up character of the orders that buying is still from hand-to-mouth, but dealers continue very cautious and are content with light stocks and repeated buying. The improvement in the crop outlook in Quebec and Ontario, should induce a much more confident feeling. The north-west while buying in much better bulk has not yet decided to open out. So much is depending on the harvest that retail merchants and consumers are reluctant to let themselves go, but when the outlook is more assured jobbers confidently expect a heavy buying movement culminating into a great fall business.

Customers are now taking delivery of harvest tools, and booking is steadily improving for apple parers, cherry stoners, lanterns, cow ties, guns and ammunition. Hose and lawn mowers are selling well, and so are gardening tools and wheelbarrows. Orders for ice cream freezers and refrigerators are not so heavy as they were. but fair quantities are going out. Dealers seem to be well supplied with screen doors, green wire cloth, and poultry netting, as sorting up orders have fallen off. Bolts and nuts, screws, and annealed hay wire are still in very strong request.

No important price change is announced. The markets generally seem firm. The threatened change in leather goods has not yet arrived, although prices are very stiff. Altogether the tone of the markets is very bright. June has started in much better shape than May, and the aggregate trade for the year is above that of 1908.

BUILDERS' HARDWARE — Trade from the large centres is much heavier owing no doubt to the improvement in building conditions. Country districts, which have been buying steadily all the way along, continue to show a good demand. The tendency towards artistic and well made trimmings continues to develop, and some exceptionally fine articles are now on the market. Lock sets, escutcheons, bolts and butts are prominent movers. We continue to quote : Door sets and escutcheons, 50 and 10 ; escutcheon pins, steel, 50 ; brass 55 ; spring hinges No. 20, $9 per gross.

SUMMER LINES—Hose and lawn mowers are still moving out well, and the recent set back due to the cold weather has easily been made up. Altogether there has been very little to grumble at in the movement of these particular lines. Refrigerators and ice cream freezers are in steady request, although quieter than they were. Sorting up orders are coming in for screen doors, green wire cloth and poultry netting, but the height of the movement is now over. Bookings are getting heavier for apple parers, cherry stoners, cow ties and lanterns. Ordinary household lines are maintaing strength, and orders are good for washing machines, wringers, mops, granite and tin ware, and other kitchen requisites. Altogether staple lines are well to the fore, and jobbers are satisfied with the way things are now shaping.

HARVEST TOOLS—Customers are now taking delivery for harvest tools, while immediate delivery orders are also swinging in well. The improved harvest reports have given greater confidence to this line. There are no change in prices, and we quote : Hay fork pulleys, $1.60 to $8.50 a dozen ; hay carriers, hay rakes, etc., 55 off.

MINERS' SUPPLIES—Although there is no rush on, miners' supplies continue to move out steadily. Dealers are not stocking up to any great extent. A good consuming demand should set in this month for surface mining tools. There are no changes in the markets and we quote : Miners' picks, 17c a pound ; prospectors' hammers, 20c ; pick handles, $1.85 a dozen; drilling hammers, 6c a pound ; crowbars, 3½c ; drill steel, 8c.

BOLTS AND NUTS—The demand is extremely good. Orders are well assorted, and it is evident that dealers are experiencing a good consuming call. We continue to quote : Discounts on carriage bolts, ⅝ and smaller, 70 ; machine bolts, ⅝ and less 60, 10 and 10 ; coach screws, 75 ; stove bolts, 80 and 7½.

SCREWS—As in bolts and nuts there is heavy demand for screws. Orders are coming in freely for the more commonly used sizes. There is no change in discounts, and we quote : 85 and 10 off for flat and round head, bright ; 75 and 10 off for flat head, brass, and 70 and 10 for round head, brass.

WIRE—Good movement characterises these lines, especially annealed hay wire. Shipping is not so congested however, and the supplies are going out more easily. There is no change in prices, and we quote : Barb wire, car lots and mixed, $2.50 ; small lots, $2.55 ; plain twist, car lots, $2.80 ; small, $2.85. Galvanized wire No. 9, $2.25 in straight and mixed car lots, and $2.30 small lots, f.o.b. Montreal. Coiled spring fencing, $2.45; straight and mixed car lots, and $2.55 small lots. Plain wire, bright, annealed and annealed and oiled, $2.25 base. Other lines $2.30 f.o.b. Montreal.

SPORTING GOODS—Fishing tackle is moving well, and the season has turned out a very good one. A steady demand characterises baseball and lacrosse outfits. The approach of the camping out season has stirred up orders in tents and other camping requisites. Boating and yachting supplies are in steady demand. Guns and ammunition are being booked for later delivery.

TORONTO.

June 11.—Hardware trading is going with a swing and brisk business is being done. Orders call for large quantities, and in some jobbing houses late hours and extra help are necessary to get goods out in time. Prices hold firm on almost all lines, and no radical change has occurred this week. Wire and wire products are asked for, and quite a lot of tin water pails have gone out to Western Ontario hardwaremen. Garden and farm tools are moving freely and so are screen doors. Builders'

hardware keeps pressing up to the limit. Some very new and convenient articles for the home builder and housekeeper are shown. Tools used in construction work are much in demand.

BUILDERS' HARDWARE—Some fine art lock sets, door pulls and drawer pulls are to be seen in a number of jobbing houses. One of these lines shows a cut glass door knob with glass plate to match. There are, too, a number of heavy brass and dull-finished metal trimmings in unique design. Hinges, also, are ornate, though not gaudy. Demand from architects and home builders is good and hardwaremen all over the province are taking repeat quantities. Metal sashes and cords are new goods and a metal safe for the walls of homes is a useful novelty in house construction. Adjustable metal bindings and angles for shop fronts are another new feature. Ordinary builders' hardware is keeping trading at the high water mark.

SEASONABLE GOODS—Screen doors are very active, and wire is, too. The summer lines are coming more freely to the front. A great many small express wagons for children were shipped to various points during the week, and the western part of the province took large numbers of tin water pails. Some went, too, to the north country, together with mining and construction tools. Freezers and refrigerators are moving fairly free, but there is no pressing demand. Garden outfits, with hose, nozzles and lawn seats are ordered better and outfits for the summer cottage and camp are beginning to be inquired for. Cutlery is a little better than normal.

SPORTING GOODS—Fishing tackle and supplies are to the front in earnest, and a pleasing feature to note is the number of canoes that have gone out in sales. In fact aquatic sporting goods have had a good week's business. Guns and ammunition are much freer, and baseball, lacrosse and cricketing articles are steady sellers.

HEAVY GOODS—As with builders' hardware, the sales of nails and screws are taking up the time and attention of shippers. This spring has been a splendid season for nails and proportionately it has been a good trading time for bar iron used in construction. Rods are steady, and pipe, black especially, is establishing a record.

U. S. IRON TRADE.

Cleveland, Ohio, June 10.—The Iron Trade Review says: Heavy tonnages in practically all lines of iron and steel continues to be offered to the mills, but the latter, with order books well filled and future operations reasonably assured, are inclined to look with conservatism upon the acceptance of much additional business at prevailing prices. Many companies have adopted the policy of raising quotations above the generally-understood level of the market in order to divert the tide of orders from themselves. Additional producers have joined the ranks of those steel bar makers who have recently been asking $1.25. Pittsburg and important plate and shape interests have now elevated their quotations to $1.35 Pittsburg applicable to ordinary business.

High booking records made during the month of May are still being announced and are giving the market a strong tone. The principal pipe interests, including both the leading makes and the independents, experienced the best month of any May in their history in orders entered. Sheet and tin plate companies also equalled their fullest month. An immense tonnage of wire products was accumulated on makers' books and deliveries have now been considerably extended. Shortages of steel particularly in open-hearth, have been forcing some large mill interests into the open market.

An encouraging development is the increasing evidence of greater buying, actual or in contemplation, by the railroads. The western lines have been purchasing rails, track fastenings and other supplies fairly well and this movement appears to be working its way eastward. The past week with the Carnegie Steel Co., when 23,600 tons of standard sections were booked for prompt shipment, was the best for many months in this company's rail department. Steel car orders are being placed more freely and numerous inquiries are out, so that these manufacturing interests are considerably more optimistic over the prospects of greater plant activities soon. It is the general belief among steel makers and manufacturers that after the expiration of July 1 of the fiscal year for many of the railroads, a more earnest patronage will arise from this source.

Hardware Trade Gossip

Quebec.

Bazin Mfg. Co., nail makers, Quebec, has assigned.

Blouin & Gosselin, tinsmiths, Quebec, have been registered.

The assets of Guay & Giguere, hardwaremen, Montreal, have been sold.

A. H. Brittain, of A. H. Brittain & Co., Montreal, has been on a visit to Boston.

C. M. Strange, Lewis Bros., Montreal, has been made vice-president of the Montreal Engineers' Club.

The James Robertson Co., Montreal, have opened up a show room and warehouse on Recollet Street.

Ernest Grobb, of the McKinnon Dash & Metal Works Co., St. Catharines, Ont., has been visiting Montreal hardware circles.

J. S. McLernon, manager for John Round & Sons, Montreal, has started on a trip out west. Mr. McLernon will go as far as Vancouver.

Arnold M. Bennett, of the Montreal Steel Works, has been elected a member of the Iron and Steel Institute, at a recent meeting held in London, Eng.

Watson Jack & Co., manufacturers' agents, Montreal, have removed their office from the Bell Telephone building to 709 Power building, 83 Craig Street West.

Henry Munderloh, of Munderloh & Co., Montreal, has given $1,000 to the campaign for raising $300,000 for the extension of the Y.M.C.A. central building in Montreal.

E. Osborne, of the Osborne, Peacock Co., Manchester, Eng., manufacturers' agent, paid a visit to the Montreal office of Hardware and Metal this week. Mr. Osborne has concluded an extensive trip through the States.

At the regular monthly meeting of the Dominion Commercial Travelers' Association, Montreal, the secretary's report showed that the membership, to date, was 332 more than at this time last year, while the payments of death claims amounted to practically the same sum.

T. R. Ferrall, Wakefield, Mass., who was a recent visitor to Toronto and Montreal, in the interests of the Boston & Lockport Block Co., East Boston, Mass., is the patentee of many improvements on tackle blocks and sheaves, and owing to his criticism the type of block sheaves used in the U. S. navy for many years, has been changed and his patented sheave adopted for naval use.

Ontario.

J. R. Hambly, Barrie, is recovering from an illness of two or three weeks' duration.

J. R. Croft, grocer and hardwareman, Limehouse, has sold his business to G. E. Polkinghome.

W. C. Springer, of the Belleville Hardware Co., is on a business trip to British Columbia.

William W. Cox, vice-president of The Whitman & Barnes Mfg. Co., St. Catharines, manager of the local branch, died suddenly on Thursday, June 3rd.

W. G. Charleson, hardware merchant, Ottawa, has sold his property on the north-east corner of Bank and Cooper Streets to Mrs. Fred. Carling for about $40,000.

John Marshall has purchased at Kingston the hardware store owned by Archibald Strachan, the new Collector of Customs. The store will be run by Mr. Marshall's son Howard.

Notice is given that the partnership subsisting between J. H. McCorkindale and Johnston Hall as hardware merchants, tinsmiths and plumbers at Owen Sound, has been dissolved by mutual consent.

Thomas Berry, tinsmith, an employe of J. W. Bennett & Son, Gananoque, ever since they began business almost half a century ago, died at his home last week after being in poor health for about two years.

J. Pratten, formerly of Howie & Feely's hardware store, Brantford, will in future be in charge of the Galt store of the McMurtry Hardware Co. Mr. McMurtry will in future do all the purchasing for the Galt store and also the branch store in St. Thomas.

The general offices of the Whitman & Barnes Mfg. Co., whose Canadian branch is at St. Catharines, were originally at Akron, Ohio, where the concern had its beginning. Several years ago they were removed to Chicago, but on August 1 they are to go back to the old stand at Akron.

The Onward Manufacturing Co., Berlin, Ont., are supplying dealers who handle their sliding furniture shoe with a neat metal hanger for advertising purposes. The demand for their product is increasing and a new glass polishing machine is being installed at their Berlin factory, while a complete glass plant and an entire new furniture shoe factory is being erected at the United States headquarters at Menasha, Wisconsin.

Trade Conditions Improving in Mother Country

Official Figures Show Large Increases In Exports Of British Goods To Canada—Welsh Trade In Tinplate Not Affected By Growth Of American Industry.

Sheffield, Eng., May 27,—Since I wrote my last letter there has been a decided improvement in many branches of the iron and steel trade. The advance, however, has not been so great as to give general satisfaction, for while in some departments work has been resumed at a pretty high level yet in others which have not been conducted on such progressive lines there has been comparative stagnation, but on the whole the output is satisfactory in as much as it increases, if only a little.

Quite the most notable topic in trade circles has been the question of the probability of further additions to the British Navy and the consequent trade impetus in departments of big works which are devoted solely to Admiralty work. Already some of the big firms have arranged contracts with the Admiralty for turbine machinery and for material for battleships and cruisers which it is proposed to construct, but these would come in the ordinary way without any agitation for a hurried increase in the number of Dreadnoughts.

The belief that trade will further improve is growing and this is partly responsible for the firmness in raw material. Any spurt in trade will inevitably lead to an all round increase in prices.

So far as the lighter steel trades are concerned the position is not very satisfactory. Cutlery manufacturers complain that general demands are on the decline, but at the same time there is a fair volume of trade and the prospect of a fairly early improvement. With Canada manufacturers are doing much better and travelers state that the outlook is much more promising than it was earlier in the year.

Progression in Equipment.

I have previously referred to the remarkable progression which has been made in the equipment of Sheffield steel works. Some concrete examples of how this tendency has affected trade and makes it difficult to reach a state of activity or boom will no doubt be interesting.

When Admiralty or War Offices work was placed not many years ago, the plant, although up-to-date at the time, would now be considered as very much behind the times. When big guns had to be forged, 25 ton hammers were brought to work on ingots of 80 tons each, and in a fortnight, two gun forgings were produced. Now, hinge hydraulic presses are part of the equipment, and twenty forgings are finished in a fortnight, with only half the amount of labor employed. Similarly a few years ago, a shift would turn out 32 shells, but now with fewer men on the work, but with modern plant, 100 shells are turned out in a similar period.

A Generous Steel Master.

Here we cannot approach the level of American philanthropists who give away libraries, but we have had an instance recently of a Sheffield steel manufacturer who has gained distinction by giving a library to the Sheffield University. The Prince of Wales opened the building, and both the Prince and the donor had conferred on them the honorary degree of Doctor of Letters. The generous steel manufacturer is Edgar Allen, head of the firm of Edgar Allen & Co., of Sheffield. He is a much travelled man who thoroughly understands his business and has made a fortune. In addition, Mr. Allen has sent to the Lord Mayor of Sheffield a cheque for £1,109: 12: 0: for the permanent benefit of genuine cases of distress among people of good character, whose distress arises from unemployment or sickness. The amount represents the preliminary and administrate expenses of the City Guild of Help which has been formed to relieve cases of distress. At the opening of the library it was announced that Mr. Allen is to give £10,000 to Sheffield Medical charities on the understanding that some part of the institutions bears the name of The Princess of Wales.

Trade in Tin Plate.

The tin plate trade is more satisfactory than it was. There was no diminution of output for a very long time, but until a few weeks ago there was a little difficulty in disposing of the products of the mills. The decreased demand led to a weakening of prices, but a fortnight ago there was some heavy forward booking, and the result is that prices have been advanced by three halfpence per box. By far the best customer is still the United States.

Some little consternation was caused by the news of extensive depelopments of tin plate trade in the United States, and the question has been asked in Parliament upon the subject. The President of the Board of Trade was confident that the South Wales makers had nothing to fear from America. Notwithstanding all that had been done by Americans to secure trade which had hitherto belonged to the Welsh manufacturers he pointed out that there had been a steady increase in our exports to the United States, which amounted last year to £885,359, whilst the value of plates exported from America to all destinations, including our own country, was only £272,767. The value of tin plates of British manufacture exported to destinations other than the United States was last year £4,594,716.

British Trade With Canada.

Following the statement made by the President of the Board of Trade, it is interesting to examine further the returns of trade between Great Britain and Canada. The most striking feature of the March figures was that the export of unwrought tin to Canada went up to £15,936, nearly three times as great as the £5,774 export of March, 1908, and appreciably larger than the 1907 export of £6,162. The figures for the first quarter of the year are equally striking. In the first quarter of 1907 the value was £28,809. Then it dropped to £16,485 in the first quarter of 1908, while this year the total has been £42,902.

Tinned plates and sheets also showed increases, the March figures being £16,642, compared with £14,396 in March, 1908, and £11,766 in March 1907. Taking the first quarter the figures were £109,975, more than twice as great as the £51,490 total of the first quarter of 1908, and well ahead of the £64,902 total of the first quarter of 1907.

Hardware and Cutlery.

In other ways British trade with Canada improved considerably. The March hardware total was £5,734, considerably greater than March, 1908 with £2,063, and well in advance of March, 1907, with £5,266. On the quarter the result, however, is not so satisfactory. It amounted to £10,974 as compared with £9,407 in the March quarter of 1908 and £12,896 in the March quarter of 1907.

Complaint has been made about declining trade in cutlery with Canada, but the figures do not bear out the gloomy statements which have been made. March, 1909, has £6,853 to its credit with £6,171 in March, 1908 and £8,852 in March, 1907. The poor results on the first two months of the year are reflected in the quarter's returns, which show only a total for 1909 of £14,817, nearly £1,000 behind the first quarter of 1908 with £15,511 and considerably below the first quarter of 1907 with £19,002.

Exports of Metals.

The exports of pig lead and manufactures of pig lead in March were £6,655, compared with £4,631 in March, 1908, and £9,547 in March, 1907. The quarter's returns, however, show a decline. Reversing the order it is seen that the first quarter of 1907 had a total of £34,039. Then there was a tumble to £14,338 in the first quarter of 1908 and a still further drop to £10,683 in the first quarter of 1909.

The British steel trade with Canada is a little better. The March total of bars, angles, rods and shapes or sections is £12,963 compared with £12,572 in March, 1908 and £16,071 in March, 1907. On the quarter it is also much better, but still behind 1907. This year the quarter's total was £36,627 compared with £22,695 in the first quarter of 1908 and £44,744 in the first quarter of 1907.

Galvanized sheets showed a big decline. The value in March, 1907 was only £7,947, whereas in March, 1908, it was £19,174, and in March, 1907, £11,495. On the quarter there is not much difference between 1909 and 1908, but there is a drop of over £7,000 in comparison with 1907.

Trade Gossip from Canada's Eastern Provinces

Dry Dock May Be Built At St. John—Halifax Business Men Run An Excursion Through The Annapolis Valley.

ST. JOHN.

June 9.—The visit of Sir Robert Perks, Bart, M.P., here last week has revived the talk of a dry dock for St. John. Sir Robert was interviewed by George Robertson, president of the Imperial Dry Dock Company, and it is said that the project may yet go through with the eminent British capitalist taking hold of it.

The C. P. R. is laying about 17 miles of new rails on the Atlantic division, replacing those of lighter weight. The new rails, which are the product of the Dominion Iron & Steel Company are 5 pounds heavier than the ones formerly used, being 85 pounds to the yard. The rails removed from the main line are being used on the branches, and in all 53 miles of track will be laid this year and about 30 or 40 miles of ballasting will be done.

The fiirm of W. A. McKay & Co., of Sydney, N.S., maye secured the contract for the electric instalation of the new Government museum building at St. John's, Nfld.

The demand for builders' hardware and for all kinds of accessories to a comfortable time in the country continues good. Hammocks, tennis requisites, lawn mowers, garden tools, refrigerators, ice cream freezers, etc., are among the fast sellers. W. E. H.

HALIFAX.

June 7.—Under the auspices of the Halifax Board of Trade a business men's excursion to the famed Annapolis Valley will be held next week. The fruit trees in the valley will then be in full blossom and the outing has been termed the "Board of Trade's Apple Blossom Excursion." About seventy of the leading business men of the city, many of whom will be accompanied by their wives, will take in the trip. All the principal towns in the Valley from Halifax to Yarmouth will be visited, and a short stop will be made at each place. This idea of the Board was inaugurated some time ago, and it is expected that it will have very beneficial results, as many of those going will combine business with pleasure. The various boards of trade along the line have arranged receptions for the visitors, and the affair will in all probability prove most enjoyable. It will also give the business men an opportunity of meeting their customers, and of looking over the conditions in the respective towns, which is one of the main objects of the excursion.

The Dominion Iron and Steel Company's output for last month was as follows: pig iron, 22,402 gross tons; steel, 25,050 gross tons; total shipments, 19,000 gross tons. The annual general meeting of the company will be held in Montreal on June 17, when the directors' report on the operations of the year will be submitted. It is expected that this will show a greater volume of business than in the previous years, with somewhat less earnings, which was due mainly to the drop in steel prices.

H. H. Fuller & Co. have removed from Granville Street to their old quarters on Water Street, which were damaged by fire. One building has been temporarily repaired and the firm is now occupying it. This firm held the contract for suppling the city of Halifax with hardware during the current year, and with the consent of the city, the contract has been transfered to the hardware firm of A. M. Bell & Co.

The Dominion Coal Company now have 125 men employed in construction work at its plants in Cape Breton.

At a meeting of the council of the board of trade held last week the matter of securing delegates to the seventh Congress of Chambers of Commerce of the Empire to be held in Sydney (N.S.W.), on Sept. 14, was left in the hands of a commitee. W. Frank Hatheway, M.P.P., will likely be one of the delegates.

President A. O. Skinner of the Exhibition Association has received assurances from Ottawa that the Dominion government grant of $50,000 will come to St. John in 1910. It has been arranged that the fair will open on Labor Day and continue 10 days.

J. H.

NEWCASTLE.

June 8.—There is a building boom on at Campbellton this season. Rent is excessively high and the hotels are crowded because of the lack of houses. One builder reports that he has 18 applications for cottages. A similar boom is on in Fredericton, and to a still greater extent in Moncton.

Sir Robt. Perks of Great Britain, a shareholder of the N. B. Pulp and Paper Co. of Millerton, N.B., is in town this week. Sir Robert is much impressed with the industrial and commercial possibilities of the Miramichi district.

Newcastle Board of Trade, which has been rather inactive for the last two years, is being reorganized. The business men of Newcastle have learned by observing the success of nearby towns with a live board of trade the value of such an institution. Reorganization will be completed on the 11th instant.

Copper Smelting works are promised for the Point Wolfe Copper mine this summer.

Campbellton, a go-ahead town which has nearly doubled its population since 1901, will have two celebrations this summer—on its twentieth birthday. June 22nd, and on Dominion Day.

The A. E. Wry Co. Ltd., capital $49,000, have incorporated to manufacture harness in Sackville.

Donald Fraser & Sons' lumber mill at St. Frances, P.Q., was burned on Friday. H. H. S.

Interesting Trade Items Gathered in Ontario

Hardware Millinery Display at Chatham—New Industries at Brantford—St. Thomas Judge Dismisses Suit Against Hardware Firm Which Cut Prices.

OTTAWA.

June 8.—Business is rapidly resuming its usual complexion at this season of the year and the demand for sporting and outdoor goods is very heavy.

Granes Bros., report a large trade in sporting goods, and are also filling numerous orders for prospecting outfits.

Ketchum & Co., have issued a splendid catalogue of sporting goods and club outfits.

F. W. Mahon, of Hintonburgh, which is now a part of Ottawa, is giving up the grocery end of the business and will devote more attention to hardware. He is contemplating some considerable improvements this coming fall.

As an indication of the increase in popularity of the use of cement as a building material, The International Portland Cement Co. report an increase of 26,933 barrels over last year, up to May 25.

The permit for the "Chateau Laurier," the Grand Trunk Hotel, was taken out to-day and the estimated cost is $864,000. The construction is stated to be of brick, steel and sandstone. Another permit for $10,000 was also issued for alterations to the old Y.M.C.A. building, converting it into a warehouse. Thus June starts off with encouragement for further evidences of progress.

R. Mulhall announces the result of the progressive euchre contest among the members of the Retail Hardware Association of this city, to be in favor of Jack Cowan the Secretary of the Association, W. Strachan and W. E. Graham tied for second place.

G. E. M. H.

HAMILTON.

June 9.—The Banwell-Hoxie Wire Fence Co., Hamilton, have contracted with the Canadian Northern Railway for over 300 miles of wire fencing to be erected along their lines in Alberta and Saskatchewan. Some good orders for railway gates have also been placed with them by the C.P.R. and C.N.R.

The will of Edwin Thomas Wright, of the E. T. Wright Company, has been filed for probate by his widow, Mrs. Minnie Caroline Wright, as executrix of his estate. He left an estate valued at $80,050, made up as follows: $5,000 life insurance; $50 miscellaneous, and a half interest in the firm of E. T. Wright & Company, valued at $75,000. The property is disposed of under the will in the following manner: To Mrs. Wright, his widow, a three-eighths interest in his share of the business of the E. T. Wright & Co., and $5.000 life insurance, a total of $33,143.75, and to each

of his daughters, and one son, one-eighth of his interest in the firm of E. T. Wright & Co., about $9,381.25. The sons and daughters are: Edwin Thomas Wright, Hamilton; Miss Minnie Agnes Wright, Hamilton; Mrs. Edna Caroline Mason, Grand Rapids, Mich.; Miss Alice Mildred Wright and Miss Ethel May Wright, both of Hamilton.

CHATHAM.

June 8.—An amusing take-off on the spring millinery openings which has set all Chatham laughing is shown in an unique window display put on by Westman Bros. this week, in which the freak hats so common this season are laughably burlesqued. The display comprises articles of kitchen tinware, etc., and is arranged in the form of a millinery window. The central figure is a "dummy" negro pickaninny, displaying a striking "offering." Surrounding this are "hats" on pedestals of varying height, the hats being made up of various kitchen utensils, each labeled with a catchy designation. The "peach basket" is simply a common bushel basket, inverted, with a couple of full-grown scythe blades as plumes. The "spooner's hat" is an inverted pan fringed with spoons. "Nifty" is the appropriate designation of an inverted tin tub with a washboard for ornament, while the "frog pond" has a fishing "frog" dangling at the top of a screen-door spring, contrary to all the rules of the Audubon society. In most cases the "hats" are fringed with bright colored bunting, though a bicycle chain is used in one instance, and clothes line, whip thongs, etc., serve, while brushes make effective plumes. A veil effect is created by the use of a horse netting. The floor of the window is covered with garden hose and holders, neatly arranged and labeled "ladies' hose and hose garters." The window is the design of Edward Rawlings, of the Westman staff. The designs shown are, of course, capable of almost endless variation.

It is curious to note how in different towns some lines of goods will drift entirely into the hands of a certain class of dealers. Wire fencing is an instance. In Chatham this trade is practically all in the hands of the regular hardwaremen. Occasional inroads have been made by agents, but the hardwaremen have held the trade. Furthermore, fencing has been handled as a regular article of merchandise, only one firm having agents on the road. On the contrary, in Leamington this trade is largely in the hands of agents. A hardwareman who recently relinquished business there states that at one time he stocked up with fencing, but eventually gave up that line entirely. On the other hand, in Chatham the cement business is practically all in the hands of regular dealers in lime and cement, while in other places, notably in practically every town within hailing distance, hardwaremen make cement a feature. Just what the explanation is, is not entirely patent.

H. B. LeGrand, formerly of Westman Bros., has joined the selling staff of J. C. Wanless.

Wire fencing, by the way, is in big demand this spring. One hardwareman has already disposed of five carloads, in addition to quite a few smaller shipments.

Business as a whole is coming along nicely. The demand for garden tools and mowers this spring has been considerably ahead of last year. Damp weather, on the contrary, has held back some other usually seasonable lines. The refrigerator trade this year promises to be rather dull. The ice crop last winter was practically a failure and though thanks to imported ice, the supply will be sufficient, the price is practically double last year's. The consequence is that the primitive cistern, pail of water and other cooling devices will be largely resorted to.

The partnership of Bragg Bros., hardware and implement dealers, has been dissolved. The business is being continued by Claude C. Bragg.

In refrigerator displays a cool and suggestive effect is created by the liberal use of cotton batting, and other white materials.

Miss Millie McTavish, bookkeeper for W. H. Goodhue & Co., hardware merchants, Ridgetown, has resigned to take a position in Detroit.

The Chatham hardware baseball team recently re-organized for the season. The organization last year was a hummer, and did a lot to promote fraternal feeling in hardware ranks. A good grist of officers was elected, including George Stephens, ex-M.P., honorary president; J. C. Wanless, honorary vice-president; C. R. Stevenson, president; directors, A. D. Westman, P. Cunningham, D. H. Douglas; secretary-treasurer, Geo. Hilliard; manager, Ed. Webster; captain, Jules Perrott; umpire, Geo. Perrin; chief rooter, Leslie Webster. The boys cavoting around the green for the Hammer-and-Nails nine are Ed. Taylor, Ed. Wanless, R. Brady, Jules Perrott, F. Cunningham (captain), S. Poole, A. Willard, F. Winegarten, J. Harrington, A. Webb, M. Baxter and E. Taylor. New uniforms will be secured. The boys have already downed the railwaymen to the tune of 7 to 4, and are brimful of enthusiasm.

GUELPH.

June 9.—The farmers' excursion season has opened, and between now and the first week or two in July, 40,000 farmers will visit the O. A. C. coming in on cheap excursions from all over the Province.

Penfold Bros. have secured the contract of supplying the city league with all the new base balls they need during the season and are arranging to present the league with a fine D. and M. trophy, in the form of a handsome cup which will go at the end of the season to the winning team. Penfolds are the Guelph agents for the D. and M. sporting goods. They have been doing some good advertising and putting in some good windows, boosting along the sporting goods department of their business. A short time ago, Penfold's added to their staff a young lady clerk whose duty it is to attend to the correspondence.

The sale of refrigerators, screen doors and window screens has been helped along greatly in Guelph just of late by the good spell of warm weather enjoyed last week.

McMillan Bros. ran some very attractive sporting goods ads in the local papers last week.

Oil stoves, gas ranges and gasoline stoves are being worked in some timely window displays in the windows of Guelph hardware stores with very good effect.

The Clerks' and Salesmens' association have been busy working for their Thursday half holidays for some time past, and as a result several of the hardware stores here have placed in their windows cards announcing that they will close up every Thursday during July and August. H. S. N.

LONDON.

June 8.—The following changes in the McClary staff are announced: A. M. Turner, late of this city, has resigned to go into business for himself in Calgary and will be succeeded by John Arthur, from the St. John, N.B., branch. Gordon Howell, London, goes to the Calgary branch as cashier, and George Neilson, for 27 years with the company as shipper and timekeeper, has resigned to go west. H. V. Kenerson, Buffalo, an expert in costs systems, has succeeded J. W. Rowlands, deceased.

Local building permits for May total close on $800,000. Since the beginning of the year 288 permits have been issued for a total of $418,300.

The city has saved $580 by ordering copper wire for Niagara power distribution before the recent advance in price.

The Grand Trunk are at the present time handling between 90 and 100 cars of ore on an average every day between Point Edward and Hamilton through this city.

June 8.—Retail hardware trade shows decided improvement. As building operations advance the demand for building materials of course improves, and hardware men are feeling the effects.

A permit has been issued to the London and Petrolia Barrel Company to erect a new factory on Horton Street.

There are now 380 men on the pay roll of the Grand Trunk shops, which disproves the rumor brought to the attention of the City Council that the company was not keeping faith with the city and was having work done elsewhere. F. T. Y.

BRANTFORD.

June 8.—The building trade is growing more active. The contract for the new Sanderson-Harold refrigerator and screen door factory at Paris, was awarded Friday evening to J. D. Tindale, Ingersoll, and the work of construction will commence imediately. The cost of the new building is estimated at $30,000. The plans call for a two-storey building 300 x 62, with an engine room 40 x 60 feet, of brick and mill construction, built in accordance with the fire protection regulations on the slow burning pro-

cess. Taylor & Taylor, of this city, were the architects, and the building will be erected near Paris Junction.

The local building prospects are growing brighter.

Schultz Bros. Co., announces that they will erect a three-storey building on Dalhousie Street.

Morgan Harris will build a handsome residence on Dufferin Avenue.

E. A. Humphrey, formerly of this city, and now a hardware dealer in Parkhill, has been appointed a captain of the 26th Middlesex regiment.

Massey-Harris Co., on Thursday last took out a building permit for a new warehouse to cost $14,500.

E Pralter, a former employee of Howie & Feely, hardware merchants, Brantford, has been appointed manager of the McMurtry Hardware Co's store, at Galt.

A new plumbing firm has been established in Welland, in the name of Long & Co., James Long and William Boyd, late of Blair's plumbing shop.

Work will begin this week, on an addition to the factory of Quality Beds. Limited, the contractors being P. S. Peacock and M. Vanderburg. It will be of brick, two storeys, 60 x 40.

Bennet and Vymburger, Haldimand, secured the contract for the erection of the Haldimand House of Refuge, at $20,768.

The Telephone City Stove Co., is a firm believer in the idea that if you can get the child, accompanied by its mother, into the store, it is a ten-to-one shot that the mother can be persuaded to purchase something besides the article wanted for the child. In acordance with that belief they exhibit in their window this week, a large completely furnished doll's house, which is a sure thing to catch a young girl's eye. They also make a specialty of baby doll carts, as well as the more needful baby carriage.

The firm of W. H. Turnbull & Son, who also have a branch at Scotland, reported to your correspondent, that after having used the instalment plan of paying for goods purchased, for some time, they have found it in the main highly satisfactory. With judicious credit extended, a great deal of business is done with those who would probably do without the articles they wish to secure, owing to the fact that they did not have the full sum at the time. Especially is this so with young couples who, in furnishing their house, do not have a sufficient sum to purchase everything needed, and as a higher sum is charged for credit prices, the firm comes out ahead in the end.

The industrial commissioner has intered into communication with the Stanford Steel Range Co., of Norfolk, Virginia, which is desirous of establishing a Canadian plant. Prospects seem bright for its location here, where there are already several similar factories.

A. W.

ST. THOMAS.

June 8.—The past week has not shown as good results among the farming community, owing to everyone being busy in the fields. Seeding is now over, except for some corn planting, this will be in the coming week and will show a larger acreage than formerly, owing to the wet season which prevented wheat sowing.

The building trade is still in good shape and promises to continue good. Among the contracts let this week, the Registry office was the largest. The hot weather coming on is making big demands on screen doors, windows and screen wire.

The general tone of returning prosperity is shown here by the returns just brought out by the local customs officers, which show an increase over May 1908, of 72 per cent., or $15,937.03.

The war being carried on by the customs officials of Chatham and other places against smuggling, could be applied to St. Thomas as well. One who is on the inside and knows whereof he speaks is authority for the statement that there is over $10,000 worth of goods brought in here every month, making a loss of $250 in duties alone. The hardwaremen lose mostly on tools.

A case tried here this week at the nonjury assizes, is of interest to hardwaremen. A. L. Silberstein, New York, maker of the Carbo-magnetic Razor, brought suit against S. A. Crawford, for selling one dozen razors below the price named, in an alleged agreement. The case was dismissed and Chancellor Boyd commenting on it said: "That were it a Division Court case, the most he would allow the plaintiff would be three (3) dollars."

Ingram & Davey are showing two good windows. One of sporting goods, which has for centre effects two tables on which are set two big bowls with gold fish in them. The other is covered with a grass floor cloth to represent a lawn, with a wax figure of a boy pushing a lawn mower, spread around is a lawn seat, hose reel, sprinklers, etc.

Bert Hamilton, of Hamilton & Scott, has completed a ticklish job on the Baptist Church, he having put on a galvanized covering on the spire, one would think to see him up in the air, that he was an old sailor.

The Amasa Wood Hospital are putting in four new bath rooms. E. B. Dixon secured the contract.

An extension of time to June 21 is given for tenders for the Grace Methodist Church. The plans call for a building to cost about $35,000. L. Wilson, Son & Arnold, of Chatham, are the architects. This firm have built several churches from the same plans.

G. A. F.

FORT WILLIAM.

June 7.—A new firm has just been formed in Fort William, under the title of the Fort William Manufacturers' Agency, being composed of some local business men, who will act in the capacity of commission agents for groceries, builders' supplies, cement, lime, etc., and also do a forwarding business, local distribution for shippers and customs brokerage. The new concern has already secured some important agencies, among them being that of the Sun Portland Cement Co., and some tile, pressed brick, and structural steel firms. They are also entering into arrangements with some large wholesale firms to do their distribution among the local merchants of the two cities of Fort William and Port Arthur. They find that from the replies received from shippers of all kinds, there seems to be an active demand for forwarding agents who wi'l undertake to trace up freight shipped via lake-and-rail, and take charge of it at the head of the lakes. It seems that many large shippers have experienced much difficulty in getting prompt shipment, and some of the biggest are assuetomed to send special agents to Fort William to look after their cargoes of binding twine, agricultural machinery and other considerable shipments. The new firm will endeavor to relieve them of this necessity.

F. L.

News from the Prairies and British Columbia

New Hardware Block at Saskatoon — Calgary Man Leaves Hardware for Paints—Building Very Active in all Western Cities.

SASKATOON.

June 5.—R. B. Emerson, St. John, N. B,. is in the city in connection with the Enterprise Hardware Co.

TECHNICAL BOOKS

A MARKET OF BUYERS, backed up by money to spend, is open to you in the Busy Man's Magazine. Every territory in Canada is represented. If you have something to sell, something you want to buy, a condensed advertisement in the Busy Man's Magazine will put you in touch with the classes you want to reach. Four cents per word will carry your message from Atlantic to Pacific. Send copy of your advertisement along with order to cover cost of insertion. Your announcement will appear under a special heading. BUSY MAN'S MAGAZINE, Montreal, Toronto, Winnipeg.

ELBOW CHART FOR TIN AND SHEET-IRON WORKERS—This chart is one of the most practical and convenient systems offered for drawing accurate patterns. It gives and rise of the miter line of elbows of any diameter and number of pieces for any angle, and is adapted to the wants of tinners, boilermakers and other workers in sheet iron and in heavy metals. Size 11 x 14 inches. On heavy Manilla paper. Price 50 cents. MacLean Publishing Co., Technical Book Dept, 10 Front St. E, Toronto.

ESTIMATING, by Edward Nichols, Architect.—140 pp 35 illus. Cloth binding. Containing invaluable information for the use of Architects, Contractors, Builders, Carpenters, Plumbers and Heaters, Painters, Roofers, Cornice-Makers, and other workers in the building trades. This handbook tells just how to go about the task of making an estimate intelligently. Price $1.00. MacLean Publishing Co., Technical Book Dept., 10 Front St. East, Toronto.

HARDWARE STORE BUSINESS METHODS—Forty subjects of the greatest interest and value to hardware merchants are discussed, including Rules and Regulations for the Store, Good Buying, Stock Taking, Collecting Accounts, Changing a Credit into a Cash Business, Starting in Business, Profit Figuring System. Price $1.00, postpaid. The MacLean Publishing Co., Technical Book Dept., 10 Front St. East Toronto,

HARDWARE WINDOW DRESSING—This book, just off the press, contains 256 pages (8x11 inches) and over 200 illustrations with full working descriptions. Every display is the work of an expert. It illustrates and explains how hardware windows may be dressed to sell goods. Price $2.50 post paid, The MacLean Publishing Co., Technical Book Dept. 10 Front St. East, Toronto.

MENSURATION FOR SHEET METAL WORKERS, by Wm. Neubecker.—This new book gives the principles of the art of measure, showing its practical application in solving problems, in finding the areas, dimensions or capacities of the diverse sizes and shapes of sheet metal products. It is of infinite value to all sheet metal workers. 72 subjects and 70 figures. Price 50 cents, postpaid. The MacLean Publishing Co., Technical Book Dept., 10 Front St. East, Toronto.

THE ROOFING, CORNICE AND SKYLIGHT MANUAL.—Consists of 3 articles: Tin Roofing, including flat and standing seam roofing; Cornice Work, describing equipment for country shop and method of developing patterns; Skylight Construction, treating of a skylight without a ventilator and also with a ventilator in the top. 175 pages, 170 illustrations, 13 plates. Price $1.50. MacLean Publishing Co., Technical Book Dept., 10 Front Street East, Toronto, Canada.

300,000 feet, from the Monarch Lumber Co., the contractor having to furnish the labor only. The construction of the race track went to W. Cook, for $1,500.

J. Noel, architect, will build a house on 10th Street. Tenders are now being called for on the building.

J. F. Cairns has announced that he will give eight prizes in a guessing competition to end on August 6, the last day of the fair. A glass box of grain has been placed in the window and one guess allowed for every dollar's worth of goods purchased. The prizes are an automobile, team of horses, lady's costume, man's suit, lady's hat, pair of shoes, lacrosse outfit, tennis racket and shoes.

The erection of a new school to cost $15,000 is under consideration at Hanley.

Wm. Wartley has been awarded the contract for building the Agnew Bros. hardware block on Selkirk Street. The price is in the neighborhood of $35,000. Work will begin at once and the building pushed to completion.

D. G. R.

VICTORIA.

June 3.—The month of May, with an aggregate value of building permits of $188,620 is the largest monthly total in the history of the city since the permit system was inaugurated. The total value of buildings this year is $252,320 ahead of the same period, the month of May alone being $107,825 ahead of last May. These figures do not include the value of the buildings which have been erected in Oak Bay, Esquimalt and other outlying sections, the benefit of which comes directly to the city. Yesterday a permit was issued for the Watson & McGregor building, to cost $8,000. It will be two stories with a frontage of 46 and a depth of 96 feet. The lower floor will be occupied by the owner's hardware store. A permit was also issued for an addition to the Masonic Hall to cost $15,000.

Tenders are being called for a new steam fire engine with a capacity of 700 gallons a minute by the Victoria City Council.

Three by-laws received the seal of the ratepayers' approval last week, all obtaining the required three-fifths majority. As a result several public improvements will be proceeded with at once. In extentions to the waterworks $125,000 will be spent, on additions to the sewerage system will cost $45,000, and the city share of block paving the Causeway, Belville, Douglas and Humboldt Sts. will be about $60,000.

Improvements are to be made to the Victoria and Sydney Railway system. A handsome new brick depot with warehouses and freight yards is to be built on the corner of Blanchard and Fisquard Sts. The inauguration of a three train daily service is also an important item. A new high power gasoline engine is to be purchased. It will haul three large passenger coaches over a two per cent grade at a rate of 25 miles an hour if necessary.

WINNIPEG.

June 8.—The Winnipeg Paint & Glass Company have just issued an 80-page catalogue, illustrative of the work which they are prepared to do in art glass manufacturing. The company have recently completed the equipment of a new plant, which was made necessary owing to the heavy loss by fire about one year ago. A feature of the new factory is that special facilities have been installed for the designing and manufacturing of church art windows. The machinery is the most up-to-date that could be secured. The company are now in a position to turn out products equal to anything on the continent. C. E. Cass is president of the company, and R. W. Paterson, secretary and manager.

The Winnipeg Oil Company are building a three-storey warehouse and compounding plant in this city, to be opened about August 15. The building will be 110x46 feet, and will cost over $20,000. Castor oil, greases and ointments will be manufactured at this plant. G.

E. A. ST. JAMES, WINNIPEG.

E. Cooper, who has been a member of the firm since its inception and has acted as secretary-treasurer, has sold out his interests to J. H. Cattley.

Many important topics will be discussed at the convention of the Western Associated Boards of Trade, to be held in Saskatoon on June 15, 16 and 17. Among other questions to be considered are, Canadian trade agents in other countries; bulk sales act; express companies to be compelled to deliver to all parts of cities and towns; Selkirk Centennial; navigation of Saskatchewan and Red rivers.

The secretary of the Sanitorium of this city received a cheque a few days ago from the G. F. Stephens Paint & Varnish Company for the amount of $250.

D. Ackland & Son, Winnipeg, wholesale carriage hardware, are adding another storey to their warehouse, to cost $1,500.

James W. Woods, Ottawa, has made arrangements for establishing a plant in this city for manufacturing tents and builders' supplies, Mr. Woods states that the factory will employ 500 men.

E. A. St. James has resigned his position as chief invoice clerk for Imperial Oil Company, of Winnipeg, to become district manager for the Continental Oil Company, with headquarters at Moose Jaw. Mr. St. James is a university graduate who is making progress in business life. He is a native of St. Johns, Quebec.

The Victoria Y.M.C.A. are calling for competitive plans for their new building, to cost $70,000 or thereabout. The competition opens at once and closes on the 30th of June. The $70,000 includes plumbing, heating, lighting, swimming tank, etc.

W. B. C.

EDMONTON.

June 5.—Trade has been quite active during the past couple of weeks, a good business being done in summer goods, such as screen doors, lawn mowers, garden hose, oil stoves, freezers, etc.

Another evidence of the growth of Edmonton, as a distributing centre, is shown by the fact that mixed cars of hardware are being shipped out to dealers in this section.

The prospects for a good year at Edmonton are bright, as indicated by the following returns for May, as compared with the same month, a year ago :

	May, 1908.	May 1909.	P.C. In.
Customs	$ 14,081.17	$ 19,125.87	35
Building Permits	77,362.00	368,005.00	422
Post Office	4,900.00	5,300.00	10
Bk. Cl.	2,972,637.00	3,794,559.00	28

Among the building permits issued, might be mentioned the following :—apartment house for Rene Le Marchand, $140,000; residence for T. M. Grindley, $8,250; residence for G. H. Spiers, $5,000; rooming house for F. Horn, $4,000; warehouse for Royal Fruit Co., $22,000; store and office building for C. F. Hellwig, $5,000; store for J. R. Umbach, $4,800; store and office building for J. Kenwood, $20,000.

VANCOUVER.

June 5.—With general activity, trade in hardware lines is reported good by the merchants. The lumber industry is not particularly busy, though the mills are working about full time, and there is not much prospect now of a marked increase in the demand. Still, building in the city continues active, the value of the permits for the past two weeks amounting to $223,740. The principal of these was a $60,000 store and office building on Pender Street, which will be erected by D. D. Hutchinson, and which will be of reinforced concrete, eight storeys in height. Outside of a $5,000 alteration to the Atlantic Hotel, the remainder of the permits were nearly all for dwellings or repairs. This means good trade for general hardware and plumbers' supplies is called more for than if all the building was of large blocks. While these are the present permits, construction is now going on of the huge steel frames for three buildings on Hastings Street, within half a block of the court house, and the rattle of the compressed air rivet puncher is merry all day long.

SAVE MONEY

By Using Our

Corrugated or Plain Round Conductor Pipe

made in 2", 3", 4", 5", 6" diameter by 8′ and 10′ lengths without a cross seam. You can buy this perfect pipe for much less than you can make up pipe in 30′ lengths. Our Eave Trough is the best; it is machine made on a steel die and every length is the same.

Western Canada Hardware Market Situation

Our Western Correspondents Review the Market Outlook—Hardware Quotations Corrected by Telegraph From Hardware and Metal's Winnipeg Office up to Noon on Friday.

Wholesalers are recovering from the setback due to the late spring and extensive seeding operations. This week orders for goods have been coming in freely from all parts of the country, new stores are being opened in several towns throughout the west and local wholesalers are reaping the benefit. Perhaps the firmest article on the market at present is wire, due to the extensive fencing being undertaken among the farmers. This is an evidence that agricultural science is developing in the west and mixed farming is being gradually indulged in.

Retailers throughout the country are active. Particularly in sections where buildings operations are extensive the retail trade will necessarily be in a flourishing condition. There are more carpenters at work in Winnipeg to-day than there has been for some years. The same is true of iron workers and painters and this means well for the trade.

It is unfortunate that retailers are compelled to sell nails almost at a par with cost price. It is the one line upon which little or no profit is made. An effort was made to have an understanding among the retailers that nails should not be cut in price, but contractors have evidently found some one or two places where special privileges were granted.

We quote a decline in annealed wire of 10c per cwt. :

Winnipeg Quotations.

WIRE—Barbed wire, 100 lbs., $3.15; plain twist, $3.40; staples, $2.90; annealed wire, $2.80 base ; oiled, 10c extra; bright iron, $3.10 base; brass spring wire, 29c base; plain galvanized wire, 6, 7 and 8, $3.50; No. 9, $3.10; No. 10, $3.60; No. 11, $3.70; No. 12, $3.30; No. 13, $3.40; No. 14, $4.25; No. 15, $4.75; No. 16, $5.

POULTRY NETTING—57½ per cent.

HORSESHOES — "MRM" and "Bell" iron. No. 0 to 1, $4.50; No. 2 and larger, $4.25; snowshoes, No. 0 to No. 1, $4.75; No. 2 and larger, $4.50; steel, No. 0 to 1, $4.85; No. 2 and larger, $4.60; featherweight, $6.

HORSE NAILS—"MRM" cold process—No. 3, $4.30; 4, $3.80; 5, $3.55; 6, $3.30; 7, $3.05; 8, $2.85; 9, $2.75; 10, 11 and 12, $2.65 in 25-lb. boxes.

who are open for a situation are requested to register their names with the MacLean Publishing Co., at any of their offices. Inquiries are occasionally made by manufacturers and wholesale houses who contemplate establishing their own advertising department.

THIS trade mark, the "Cover the Earth," stands for 40 years of paint and varnish making, during which quality has been the first consideration. It safeguards the retailer in dealings with his customers. It's worth something to have your store identified with this trade mark, and it pays to handle high-quality products like

SHERWIN-WILLIAMS PAINTS AND VARNISHES

Even if you do have to ask a little more for them than your competitor does for inferior goods; it's easier for a good salesman to sell a well-known standard article at a reasonable price than cheaper goods at a lower price. By selling Sherwin-Williams Paint and Varnish Products you can get the trade of the most desirable customers in your locality, avoid complaints and bad accounts, and get the repeat orders with very little effort or selling expense. Write us today for full particulars regarding the Sherwin-Williams Proposition.

Grace Church congregation, St. Thomas, are raising funds for the erection of a new building and will soon be ready to let contracts.

The new western telephone exchange at Winnipeg will cost $30,000 and will be completed this year. Preparations are also in hand for a branch north exchange.

The contract for the construction of the new Presbyterian church at Burnside, Man., has been awarded to Bedman & Oburn, of Portage la Prairie at $2,397.

The Vancouver Exhibition Ass. have adopted Henry Watson's plans for the new exhibition buildings. The building will be 240 ft. long and 100 ft. wide, and will cost $25,000.

The Catholic School Commissioners of St. Edouard, will build a house for the Brothers on Cowan Street, at a cost of $20,000. Also a school house, on Upper St. Denis Street, $30,000.

It has been decided to award contracts for the proposed $50,000 addition to the Winter Fair Building at Guelph. Work will be commenced as soon as the agreement with the Government is signed.

J. C. M. Keith, Victoria, has received instructions from the School Board there to proceed with the drawings and specifications of the new Moss Street school. The cost will be approximately $38,000 to $40,000, exclusive of $6,000 for heating.

General Building.

L. H. Higgins plans the erection of a large business block at Moncton.

A $15,000 dwelling will be built at Toronto for G. P. Schofield.

J. R. Marshall will erect four attached dwellings at Toronto, to cost $12,000.

The value of building permits granted in May at Toronto, was $1,887,532, against $1,216,982 in May last year.

Charles W. Sharpe & Co. have been awarded the contract for the erection of the head office building of the Great West Life Assurance Co., at Winnipeg. The contract price is $170,000.

Recent permits for building construction, at Ottawa, have been issued as follows: Wolf Shenkman, dwelling, $2,000; William Hunt, dwelling, $3,500; John Black, dwelling, $4,000; A. E. Slemon, dwelling, $4,600; T. J. Somerville, dwelling, $1,600; D. A. Martin, double dwelling, $5,000; J. G. Davidson, dwelling, $3,000; Michael Ouellette, dwelling, $1,800; Geo. Hammond, dwelling, $3,500; J. H. Simpson, addition to dwelling, $2,000; J. More, dwelling, $3,000; Cleophas perron, double dwelling, $3,000; Thomas Clarey, dwelling, $2,000; P. J. Brennan, three dwellings, $4,600.

Railroad Development.

Work on the Hamilton Guelph and Waterloo Railway is to be proceeded with this year.

The number of men at work on railway construction in Canada is estimated to be 7,500.

The Northern Pacific and the Burlington road are said to be negotiating for an entrance into Victoria.

Plans are being prepared for the extension of an electric car line between Masson and Buckingham, Que.

Tenders are about to be taken for the construction of the Alberni (B.C.) extension of the E. & N. Railway.

The B. C. E. R. has called for tenders for the construction of about five miles of tram extensions near Vancouver.

The Canadian Northern Ry. has about 1,000 men engaged upon construction work westerly from near Sudbury, Ont.

The construction of the C.N.R. extension through the Shellbrook district has been begun. Sixty miles will be built this year.

A U. S. syndicate which bought the townsite of Grande Prairie, B.C., propose building an electric line from Kamloops to their properties.

The relaying of the G. T. R. track between Montreal and Toronto with 100-lb. steel has been resumed at Thousand Islands Jct. It is expected that the new steel will be laid to Cobourg this year, leaving the stretch between Cobourg and Toronto to be done in 1910.

New Companies.

Dominion Mica Works, Montreal; capital, $75,000; to manufacture mica goods. Incorporators A. R. Macdonald, J. N. Brissette and W. Patterson, Montreal.

Eastern Canada Portland Cement Co., Quebec; capital, $2,750,000; to make cement, lime and plasters. Incorporators, C. A. Irwin, P. H. Saver, and S. F. Bell, Ottawa.

Novelty Stamping Works, Toronto; capital, $60,000; to manufacture metals, enamelled goods and tinware. Incoporators, H. E. Stonge, T. J. Page and H. E. McMillan, Toronto.

The Miner Rubber Co., Granby, Que.; capital, $1,000,000; to manufacture rubber and gutta percha goods. Incorporators, H. S. Williams, M. A. Phelan and W. Bovey, Montreal.

Kirkfield Portland Cement Co., Toronto; capital, $250,000; to manufacture cement and stone products. Incorporators, E. L. Middleton, Geo. Keogh and A. E. Knox, Toronto.

The Imperial Cement Co., Owen Sound; capital, $200,000; to manufacture cement and cement blocks. Incorporators, A. G. Mackay, T. I. Thomson and S. Lloyd Owen Sound.

McBrien Mfg. Co., Toronto; capital, $40,000; to manufacture and deal in hardware and hardware supplies, machinery, etc. Incorporators, A. W. Holmestead, J. L. Ross and W. L. Carr, Toronto.

The Crown Portland Cement Co., Wiarton, Ont. capital, $800,000; to take over the Colonial Portland Cement Co., and manufacture cement. Incorporators, J.

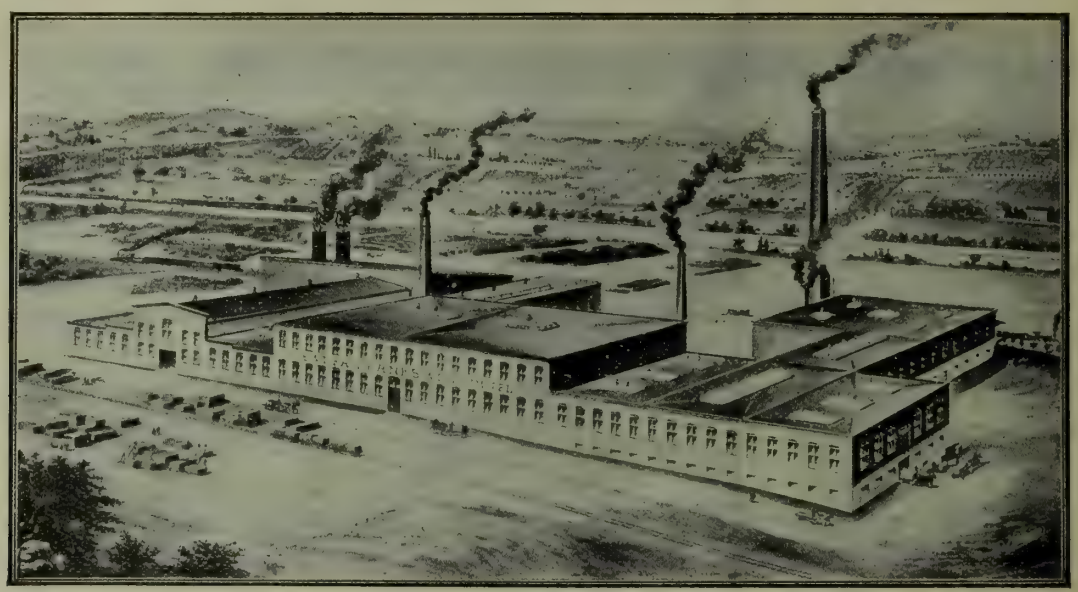
A MODERN SCALE FACTORY.

One of Canada's newest industries is the large scale factory just opened at Sherbrooke, Que., by E. & T. Fairbanks & Co.

While the scale was originally designed as a weighing machine, it is now also used to determine the number, volume, strength, quality and the quantity of many articles of commerce. It computes percentage, determines values and translates the standards of one country into those of another. One may weigh in pounds and read in bushels, a fact worth remembering when it is considered that the great west of Canada produces immense quantities of wheat and grain. Coal may be kept in storage or on a scale which will weigh the amounts dumped in or drawn out and at all times indicate the quantity remaining in the bin. Without scales our mining industry would be seriously hampered. There is a constant increasing demand for modified forms of scales for new industries and for special sizes to fit difficult and restricted locations. Many of the processes in the industrial world depend upon the weighing machines to proportion ingredients, to facilitate the handling of materials and to test the accuracy of products.

There was a time when all weighing was done by means of beams or steelyards, but this method was found to be too slow and the inventive genius of Thaddeus Fairbanks brought out the Fairbanks' Platform Scale in the year 1831. The resulting economy in time and labor has proved of increasing value in every industry. Hundreds of modifications from the original size and style have come into daily use and there are few weighing requirements for which specially adapted scales have not been designed.



The Fairbanks' scales of to-day embodies in its construction, first, the experience of more than three-fourths of a century of constant effort toward the improvement of scales; second, the employment of the best skill, including engineers to design and workmen to execute, together with the highest grade of material necessary to bring out a scale of quality; third, the use of intricate and special machinery, which secures exact uniformity and unfailing accuracy.

The buildings making up the Fairbanks' Scale factory are situated in the centre of the town of Sherbrooke at a point where the plant is well served by both the Grand Trunk and Canadian Pacific Railways. They are of modern mill construction and consist first of a large iron and brass foundry with the annex providing the storage house for metals and foundry accessories. The cupolas are of large capacity and embody all the latest ideas for charging and operating. The core room joins the cupola and is equipped with Millett core ovens for banking sand. The coke is elevated by means of a bucket conveyor from alongside of the railroad track, where it is dumped from the cars and this eliminates all unnecessary handling.

Adjoining the foundry is the machine shop and next to this the paint shop. Beside the paint shop is situated the sealing and packing department, a long building about 40 feet in width. In this department the various parts are assembled and tested, sealed and finally packed for shipment, the depot being located at the end of the packing room.

The buildings throughout are built with monolithic and reinforced concrete foundations which are carried up to the first floor level where the walls are continued in red brick set in lime cement mortar. The floors are of 2-inch by 4-inch spruce on edge and 7/8-inch hardwood flooring on top, with heavy timber beams and columns, the construction being known as slow-burning or mill construction. Each department is divided from the other by means of brick walls, with tinned standard automatic fire doors. The arrangement of the departments is such that the raw materials come in at one end crude, pass through the factory and go out the other end finished, with all unnecessary lifting and handling eliminated.

The room of the shipping department is 30 feet wide by nearly 100 feet long with a 10 foot platform with canopy covering the same running the full length of the building. Alongside this platform are located the tracks of the Canadian Pacific Railway running over a 100 ton latest pattern Fairbanks' Track Scale, so that all raw materials entering the works, and finished material leaving the same, can be weighed in the cars before leaving the company's yard. The spur or siding from the main lines enters the property on the south side of the buildings, which serves as a lumber yard. The latest weighing devices are also employed for weighing the charges for the foundry furnaces and for other purposes about the works.

New Fairbanks Scale Plant at Sherbrooke, Que.

SELLING SHOP-WORN GOODS.

Salesmen must use tact and intelligence in offering old goods. It would be a great mistake to call the attention of every customer to them. The clerk must be able to "size up" his customers and be able to judge who will be likely to be interested. He must not attempt to force the goods on every customer just because he knows it would be a good thing to get them out of the store, nor should he be too timid about calling the attention of customers to them. In a word, he should exercise that uncommon quality of common sense.

A small boy entered a Toronto hardware store and said: "I want a ladder." "A step ladder?" asked the clerk. "I guess so; it's for my stepfather."

PAINTS NATURAL TO THE STORE.

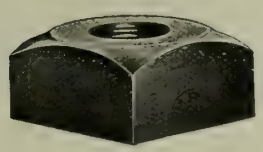
Very few hardwaremen now fail to realise that the carrying of prepared paints is a natural adjunct to their staple lines. It is true that in many cases much greater opportunity could be taken of the fact, but all the same the hardware store without its paint department is now the exception whereas at one time it was more the rule. Taking all the various extraneous lines which are being assimilated by the hardwareman, none fits in so well with the selling of his general stock as prepared paints. For instance in the case of builders' hardware. The property owner or contractor who comes in to buy his trimmings, will want paint just as much as lock sets, bolts and butts, etc. Is it not an easy matter to switch off from the one to the other. The salesman is given the best possible opener for a smart talk on the value of paint. It is the same with regard to metal roofing. Again, as it has been pointed out, the man who buys a reaper or mower needs paint for the shed he may be building to house it in, or to put on some of the implements he already has in use. In addition, the hardware dealer may easily make a sale of paints for interior decorations to the man or woman who needs some screws to strengthen an old chair, or to fix a cupboard or some other household article.

In fact, the purchase of any article used in the construction or repair of household articles indicates the need of paint also, and the hardwareman is the man on the spot who ought to be in the position to supply it. It is evident that the use of paint appeals directly to all classes of general hardware customers. The builder, the contractor, the house-owner, the farmer and householder, who depend on hardware for many important needs find paint equally essential, and even if other things were no more than equal they would find it convenient to include their paint with building materials, fittings, or household necessities. It not only becomes a convenience and expedites business for them, but facilitates delivery, and the ease of renewing supplies.

Working thus harmoniously together the building up one department can be made the means of building up another. When the sale of paint has been effected approach the customer on builders' hardware, or tools, and vice versa. By this means fine co-operative work can be done, and it is co-operative work that pays.

Then again prepared paints carry a fair margin of profit. It is true that some hardwaremen are already starting on the evil of price cutting, but the practice has not, we believe, gone very far as yet, and can be checked. There is no need for the dealer to cut with a proper selling campagn to back him, and if he secures his legitimate price his profits are better than on the average lines of hardware goods. In addition he is helped by the manufacturer to an extent unthought of at one time. As a matter of fact the paint manufacturer not only advertises the paints but he

Don't Get "Notions" About



Floorglaze

Please don't get the notion that FLOORGLAZE is good only for floors. FLOORGLAZE is a solid-color floor-enamel with all the elasticity of good paint, and more; and that has a dozen uses about the house, indoors and out. It's so advertised for you that it can't help selling once; and its own quality sells it again to the same people—and their neighbors. FLOORGLAZE is the kind of goods that strike you as about right for your store.

NUTS

We make all sizes, 3-16 in. to 3 in., both Square and Hexagon, tapped or blank.

Material that they are made from is the best that can be procured.

The care and attention taken during the process of manufacture are such as to ensure to the consumer, an article that will give perfect satisfaction.

Montreal Rolling Mills Co.

advertises the other parts of the store by supplying the artistic hangers and cards with which the dealer can embellish his store.

Taking everything into consideration, prepared paints should be carried by every hardware dealer. It is a natural component part of the business. It carries a good profit, and in addition it co-operates with the other lines in the store.

Paint and Oil Markets

MONTREAL.

June 11.—The marked improvement in trade noted last week still continues and orders in every line are most numerous. In fact, conditions are very encouraging, and manufacturers and jobbers are more than satisfied with the business outlook. The advances in oil and white lead have acted as a stimulation upon the demand, instead of checking it, and these lines are very active. During the week linseed oil advanced another cent. Retail merchants report a good consuming demand, with evidences that more painting will be done this year than ever before.

TURPENTINE—Free buying from all quarters of the Dominion is noted, the moderate quotations as compared with other years inducing buyers to think that this is a good time to stock up. We continue to quote turpentine, 57c for single barrels, net 30 days.

LINSEED OIL—Notwithstanding the sharp advance, a heavy buying movement is noted. Accumulated stocks have disappeared, and a healthy demand exists, both from the hardware trade and the manufacturer. During the week linseed oil advanced another 2 cents, making 5c in all from the low level which existed a few weeks ago. We now quote: Raw, 1 to 4 barrels, 63c; 5 to 9 barrels, 62c; boiled, 1 to 4 barrels, 66c; 5 to 9 barrels, 65c; strictly net, 30 days.

GROUND WHITE LEAD—With the optimistic feeling now prevailing ground white lead was bound to be stimulated. Orders have been numerous, and of a substantial character, and the whole tone of the market is good. We quote; Strictly pure, $5.60 to $6.10, according to brand, and No. 1, $5.10 to $5.60, f.o.b. Montreal.

RED LEAD—Red lead shows improvement. Orders are more free, and with the better tone all the way round quotations are firmer than they were. We quote: Genuine red lead in casks, $4.50; in 100-lb. kegs, $5; less quantities at $6 per 100 lbs.; No. 1 red lead, casks, $4; kegs, $4.50, and smaller quantities, $5.50.

WHITE ZINC—There is an encouraging call for white zinc, chiefly from the large centres. Quotations are well maintained. We quote: Dry V.M. Red Seal, 7½c; Red Seal, 7c; French V.M., 6c; Lehigh, 5c; white zinc, ground in oil, pure, 8½c; No. 1, 7c; No. 2, 5¾c.

VARNISHES AND JAPANS — All classes of gums show a firmer tendency. In view of this and higher prices in turpentine, consumers are booking more freely than has been the case for some time back. There is an improved call for all sized tins of varnish.

PARIS GREEN—Notwithstanding the warm weather the call for paris green is somewhat disappointing. Prices are unchanged. We continue to quote: 1-lb. cartons, 18c; 1-lb. tins 19c; 50-lb. drums 17c.

PUTTY—Heavy shipping is now going on to all parts of the country. Jobbers are commencing to place their orders for the fall on the figures now prevailing. We quote: Standard putty, 880 lbs., in casks, $1.65; in 100-lb. drums, $1.90; bladder putty, 400 lbs., in barrels, $1.90; in 100-lb. cases, $2.05; in 25-lb. drums, $2; 25-lb. tins, $2.05; 12½-lb. tins, $2.25 f.o.b. Montreal.

TORONTO.

June 11.—Paint jobbers were were too busy to discuss at length the situation of the market this week, contenting themselves with giving answers to the various questions put to them. The demand for paint just now is heavy and the present month is expected to be as busy a June as any up to now. Painters everywhere are buying and say they are rushed with work. Travelers report good sales, and paint grinders are smiling at the heavy shipments going out.

As was anticipated sometime ago, white lead has advanced 10 cents per hundred on all grades. Jobbers state this is but preliminary to a further general advance. Turpentine is fairly steady, though there is some uncertainty abroad. Oil is slated for a further advance, say men in the trade; but if English oil keeps down it does not look to the outsider as if that advance would go very high. All the other lines are unchanged, and there is a decidedly better and firmer tone to the market.

TURPENTINE — As regards turpentine, opinion is divided, the market seems to have steadied at the places of production and they do not seem to promise any decline in prices for some time as the quantity of turpentine coming forward for the months of April and May has only been 2-3 as much as for the same months two years ago. Some paint men aver, however, that supplies are free and that prices are likely to ease off a little. The majority of jobbers hold "turps" at 58c for single barrels, the same price as last week. One manufacturer is quoting at 57c, and a third at 56c.

LINSEED OIL—Regarding linseed oil, the advanced price seems to be well maintained and likely to be for some time as the price of flaxseed has advanced in greater proportion with the ad-

vance in oil and the report now comes that the crop of the Argentine seed has been over-estimated by as much as 50,000 tons and that the shipments from that country are now falling off and it is believed that the crop is all in for the season. It will depend on this report to some extent as to whether or not the price will advance. Just now it looks as if it would, and jobbers say it will; but if English quotations are low the price here will not advance much. The quotations of last week, 63c and 66c for single barrels, raw and boiled still hold good.

WHITE LEAD — The expected has happened and all grades of white lead have advanced 10c per hundred pounds. It is stated among the trade that a further advance will take place shortly. No. 1 is now $5.50 and $5.75; pure white runs from $5.90 to $6.10, with a superior grade at $6.35. Red lead is unchanged as to price. The demand is of goodly proportions. Quotations are at $4.50 for casks and $4.75 to $4.80 for hundred pound lots.

GLASS AND PUTTY—Putty is fairly active. It is going out in orders not so much for glass work as for fillers after priming. Glass is moving slightly better than a month ago, if we except the import movement. Prices on both lines are unchanged. Glass prices are yet at $2.90 for the first break.

STAINS AND VARNISHES—These lines with ready mixed paints, which latter are going out in splendid repeat orders, continue to be the foremost summer lines. Wall finishes, whiting, etc., also figure well in sales.

PETROLEUM — Rumors of lower prices in other markets have not been generally heard here. Toronto prices are unchanged and have been at stationary figures for several months past. Gasolene and benzine are active sellers.

IMPROVING THE TURPENTINE AREA.

Through the improvement in the systems of turpentining the Southern States of America have taken a long step forward in the movement for the protection and development of one of the country's most important natural resources, the rich yellow pine forests which make the United States the leading nation in the production of rosin, turpentine, and the other products known as naval stores.

Improved methods of turpentining were first established to an appreciable extent during the producing season of 1904, when the cup and gutter system was installed by a number of the most enterprising manufacturers of naval stores in Georgia and Florida. Since that time there has been a steady and satisfactory increase in the percentage of turpentine and rosin produced by these conservative methods. The work in conserving these vast turpentine orchards of the South has perhaps come in time to stay the early destruction of yellow pine forests threatened by years of careless management.

Experiments conducted by the United States Forest Service at Ocilla, Ga., and Green Cove Springs, Fla., as well as definite and reliable data received from operators throughout the naval stores belt, have effectively determined the great advantages of the new methods over the old. Not only has it been shown forcibly that the conservative methods are of great protection to the forests, but sufficient data has been collected to show that the increase in yield of both turpentine and rosin by the new and improved systems furnishes a strong argument in favor of their use.

Reports from the states where naval stores are produced show that where there is a greater percentage of turpentine produced by improved methods there is also a greater yield.

To demonstrate more fully that the use of improved methods is largely responsible for the remarkable increase, the reports from two of the large establishments in Texas, one using the cup and apron system and the other cutting boxes into the tree, are compared. The establishment using the cup and apron system reported a yield of 1,372 barrels of turpentine for 20 crops, as against a yield of 1,500 barrels of turpentine for 35 crops where the old methods were employed, 68.2 casks per crop for the cup and apron system as against 42.8 for boxes.

Both companies were operating for the first year and timber and weather conditions were practically the same. The two establishments reporting these figures employ a high standard of business and the figures given are reliable. Forty-two barrels is considered a fair average yield for the first year the trees are bled and where boxes are used.

In Texas and Louisiana a greater percentage of operators own their own timber. Some of the most extensive places in these states are operated by large lumbering companies or corporations who are bleeding their trees for turpentine and rosin previous to converting them into lumber. These companies have carefully and systematically studied both methods of turpentining, and the fact that the new methods are more generally in use in those states indicates their advantage over the old.

PAINT NOTES.

The Horwood Glass Mfg. Co., incorporated under the Dominion statutes, has been granted a license to do business in Ontario.

The British American Oil Co., Montreal, with a capital of $500,000 has been incorporated at Ottawa to take over and conduct the British American Oil Co., Limited.

A painter says that if before painting a smoky wall or a greasy wooden surface some limewash is applied, the paint will take on the object to be covered.

Ed Dean, office manager with Stewart & Wood, paint jobbers, Toronto, left this week with his daughter for a three months' holiday tour of England, Holland, Belgium and France. While in Antwerp, Mr. Dean will spend a few days inspecting the glass industries there.

Keep Your Gasolene Outdoors

STORE IT IN A BOWSER OUTDOOR CABINET

Cut 10—Outdoor Cabinet

The Bowser will keep your property absolutely safe from gasolene fires and explosions because it keeps explosive gases from forming.

It will increase your profit on gasolene because it stops the usual loss of from 15 to 50 per cent. through evaporation, leakage and waste. It draws new trade because it is placed in front of the store where it continually advertises the fact to automobilists and others that you sell gasolene.

The Bowser costs you nothing because it pays for itself by its own saving of gasolene. Ask us to send Gasolene Catalog 5445. It's free.

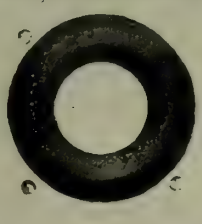
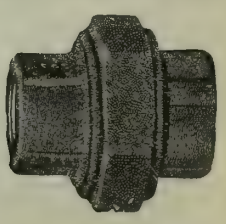
Mr. Hardwareman, add a New Line! Why not sell INVALID ROLLING CHAIRS?



These goods are MADE IN CANADA, and represent something that every dealer can carry at a good profit. Here are two desirable lines:

The cut on the left is one of our Reclining Chairs, equipped with divided and independent leg rests and is one of the most popular on the market.



The cut on the right shows a Rolling Chair with body of the best reed and hardwood and seat of cane web filling. The wheels and metal work are of the best steel and malleable iron.

You May Become a Practical Window Dresser For $2.50

This is the first book ever written devoted exclusively to Hardware Display, and has been off the press only a few weeks. It is a practical, up-to-date collection of ideas of the most expert window dressers in the world. There are hundreds of displays in the book that can be put in at practically no expense—any one of them will bring enough extra trade to the store to pay for the book many times.

LOOK OUT!

¶ Live business men should always be on the look-out for new lines which are going to take on, because by not carrying them they lose trade and reputation.

¶ We recommend them, therefore, to be quickly on the trail of our new No. 23 Handsaw, which has already met with great favour, partly because men wanted a straight back to compare in quality with our 87 and 87A, and partly because we have hit on a mighty good thing in our new alloy saw steel.

¶ There's "just a little something" in it which makes the difference your customers will notice.

CURRENT MARKET QUOTATIONS.

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate.

SEND FOR CATALOGUES

NORTH BROS. MFG. CO., - Philadelphia, Pa., U.S.A.

Mr. Hardwareman

Are you aware that the **EASTLAKE METALLIC SHINGLES** are the best steel shingles on the market? Now we are not claiming anything we cannot prove.

"EASTLAKE" STEEL SHINGLES were produced twenty-five years ago—long before any other steel shingle. The roofs that were covered with "Eastlake" shingles that first year are to-day in as good shape as when they were laid– never having needed repairs.

No other galvanized steel shingle can even claim such a record. Remember this fact when others say to you "My shingles will last a century."

Satisfy your customers Give them a shingle that has proven itself – that you know will insure the utmost satisfaction.

"Eastlake" Steel Shingles are made by the oldest and largest sheet metal building material firm in Canada—a firm whose policy has been "Protection to the Dealer" from the start.

We also manufacture **Galvanized Cornices, Skylights, Ventilators** and **Finials, Metallic Ceilings, Siding** and **Lath, Corrugated Iron, Conductor Pipe, Eavetrough, Fireproof Glass Windows, Doors,** etc., and Architectural Sheet Metal Work generally.

Write us for catalogue and estimates.

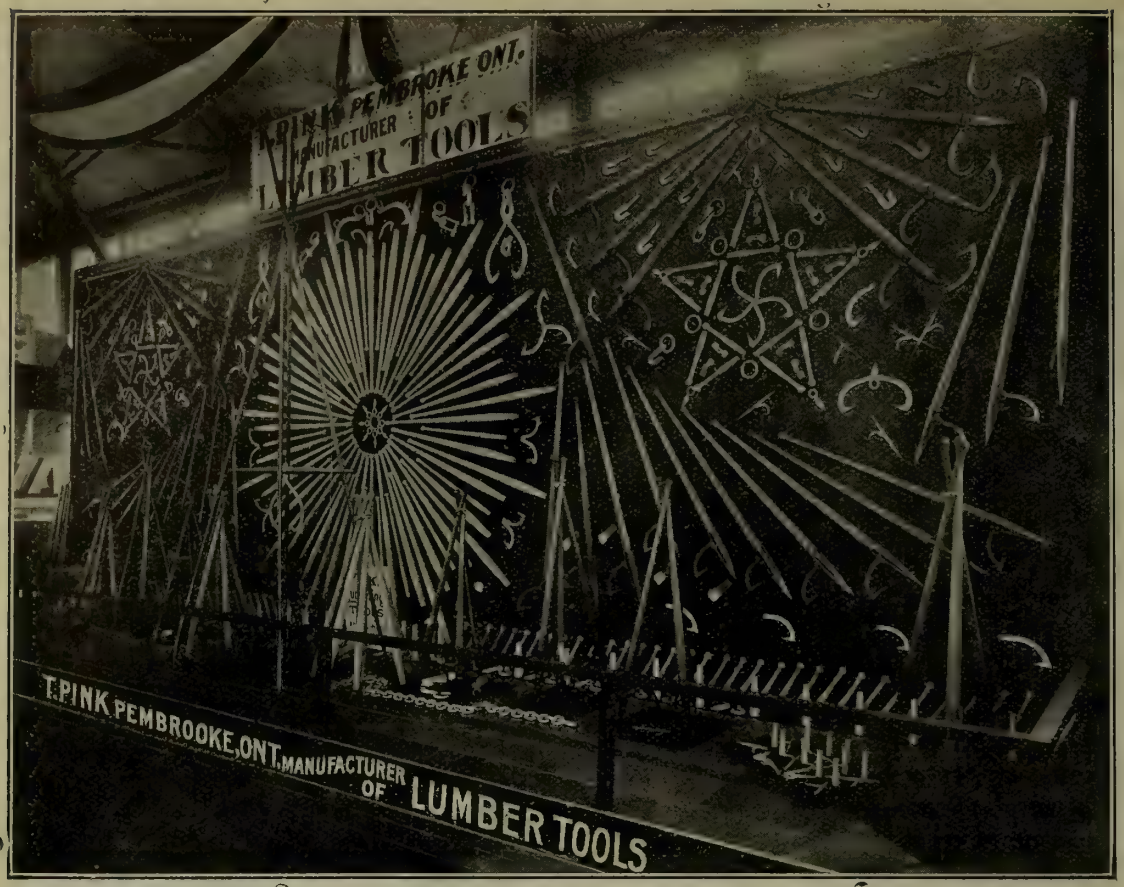
—**Potato and Manure Drags.**
—**Hoes:** Garden, Field, Turnip, Carrot, Mortar and Dutch, etc.

"SAMSON"
Selling Features

(1) The Handles are made from the highest grade of Canadian Second Growth White Ash especially selected for these goods.
(2) All Forks are made from hammered drawn steel, oil tempered, carefully and severely tested before leaving the factory, thus reducing to a minimum the danger of breakage in use, an item of interest which cannot be too often repeated in making sales.
(3) The Tines of the Manure Forks are properly hung, something the user appreciates. The same may be said of the Hay, Spading, Straw and Barley Forks.

That Count



(4) The Turnip Hoe Blades are all carefully adjusted, enabling the user to draw and push back the soil, for which purpose a Turnip Hoe is designed. Also note the shape of the handles.
(5) Field and Garden Hoes. These are welded and proportioned so that the pull comes from a point near the centre of the blade.
(6) A nail is driven into the ferrule and through handle, therefore eliminating the danger of ferrule coming off. All Hoes are sharpened.
(7) Each Handle is wrapped in a paper bag, insuring clean goods for stock.

Export Trade

Represents the Great Future Market for American Goods

Manufacturers that cultivate the field **NOW** are assured of the largest share of this trade in the future.

Our service, the greatest single power in Export Trade, enables manufacturers to get their products prominently before the trade abroad. An efficient service, covering all export markets at minimum of expense.

The aim of the **American Exporter** is and has always been the up-building of a world-wide demand for American machinery and goods. Issued in two editions each month, one in English, and other in Spanish **(Exportador Americano.)** The two together cover all countries that import American goods.

It is the only journal of foreign circulation which regularly publishes its exact circulation every month in its editorial pages.

Stronger evidence of the AMERICAN EXPORTER'S strength in its chosen field could not be brought forward than the phenomenal growth in its advertising pages during the past three years. The AMERICAN EXPORTER in net volume of advertising business carried three years ago 52 pages of net advertising; two years ago 88 pages; one year ago 116 pages; carries to-day 122 pages. Its number of regular advertisers three years ago was 325; two years ago 400; one year ago 550; and to-day 650. It is seen that notwithstanding a "panic," there is a growth in the last 12 months.

An increasingly important feature of the **American Exporter** is the Foreign Trade Service maintained on behalf of its advertisers. This service includes the sending of our representatives into foreign markets to study conditions in the interest of our clients, the furnishing of selected names of possible customers or agents in any country, commercial ratings on prospective foreign customers, translation of foreign correspondence from and into any and all languages resulting from or pertaining to the advertiser's announcements.

Representative space regularly in the **American Exporter** gives you all the export advertising you need, for this publication covers every foreign market for your goods. This publicity. coupled with our Foreign Trade Service, provides you with the necessary facilities for conducting intelligently an export trade.

May we send more particulars?

AMERICAN EXPORTER

135 William Street, New York City

Established 1877 **Conducted by Export Specialists**

Crescent Brand

Registered

DON'T BE "AN EASY MARK"

Any jobbing house can tell you that there are dealers here and there who will take anything at all; good, bad or worse, with no regard for brand or quality just so long as it is the "article" they ordered from the traveller.

Of course, we all know that if it wasn't for this class of merchant the manufacturer of inferior goods would go out of business—but, Mr. Merchant, don't you let anybody think for a minute that you're that kind of a business man.

You don't intend to be a "dumping ground" for these inferior goods.

When you want a Hinge, you want the very best kind of a Hinge—

A CRESCENT BRAND HINGE

The up-to-date Hardware man knows what he has to pay for and doesn't take chances. There are several kinds of Hinges and Butts, and those of quality and merit bear the "Crescent Brand."

Armstrong Bros. Tool Co.

"THE TOOL HOLDER PEOPLE."

106 N. Francisco Avenue, CHICAGO, U.S.A.

No. 70

No. 70 Breast Drill

Manufactured by

Ryall Tool Company, Montreal, Canada

RYALL TOOL CO. Breast Drill is carefully designed and proportioned, durable, easy working and strong.

FRAME--Finished in black and yellow enamel.

HANDLES—Polished Hardwood.

BREAST PLATE—Adjustable to any position.

GEARS—All gear teeth cut from solid metal, and the small pinions from rolled steel bars. Double gears equalize the bearing.

CHUCK—Nickel-plated with knurled sleeve, holding round or square shank drills. Two (2) pairs of jaws supplied with each drill.

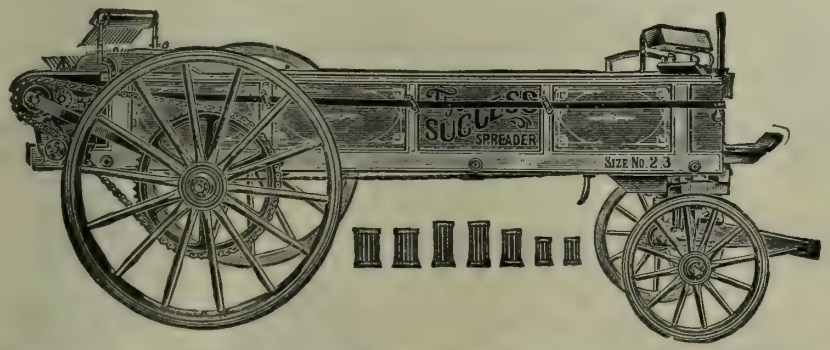
LEVEL—Is set in perfect alignment with the chuck and handle, which enables the drill to be held true. It is set in solid iron where it can be seen while in use, and is protected from all but intentional injury.

SPEEDS—Two speeds, one approximately three times faster than the other; readily changed to fast or slow by turning the knurled nut on the frame marked "F" and "S," at the same time turning the large gear slowly so the clutch may drop in.

SPINDLE—Runs in case-hardened, anti-friction cone bearing.

Length: 16 inches over all. Weight: 61 lbs. per doz.
Packed one drill only in a linen reinforced cardboard box.

Write for Catalogue.



DECATUR, BULL & CO.

SELLING AGENTS. MONTREAL, CANADA.

Live Hardware Dealers Everywhere

are beginning to appreciate the implement business as one that can be successfully and profitably handled in connection with their regular hardware lines.

We have a line of goods which will warrant your confidence if you have or intend to branch out along the implement line. Our goods are well and favorably known, and are kept before the agricultural community through the medium of all the leading farm papers.

We supply the following goods

Success Manure Spreaders
Walking Plows of every description
Single and Double Riding Plows for Ontario and the West

Grain Grinders, Disc and Drag Harrows. "Leader" Scufflers. Pulpers, Agricultural Wheelbarrows. Also the famous Thom's Blower, Ensilage Cutters.

These goods can be and are being profitably handled by many of the leading hardware men.

We solicit your inquiries and will be glad to send a traveller to talk the matter over.

Winnipeg Montreal

SIMONDS HAND SAWS

are good sellers. Dealers should send for 1907 Catalogue and discounts.

SIMONDS MANUFACTURING CO.
Fitchburg, Mass.
Branches Throughout The United States

SIMONDS No. 8½

This Saw is of the general style and shape which carpenters have been accustomed to using for years past. Has a carved apple handle with highly polished sides and edges, making a very pretty Saw. Holds its cutting edge and saws true. Its high quality and even temper are due to the fact that it is **Made of Simonds Steel.** Covered by the broadest Simonds warranty.

NO TANG TROUBLES

When You Use The

"Norka" Two Grooved High Speed Twist Drill

(THE DRILL WITHOUT A TANG)

because in making the Drill a piece of the stock is left untwisted and serves as a shank.
The Drill is held in the chuck by a pair of jaws, fitting the grooves of the shank perfectly and securely locked.
This Drill is twisted while hot from "W. & B." High Speed Steel, therefore the grain of the steel is not disturbed in any way, consequently the Drill has great strength.
Tempered by our special process and ground to size.
Write for Catalogue No. 72—shows all "W. & B." High Speed Tools.

TRADE MARKS W&B

A Guide to Demonstrating Asbestos Sad Irons

Every ambitious salesperson is anxious to learn all he can about the articles which he tries to sell. Selling without knowledge of the goods is like fishing without a hook.

For the assistance of salespeople who are interested in their profession, we have prepared a talk on the selling points of Asbestos Sad Irons.

Concise and Precise

There is no useless verbiage about this "Guide to Demonstrating," but straight, pointed selling talk that gives the facts and leaves it for the salesperson to supply the personality.

Develops Salesmanship

Nothing helps a salesperson to acquire the knack of "cashing in" the goods on the shelves like knowing just why those goods will be of service to customers. The "Guide to Demonstrating" will not only give you a line on Asbestos Sad Irons, but will also show you how to pick out the talking points of other articles. Before you forget it, write a postal asking for the "Guide" to

"Quality" PLUMBING GOODS

There is a vast difference

between the ordinary compression tap and the J. M. T. Cushion Disc Faucet.

The ordinary tap generally commences to leak soon after use, either at the outlet or around the spindle.

J.M.T. Cushion Disc Faucet

The construction of the J. M. T. Cushion Faucet is such that under ordinary care they last for years without requiring repairs.

The double-disc feature permits tight closing at minimum pressure. Improved packing gland prevents leak at spindle. The cost is little more than the "Common Tap."

Made for Basin, Bath, Laundry and Sink.

Use them for your best work, or anywhere where you want durability.

Investing Business Profits to Advantage

Reader of Hardware and Metal Asks for Advice—Will Surplus Profits invested in an Undeveloped Industrial Concern Ensure Safe Returns—Advised to Spend a Portion of the Profits in Visiting Factories and Conventions, Advertising and Paying Personal Visits to Customers—Bank Balance and Invest in Safe Securities.

By John Bayne MacLean.

Some months ago a subscriber to Hardware and Metal wrote me personally asking advice on what to do with his surplus profits. He had been strongly urged to subscribe for stock in a well-known—through extensive advertising—but new, industrial concern which promised very good dividends. "Shall I put a couple of thousand dollars in this?" he wrote. "If not, how would you advise me to invest the money?"

I had not much faith in the stock, but I handed the letter to the editor of The Financial Post, who is an expert in these matters. He replied that the company in question had undoubtedly a good thing up to a certain point, but so far it had not demonstrated any capacity to compete beyond that point with old established companies, and that of the large sums already paid in, the bulk had gone to the promoters and not to the development of the company.

I sent this information and wrote:—"This concern is one of a numerous class, but better than the average, in which business men are solicited to take stock. They are chiefly financial promotions rather than legitimate commercial businesses. With few exceptions business men with a reserve fund to invest should not touch any shares excepting those of old-established concerns directed by successful, conservative men of high character."

My advice, based on twenty-five years' erperience and observation of men who have made the best successes in retail business is this: If you are in good health and under 50, or even 60, establish a reserve fund of 10 per cent. of your average annual profits. Deposit this in weekly payments in your savings bank. After that you are safer and can make more money by investing your surplus in your own business in the following ways:

FIRST.—Spent part of it in at least two, or if possible more, weeks' vacation each year during which visit the factories of the concerns in Canada and the States whose goods you sell. You can find a list to select from in Hardware and Metal. If you wish, the editor can arrange it for you in advance. You will there meet personally the big men in the trade. You can depend upon getting a cordial reception.. You will see through the works and learn a lot that will be useful to you—you can talk more intelligently to your customers. But, best of all, you will absorb ideas from these men that will help you to be a broader, bigger and better business man yourself in every way. I am taking it for granted, of course, that you take advantage of every opportunity of seeing your wholesaler and his representatives and learning all you can from them.

SECOND.—Never miss the annual gathering of the Hardware Association or any local meeting of the trade in your town, or an opportunity to discuss business with anyone engaged in your particular trade. The cost of attending these meetings is small and the exchange of ideas pays enormously. I have built up the largest publishing business in Canada to-day—and this is not said by way of boasting, but to emphasize my argument—and the basis of this success was the ideas I learned in listening to and taking part in discussions at the annual meetings of the Press Association, which was composed almost entirely of the publishers of country weeklies and smaller dailies. I was then on the staff of a big daily newspaper and was about the only daily newspaperman who attended these meetings. My confreres used to make fun of me and the gatherings were a great joke, but there was then, and there is to-day, more real knowledge of how to run the business—particularly the editorial side of a newspaper—among the small country publishers than in the big daily newspaper offices. I never miss such a gathering if I am in the vicinity. I always learn something worth while from them—something that makes me a more successful business man. I am satisfied that you would get the same results by atending the hardware and stove trade gatherings. I would also encourage and attend gatherings of farmers of your district. There they will learn how to make more money out of their farms and the more money they make the more they will have to spend with you and the other merchants in your town. Perhaps you could encourage competition among them by giving prizes for the farmer who shows the greatest increase in revenue from some profitable department of his farm.

THIRD.—Spend some of your surplus money in advertising in your local paper, if you do not do so now. It will pay good interest and part of the principal back every year. Of course, it must be well done. You will make lots of mistakes at first, but you can get many ideas to supplement your own from the experience of other men. Begin in a small space and gradually increase as your experience shows you how to use it.

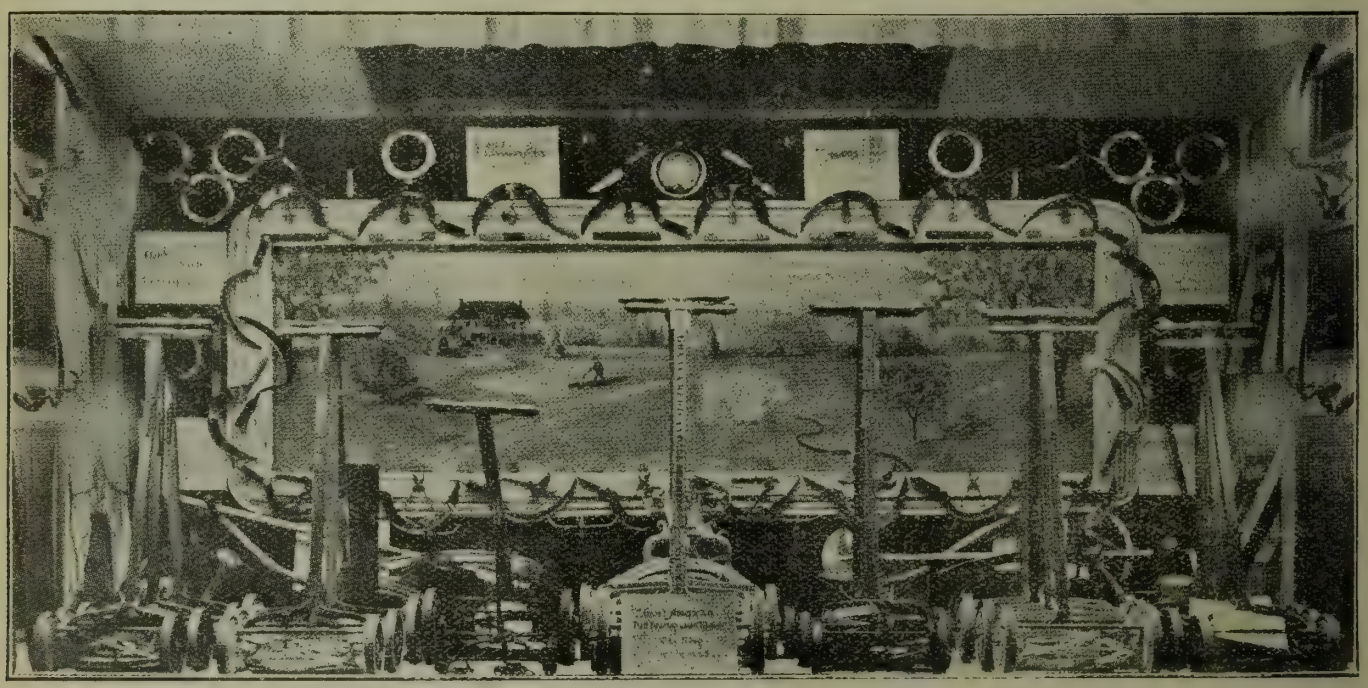
FOURTH.—Spend some more of your annual surplus profits on a reliable young man to manage your store in your absence. Then get out and devote all the time you can in the next year or two in canvassing the people in your town and the surrounding country for orders. You will learn a lot from this and you will make a most valuable connection. These people will appreciate seeing you, though they may not admit it to you. You will learn their wants and suggest things that they have not thought of requiring, but which they will want to buy when you tell them about them. When you have this connection properly worked up, send your best clerk out and keep him doing this work in future. You can then spend your time in building up the store trade and in directing and advising him. You will find a lot of lines that you are not now selling in any quantities, but for which you can create a demand among the farmers. For example, there are all kinds of agricultural implements and tools which are not now handled regularly by the trade, but which should really be a department of the hardware dealer's business. There are numerous other similar developments. This will probably eat up nearly all your surplus for two or three years, but it will begin to come back with big profits.

After you are past say your 55th year, you can then begin to withdraw some of your surplus which is now only drawing 3 per cent. in your bank and buy high-class bonds and stocks, or invest in good mortgages at your own door.

Every real business manager realizes the fact that he must pay all he possibly can afford if he expects to keep a thoroughly competent working force, but many of them depend upon the pay alone to hold their men. There is much more to be thought of. The best men will in many cases work for less wages than they could command from other sources if they feel sure that their efforts will bring promotion. Good men are willing to prove themselves to be competent, and to wait for better things, if they feel sure they are not to be disappointed in the end; but bringing one new man in above them shatters all their confidence in a square deal, even if that new man happens to be the son of the manager, fresh from college, and long on athletic knowledge and short on business sense,

Window Displays for Summer Season

Lawn Sundries, Sporting Goods, Camp Supplies, Refrigerators and Freezers all Seasonable Lines for the Window—Novel Window Displays Attract Attention and encourage People to Look at Goods Exhibited.



The cool weather up to the middle of June has left some stocks of summer goods in hardwaremens' warehouses and every effort should be made to make these lines move, as money tied up in stock carried over from season to season not only does not draw interest but rather deteriorates, the merchant losing the use of the money, the interest, the loss of storeroom and the loss in the selling value of shop worn goods.

No better means can be taken to make seasonable goods move than the use of attractive window displays backed up by advertising in the local newspapers, prices being named whenever possible, as nothing so interests probable customers as price tags on goods displayed or in advertising, this being shown by the success of departmental stores in quoting prices in their ads. and catalogues.

Displays of Lawn Goods.

July and August are the outdoor months and as the weather so far this summer has not been very inviting outside many lawns have been neglected. Consequently there is still time to move out any lawn goods in stock and the accompanying display, one of the best we have seen this season, suggests a very attractive arrangement. Too many trimmers try to overcrowd their displays, but it is best to put fewer goods in the window, have the goods all from one department and change the displays more often.

In the centre of the background in the photograph shown is a water color landscape showing a man operating a lawn-mower on a lawn while in the foreground of the scene, the hose and a lawn sprinkler in full operation. A raised framework of wood one inch by three inches surrounds the scene, and bordering this framework are three layers of hose. Grass hooks, scythe stones, hose nozzles and pruning shears were attached to the framework by the use of small wire nails and furiture nails. The outer edge of the background was covered with black bunting over which was tightly drawn a piece of 1-inch No. 20 poultry netting. An assortment of lawn sprinklers, small garden tools and display cards were attached to the netting by means of window screens, grass shears and grass catchers. Back of the mowers which filled the foreground can be seen scythe stones, snaths, scythes, hay carriers, hose, watering pots, etc. Attached to the roof of the display is a screen door. Seven different brands of mowers were shown.

Display of Lawn Mowers, Hose, Scythes, Sprays, Shears gnd Similar Goods.

Camping Goods for Vacations.

Summer holiday season suggests the class of goods young people will take with them on canoe trips or to the summer resorts as well as the cooking utensils, refrigerators, ice cream freezers, etc., families who go to summer cottages or tenting grounds will require. Tennis outfits, baseballs and bats, boating sundries, fishing tackle, tents, oil stoves, cooking utensils and camp furniture, ice boxes, refrigerators, water coolers and filters, ice picks, ice cream refrigerators of various sizes—all of these goods should be brought to the front in window displays the last of June and during July.

Novel Millinery Displays.

In order to attract attention to the window an occasional moving display or freak window is a practical diversion. A Toronto sporting goods store has been showing a mechanical window with an airship, a mechanical fireman's ladder and a moving toy train, crowds watching the window at all hours of the day. Similarly there have been many freak "hardware millinery" displays shown in hardware stores at Guelph and other cities, the monster merry widow and inverted dishpan or chopping bowl hat shapes making admirable subjects for burlesque displays. In the illustration shown the standing figure was a borrowed model on which was placed a wonderfully constructed hat of rope, decorated with fringed ends of the same and two large screw-driver hatpins. Below was displayed a stunning, though stiff, creation evolved from a pudding dish decorated with a large stirring spoon, two egg beaters and a turquois studded dog collar. A coal scuttle model, the handle of which served for a coquettish chin string, was extremely fetching. It was encircled by a cat collar and bewitchingly trimmed with a rakish dish mop pompon. A single lamp swab chastely set off the cuspidor; a whirling egg beater decorated the wash basin; a haughtly looking scrubbing brush adorned the wire colander; two whisk brooms looked

amazingly like mercury wings on a tin chimney stopper and so on.

In another town a hardwareman borrowed two models and seven stands from a dry goods merchant and put in a display comprising a white dish pan trimmed with white crepe paper, and a marbleized blue dish pan with top from a tea kettle, also trimmed with white paper. What was regarded as the most attractive hat in the window was a common home-made feed basket trimmed with blue paper and two roses. Another very catchy one was manufactured from a white dish pan trimmed with white crepe paper, a dog collar being used as a band and an 8-inch butcher knife as a feather. Still others were as follows: A wooden dough tray with seine netting as a veil, producing a hat of the automobile variety; an inverted sauce pan with bow of white paper; a wash pan trimmed with two fly flaps and blue paper; an inverted colander with white crepe paper and trimmed with a dog collar. The entire cost of the window was $1, spent for blue and white crepe paper and roses.

The two displays referred to attracted more attention than any ever put in the windows and the effect was felt by increased sales of goods shown in displays following the freak windows.

SELLING HOUSEHOLD TOOL SETS.

A western hardware dealer says that one of the most successful window displays he ever had consisted of household tool sets. He made up quite a number of these sets, consisting of several such articles as a hammer, chisel, screw driver, small augur, etc. He made a close price on the assortment and placed two or three dozen sets in his show window.

"It was just what a lot of people wanted," he said. "There were a good many who wouldn't come in and buy the separate articles, but seeing them all in a bunch at a reasonable price they figured it was just what they needed for tinkering about the house."

SHOW WINDOW HINTS.

When offering goods in a window display that are especially low priced it is a good plan to have every article bear a price card. This is good even if the price of every article is the same.

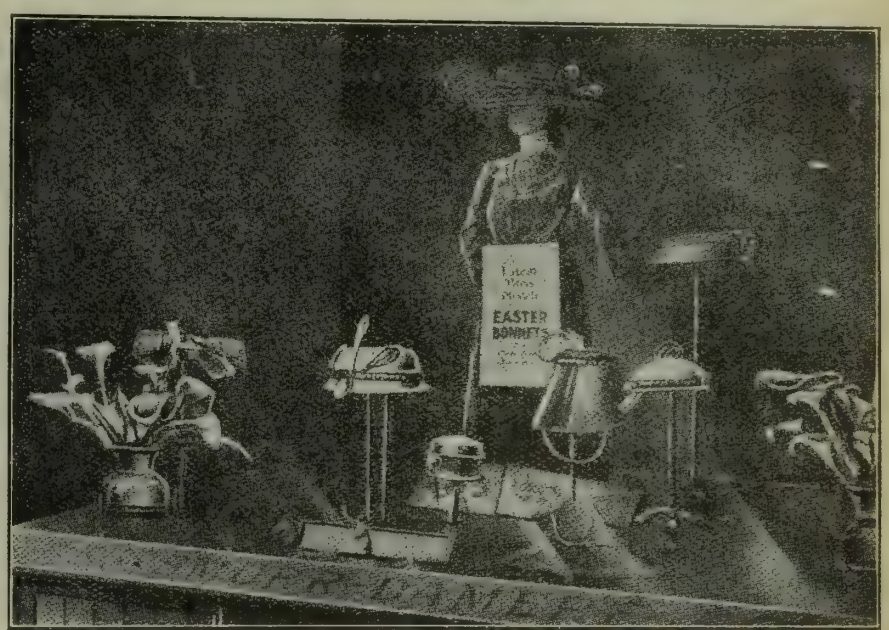
As often as possible put stuff in the windows that will appeal solely to women. They are the real shoppers and know a bargain when they see it. Nothing appeals to a woman like an article of utility for the household.

Every merchant should leave lights in his windows in the evening if he is in a town large enough so that there are apt to be people about on the main streets at night. Many people do all of their "window shopping" in the evenings.

The smaller the town the more frequently window displays should be changed. In a small town the crowd does not change much. The same people pass and repass the store day after day. If a window display is left in too long it will cease to attract their attention. Frequent changes will serve to attract their attention every time they pass. They will always be looking for something new.—Hardware Trade.

CASK FOR WINDOW DISPLAY.

Originality does not always mean something new, but sometimes something old in a new place. An English hardware dealer suggests that instead of placing locks, hinges, bolts, and small articles of builders' hardware or other goods on the floor of the window it would be much more interesting to take an ordinary barrel, paint it red, green, or blue, and fix articles for display upon it. Such a device hung in a display window would draw attention, not because it is specially ingenious, but because it is something new. The cask would attract more attention if made to revolve.



PHRASES FOR WINDOW CARDS.

"These cost only as much as they must, in order to cost you as little as they do."

"We don't keep a bargain store, and yet you will find bargains all over the store."

"We have more than is seen."

"Buying right is getting your money's worth."

One of the Freak Hardware Millinery Displays so Popular this Season.

"You would not leave your happy home for anybody if you let us furnish the kitchen."

"The way to find out about these is to step inside and examine them."

"Our selling prices indicate our buying power."

"We sell so as to sell again."

"Goods as good cost more elsewhere."

"It's better to buy here with cash than to buy elsewhere on credit."

"We do not deal in 'glittering generalities.' We have many 'sparkling specialties,' however."

ENCOURAGE NEW IDEAS.

Ideas are worth dollars. If you have an employe in your store whose brain shows fertility in producing ideas, see that he receives the proper kind of encouragement. Some of his ideas may not seem practical to you, perhaps, but give them good, fair consideration before rejecting them. And if you accept any of them and carry them out successfully, see that the employe gets the credit due him.

PROTECTIVE COATING FOR METALS.

Steel, iron, bronze, brass, and copper may be protected from the oxidizing action of the air by the following cheap and simple method: The surface of the metal is cleaned, first with lye and then with dilute sulphuric or hydrochloric acid. A thin paste composed of a metallic powder mixed with water or other suitable liquid is then applied uniformly, with a brush for small objects and with a compressed air sprayer if large surfaces are to be covered. The metallic powder is composed of tin, pure or alloyed with lead or with lead and zinc. The metallic coating is next melted by means of a flame or a coke or charcoal fire. The moment of fusion is indicated by the change of color from gray to black. In order to avoid danger of burning off the coating it is advisable not to heat much above the fusing point. After the surface has cooled, it is washed with water. A glossy surface may be produced by friction with a brush or with tow.

Wrought iron and steel must be washed with sulphuric acid and, in some cases, a thin coating of copper must be applied by brushing or spraying with a slightly acid solution of copper sulphate and immediately washing with water before the tin is applied. Cast iron must be attacked with hydrofluoric acid before the washing with sulphuric acid, and electroplated with copper before tinning.

SWISS ARMY RIFLES.

Several Canadian jobbers are again pushing the sale of Swiss Army repeating rifles, large quantities of which were imported into Canada last year before the government prohibited their incoming. The rifles sell for very reasonable figures and ammunition can always be had in any quantity.

What Canadian Hardware Associations are Doing

Matters Relating to Trade Organization Will be Discussed on This Page and Readers are Invited to Express Their Views on any Matter Affecting the Hardware Trade—Correspondence on Official Business Should be Sent to the Secretaries of the Associations Interested.

CHEAPNESS OF ASSOCIATION WORK.

The Canadian Grocer, in a recent issue, published the following article referring to the work of the Ontario Retail Hardware and Stove Dealers Association. The Grocer is endeavoring to induce the retail grocers to organize a provincial association, to work along similar lines as the Retail Hardware Association, which it holds up as an example of what can be done in the way of organization. The Grocer says :

Since the suggestion that an Ontario Retail Grocers' Association be formed has taken hold some have expressed the opinion that the idea of organizing a one line association is not feasible because the cost of conducting the association would be too great for one branch of trade to stand.

There is no reason for this objection as the experience of the Ontario Retail Hardware Association has shown. This organization was formed in April, 1906, with about twenty members scattered throughout the province. It met with active opposition on the part of the Retail Merchants' Association, secretary E. M. Trowern uttering a foolish threat that he would put the hardware organization out of business unless it nestled under his protecting wing. The Retail Hardware Association, however, declined Mr. Trowern's invitation and, placing its annual membership fee at $3, collected $400 the first year and after paying expenses of $340 began the second year $60 to the good. In 1907 the expenses were $450 and in 1908 only $365, the assets at the beginning of 1909 being $138 and the balance to the good on April 1, 1909, being $540.

The Retail Hardware Association paid out about $200 during the first two years in traveling expenses for an organizer and while the Association had a profit on the work, experience has shown that in the long run it is unwise to hire a man to talk merchants into joining an association as unless men join of their own accord they are likely to become disgruntled and withdraw, feeling that they have been "done" for the amount of the membership fee.

This is a wrong attitude to take, as the indirect results of having an association organized are considerable—notably in compelling concerns looking for custom from the retailers to sell more exclusively to the trade. But the experience of the officers of the Retail Hardware Association has been that their most enthusiastic members are those who attend the annual conventions while those who stay away are reluctant to pay their membership fees.

The conventions of the Retail Hardware Association have become events to be looked forward to, the gathering at Hamilton last February being attended by about two hundred retailers with another hundred present representing jobbing and manufacturing firms, one session being open to all branches of the trade. In connection with the convention a trade exhibition was held, over thirty firms paying a small fee of $10

H. T. KIRK, New Westminster,
Recently Elected Vice-President of the B.C. Hardware Dealers Assn.

for the privilege of exhibiting. It is the money raised from this source that has given the Association its creditable balance in the treasury. The Association has recently decided to hold its 1910 convention at London and to run an excursion of its members and retail friends to Montreal in August.

By having a balance in the treasury the Hardware Association is in a position to put up a strong campaign against any unfair legislation which the mail-order houses endeavor to put through parliament. It is largely due to this organization, in fact, that Postmaster-General Lemieux in 1907, withdrew his proposed parcels post c.o.d. law, the effect of which would have been to make every postmaster in Canada a collecting agent for the big department stores. Whole wagon loads of letters and petitions were delivered to Hon. Mr. Lemieux on Feb. 1, the date set by the Association for members to forward petitions.

Another matter being pressed by the Hardware Association is that of Mutual Fire Insurance. In the United States there are many Hardware Merchants Mutual Fire Insurance Companies, several returning an annual rebate of 50 per cent of the premium to its members in addition to maintaining a substantial cash reserve. In Ontario farmers are the only class privileged to form mutual fire companies but at the next session of the legislature the Hardwate Association will endeavor to have the law changed to include merchants generally.

The officers of the Retail Hardware Association state that they could have done more effective work if a $5 fee had been named as with a paid up membership of about 200 the $3 fee was needed to pay office expenses, cost of executive meetings, printing supplies, and a small honorarium to the secretary. But now that the Association is firmly established the membership should steadily increase until it reaches the standard of the Michigan Retail Hardware Association with its 800 members and the Illinois Association with its 1,100 members, these latter bodies having the advantage, however, of giving their members the savings resulting from mutual fire insurance. About 125 members of the Ontario Retail Hardware Association are using a set of "collection letters" supplied by the organization at cost, the results proving very satisfactory.

Grocers in Ontario far outnumber the hardwaremen and, with the advantage of already having several live local associations in the larger cities, there is no apparent reason why they should not be able to profit by the experience of the hardwaremen and organize a strong Provincial Retail Grocers' Association to work in harmony with the hardwaremen, booksellers, drygoodsmen and other classes of merchants.

SELL OUT EVERY TEN YEARS.

John R. Folsetter, Ayr, who recently sold his hardware business to R. C. Puddicombe, writes that although he is out of the hardware business temporarily he does not intend dropping out of the Retail Hardware Association and he plans to take in the Association excursion to Montreal, Aug. 23 to 30. Mr. Folsetter intends going into business again shortly, and expresses the opinion that every merchant should sell out about every ten years in order to make a clean up of outstanding accounts.

Hardware Trade Gossip

Ontario.

McIntyre & Hills recently succeeded Reid & Wilson, Seaforth.

Charles D. Warren, Toronto, has been elected president of the re-organized Lake Superor Corporaton.

Wm. Crawford, sales manager Kemp Manufacturing Co., Winnipeg, has been spending a fortnight in Toronto.

The Kerr Engine Co., Walkerville, have been awarded the contract for the iron gate valves for the Cobalt Hydraulic Power Co., Cobalt.

Charles C. Lee, hardware merchant, Goderich, is now owner of Hotel Sunset a summer resort near that town. He reports hardware business as picking up.

M. S. Chapman's hardware business will be amalgamated with the general store business of John Dickie & Co., Pickering, and the firm name will be changed to Dickie & Chapman.

W. R. Singleton, tinsmith and hardwareman, Carleton Place, is dead. He began in business in Delta, Leeds Co., some years ago, but having been burned out there removed to Carleton Place.

Acting for George H. Playter of Boston, Mass., J. M. Ferguson asked Justice Britton at Toronto last week for a winding-up order against the Canada Nut Co., of which Playter is treasurer and John Vannever is president. The company's head office is in Boston, but the plant is at Niagara Falls, Ont.

The partnerships subsisting between Geo. A., W. R., and E. C. Coslett, under the name the Coslett Hardware Co., Fort William, has been dissolved by mutual consent. Geo. A. Coslett is retiring, but the business will be continued by W. R. and E. C. Coslett.

Quebec.

J. A. Paquin, of St. Eustache, Que., has been visiting Montreal.

J. A. Foucault, of St. Leonard, Que., has been on a trip to Montreal.

Beauvais Freres have removed from 316 to 320 St. Lawrence Boulevarde, Montreal.

The Dougall Varnish Company, Montreal, have removed to more commodious premises at 525 St. Paul Street, Montreal.

T. J. Drummond, of Drummond, McCall & Co., Montreal, has been elected second vice-president of the Lake Superior Corporation.

A license has been granted by the Lieutenant-Governor of Quebec to The General Explosives Co., Montreal, allowing them to do business in the Province.

D. J. Munn, of Alex McArthur & Co., Montreal, and Walter J. Sadler, of Sadler & Haworth, Montreal, have been nominated for the executive council of the Montreal Branch of the Canadian Manufacturers Association.

T. H. Jordan, of A. C. Leslie & Co., Montreal, has returned from a business trip to Quebec. Mr. Jordan states that while trade has been backward there is no doubt as to the improvement now taking place. There is much more confidence as to prospects.

F. Gavin Smith, of A. C. Leslie & Co., Montreal, has been presented with a handsome cabinet of cutlery from the firm and staff on the occasion of his marriage with Miss M. L. Higgins, at Zion Church. Toronto and Niagara Falls were selected for the honeymoon. W. S. Leslie made the presentation, and the heartiest congratulations were accorded Wr. Smith.

J. Sophus, of Montreal, has taken over the Canadian Sales Company, and with a staff of travelers intends to cover the whole of Canada with the many agencies that he controls. Among these may be mentioned, Crosier, Stephens & Co., Newcastle-on-Tyne, machinery; the Indestructible Paint Co., London, Eng., Oliver Eastwood, London, Eng., hardware specialties; A. P. Lundberg & Sons, England, electrical accessories; Seabrook Bros., Londoo, Eng., safety razors; Consolidated Mfg. Co., Hartford, Conn., ice cream freezers, and the Progress Company, Chicago, toilet rubber goods.

Fire, smoke and water did from $60,000 to $65,000 damage to the James Walker Hardware Co. store, St. James Street, last week. Owing to fire doors on each flat, and the promptness of the fire brigade, the fire, which broke out in the basement and was discovered just before 8 in the evening, did not spread much beyond the lower floor, but the tons of water poured into the building caused much of the heavy loss. Half of the fire strength of the city appeared on the scene, and there were some anxious moments until the fire was got under control. Repairs are being rushed through by Max Hill, manager for the Walker Company, and he is taking this opportunity of making some important alterations in the store that he has long contemplated. The loss is covered by insurance, but not of course the dead loss caused by the closing of the store, while the appraisers were at work. But for this Mr. Hill would have had the store open the next day.

Western Canada.

A. Guilbert, hardware dealer, Letellier, Man., has sold his business to N. Jubinville.

Skelding & Jackson, hardwaremen, Neepawa, Man., are closing up their business and selling off their stock.

G. M. Lorimer & Co., hardware merchants, Manor, Sask., have sold their business to E. M. Kissack.

Maritime.

S. B. Bogart, one of the leading hardware merchants of San Francisco, Cal., who dropped dead recently at that city was born and was for a time a resident of Bridgewater, N.S.

AN INTELLIGENT SPIDER.

Mark Twain says: "When I was editing the Virginia City Enterprise, writing copy one day and mining the next, a superstitious subscriber once wrote and said he had found a spider in his paper. Was this good or bad luck? I replied to him in our 'Answers to Correspondents' column as follows: 'Old Subscriber.—The finding of a spider in your copy of the Enterprise was neither good luck nor bad. The spider was merely looking over our pages to find out what merhant was not advertising, so that it could spin its web across his door, and lead a free and undisturbed existence forever after.'"

Hardware Letter Box

Any questions on trade subjects will be answered by the editor in this department. Do you want any address, any special line of goods, anything relating to the hardware trade? Ask us. Letters from manufacturers, jobbers, travelers, retailers or clerks are solicited. Suggestions for trade improvement or discussions on trade evils are invited.

Dustless Floor Brush.—Taylor Bros., Carleton Place, ask what firm makes a dustless hair floor brush to be used with oil.

The Dustless Brush Co., 29 Colborne street, Toronto.—Editor.

Barn Door Hangers.—E. B. Davis, Cayuga, asks who makes the "Reliable" brand of barn door hangers?

This is a brand sold to retailers by the Allith Mfg. Co., Hamilton, the same hanger being sold to jobbers under another name.—Editor.

Umbrella Supplies. — Waites Bros., Victoria, ask to be put in communication with Canadian firms manufacturing umbrella handles, shanks, covers, and parts, as well as making repairs.

The Irving Umbrella Co., Toronto; East & Co., Toronto; and the Standard Umbrella Mfg. Co., Montreal, are manufacturers and deal in umbrella supplies, though practically all handles used in Canada are imported.—Editor.

Catalogues and Booklets

Manufacturers or jobbers sending printed matter for review, should draw attention to the new lines listed; and retailers sending for catalogues or other matter, shou'd write on their regular printed letterhead and mention this paper to make clear that they are in the trade.

"Perfection" Heating Goods. — The approach of the fall and winter season is brought home by a glance through the 100-page 1909 stove catalogue just issued by The James Smart Mfg. Co., Brockville, makers of "Perfection" stoves, ranges and furnaces, and the "Kelsey" warm air generator. The various heating lines are illustrated as well as described, and special attention is directed to the new goods added by the company this year. Some odd designs in stoves for special uses are shown, and the elevated oven, for use with any stove, is a novelty. Other peculiar designs are the "Tortoise" heaters and cookers which occupy little space; the candy stove, tailors' oven, and farmers' boiler, which should appeal to the classes for whom intended. A chapter devoted to stove repairs should prove useful to hardwaremen handling this company's stoves and the few pages devoted to hollow ware and stove accessories may suggest some ideas. All the articles enumerated are coded for convenience when ordering.

One of the most costly fires in the history of Winnipeg destroyed the wholesale house and factory of the Great West Saddlery Co. on June 17, doing damage amounting to about $375,000, less than half of which is insured. The fire was of mysterious origin and 150 men are thrown out of employment temporarily.

PLAN FOR A SUMMER VACATION.

The members of the Ontario Retail Hardware Association are making a practical move this summer in arranging to take a week's holiday in a party where 100 or more will be together for about a week. In Iowa last year the hardwaremen of the State held a big picnic and each year the grocers of Hamilton, London and other places hold a picnic, excursion or reunion of some kind.

The hardwaremen, however, are going one better by arranging to be together for a whole week, going down to Montreal from Toronto by boat and taking their wives along to make the holiday more enjoyable. During the week lasting friendships will be created and many members of the party, while in conversation with hardware merchants from other parts of the province, will pick up pointers valuable enough to repay them for the cost of the whole trip. For instance, the trip will cost each excursionist $30 to $40 necessary expenses according to location. Will it be hard to pick up ideas which, if put in practice, will make it possible for a merchant to save $1 per week in his bookkeeping, his delivery or his buying, or make it possible to increase his profits $1 weekly by improving his selling methods?

But aside from the business advantages of making a holiday trip in company with other hardwaremen and meeting Montreal hardware manufacturers and jobbers at a time when pleasure, rather than business, is the object in view, the taking of a week's holiday on the water is a commendable undertaking.

Every merchant should endeavor to put something aside for the rainy day but too many keep on saving from mere habit until long after the rainy season has passed, then leaving the savings for others to enjoy. To most merchants death comes while they are still busy adding to their pile. Why not, therefore, enjoy life to a reasonable extent before old age is reached? A week or two each summer will be enjoyed far more—and will be better for the health—than a total rest at sixty or seventy.

Wealth is not saved when it is piled up at the expense of a dull existence or a run-down constitution and a man is poor indeed if he cannot afford to keep his health good by an annual vacation.

BUYING IMPORTED GOODS.

Before stocking lines of imported goods retailers should make certain that the articles are being marketed by firms who are seeking a permanent trade for their products in Canada.

Some American manufacturers have a habit of dumping their surplus product in Canada and dealers may be tempted to buy on account of the low prices quoted. They will probably be better off, however, if they continue to stock lines they know well by reputation even if the cost is greater.

For instance, if lawn mowers, stoves or similar goods are purchased from American manufacturers who have not built up a trade in Canada the dealer has no assurance that he can purchase repairs in following years. And any customer who buys a stove or mower and cannot secure repairs easily is apt to hold a deep rooted grudge against the merchant he bought the goods from.

Or suppose a cheap line of harvest tools is imported and the handle and tool part company the first time the article is used. Then the iron is found to be soft and the tool second grade. The dealer's reputation suffers in consequence.

A good test to apply to any foreign firm which seeks Canadian business is to ask what their advertising policy is. If a manufacturer endeavors to sell his products in Canada without making their good qualities known through trade newspaper advertising the natural assumption is that he is not seeking a permanent market. On the other hand, if an English or American manufacturer advertises his line it is evident that he intends to cultivate the Canadian field as few manufacturers advertise for immediate results. Rather do they advertise to build up their reputation and good will by making their trade marks known as a standard for a certain quality of goods. They look for results from their advertising in future years as well as in the present.

There may be bigger profits in selling cheap goods, so far as the immediate sale is concerned, but the good will of a retail store is in the number of satisfied customers it has. It pays best in the long run, therefore, to sell goods of quality and, where imported articles are handled, to buy from manufacturers who show permanency in their methods by making connections with reputable jobbers and using publicity methods calculated to make their goods staple lines on this market.

Many foreign firms adopting these methods have found it necessary to build Canadian factories, so the merchants, in dealing with concerns with enterprising business methods, are not only adopting the best policy so far as their store is concerned, but are also helping in building up our country's manufacturing industry.

ST. JOHN IN BOASTFUL MOOD

St. John, N.B., is in a rather boastful mood these days. It is over the result of the winter port trade for the season of 1908-09. This boastfulness is not without reason, for the winter port season, which ended in May, is a record one. According to a statement just issued by the Board of Trade the exports for the six months ending with that month were $24,546,840. This is not only over $1,000,000 larger than any preceding year, but it is about $14,000,000 in excess of the same period ten years ago.

No one begrudges St. John its success. The people of that city are enterprising and have not been satisfied with the assistance which the Federal Government gave them in order to improve the facilities of their port to accomodate ocean steamers, but they have put their hands in their own pockets and put them in deeply in order to bring about the desired end.

Business men who, like those in St. John, help themselves, are entitled to the assistance of the Federal Government, for the nation as well as the immediate locality derives benefit from a port like that of St. John.

HALF HOLIDAYS AND TRAVELERS.

Something that caused more kicking among wholesale men and travelers last summer than even bad railway facilities and local option boarding houses was the interruption of business through the frequency of the mid-week civic and other local holidays. To say that such caused a lot of inconvenience is putting the case mildly. It would be hard to figure out in money just how much local holidays cost as a result of useless trips and enforced lay-overs. The half-holiday pretty well carves up the five-day business week of the commercial man with headquarters in Montreal or Toronto, and it is complicated by the half holidays being on different days in various towns. Moreover, the civic holiday dates ought to be known. It would mean a big saving in real money to have a list of holidays published.

Profits in Refrigerators and Ice Cream Freezers

Many Hardwaremen Neglect These Lines and Allow Departmental Stores to Make all the Profit—The Hardware Dealer, if He Uses His Window and Advertises Intelligently Can Get the Business by Going After it.

"Speaking of seasonable goods, did it ever occur to you that few hardwaremen proportionately, carry ice cream freezers, refrigerators, campers' supplies and things like that during the summer time?" This observation was made to Hardware and Metal by a representative of a manufacturing concern. And a number of incidents were related where some fairly large hardware merchants were unable to make sales because they had not the goods.

One Toronto hardwareman give two reasons for not carrying refrigerators during the summer—because they took up so much room, and because the department stores undersell them. The first complaint has also been made by country hardwaremen.

Kingston Hardwaremen's Experience.

A striking example of the business that can be worked up in refrigerators, ice cream freezers and campers' supplies generally is furnished by the hardwaremen of Kingston, where practically every man in the trade carries a stock of these goods. The proximity of the Thousand Islands led one merchant there a few years ago to look to the needs of the summer visitor and his success in that field brought other hardwaremen to realize the business possibilities in handling these lines.

Refrigerators are bulky articles, to be sure, but if carried in stock repay the hardwaremen a good profit when sales are made. A Toronto hardware merchant who made this complaint about "taking up too much room" rang up a manufacturer the other day asking that he be allowed to bring a couple of customers to the warehouse to look at some refrigerators. His request was complied with, and within an hour the hardwareman had sold two of them, one at $35 and the other at $23. The manufacturer allowed the merchant the usual discount to the trade. On the first $13 was made and on the second $11—$24 in all a pretty fair profit. Another Toronto merchant had the same manufacturer send a refrigerator to an out-of-town customer on which $10 profit was made. And by the way this out-of-town customer traveled 100 miles to the city to buy the ice box because no merchant in her own town had even a catalogue showing the goods.

So much for concrete examples. Both these hardwaremen are now converts to the handling of refrigerators, and take no more stock in the competition of department stores.

Must Display the Goods.

If a merchant has some goods to sell he should let the people know it, by advertising and displaying the goods he has for sale, as it will certainly result in inquiries and possibly sales, that otherwise would go to the department stores and mail order houses in the large centres. They may help, too, in bringing other lines to the notice of interested parties. Many good customers have been made by some attractive offering, and many a customer has been lost because he could not get a certain article which he wanted.

Talking Points in Selling.

Once he has taken the plunge and put in a stock (it need not be a large on—a few refrigerators, ice chests, etc., will do), and has made his window display his talking points come next. One of the best points to make is to emphasize the importance of the health of the family. In warm weather, especially, when typhoid and other diseases are prevalent, extreme care should be exercised in the preservation of the quality of food. What better preservation than a good refrigerator? What more refreshing confection than fresh home-made ice cream? Statistical reports can be quoted showing the marked increase of sickness during the hot season. Particularly is this increase noted among children, for the reason that milk being one of their chief foods has qualities more easily digested than others and at the same time it will putrify more quickly. Health is at all time worth more than the cost of a refrigerator.

Market Becoming More Staple.

Most of the refrigerators now on the market have passed the experimental stage, and besides being sanitary, are neat pieces of furniture. They are simply constructed and easily operated. The same may be said of ice cream freezers, which every day are becoming more simplified and more of a necessity.

It might be said that refrigerators should be carried by both city and country hardwaremen; for they are wanted by all householders; ice chests are liked by old country people, who wish a cheap article; and ice cream freezers are more apt to be asked for in the smaller centres than in the cities, because of the number of places in the larger centres where the read-made cream can be obtained.

THE RETAILER AS CULPRIT.

Under the above caption the Literary Digest in its issue of June 5, gives a summary of the discussion in the United States Congress, as well as in some of the newspapers on the question as to who is responsible for alleged high prices of commodities to consumers.

A few weeks ago Senator Hale asserted that "it is the jobber, the retailer, who puts up the price," and that "we are at the mercy of the middlemen and retailers." Senators Flint and Smoot and others later returned to the charge, asserting that the retailers and department stores of the country are making exorbitant profits.

In the face of the facts that the retail trade have no organization in which to fix prices and that competition is so strong, these statements by the Senators are nonsensical. It is plain that in order to establish unreasonably high prices for any line of commodities, combination and suppression of competition among sellers are absolutely necessary. Neither of these at present exist, so that little reasoning power is necessary to understand that the retail trade is not responsible for any undue prices that may from time to time be in vogue.

During the recent presidential campaign in the United States, both parties favored tariff reduction, but it seems that it is now a case of "drawing a red herring across their paths" by blaming the retailer in order to obtain excuses for increasing the tariff.

The retailers of the country are indignant, and are justified in being so, at this effort to make them responsible for conditions occasioned by the tariff, and as the Los Angeles Express points out, "about to be made additionally unjust by an increase of 10 per cent. in its average ad valorem rates."

No one doubts that competition continues to rule with unabated force in the retail trade, making statements to the effect that this section is the cause for any unreasonable price, appear ridiculous.

INSIDIOUS FORM OF BLACKMAIL.

In a recent issue of a trade newspaper there was a report in one column, of a meeting of retailers at which a committee was appointed to wait upon the wholesale trade for donations to a picnic, which was to be held this summer. In the very next column of the same paper was a report of a meeting of retailers in another town in which strong exception was taken to the demands which were from time to time made upon them for donations to various organizations, which was designated as being "absolutely obnoxious."

What is sauce for the goose should be sauce for the gander. The whole system is wrong. Every tub should stand upon its own bottom. It is nothing but a species of hold-up. When a customer, be that customer either consumer or retailer, attempts to obtain donations to picnics and other social functions from those from whom they buy their supplies, the practice is an insidious form of blackmail.

With the retailer largely lies the remedy. Let him refuse either to hold up or to be held up.

CANADIAN METAL MARKETS

See Itemized Market Quotations on Page 74.

MARKETS IN BRIEF.

Montreal.

Tin—Advance of ½c to 1c.
Copper—Unchanged.
Tinplates—Probable advance in English lines.

Toronto.

Turpentine—Advanced 1c.

THE MARKET SITUATION.

There has been a continuance of the speculative movement in the London tin market and some heavy transactions have been recorded. New York has, of course, been swayed, although the action of the English bulls caused some surprise. New York authorities are somewhat lost to account for a bull movement when American conditions do not favor such a course. Still New York plays second fiddle where tin is concerned. Probably the bull interests had reasons which they do not shout to the market generally. Copper has been on the quiet side. There has been a sagging in London, but statistical information is more favorable than at any other time. There appears to have been a decrease in stocks for May. It is to be hoped that this will continue. Consumption has shown improvement, while exports have been up to the average. Spelter has been in good demand, and both the American and English markets have maintained their prices very firmly. Spelter is under strong control, and with production in check, and the development of the uses of the metal, it should keep up its strength. Lead has been without character, and showed signs of sagging. The United States iron and steel markets have been in firm condition. Fairly large sales have been made of pig iron at somewhat advanced prices, while though the buying of finished steel products is hardly so large as it has been the mills are well sold up. Conditions in the Old Country have been somewhat better, and much is expected from an increase in the shipbuilding. But if the threatened coal strike occurs it will strike a nasty blow at all iron and steel interests.

MONTREAL.

June 18.—Orders have swung in well this week, and there is a general feeling of satisfaction among the trade at the progress now being made. It is evident that the consumption for the finished article is much better than it was, because although users are not buying any further ahead than they did, their everyday requirements are greater, and they are ordering more freely, and in better bulk. There is now a quiet feeling of confidence among the trade that did not exist some weeks back. Good reports are coming from the northwest, and in every direction signs are observable of improving conditions. It is evident that a continuance of the present rate of progress will make June more than a normal month for metal business.

Owing to the possibilities of a coal strike in South Wales, tinplate quotations are being withdrawn from the market by some of the Old Country firms. If a strike does occur it will affect all British iron and steel, and not only advance prices, but interfere with deliveries.

PIG IRON—The local market is in a very good condition and considerable tonnage is moving at somewhat advancing prices. Many contracts have been placed for delivery at the end of navigation, while other large interests are making inquiries as to placing their requirements. Canadian furnaces are doing good business, and holding prices well, the average figure, Montreal, for high grade foundry iron being from $19 to $19.50. The market generally is in good condition, the maintenance of strength in the United States, and the slighly improved feeling in Old Country helping matters. Greater activity in shipbuilding across the Atlantic has improved the demand there, but if the coal strike is not prevented, there will be a serious disruption to trade as manufacturerers state they will rather shut down their furnaces and mills than pay more for their coal. We continue to quote imported pig, Clarence, $16.75 to $17; Middlesboro No. 3, $16.50 to $16.75; Summerlee No. 1, $19 to $19.25; No. 2, $18.50 to $18.75.

TIN—A very good week for tin. Orders have swung in nicely, and for increased bulk. The bulling movement in London caused the local market to advance and jobbing prices were raised from 32½c to 33 and 33½c. Despite the advanced price business was not affected showing that metal is wanted, and there has naturally been strong inquiry. This increased interest in the market only bears out the fact that a strong staple market would induce a lot of business. Heavy buying movements have taken place in London, and the usual amount of mystery has been attached to the manipulation. Nobody seems to know why there has been this speculation especially as American consumption is not so good as it was. But tin manipulation in London seems to follow no recognised rule. It is speculation pure and simple.

COPPER—Good business has been done at the firm and unchanged price of 14¼. There is, however, at present not so much interest in copper as in tin. The copper primary markets have not been so firm, and there is a lack of confidence as to prices. Although the rate of production in May was higher than any other month this year, the exports and consumption were also much higher, and May was the only month to show a decrease in stocks. This is a very good sign, but there are many months, surplus for which account New York, however, still remains confident.

SPELTER—The metal remains firm and in good demand at $5.75. Inquiries are increasing and there is a growing disposition to contract ahead in view of the strong tone of the English and American markets. There is very little change in the primary markets, St. Louis being if anything stronger than the others. The consumption is steady, while stocks are held in very firm hands.

LEAD—There is no change in lead quotations, imported pig being $3.60, and Trail $3.50. The demand is keeping up very well, and the market is firm, and in good condition. The English market has fluctuated a little, but is evidently making a strong fight to maintain figures in face of much metal on the market.

TORONTO.

June 18.—In strange contrast with other industrial lines metals have had a somewhat quiet week locally. Iron and steel are the only metals which seem to have increased their volume of sales. While they have a firmer tendency there has been no change in prices here. This applies also to tin, which while on a firm base is yet irregular in tone and tendency. Buying, too, has been very much off color.

PIG IRON—Unchanged in price though with a slightly firmer tendency, due to advances in other markets, iron is gradually working up to its former level. The steel revival has helped to make for a better feeling. Quotations and sale prices are nearer the basis set by buyers for business, so trading is on a better footing. Iron, however, cannot support the whole metal imarket, and though the iron business is better than several months ago, the same cannot be said this week of other metals. Canadian foundry is at $19; No. 3, Middlesboro, $19.25, and Cleveland, $20.

COPPER—The red metal is again pursuing its erratic course. After holding its own for five weeks, slightly improving its position, copper has broken badly in London and during the week has declined £2 a ton. This has reacted on New York, and that reaction is reflected on the local market. Toronto quotations are yet at 14½c, but as expected, is easy at that figure and little trading is being done.

TIN—With a foundation firm as to price tin is irregular in selling conditions, and as a result buyers are holding off. Outside markets report an advance, but the local market is still at 32½c.

LEAD—Quiet business conditions prevail at unchanged quotations. Imported pig is yet at $3.65 for hundred pound lots.

SPELTER—Sympathetically with its kindred metals, lead and tin, spelter is quiet this week. The quotation remains unchanged, however, at $5.75.

U. S. IRON MARKET STRONGER.

Cleveland, June 17.—The Iron Trade Review says:

Greater optimism is characterising practically every branch of the iron and steel industry as ordering activity is sustained and as the consumptive needs of the country appear to be expanding. A more encouraging attitude upon the part of the railroads towards expenditures for rails and equipment and the belief that congessional action upon the tariff will be conservative, are contributing to clarify the situation. Price talk is stronger, and the expectation of both maker and consumer is for a higher level soon.

HARDWARE MARKETS

MONTREAL.

June 18.—Although no rush is observable, trade is moving along briskly and with more confidence. Dealers seem more assured as to their position, and although this has not made them alter their attitude as to buying conservatively, it has made the tone of the markets very much brighter. Another good feature has been the bright reports now coming in from the north-west. Travelers state that the farmers are feeling in much better shape. Crop prospects look exceedingly healthy, and buying is opening up firmly if somewhat slowly. Everything seems to point to heavy fall business.

Harvest tools are now moving out freely, and the demand considering everything is good. An improvement in building seems to have stirred up the local trade in builders' hardware. Bolts and screws are in active demand with the markets firm. Hose and lawn mowers are selling well, and there is a steady demand for miners' supplies. Ordinary household utensils are in good request. There has been a steady demand for staples all through. Booking is quiet for apple parers, lanterns, cow ties, etc., and the probability is that the lines will not be ordered until they are actually wanted. No change in prices of any importance is announced. Trade this month seems well up to an average June, and the tone of the markets is undoubtedly very good.

BUILDERS' HARDWARE—Owing to an improvement in building operations, the demand locally has been much more active, and some very good orders have come in. The country trade is steady, but does not show the same relative improvement. There are no changes in prices and we quote: Door sets and escutcheons, 50 and 10; escutcheon pins, steel, 50; brass 55; spring hinges No. 20, $9 per gross.

SUMMER LINES—A steady movement is noticed in these lines. There is no rush on, but dealers are sending in their sorting up orders regularly, showing that consumption is fairly active. The North-west has shown distinct improvement. Hose and lawn mowers are still good sellers, but gardeners' tools are naturally much quieter. Refrigerators and ice cream freezers are moving out in a sorting-up way. Carpet sweepers are a good staple line. Washing machines and wringers are in steady request. Graniteware and tin-ware are also moving well. Early fall lines such as apple parers, cow ties and lanterns are being booked quietly, but the bulk of the movement will not be felt until the goods are wanted.

HARVEST TOOLS—Harvest tools are now moving out well, shipping being good all the week. This will probably continue, as early bookings were very quiet. No changes in prices are reported, and we quote: Hay fork pulleys, $1.60 to $8.50 a dozen; hay carriers, hay rakes, etc., 55 off.

MINERS' SUPPLIES—There is no great improvement in Miners' supplies over last week, although the demand continues very steady. The market is firm, and we continue to quote: Miners' picks, 17c a pound; prospectors' hammers, 20c; pick handles, $1.85 a dozen; drilling hammers, 6c a pound; crowbars, 3½c; drill steel, 8c.

BOLTS AND NUTS—Bolts and nuts continue to be in very active demand. Orders swing in freely from all points, and these lines are undoubtedly among the best sellers up to now. We continue to quote: Discounts on carriage bolts, ⅝ and smaller, 70; machine bolts, ⅝ and less 60, 10 and 10; coach screws 75; stove bolts, 80 and 7½.

SCREWS—Screws also continue to move well. Orders are of good volume, and the tone of the market is strong. We quote: 85 and 10 off for flat and round head, bright; 75 and 10 off for flat head, brass, and 70 and 10 for round head, brass.

SPORTING GOODS—An active movement in sporting goods has developed with the warmer weather. Fishing tackle is selling well, and there is a good movement in guns and ammunition. Other summer sporting lines are moving actively, there being a good demand for camping outfits, including enamelware.

WIRE—All lines are in good demand, and the strong movement in wire, which has characterised the trade for some time, continues. No price changes are announced, and we quote: Barb wire, car lots and mixed, $2.50; small lots, $2.55; plain twist, car lots, $2.80; small, $2.85. Galvanized wire No. 9, $2.25 in straight and mixed car lots, and $2.30 small lots, f.o.b. Montreal. Coiled spring fencing, $2.45; straight and mixed car lots, and $2.55 small lots. Plain wire, bright, annealed and annealed and oiled, $2.25 base. Other lines $2.30 f.o.b. Montreal.

TORONTO.

June 18.—Trading is still at the high water mark, and many of the jobbing houses are compelled to steal from the night a few hours in which to pack up ready for shipment a number of goods asked for in orders. With the advancing season the articles in demand are undergoing a change. This week large quantities of agricultural and harvest tools are going out. Lawn mowers, hose, garden tools and lawn supplies generally still have a good run, and some very fair repeat orders for door and window screens and wire cloth have come in.

Prices continue to be firm, which is to be expected in the face of the present demand, but no advances have been made. There are the usual daily fluctuations in some of the minor articles asked for, but these goods hold pretty well to the same figures from week to week.

Builders' hardware and tools are still going well. Nails and screws are beating all previous sales records. Some fine presentation sets of cutlery and a number of high-grade articles of silverware for wedding presents went forward on rush orders. These latter show that the hardwaremen in some sections have their ears to the ground. Sporting goods are yet in high favor.

SEASONABLE GOODS. — Improvement in strictly summer goods is noted. Lawn mowers, hose and supplies generally are moving splendidly and quite a demand has sprung up for hammocks. Repeat orders for house screenings are coming in fairly well and garden tools are active. The most notable feature in the whole market, however, is the demand which has sprung up for harvest tools and agricultural implements. Haying forks and cradles have gone out in fine quantities and orders are coming in for other lines. Inquiry has opened for fall lines, which seems to presage good business right up to the end of the year. In fact the great bulk of the skate business for next winter has already been booked. June weddings are responsible for a few handsome sales of cutlery and silverware. The orders were of the rush variety. Evidently the country hardwaremen are getting out after the business.

BUILDERS' HARDWARE. — With not a let-up this line is as much in demand as it was six weeks ago. Orders for delivery are days behind in being filled. Tools, too, are active, though holding only a second place compared with the hardware. Carpenters tools continue fair, but lathers' and cement layers' outfits have been good. In hardware sash cords and weights and a variety of fancy door knobs and plates of old-style designs are in demand.

HEAVY GOODS. — Like builders' hardware this companion line continues to be active. Nails are in such demand that factories are running almost continuously. The eastern mills are said to be getting much of the Western business at the expense of coast mills, because of cheaper freight rates. Certainly demand is enormous; but then building in all sections in Ontario is nearly back to the boom period. Screws, too, are very active. Bar iron and structural steel are more in demand than for two years, and great calls are made for pipe.

SPORTING GOODS. — Guns and ammunition are right to the front and with fishing tackle and outfits are increasing in sales every week. Camping outfits and supplies are beginning to move and inquiry increases. Baseball and lacrosse goods are still at normal.

METAL NOTES.

The president of the British Board of Trade states that the total value of exports of tin plate from the United Kingdom from 1904 to 1908 was $103,623,669, the highest figure for one year being $24,737,509 in 1905.

The revival of the steel industry in the United States is broading. Recent wire and fabricated steel orders have broken all previous records; 36,000 tons of wire were ordered from the American Steel and Wire Co. in one day.

The steel mills in Pittsburg are now running to their capacity for the first time in twenty years. At the present rate of going—day and night—it will take three months to get rid of the orders for nails alone now booked.

Trade Gossip from Canada's Eastern Provinces

Former St. John Manufacturer Wins Political Honor in Illinois City—Drummond to Locate Ore Docks at Newcastle—Nova Scotia Industries—Active State of the Hardware Market.

ST. JOHN.

June 16.—Eben Perkins, who left St. John about three years ago to take charge of a large horse shoe nail works in Hoopeston, Ill., has been elected an alderman of that city. While in St. John, Mr. Perkins was manager of the Portland Rolling Mills and the Maritime Nail Works.

John E. Moore returned last week from Boston, where he purchased a very powerful dredging plant for the Maritime Dredging and Construction Co. The dredge will work in the harbor here and has a capacity of 7,000 cubic yards a day.

The Drummonds have accepted the offer of a free site from the town of Newcastle and will commence shortly to build docks there for shipping their ore. A branch line is to be built from the mines to the Intercolonial at Black's cut, about four miles south of Bathurst.

The estimates for the Transcontinental Railway for work in the province during the month of May were: $423,547.25.

The annual meeting of the St. John Railway Company was held on June 9. The financial statement showed a net profit for the year of $52,980. The board of directors was re-elected with James Ross, of Montreal, president.

W. E. H.

HALIFAX.

June 14.—There is a fair volume of business passing for the season of the year in the hardware trade. Collections are about an average, and the outlook for the future is quite promising. There is a good demand for poultry netting, wire fencing and green cloth. Fair sales are being made of window and door screens, also paints, oils and brushes. The trade for haying tools is also opening up and several moderate sales have been made recently. Corn brooms have declined 25 cents per dozen, and oils and white lead have been advanced. The increase in the price of linseed oil is four cents per gallon, which is usually heavy. It is now quoted at 64 cents per gallon for boiled in cash lots, and 75 cents in smaller quantities.

All metals are firm and have a strong tendency to advance. Copper, pig lead, zinc, and spelter have all been advanced by the United States Steel Company and quotations have been withdrawn on all kinds of wire rods, plain twisted and barbed wire fencing. White lead is quoted at $6.25 for Canadian pure, and $7.20 for Brandram's B.B. Ingot tin is 34 to 35 cents, bar iron, $2; zinc, 6¾ to 7¼ cents, and sheet lead in rolls, $5.25.

Industrial activity continues throughout the province and it is predicted that the present year will be a banner one in the history of the iron and steel trade. The improved conditions that commenced to appear at the plants in Cape Breton early in the year, continue to be even more marked than they were at the outset. Every department of the Dominion iron and steel company's plants is working to its full capacity and new records in production, both as to the quality produced and the reduced cost of production, are being constantly made. In the steel rail department orders continue to be abundant and the prices realized are satisfactory. The same is true as respects the steel rod department—so much so that the mill in its efforts to overtake orders is running double shift to its capacity. In the open hearth, Bessemer, blast furnace, iron ore and lime stone departments greater economic results are being obtained, and the prospects are excellent.

The Davidson Lumber Company of Bridgewater are planning a lot of construction work for this season, and are advertising for three hundred men.

The steamer Hercules is now loading a cargo of 5,650 tons of rails at Sydney, for the Grand Trunk Pacific. This is the second cargo of rails for the Pacific this season.

James Reed, of Digby, N.S., has been awarded the contract for the erection of a new school building at Springhill, N.S. The building will be modern in every respect, and will cost about $55,000.

The Canadian Aerodrome Company, with headquarters at Baddeck, C.B., are constructing two aerodromes, and are giving employment to a large number of men. The dromes are constructed largely of metal, and they are modelled after the "Silver Dart" with which several successful experiments were made during the past winter.

Hardware Jobbers Appear Before Customs Board at Ottawa—Crops Reported in Good Condition and Sales of Summer Goods Large—Brantford to Get New Stove Foundry — Chatham Merchants Discussing the Giving of Christmas Presents to Customers—Windsor Judge Decides Important Law Case.

OTTAWA.

June 15.—On June 8 the board of customs appraisers concluded their monthly meeting at Ottawa. One of the important questions considered was the duty on electroplated goods. A deputation representative of the leading wholesale firms pressed argument before the board for a uniform duty of thirty per cent. as against the proposed tariff of thirty-five per cent. Objective cases were cited where at some entry ports lack of thorough knowledge of the goods would in all probability lead to irregular charges, as for instance in polished steel and plated steel. Where the polish is very highly done it would be a matter for an expert to judge between it and a plated or practically dipped piece. There was no assurance given as to the action to be taken by the board, but it is hoped that the claims of the hardware importers will be favorably considered. The houses represented were H. S. Howland, Sons & Co., Toronto; Wood Vallance & Co., Hamilton; Caverhill Learmont & Co., Montreal; and Thos. Birkett & Son, Ottawa. G. E. M. H.

KINGSTON.

June 15.—Kingston hardwaremen report a brisk business, due to the building going on in the city and country.

The City Council decided to build new coal sheds of cement, at a cost of $1 500.

Farmers say the crops in this section are in first-class condition, and all are in happy spirits.

H. W. Richardson, president of the Street Railway Co., sent a letter to the city council, offering the road to the municipality for money invested by stockholders, since 1905, and six per cent. interest. It is said that the road has not paid the capitalists, but that it might do as a municipal undertaking. In Feb. last, the company asked the city to renew the power agreement, but so far no action has been taken. The company has been getting power at $1.66 a kilo watt hour, but the cost has been $1.87 to $1.95 to manufacturers. The finance committee of the city council, will be asked to consider the matter.

E. G. B.

PETERBORO.

The Peterboro Hardware Co. had one of their windows decorated the week of May 24. It was arranged particularly for that day and besides being patriotic in its effect it combines a striking "ad" for the Sherwin Williams paints. The background is made up of two large Union Jacks, nicely draped. In the centre there are three Lee Enfield rifles stacked in regular military style. On each flank of the window there is a display of Sherwin Williams paints. They are not conspicuous and yet in a sense they are prominent. At the foot of the stacked rifles there is a display card with this inscription, "These Colors Never Run." The idea has been carried out well and the window was one of the best seen in the city in keeping with the patriotic spirit of Victoria Day. H.T.

BRANTFORD.

June 15—The continued warm weather has created a brisk demand for such seasonable goods as fly screens, doors,

refrigerators, ice cream freezers, and other such utensils. The weather being favorable to growing, there is a good call for lawn mowers. A feature of the trade is the demand among the farmers for what have hitherto been termed luxuries, such as ice cream freezers and refrigerators. Many farmers are laying in ice from their own creeks in winter, and are having summer comforts thereby.

The Westrumite Paving Company secured the contract for the paving of George Street.

The Brantford Real Estate Company will erect three three-storey buildings on Dalhousie street and a two-storey building on Darling street.

Local industrial matters are active, so far as new industries are concerned, the publicity and industrial department are getting in their work. Some time ago negotiations were entered into with the Norfolk Steel Range Co., of Norfolk, Virginia, which had expressed an intention of locating a branch in Canada. The firm had located temporarily at Welland. An expert of the company was in the city on Friday, and practical tests of the range were made in the Y.W.C.A. As a result of business men meeting in the city hall afterwards, $25,000 will likely be subscribed by local shareholders. The organization has not been completed, but prospects are bright, and a new factory will shortly be erected.

The Burrill Foundry Company has reorganized under the name of the Brantford Foundry and Development Co., with a capital stock of $40,000. The members of the firm are H. G. Burrill, J. B. Rouse and W. R. Burrill. Besides foundry work, a machine shop will be added, and the plant at Grey Street will be remodelled and enlarged.

Elliott and Son and Watt and Squire, two local hardware stores, are booming several leaders each Saturday, wire screens, lawn mowers and screen doors being the features. They report excellent results.

Sporting goods are having a tremendous call this season. Sport being rejuvenated in all branches. Running shoes and toggery are in great demand, local meets being held every week, the merchants donating prizes. Baseball goods are on brisk demand, especially the better quality. A.W.

CHATHAM.

June 14.—The urgent need of the recently inaugurated debt collection scheme is emphasized by the fact that accounts against over 400 different debtors have already been placed in the hands of the collector. Against many of these there is more than one account, the highest record against any single debtor being 11 accounts. This was the report presented at the R.M.A. meeting last Tuesday evening, after the collection scheme had been only a few weeks in existence. Though listing the accounts, mapping the city into routes and other incidentals have taken much time, the collector is already making regular calls, and has dates with 54 debtors, while upwards of $30 has already been collected, in addition to amounts paid direct to merchants, which will total far more. Some difficulty has been experienced in convincing debtors that the association is really in earnest, but this is only a temporary trouble.

A difficulty in connection with disputed accounts was referred to the association, many debtors having claimed that the amounts were incorrect. It was recommended that in such cases the collector instruct the debtor to show his bona fides by calling on the merchant with a view to adjustment within a week. At the end of that time if the debtor doesn't put in an appearance, the matter will be once more in the collector's hands. The feeling is that most of these "disputes" are merely devices to gain time.

A means of effectively handling country collections was another difficulty. In many instances 75 per cent. of a merchant's bad debts will be outside city limits. It was ultimately decided to experiment with a mail system of dunning, though the point was effectively raised by Peter Cunningham that monthly dunners were useless, and that to show the debtor that business was meant, would require a series of probably seven letters, steadily increasing in sharpness, at intervals of about a week. President Westman inclined to favor personal calls, and thought that by mapping out definite routes in the country the time and trouble involved could be reduced to a minimum, while the expense of horse hire, otherwise an insurmountable item, could be elimanated by individual merchants lending the collector the use of their horses and rigs time about. It was felt that the additional expense inevitable in any case would justify the charging of a small percentage on country collections. If the mail system doesn't work, further methods will have to be devised. A committee comprising Peter Cunningham, Paul Blonde, A. D. Westman, Harry Andrew and Wm. Anderson was appointed to take charge of the entire matter.

The practice of giving Christmas presents to customers was trenchantly handled by Wm. Anderson, who thought that, like ticket selling and program advertising, it should be placed under the ban of the association. He pointed out that the wholesale grocers had cut out the present giving habit, and it was up to retailers to follow suit. Personally, he had eliminated everything of the kind from his business, even to the annual calendar. Peter Cunningham added that he had been fighting the practice for years, but it was old and deep rooted. President Westman said he had found the annual calendar—something costing about 5 cents—a good means to doing away with more expensive presents; while F. Jacques declared that valuable customers did not get the calendars as a rule while children did. The matter will be further discussed next month.

The old objection to auctioneers selling new goods on the market was discussed, individual merchants favoring prohibition; but those present who were aldermen pointed out that the price of market spaces to auctioneers had been raised to $50, in addition to which they had to pay licenses. The general opinion was that prohibition was out of the question.

Wm. Potter, W. E. Parrott, J. E. Gray and W. M. Grant were named to look after the initial arrangements for the Merchants' Picnic next August. On Mr. Anderson's suggestion cards embodying the Merchants' Decalogue—the prohibitions with respect to program advertising, buying of tickets and soliciting of charity during business hours, and other items, including the fact of the merchant's membership in the collection department—were ordered printed, and will be distributed among the members. A dramatic wave of the merchant's hand in the direction of the significant placard will henceforth be all that is necessary to silence the now rare ticket solicitor.

Joshua Rumbell sold his hardware business in Harrow some time ago to a Mr. Townsend, agreeing to forfeit $500 if he started in business within a radius of five miles of that town inside of ten years. He did recommence business, with the result that Judge McHugh of Windsor recently awarded Townsend $500.

Jas. Craig, who has been employed with Van Tuyl and Fairbank, Petrolea, for the past two years, has accepted a position with Page's hardware establishment, Detroit.

Claude A Willet, who recently purchased the Mettan hardware store, Leamington, has taken possession, and will conduct the business under the firm name of C. A. Willet & Co. He is a St. Thomas man.

Dobbyn Bros., Wheatley, last week put on a window display of mounted animals and birds. To stimulate interest, Mr. Dobbyn offered a prize of $2 to anyone who would discover the name of one of the birds which had not been labeled. Two boys divided the $2, discovering that the bird was an American egret.

Hardwaremen here are up against a wire famine. Poultry netting and barbed corded and coiled wire are scarce. Wire fencing, however, and plain wire, do not seem to be affected. Merchants attribute the situation to circumstances similar to those which affected the lantern business a couple years ago and the spade and shovel trade for a while last year. Manufacturers seem to have cut prices, and booked orders for future delivery. Coiled wire, for instance, the price of which formerly hovered about $2.60 in cars or $2.70 for smaller shipments was slashed to $1.90. Now, to judge from this end of the line the wire men are reluctant to deliver at this price, and are holding off. This, at least, is the view of local hardwaremen in accounting for the difficulty of securing the lines mentioned. Fortunately, the rush season in wire is pretty well over, trade being naturally slack from now on.

Mayor Westman, of Westman Bros., hardware, has reached a practical solution of the meter difficulty which has en-

grossed his attention since becoming chairman of the water commissioners. Manufacturers are given a 6 cent rate. It is understood this settles the difficulty except for one concern, which secured an injunction to prevent the shutting off of the water, and which is believed to be irreconcilable. The injuction writ alleges that Mayor Westman's firm being holders of a plumbers' license issued by the water commission and also profiting by work which the meter by-law renders necessary, Mr. Westman is disqualified as a member of the commission. The contention is a peculiar one, and, if carried out to its logical conclusiion, would practically disqualify any plumber from holding the offices of mayor or water commissioner.

Stephens & Douglas have a very neat lock display this week. This is a line seldom used for window displays, but the showing is attractive. Instead of displaying the seasonable hammock in the window, this firm have hit the novel device of hanging it across the top of the entrance, about the customer's head as he passes in.

News from the Prairies and British Columbia

Winnipeg Loses Big Industry—Wife of Manitoba Hardwareman Burned to Death—Ashdown Company to Erect Large Warehouse at Calgary—Large Dry Dock to be Built at Vancouver—Wood Pipe Factory for Kelowna, B.C.

VANCOUVER.

June 12.—An industry of direct importance to the iron and hardware trades of Vancouver is the establishment of the drydock in the east end on Burrard Inlet, on the property owned by the Ross & Howard Iron Works. Nicol Thompson, who has had this matter in hand for some years, has returned from Ottawa and announces that his interview with the government was successful and that a subsidy is to be granted of three per cent. on the total cost of the dock for twenty years. As the estimated cost of construction will be one and three quarter million dollars, this means something like $37,500 per annum. Mr. Thompson states that construction will proceed as soon as the working out of the necessary details will allow, and that he will visit England shortly to float the scheme. The dock will be one of the first of its kind on the Pacific coast, to be a pontoon floating dock of steel, 500 feet long and capable of accommodating vessels of 10,000 tons. The terms of the subsidy necessitates the construction within two years, and the promoters are certain the time limit will not be exceeded. The dock is a necessity with the increase of shipping, for all the ways are full and vessels have to wait their turn.

H. K. Dutcher, civil engineer of this city, has returned from Kamloops, where he spent several days in connection with the power scheme being instituted there, and when the tenders for the supply of the machinery were opened. The contract for the engine and dynamo was awarded to the Canadian Westinghouse Company and for the boiler and condensor to the Canadian Fairbanks Company. Thirteen companies tendered. It is expected that the new plant will be ready in three months.

In response to the city's invitation three waterpowers, all within 60 miles of Vancouver, were submitted for sale. In addition, it was stated by T. W. Judd, of Brackendale, about 30 miles distant, that he had two unsurveyed, and if they were suitable arrangements for their purchase might be made. It is the intention of the city to secure water for power, and even domestic purposes ahead of time. In 1918 the city has the option of taking over the system of the B. C. Electric Railway Company, and power will be needed if this is done. In the meantime, the superintendent of the waterworks, municipally owned, will investigate the propositions, selecting the best, and then an engineer will be appointed to report thereon.

At the last meeting of the Fire and Police Committee, tenders were opened for 5,500 feet of rubber hose for the fire department. The tenderers were the Canadian, the Durham, the Dunlop and the Vancouver Rubber Companies, the prices being very even, running from $1.10 and $1.05 for the first grade, to 95c for the second. Five minutes were allowed a representative of each company to address the committee. The chief of the fire department recommended the Eureka at $1.10. The awards were: Vancouver Rubber Company, 3,000 feet Eureka; Dunlop Company, 1,000 feet Dunlop; Canadian Rubber Company, 1,000 feet Keystone; the Durham Rubber Company, 500 feet Magnet. The tender of the Vancouver Rubber Company to supply couplings at $2.44 per set was accepted.

Building permits continue to show up well, the returns for the past week being $151,620. The largest was a brick store for J. Dodson, baker, to cost $55,000; brick store for Capt. Pybus, $11,000, and alterations to a business property on Cordova street, owned by Evans, Coleman & Evans, $13,000. The rest was for dwellings and repairs.

The Fraser River Lumber Mills are constructing a logging railway in Vancouver that will cost $150,000.

Vancouver's new bridges, two in number, are progressing in construction and will be ready for use before the close of the summer. This week the huge bascule shaft, weighing 43 tons, for the Westminster avenue bridge over False Creek, was shipped in. The supports in the end of the shaft on which this will turn weigh twelve and a half tons each.

The clearing operations that are going on in and about Vancouver also brings grist to the mill of the hardwaremen, if it may be put that way, as well as the activity in the shipbuilding and repair yards.

J. C. Keith, who for several years has been in charge of E. Hunt's hardware department at Eburne, has come to Vancouver to reside.

Scott & Ledingham have been awarded ed the contract for ten miles of cement walks at 12 cents. R. B.

VICTORIA.

June 12.—Trade still continues fairly brisk, builders hardware being among the principal articles in demand. The warm weather of the past week has brought out the usual swarm of flies and screen doors and windows are in demand. Most of the local dealers are making a display of these necessary articles and are doing a good trade with them.

Victoria capital is interested in the Carmanah Coal Co., whose property is on the seashore of Vancouver Island, near Point Carmanah, a comparatively short distance from Victoria. The company have ordered a $20,000 diamond drill and will bore for coal.

The sale of Prince Rupert lots held in the city the latter part of last week, realized $323,190. The amount of $1,500,065 worth of property sold here and in Vancouver is claimed to be a record sale for one townsite. The prices obtained for the lots was high, some of the business properties bringing a very high price.

The city engineer's department is now preparing plans for a new incinerator to cost about $2,000 and capable of consuming twenty tons of material per day.

The B.C. Telephone wires in Victoria are to be put underground. The city is to borrow $50,000 for this purpose, the company meeting the charges of interest and sinking fund and paying nine-tenths of the cost of the work.

Contracts for the supplying of English cast iron pipe to the municipality of Oak Bay have been let, R. Angus being the successful tenderer. The amount involved is $15,952.30, that being the lowest tender. The following also tendered. A. Shiret, Robertson-Godson Co., Vancouver, W. G. Winterburn. The B. C. Foundry and Engine Works will supply the special castings. The contract for valves and meters will be awarded in the near future.

Work has commenced on the three-storey block to be erected by Challoner & Mitchell, the Government St. jewellers on Yates St. The structure will cost $8,000 and will be built of reinforced concrete and brick.

The growth of population has made another school necessary in the eastern part of the city.

Six carloads of machinery arrived in town this week consigned to the Victoria

CONDENSED OR "WANT" ADVERTISEMENTS.

ARTICLES FOR SALE.

Don't keep any fixtures or tools around your store for which you have no further use. They are worth more to-day than they will a year hence. Don't keep money tied up which you could use to secure discounts from your wholesaler.

Good financial standing and business connection a strong recommendation. Just the position for a retired business man for his spare time. The MacLean Publishing Company, Limited, Toronto.

Machinery Depot, to be installed in the Skena river steamer being built by this ship building firm.

W. B. C.

NELSON.

June 5.—The Canadian Marble Works, of this city, has received an order for all the marble to be used in the construction of the new Great West Life Assurance Company's building in Winnipeg. The contract is a large one, the total amount of marble to be required being over 300 carloads. The whole of the exterior will thus be of Kootenay marble and will stand as a perpetual advertisement for British Columbia and the quality of its product.

June 12.—J. H. Ashdown, head of the Ashdown Hardware Company of Winnipeg, which has a branch here, was in the city this week on his regular business trip to cities where his branch stores are located. He reports that the demand on the prairie for building material and supplies was excellent, and on the whole he was highly pleased with the business outlook.

J. A. Ede, engineer of the Illinois Zinc Company, at Peru, Ill., is in this district to study the zinc industry in the Kootenay and Slocan. This industry has not such a bright prospect as a couple of months ago, owing to the high duty imposed on zinc going into the United States by the recently enacted Payne tariff.

KELOWNA.

June 12—With a large local demand for pipe for irrigation purposes, E. T. Bogart, of Vancouver, will establish a factory to manufacture all kinds of wood pipe, from the bored log variety to the continuous stave.

CALGARY.

June 14.—As a result of J. H. Ashdown's visit to Calgary, it has been decided that the company will erect a large wholesale warehouse here. A full line of all kinds of hardware will be carried and the new warehouse will be the distributing centre for the whole of the province and adjoining provinces. The location of the new structure will be the corner of 11th avenue and 2nd street, west. The building will be a four storey brick and stone 50x120 feet.

The National Drug Co. are to erect a three storey warehouse at the corner of Seventh avenue and Third street, west.

The Bradley & Tuck corner, just opposite the Post Office has been sold to the Dominion Bank for the neat sum of $100,000, which is $2 000 per foot. They intend to erect one of the best bank buildings ever built in Calgary.

A new hardware firm has opened up a retail store on Eigth Avenue a few doors east of First St., east. The name of the new firm is Turner & Co.

A. R. A.

SASKATOON.

June 12.—S. A. Clark, a pioneer hardwareman of this city, died to-day at his home on Spadina Crescent. Some years ago he established the business now known as S. A. Clark Ltd. One of his sons, Fred, now conducts a hardware business at Elstow, Sask. Mr. Clark only recently returned from an extended trip to England and appeared to be in very good health.

The Goose Lake branch of the C. N. R. was taken over by the operating department on June 13. The steel extends as far as Zealindia. There is a tri-weekly passenger service on the road.

The Hub Roofing and Cornice Co. have just finished fixing up a cornice on the grocery section of the Cairn's store.

J. F. Cairns has arranged to let his staff have a weekly half holiday during the summer months. The store will not be closed but the clerks will arrange amongst themselves for getting away. The effort of the retail clerks to get the city council to pass a by-law for a half holiday during July and August has as yet been unsuccessful. Mayor Hopkins, who himself is a hardwareman, is one of those against the scheme.

THE LATE S. A. CLARK,

A Pioneer Hardwareman at Saskatoon.

Building operations continue brisk although many big contracts are only in their primary stages. W. W. LaChance is preparing plans for a $45,000 school while plans for a $125,000 collegiate institute are now before the trustees.

D. G. R.

WINNIPEG.

June 16.—The Manitoba Rolling Mills Co. may remove their plant from the city and locate at a point where they will not be subjected to the petty annoyances and threats of Winnipeg city officials. A new site at St. Boniface may be selected and the company will proceed at once with the work of transferring the plant, which will be quadrupled in size and capacity.

The improvements planned by the company not only include the extensions to the present plant to four times its capacity, but they also contemplate the addition of a steel mill and possibly a puddling plant. Mr. McElroy is president of one of the largest horseshoe manufacturing concerns in New York state and when the western Canada business warrants such a step a horseshoe plant will also be put in. The present extensions will give accommodation for at least 400 men, a large number of whom are highly paid, for it is designed to run day and night, with double shifts on each, working the two trains of rolls to their full capacity. The work will cost about $250,000. The steel mill and other additions will more than double the number of men required.

The mineral resources of Riding Mountain, Manitoba, are about to be developed by a syndicate which has purchased the mineral rights of many of the settlers. Samples taken at a depth of 300 feet have been reported on favorably by the head office of the syndicate and it is the intention to sink a shaft 1,000 feet when it is confidently expected that oil and coal in paying quantities will be found.

Mrs. Steves, wife of a hardware merchant, at Rosebank, Man., was fatally burned on June 15th, while lighting the coal oil stove before breakfast. In some way her clothes were ignited, and in her excitement she rushed outside, where a strong wind was blowing. Her dress was entirely burned off in spite of the efforts of her husband, who was terribly burned himself in the attempt to save his wife. She died in the afternoon. Only a few months ago the house and store of Mr. and Mrs. Steves were destroyed by fire, and they lost everything they had.

J. C. H.

EDMONTON.

The Grand Trunk Pacific is expected to arrive in the city about July 1, when no doubt business will improve considerably on their line, as dealers are keeping their stocks low, until that time, as if they bought at present they would be obliged to have their goods hauled from some point on the C.N.R. or C. P.R.

J. C. Dowsett, sec.-treas. of Ross Bros., was elected president of the Edmonton Board of Trade, at their annual meeting a few weeks ago.

L. E. Dubuc, who for some years has been with Cote Boivin of Chicoutimi, Que., as manager, has located at Edmonton, Alberta, as a manufacturers' agent. He has secured several agencies from Montreal and the Old Country, and his lines will be confined to hardware and building supplies. Mr. Dubuc believes that in Alberta and Saskatchewan there will be splendid business for the manufacturers' agent. The demand for hardware and building supplies will be large there for years to come and those who secure the trade now will have the advantage in years to come. He prophesies a great future for Edmonton itself, even greater than any western city.

Western Canada Hardware Market Situation

Our Western Correspondent Reviews the Market Outlook — Hardware Quotations Corrected by Telegraph From Hardware and Metal's Winnipeg Office up to Noon on Friday.

The trade has been very active for several days chiefly among the retailers. Builders' hardware, paints, and sporting goods are selling well. A few warm days last week stimulated the sale in refrigerators. The wholesalers are preparing for a heavy trade during exhibition week when it is expected many merchants throughout the west will visit the city.

We quote advances in linseed oil and turpentine.

Winnipeg Quotations.

BUILDING AND INDUSTRIAL NEWS

For additional items see the correspondence pages. Information is solicited regarding building and industrial news, the incorporation of companies, establishment or enlargement of mills, factories or foundries, municipal waterworks and sewerage systems, railway or mining news, etc.

Industrial Activity.

Construction will soon commence on the new D. W. Black cleaning elevator at Fort William.

The new Consolidated Elevator at Fort William will be erected by the Canadian Stewart Co.

The Canadian Stonewood Flooring Co. is opening up a factory in Winnipeg for the manufacture of plastic flooring.

W. A. Edwards has been granted a permit for additions to the premises of the Frost Wire Fence Co., Hamilton, at a cost of $10,000.

The Dixon Bridge Works Co. are looking for a suitable place in the west for the location of a branch of their business. Port Arthur has appealed to them.

The Kootenay Belle, Columbia and Golden Belle mining properties on Sheep Creek, B.C., will start crushing with the ten new stamps in the mill at the Kootenany Belle mine in a few days. Four stamps are working at present, crushing about 70 tons per week.

The contract for the new Harold-Sanderson refrigerator and screen door factory at Paris has been awarded to J. D. Tindale, Ingersoll, and the work of construction will be commenced immediately. The cost of the new buildings is between twenty-five and thirty thousand dollars.

A big elevator company has been organized in Calgary with a capital of $600,000. The company will build a large elevator capable of holding a million bushels, and the company expects to have 250,000 bushels of this storage ready for use this fall. Work has already been started on the elevator.

The Canadian Stewart Co., one of the most recent of the big contracting companies in the U. S. to come to Canada, are employing over 700 men on the G.T.P. elevator at Port Arthur. Amongst other elevators which are contemplated by the Stewart Company is the construction of the Ogilvie Milling Co., who intend building another large elevator to add to their Fort William plant.

Municipal Undertakings.

A waterworks system is proposed for Oxbow, Sask.

$8,000 will be raised for a waterworks system at Rockcliffe, Ont.

The Belleville Board of Works is considering the construction of a number of sewers.

John Wagner, Cleveland, has the contract for sections 4 and 5 of Toronto's trunk sewer.

A by-law for new sewers and sidewalks was passed recently by the town of St. Paul, Que.

Galt & Smith, Toronto, have been engaged on a sewage disposal scheme for Nanton, Alta.

Tenders are invited by the Peterboro Water Commissioners for extensive work in connection with the waterworks.

The plans submitted for a waterworks system at Markdale will be passed by the Provincial Board of Health after a few amendments have been made.

The report and plans prepared by T. Aird Murray, C.E., Toronto, for a sewerage disposal system for North Toronto, were recently accepted by the Provincial Board of Health.

The contract for the instalation of the Yorkton, Man., waterworks system has been awarded to the Municipal Construction Co., of Regina. The Municipal Construction Co. has also been awarded the contract for the Estevan waterworks, amounting to $11,455.

Public Buildings.

The Guelph Board of Education is said to be considering the erection of a technical school.

Belleville ratepayers will vote on July 5 on a by-law to raise $70,000 for school extensions.

Tenders have just been taken for the erection of a new Presbyterian church at Chateauguay, Que.

The C.P.R. will spend one and a half millions on extensions to the Windsor street station, Montreal.

The Vonda, Sask., town school was recently destroyed by fire. The school trustees will rebuild on a better scale.

A by-law will be voted on in the near future to borrow $10,000 to build a town hall and police station at Killarney, Man.

Wilson & Holmes, Ottawa, were the successful tenderers for the new Hintonburg school and the new St. Mary's school, Bayswater.

The Fernie city council has purchased a lot in the centre of the business section of the town on which they will erect a new fire hall.

The request of the Welland School Board for $17,000 to add two rooms to fourth ward school and four rooms to the central school has been acceeded to.

The board of regents of Mount Allison College decided to proceed at once with the work of building the contemplated new stone ladies' college at Sackville, N.B.

At a meeting of the joint committee of the Niagara Falls council and library board, the plans of C. M. Borter for the new library were accepted. Tenders will be called at once.

The contract for the construction of the new high school has been awarded to Everard & Oakes at about $38,000. James Rae was the successful tenderer at $9,000 for heating, plumbing and ventilating.

General Building Notes.

A $10,000 dwelling will be built at Toronto by E. Davies.

E. F. Hutchings will build at Winnipeg a $22,000 warehouse.

The Canada Weekly Printing Co. will build a $7,150 structure at Winnipeg.

Thirty-seven permits totalling $151,620 were issued last week in Vancouver.

Morris Reid, Toronto, will build two pairs of semi-detached houses to cost $10,000.

The Leeson-Dickie Grocery Co., Vancouver, will erect a new six-storey business block.

M. J. Morris, Toronto, will build four stores and dwellings at a cost of $15,000.

A fourteen storey office building to cost over $300,000 is to be erected at Toronto.

At Toronto, Schultz & Garrett will spend $18,000 on three stores and dwellings.

Four pairs of brick dwellings to cost $20,000 will be built at Toronto by Wilkins & Co.

Two pair of semi-detached dwellings to cost $10,000 will be built by A. E. Fisher, Toronto.

Four attached stores and dwellings will be built by W. M. Rankin, Toronto, at a cost of $12,000.

The Bank of Montreal has purchased a site for the erection of a new branch building at Port Arthur.

Six attached stores and dwellings will be erected at Toronto by G. L. Thompson at a cost of $18,000.

McQuarrie & McLeod are the contractors for the new $157,000 Breadalbane apartment block at Winnipeg.

Recent building permits at Hamilton include: E. New, dwelling, $2,200; W. Theaker, house, for G. C. Hoar, $2,000.

The number of new buildings erected in Toronto between Jan. 1 and May 31 was 2,680. Last year during the same period 2,010 buildings were erected.

The Manse Committee of the Blenheim Presbyterian Church has awarded the contract for the erection of a new residence on MacGregor Street to H. Collar. Estimated cost $3,500.

J. Dodson, stores and office building, $55,000; Capt. H. Pybus, store and office, $11,000; Evans, Coleman & Evans, $13,000, are the three largest building permits issued at Vancouver last week.

Some of the smaller building permits issued at Vancouver during the week ending June 5 are: S. N. McLeod, frame dwelling, $3,800; W. A. S. Richards, frame dwelling, $2,000; H. C. Hatt & Co., frame dwelling, $2,500; J. B. Currie and A. Anderson, frame dwelling, $1,600; H. O. Appleby, frame dwelling, $2,000; C. E. Tisdall, alterations and additions, $3,000; John Hunter, frame dwelling, $1,800; Pacific Bottling Works, brick warehouse, $3,000; W. H. Patterson, frame dwelling, $2,400; J. Myers, frame dwelling, $1,000; G. Hawes, frame dwelling, $2,400; J. Gibbons, frame dwelling, $3,700; W. Sampson, frame dwelling, $2,500; J. G. Fordham, frame dwelling, $6,000; J. E. Guinet, frame dwelling, $1,500; W. H. Sparrow, frame dwelling, $1,500; L. H. Norton, frame dwelling, $2,000; Wm. Shannon, frame dwelling, $7,000; John Brown, frame dwelling, $4,650; J. D. Murray, frame dwelling, $1,500; Wick & Ives, frame dwelling, $3,000; J. McLeod, frame dwelling, $2,400; Calgary Milling Co., frame warehouse, $3,000; Buckley & Wilcox, frame dwelling, $2,000; T. A. Fee, alterations, $3,000.

In the production of naval stores for the year 1908, of the total 36,500,000 gallons of turpentine produced by all the naval-store producing States, the yield from Florida was more than 17,000,000 gallons; and of the total of 4,000,000 barrels of rosin, the output of this product from Florida was nearly 2,000,000 barrels. Georgia ranked next to Florida in the production of these products, yielding 1,000,000 gallons of turpentine and 10,000,000 barrels of rosin.

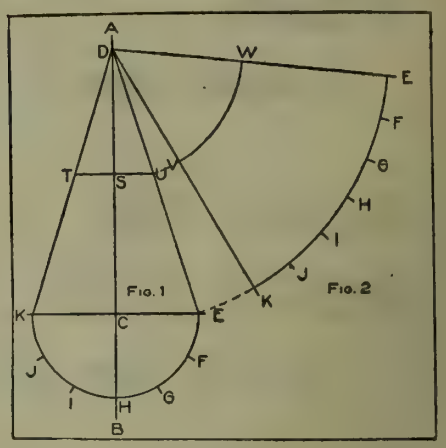
Cutting Patterns in the Tin Shop

Readers of Hardware and Metal are Requested to Make Use of This Department—Questions Regarding Patterns Will be Answered by Experts—Discussion is Also Invited on Any Matter pertaining to the Tin Shop.

SQUARE BAY WINDOW BASE.

This method can be applied to any size or shape providing same is similar in plan. In this case we have the normal profile in the elevation which is also the true profile of section "B"; divide the normal profile in any number of parts and draw same down through section "B" to miter line from these points of intersection, draw parallel lines through section "A." Next project the points in normal profile to right as shown, take the points of intersection on line XX in plan and place same parallel to the aforesaid projected lines as shown; from these points draw lines down until they intersect corresponding lines making the true profile for section "A"; take the stretchout of profile "A" and place same with parallel line under section "A" as shown, drop the points of intersection in miter line K in plan down until they intersect corresponding lines in stretchout, and this will give the pattern for section "A". Do the same with stretchout of normal profile by placing same opposite to section "B," obtaining pattern for "B."

G. L. GRAY.



PATTERN FOR A CONE.

First draw a centre line AB, Fig. 1, and on this line mark the height of the cone from C, the base, to D, the vertex. The diameter of the base, KE, is marked out with equal radii from the intersecting lines at C. Draw a line from E to D and from K to D. A semi-circle, EHK, is described with C as a centre and CE or CK as radius. This semi-circle is divided into equal parts as shown and represents one-half of the base.

The pattern is made as shown in Fig. 2, by using D as a centre and with a radii equal to DE describe an arc KE. Draw a line from D to K. Starting from K, lay out the divisions of the semi-circle the same as if it were stretched out straight from K to E. Draw a line from E to D. Then KED will be one-half of the pattern for the cone.

A pattern for a frustum or tin bucket is made in the same manner, using the intersecting line at S, Fig. 1, for the height, from C, of the bucket. In this case KE would be the top of the bucket and TU the bottom. The diameter of the top KE is laid out the same as for the cone, and also the bottom, TU, is marked out in the same way. A line is drawn from E intersecting the point V and continued to point I. The line is drawn from K to D in the same way.

In this case two arcs are described, KE and VW, Fig. 2. The semi-circle is drawn and the divisions are marked out as before and a half-pattern, KE VW, is obtained for a bucket.—Popular Mechanics.

AN OLD TIN ROOF.

Records of tin roofs lasting from thirty to fifty years are quite numerous, attesting to the superiority of tin as a roof covering. It is very unusual, however, for a tin to be fit for use again after such long service. A Philadelphia concern has in its office a sample of tin put in a building at Lynchburg, Va., in 1860, a year before the Civil War. When the building was torn down a month ago the tin roof was found to be in such excellent condition that, after being trimmed up, it was relaid on two small houses and is expected to last many more years. The tin was an imported genuine charcoal iron plate coated with pure tin.

A. T. Fife, hardware merchant of Kenora was in Ft. William early this week on a business trip.

The Retail Paint Trade

PAINT ENTHUSIASM.

Although the sale of ready mixed paints is increasing tremendously every year in Canada, it cannot be said that the paint dealer has yet thoroughly realised the opportunities that lie before him. Encouraged by the manufacturer, he is becoming more enthusiastic as to the possibilities of his paint department, but still he has a lot to learn in the art of pushing his lines. The paint dealers in the States are much more alive to the profitable field that paint selling gives them. They recognize that no line of goods offers better profits than paints; that no line of goods has a better selling field, if properly encouraged; and that no line of goods has the co-operation behind it as offered by the paint manufacturer. A trip through the States shows the extent of the good work going on. Prettily painted houses are seen on every side; barns and fences bear the full glare of the summer sun without shame, and a review of the many interiors would no doubt tell the same tale. For instance, Massachusetts offers up a fine example of how paint can be utilised, and many dealers in Canada, who are sceptical as to the field that paint offers, should take a trip into this State, and see how the dealers there have realised their opportunities.

Many Canadian merchants are still inclined to look upon their paints as a minor side line, kept because customers ask for them. They make little effort to push sales, with the result that houses, barns, and fences are allowed to deteriorate all through the district for the want of energy on the part of the merchant. He neglects what should be a major, and not a minor, part of his store for the want of enthusiasm. Enthusiasm is the master key. If once the merchant becomes enthusiastic over the possibilities of paints, he will soon touch the dolars and cents that lie behind them. But the dealer must understand this, that the right way to sell paints is not to sit behind his counters and expect the consumer to come to him. He must go out and educate the consumer to the value of paint. He must arouse the spirit of emulation among the property owners so that no man will allow his neighbor to lead him in the matter of using paint. And in doing this educational work, the dealer is not only working for himself, but for the community, because paint is a valuable asset to every man. A man who paints his house regularly is adding to its value as a selling prposition, and he is preserving it for his own use. The housewife should be told that paint is a disinfectant as well as beautifier, and that a house made cheerful by paint must necessarily be the abode of health and happiness. The dealer is the only man who can do this educational work, and he can do it easily if he is thoroughly enthusiastic.

There is no doubt that if the dealer

THE particular dealer we want to get in touch with this time is the man who is tired of handling the kind of paints and varnishes and enamels that don't pay shelf-rent—the dust-catcher kind nobody ever calls for twice, and few people even once. There's news for that dealer in the selling-power of FLOORGLAZE (the king of solid - color floor enamels), GRANITINE (the floor finish that wears amazingly) and quite a few other lines of ours that make good.

If that dealer wears your hat it will pay you to ask us questions this very day.

Send for Sample Can of FLOORGLAZE, or GRANITINE

IMPERIAL VARNISH & COLOR CO., Ltd., TORONTO

IMPERIAL

BOLTS AND NUTS

An old but very true saying is that "an article well made is half sold."

Our Bolts and Nuts are well made. That's why they are giving such satisfaction, and why they are now being stocked by all the leading Hardware Men throughout the country.

We can supply everything in the line of Bolts and Nuts.

Montreal Rolling Mills Co.

were a practical painter a lot more paint could be sold, but all the same he can easily pick up those selling points, which will give him a strong campaign. And above all he is helped in every way by the manufacturer, who spares neither time nor money to help forward sales. It is highly important that the dealer should carry a good quality line of paint —one in which he can have the fullest confidence. Confidence in one's goods is the first requisite to success. It is an easy matter to pass this confidence on the customer.

Paint and Oil Markets

MONTREAL.

June 18.—The situation in the paint and oil trade may be described as very healthy. Purchasing is being done with greater confidence and in heavier volume, and there is a very bright feeling shown on all sides. There has been no special feature with regard to fluctuation in prices, and the market is strong and unchanged. A good call for white zinc, which, as a rule, is on the quiet side, is noticed this week.

TURPENTINE—Trade is exceedingly brisk, and the market is firm with an advancing tendency. Stocks in dealers' hands are none too heavy. We continue to quote 57c. for single barrels, net 30 days.

LINSEED OIL—As fast as the stocks can be matured shipments in linseed oil are now being made, and there is every indication of a good demand all through the summer. No further price changes are announced, and we quote: Raw, 1 to 4 barrels, 63c.; 5 to 9 barrels, 62c.; boiled, 1 to 4 barrels, 66c.; 5 to 9 barrels, 65c.; strictly net, 30 days.

GROUND WHITE LEAD—There is a strong undercurrent in ground white lead, and buyers, who see even a fair business ahead, are stocking freely in case another advance will occur. We quote: Strictly pure, $5.60 to $6.10, according to brand, and No. 1, $5.10 to $5.60, f.o.b., Montreal.

RED LEAD—Some cutting is still being noticed in red lead. A steady demand tends to keep the market up and for ordinary sized lots the following prices are still generally asked: Genuine red lead in casks, $4.50; in 100-lb. kegs, $5; less quantities at $6 per 100 lbs.; No. 1 red lead, casks, $4; kegs, $4.50, and smaller quantities, $5.50.

WHITE ZINC—One of the features of the week has been some really good buying in white zinc. White work and white finish seems to be apparently growing into favor. We quote: Dry V.M. Red Seal, 7½c.; Red Seal, 7c.; French V.M., 6c.; Lehigh, 5c.; white zinc, ground in oil, pure, 8½c.; No. 1, 7c.; No. 2, 5¾c.

PARIS GREEN—There is a little more trade doing in this article, but the demand seems to lack the snap of former years. We quote: 1-lb. cartons, 18c.; 1-lb. tins 19c.; 50-lb. drums, 17c.

PUTTY—Putty is still moving out freely, and the tone of the market is good. Quotations are unchanged. Standard putty, 880 lbs., in casks, $1.65; in 100-lb. drums, $1.90; bladder putty, 400 lbs., in barrels, $1.90; in 100-lb. cases, $2.05; in 25-lb. drums, $2; 25-lb. tins, $2.05; 12½-lb. tins, $2.25 f.o.b. Montreal.

TORONTO.

June 18.—An apparent slackening of trading is noted this week, and opinion is somewhat divided. One or two paint jobbers and manufacturers say business is good; while on the other hand an equal number say it is quiet. The majority aver, however, that passing business is "nice" though hardly up to what was done during the previous month. Of course, the paint trade is sensitive to weather conditions, and this wet spring has set back much work to the fall. Still painters themselves are rushed with work, just at the moment, and have contracts ahead to take up much of their time for a month at least.

Dry colors have been going out fairly freely of late, and some good repeat orders for ready-mixed have come in from country hardwaremen. The other lines have been normal only, with the exception of floor, wall and ceiling coverings, which may be termed summer, and so seasonable, lines, and which have been good sellers.

Prices continue rather firm all round, especially so with lead and oil. Turpentine is up a cent, but is irregular, and some houses are quoting, though not pushing sales, below the market price.

TURPENTINE. — There has been an advance of about 2 cents per gallon in the Southern States. It is reported that thus far this season the receipts of turpentine have been about 41,000 barrels, while last year for the same time there were about 62,000 barrels, indicating that for some reason the quantity coming forward this year has been much less than last year. This is supposed to have been partly caused by the unseasonable weather that has prevailed in the Southern States. Locally, turpentine has been advanced one cent per gallon, the price now being asked for single barrels is 59 cents. A couple of houses go below this, however; one at 58c and the other at 57c.

LINSEED OIL. — This line remains very firm. The price of seed indicates that any decline is out of the question for this season; at least up to September. Prices while not advancing are very firm. Single barrels of raw and boiled at 63c and 66c, are the unchanged quotations from last week.

WHITE LEAD.—The advanced quotations of last week still rule the local market, and if anything are pretty firm at the new figures. No. 1 is now $5.50 and $5.75; pure white runs from $5.00 to $6.10 with a superior grade at $6.35. Red lead is unchanged as to price. The demand for both white and red lead is but normal. Red lead is unchanged in price, $4.50 for casks and $4.75 to $4.80 for hundred pound lots.

The Painter Knows

That's Why He Asks For

"ENGLISH"

LIQUID PAINT

He knows that the shades are clean, clear and perfect.

He knows that the guarantee formula appears on the can.

He knows that the white base is

70% Pure White Lead
30% Pure White Zinc

thinned with pure linseed oil, turpentine and dryer.

It suits him. This is only one of the reasons why progressive dealers are taking up the agency.

Just send us a postal card for prices and selling plans.

MURESCO

Easy to Apply : : : : Only One Coat Needed

You can recommend this article to every amateur or professional painter, decorator or householder with perfect confidence. It is unequalled for all classes of ceiling and wall decoration.

It is ready to use when mixed with hot water. It is well to beware of wall finishes containing lime or plaster that cannot be removed by washing when desired; they are neither practical nor sanitary and will eventually peel off, leaving the walls in a ruined condition.

BENJAMIN MOORE & COMPANY
LIMITED

Makers of Muresco and High-Grade Paints, Colors and Varnishes : : : :

New York Chicago Cleveland

What Muresco Will Do

Muresco can be applied by anyone, to any kind of surface. It will not rub off nor peel, shows no laps, spots or brush marks, and is the only material producing that flat, subdued, velvety effect, so much admired.

NEW YORK CHICAGO LONDON BERLIN BRUSSELS

GLASS AND PUTTY.—Glass is moving a little freer, but it is not going out in any large quantity. Prices are unchanged, but much firmer than last season. Painters' putty is the only line of that article selling at all well just at present.

STAINS AND VARNISHES. — All summer lines for floor, ceilings and walls are moving nicely, and the demand is good.

PETROLEUM—Gasoline and benzine continues to increase in popularity and sales as the season advances. The movement of coal oil lines is fair. Prices unchanged.

—

CO-OPERATION WITH PAINTERS.

It has frequently occurred to me, writes V. W. Hartman in the American Paint and Oil Dealer, that many retail dealers overlook one feature of their paint business which, if given more attention, would tend to increase their paint sales and minimize the complaints arising solely through the improper handling and application of paint by inexperienced purchasers.

The feature referred to is the cultivation, the getting in touch with, the local painters. This is a problem that every paint dealer can consider with profit.

There are many, very many, good reasons why the painter will benefit by keeping in touch with the paint dealer. It will bring him many jobs he could not get otherwise. Every job he does with mixed paint is clear profit. He has no left-over materials on his hands.

The time he usually expends in mixing colors to meet the changing whims of his customers is saved.

He does not have to invest any money in materials. The house owner buys his own paint, pays for it and assumes the responsibility of its being satisfactory.

In fact, the painter has everything to gain, nothing to lose in this connection.

He gains the dealer's co-operation in securing jobs. This is no small item to him each season.

He is not called on to make good at his own expense and loss any job that does not prove satisfactory.

He avoids the time and trouble involved in mixing colors to suit the whims of his customers. He would gain many days' work in course of a season right there.

With such points as these to use, the retail paint dealer can go to the painters with a strong argument and will find it to his advantage to work hard to get them in line.

How many dealers sell a stove without telling the customer how to use it? The purpose of the different appliances are carefully explained, the proper way to adjust the dampers is illustrated. Yet how many of these same dealers ever think of handing a paint customer a color card or booklet containing directions to use the paint just bought, calling attention to them and the importance of their being observed?

If one per cent. of the enthusiasm and energy annually expended on base ball were diverted to the retail paint business how it would grow!

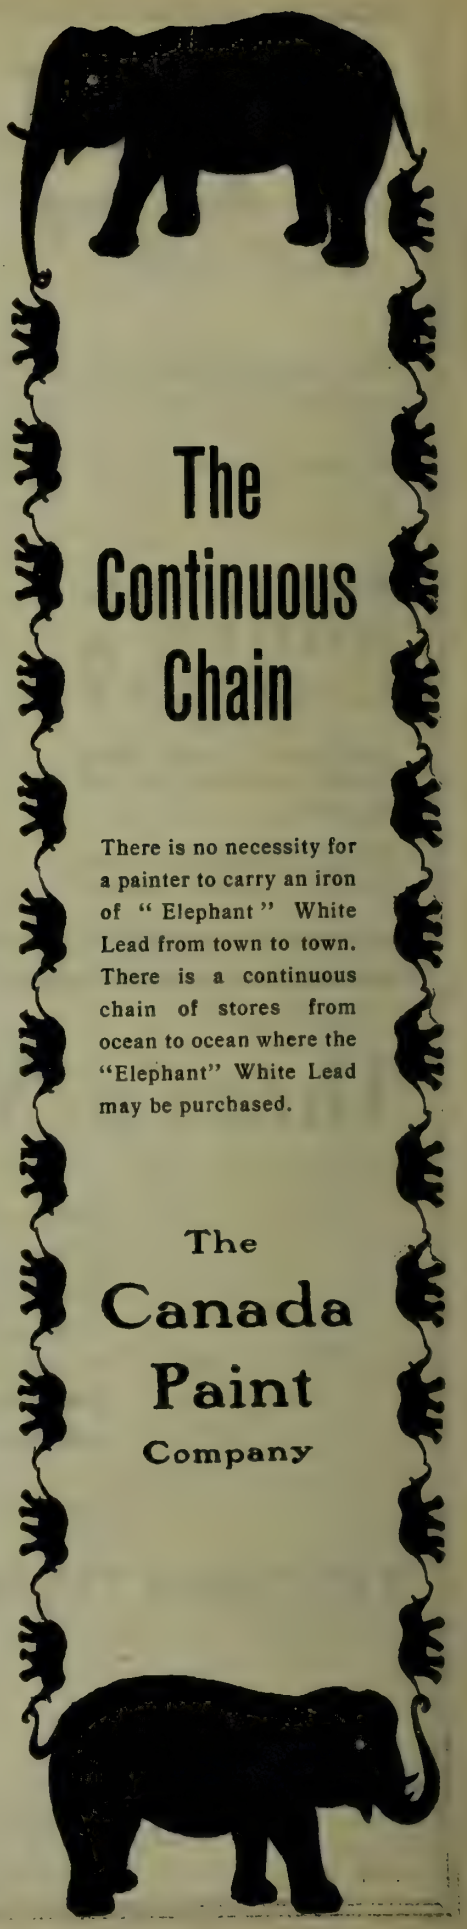
The fact that our timber supply is disappearing so rapidly, the price of lumber attaining almost prohibited proportions while its quality deteriorates from year to year, should be an eloquent source of argument for the paint dealer. Don't overlook these considerations when talking paint.

Laying aside the claims of individual paint manufacturers for superiority of any specific make of paint, the fact remains that ready-mixed paint is growing in public esteem. There is but one reason for this. It has demonstrated its adaptability to the varying conditions, climatic and otherwise, under which it is used. It is both convenient and economical for the dealer to handle and for consumers to use. It represents the best there is in paint protection. It is almost invariably an honest product, made on honor and sold at its true, intrinsic worth. Its rapid growth and universal use prove this. The wheels of progress refuse to turn back. The "good old days" of our forefathers is a slogan rapidly dying out. Twentieth century civilization demands modern conveniences, requires up-to-date methods. To deny this is to assert we are not a progressive, growing people.

The paint dealer is a public benefactor. The use of paint denotes thrift and prosperity, promotes health by making one's surroundings healthful and sanitary, increases the value of property by making it attractive. "Magnify your mission" and sell more paint.

—

PAINT NOTES.



M. J. Phelan, Toronto, will do the painting in the new separate school at East Toronto.

The Bank of Montreal painting contract at Montreal has been awarded to F. Lefebvre of that city.

Murphy & Son, Montreal, have the contract for painting the W. T. Rodden residence at Vaudreuil, Que.

Oscar L. Whitelaw, a paint jobber, has been appointed Asst. Treasurer of the United States, with charge of the Sub-Treasury in St. Louis.

The Canadian Pacific has been experimenting with a fireproof paint for wooden trestles and bridges. A trestle treated with this fireproof paint was subjected to a pretty severe test, and met with promising results. An engine was run slowly over the painted trestle, and as it went the ashes were shaken out in such a way as to allow every chance for a fire. Later, the engine was brought to a standstill at the centre of the trestle and red hot cinders shaken out of the fire box in a heap on the painted ties. The first ashes from the moving engine made no sign of fire, while the heap from the standing engine caused a slight blaze on the ties which went out in a few minutes without causing any damage. The results of the experiments were decidedly satisfactory, and further work will be done to demonstrate the usefulness of this fireproof paint. If it proves a success, it will probably be adopted on wooden trestles and bridges along the C. P. R. especially on those located in remote sections of the line, where most trouble is caused by fires.

Barn Paints

A good barn paint brings you good money. Many paint dealers overlook the opportunity for profit in Barn Paints, and neglect the business altogether. There are barns, fences, roofs, bridges to be painted, but consumers hesitate to use the high grade house paints.

Ramsay's Outside Paints

fill the bill and help to fill the till. Don't overlook this profitable branch of the business. Two or three good colors added to your stock and pushed forward to your customers at $1.00 a gallon brings a nice profit. Ask us for card and price list of Ramsay's Outside Paints.

Send for a Free Sample

Amatite ROOFING

If you will write to-day for a free sample of Amatite, the end of your roofing troubles is in sight. It is the one roofing that *needs no painting* after it is once laid on the roof.

If you would sit down and figure out exactly how much it costs to paint a smooth surfaced roofing during its life, you would find that the cost of this paint is *more* than the roofing itself Amatite, on the other hand, has a real mineral surface, and we sell the goods on the broad statement that it *needs no painting of any kind.*

The man who puts Amatite on his buildings is insured against leaks and trouble for many years to come. Send name and address for a sample and booklet, which will prove conclusively how much better Amatite is than the old-fashioned "rubber roofings" which require constant painting and care to keep them tight.

"The Englishman's Home"

is SAFE if ALL his family can use a RIFLE.
THE ONLY RIFLE MADE IN CANADA is the famous

ROSS RIFLE

In Going after Big Game, the important force is the **RIFLE.**

Our New Sporting Models delight the keen shot.

For Range Shooting the marksman cannot afford to be without a **ROSS MARK III RIFLE.**

We have the written testimony of the best riflemen in the world, and the **ROSS RIFLE** has stood the severest tests in the best rifle matches of the world, **BISLEY** especially being loud in praise of the **CANADIAN RIFLE.**

The Sporting Rifles retail at $25 up and sell themselves. Try a sample order.

HANDSOME CATALOGUE ON APPLICATION.

Don't Wait for Something to Turn Up. Try a "WANT AD."

SALE STARTERS

"My wife said I should buy her a set of these irons," said the man, as he pulled from his pocket a little folder.

"She picked this piece of paper up when she was in here the other day and she has been studying it like a spelling book. Yesterday when she ironed, she declared it was the last time she would use the old flats.

"Yes, that's the iron, the Asbestos Sad Iron, same as this picture. My wife likes this set here, and I guess I will have to take one of those Flounce Irons too, because she hinted about how nice it would be for her waists and the baby's things."

RESTS ON THE SHOWCASE

DON'T GET SCATTERED

One hundred folders with your imprint in a "Stand Pat" carton mailed on request. Write for a box and state how you want the folders imprinted.

The Dover Manufacturing Co.

NORTH BROS. MFG. CO., Philadelphia, Pa., U.S.A.

Mr. Hardwareman

Are you aware that the **EASTLAKE METALLIC SHINGLES** are the best steel shingles on the market? Now we are not claiming anything we cannot prove.

"EASTLAKE" STEEL SHINGLES were produced twenty-five years ago—long before any other steel shingle. The roofs that were covered with "Eastlake" shingles that first year are to-day in as good shape as when they were laid—never having needed repairs.

No other galvanized steel shingle can even claim such a record. Remember this fact when others say to you "My shingles will last a century."

Satisfy your customers Give them a shingle that has proven itself—that you know will insure the utmost satisfaction.

"Eastlake" Steel Shingles are made by the oldest and largest sheet metal building material firm in Canada—a firm whose policy has been "Protection to the Dealer" from the start.

We also manufacture **Galvanized Cornices, Skylights, Ventilators** and **Finials, Metallic Ceilings, Siding** and **Lath, Corrugated Iron, Conductor Pipe, Eavetrough, Fireproof Glass Windows, Doors,** etc., and Architectural Sheet Metal Work generally.

Write us for catalogue and estimates.

"You know the difference between 'claims' and 'proofs.' Claims MAY hold customers, but proofs WILL hold customers."—*The Philosopher of Metal Town.*

Disston's Files

Did you ever hear how "Disston's" came to start the Manufacture of Files? Here it is; it may interest you.

In the course of the Manufacture of their Saws they use 30,000 Dozen of Files annually. These were brought from the different File Factories throughout the Country. Sometimes shipments were satisfactory in regard to quality and sometimes they were not, principally the latter, for the reason they did not run uniform and it occurred to the Management of that Large Plant, that as they made their own steel they could get much more satisfaction by making their own Files. It was their intention to only make sufficient files to supply their own wants, but friends one after another persuaded them to take on their account and to-day they have the Most Modern and Best Equipped Plant in the Country.

Disston's Saws are the Standard of the World.

Disston's Files soon will be.

Orders accepted for immediate shipment and shipment up to September 1st.

PRICES REASONABLE.

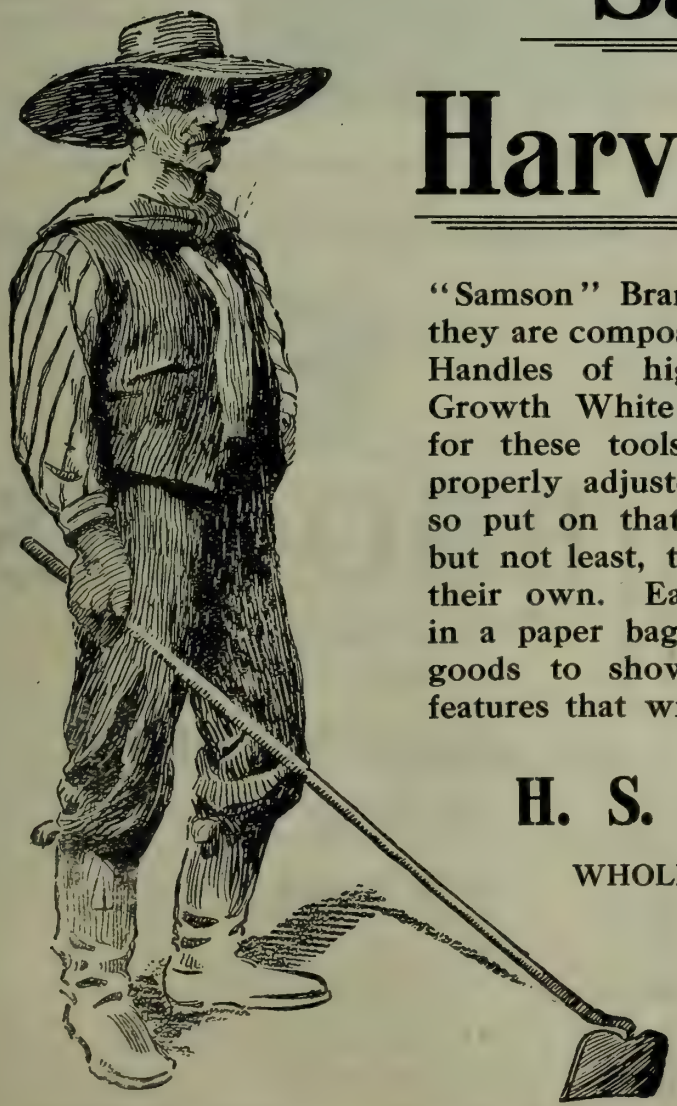
The Canada Metal Co., Ltd., Toronto

On the Farm



It is the test that counts after all. You may say everything that is fine about an article, tell about its construction, material it is composed of, and finish, also the price may be right, but the tool that stands the work is what the Farmers want; what they want they will buy.

STOCK

"Samson"

Harvest Tools

"Samson" Brand will stand the work because they are composed of Oil-tempered Drawn Steel; Handles of highest grade Canadian, Second Growth White Ash and are specially selected for these tools. The Tines and Blades are properly adjusted by experts. The Ferrule is so put on that it cannot work off; and last but not least, they have an attractive finish of their own. Each handle is carefully covered in a paper bag, so you will have new clean goods to show your customer. These are features that will appeal to the buyer.

DON'T BE "AN EASY MARK"

Any jobbing house can tell you that there are dealers here and there who will take anything at all; good, bad or worse, with no regard for brand or quality just so long as it is the "article" they ordered from the traveller.

Of course, we all know that if it wasn't for this class of merchant the manufacturer of inferior goods would go out of business—but, Mr. Merchant, don't you let anybody think for a minute that you're that kind of a business man.

You don't intend to be a "dumping ground" for these inferior goods.

When you want a Hinge, you want the very best kind of a Hinge—

A CRESCENT BRAND HINGE

The up-to-date Hardware man knows what he has to pay for and doesn't take chances. There are several kinds of Hinges and Butts, and those of quality and merit bear the **"Crescent Brand."**

The Celebrated "Dreadnought" Milling File

A substitute for Files which is revolutionizing File Work. A great cost reducer; a simple and radical improvement on the ordinary style of hand files; it cuts from 300 to 500 p.c. faster than an ordinary file; it is self cleaning; it can be sharpened four times; it cuts equally well all metals, also wood and marble; its cutting edge outlasts from five to ten ordinary files; although practically a rasp, it leaves the surface smooth N.B.—The Dreadnought is adaptable to every job in which ordinary files can be used, expediting the work and doing it better, and for numerous jobs usually milled in machines. Gold Medal, Franco-British Exhibition, 1908. Gold Medal, International Exhibition, Madrid, 1907

LOOK OUT!

¶ Live business men should always be on the look-out for new lines which are going to take on, because by not carrying them they lose trade and reputation.

¶ We recommend them, therefore, to be quickly on the trail of our new No. 23 Handsaw, which has already met with great favour, partly because men wanted a straight back to compare in quality with our 87 and 87A, and partly because we have hit on a mighty good thing in our new alloy saw steel.

¶ There's "just a little something" in it which makes the difference your customers will notice.

Martin's Store Ladder
Low Down High

For all merchants that carry merchandise on shelves enquire of E. R. CASE, Toronto

A Few Testimonials

Rockford, Ill., May 27, 1908.

Mr. S. B. Martin, Dalton, Ohio.

Dear Sir,—Ladder is very satisfactory—the new track holds up and were we fitting a "string of stores" we should place your ladder in each one of them.

Very truly,
Hunter Hardware Co.

Toronto, Ont., Sept. 28, 1908.

Mr. S. B. Martin, Dalton, O.

Dear Sir,—We are well pleased with the "Low-Down-High" Ladder you installed in our warehouse some weeks ago. We find same works very easily and smoothly and makes the work of filling orders from the shelves a very easy matter compared with the old style of ladders. We will be glad to receive quotations for Ladders for other parts of the Warehouse.

Yours truly, T. Woodbridge & Co.

AutoStrop SAFETY RAZOR

The only Self stropping Razor in existence.

. SEE .

what a satisfied customer has to say about it.

A specimen of many letters we receive.

The Safety Razor that is building its reputation on

MERIT

New Glasgow, N S,
June 12th, 1909.

The AutoStrop Safety Razor Co., Ltd.
Montreal, Que.

Dear Sirs:

Perhaps you will be interested to learn of my own experience with the AutoStrop. I was using an ordinary safety razor, putting in a new blade every few shaves, when I received the first order of AutoStrops. I took one home to try. This was in November, 1907. I have been shaving myself twice and three times a week ever since (over 80 weeks) and have used but the one blade. This no doubt is due to your simple stropping arrangement.

I figure that a barber cannot shave without Stropping, neither can it be done with a Safety Razor.

In your ads impress on the purchasers of the AutoStrop to follow the directions. The razor will do the rest.

Yours truly,
SAMUEL EASTWOOD,
Jeweler and Optician.

Shave with the AutoStrop Safety Razor yourself, so as to know how to demonstrate it to your customers. When you are personally satisfied with its services you will find it an easy matter to make sales, and your customer wil be satisfied with his purchase.

Write us for sample and terms

HAMILTON (22 Calibre) RIFLES

Money Makers

Models 27 and 027

Prices $2.00 and $2.25

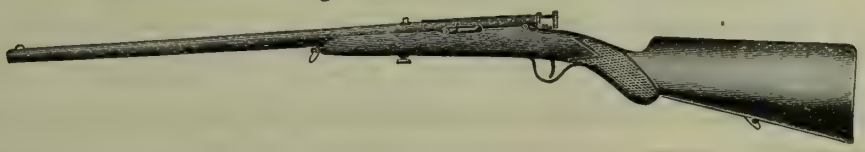
We Specialize on Boys' Rifles

We build our rifles under patents exclusively our own and confidently claim to make the **best rifle ever built for the money.**

MODEL No. 27 is an efficient sporting rifle, with hammer action, of few parts and exceedingly simple, using 22 calibre short or long cartridges. The barrel is bronze, rifled and steel jacketed, finished in blue black gun finish. Breaks down for loading and ejecting shells. Flat stock and forearm of gun of gum wood. A beautiful model, symmetrical and well balanced. Barrel is 16 inches long, length of rifle over all, 30 inches. **Price $2.00.**

MODEL No. 027 is exactly like No. 27, except the stock and forearm, which are of genuine walnut, turned and beautifully finished. **Price $2.25.**

Other models are Nos. 15 at $2.00, 19 at $2.50 and 23 at $3.50, each a winner in its class.



Our continuous advertising in the boys' papers will bring the business to you, as every boy will want one and you should have a stock on hand. **Write for catalogue and net trade prices.**

THE HAMILTON RIFLE CO., Box 202, PLYMOUTH, MICH., U.S.A.

SOMETHING NEW IN THE RIFLE LINE!

The "BAYARD" Semi-Automatic Rifle

Made for .22 cal. long and short Smokeless Rim Fire Cartridges.

In the Bayard Rifle, the pressure of the explosion is used to push back the breech block, to eject the empty shell and to cock the firing pin. After each shot the breech remains open, ready to receive a new cartridge, which is placed into the barrel by pressing the button of the breech block catch. An easily adjusted safety catch permits the rifle to be locked when loaded. The barrel is fitted with an open adjustable rear sight. Owing to its long range and its great accuracy the Bayard Rifle recommends itself for target practice and small game shooting. Ask your jobber to show you this wonderful little Rifle. If he cannot supply you write to us direct and we will see that your wants are attended to.

DORKEN BROS. & CO., - MONTREAL

Our Electric Welded Chains

have shorter links than the knotted chains and are also smoother. They are thus more flexible and easier on the animal. No kinks of any kind to catch the hair. We guarantee they are 50% stronger.

EMERY MFG. CO., Bradford, Pa.
A large part of plant is covered with CONGO

CONGO NEVER LEAK ROOFING

THE GUARANTEED ROOFING

One of the most attractive features about Congo is that you get a genuine Surety Bond with EVERY ROLL. This Bond is issued by the National Surety Company. EVERY roll of 3-ply Congo is guaranteed for a period of TEN YEARS if printed directions are followed.

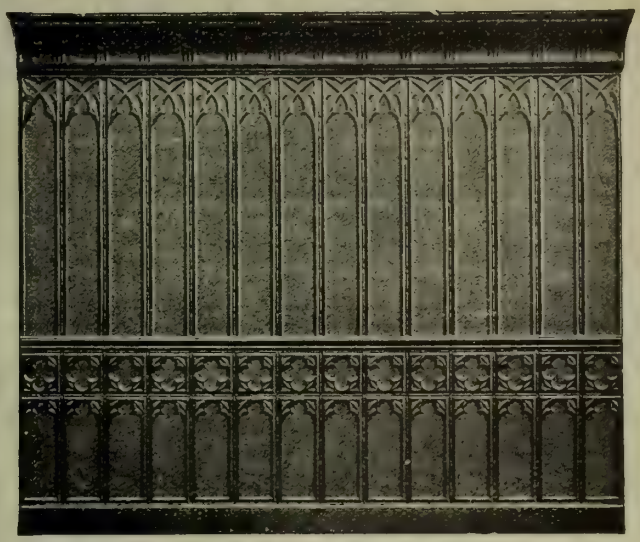
Thus the buyer is protected for a long time by the strongest guarantee ever issued, backed by a Surety Company whose bond is as good as the Government's.

That Congo is made of the right stuff durable and lasting, is attested to by the fact that the Surety Company was willing to back it, and for so long a period.

Congo is really a better purchase than ever before.

In addition to the Surety Bond, we furnish with every roll GALVANIZED CAPS, instead of the tin caps or nails supplied by others. The galvanized caps can't rust or bend or break. Liquid cement is also furnished free.

We mean to get the roofing trade of the country and think these SPECIAL FEATURES will come pretty near landing it.



Send to-day for free Sample of Congo and a copy of the Guarantee Bond.

The

ECONOMY

All stove dealers who have seen this stove have pronounced it to be the best in its class.

REASONS WHY

The design is clear, neat and attractive.

It has an ideal fire box, fitted with heavy cast iron linings and heavy duplex grates

It has a drop oven door, the frame of which is nickelled as well as the medallion on the oven door.

It has a cast iron reservoir end, which gives it a finished appearance.

It is fitted with either a galvanized or copper reservoir as desired.

This stove shows more class, and has more special features and selling points than any oter stove in its line.

SPECIALS

We also furnish it with a cast iron hearth with bracket, and nickel band on the top.

PRICES

The price to the trade makes it the best stove proposition which you have had for some time.

Correspondence invited, and catalogs for stoves and furnaces will be mailed upon request.

Export Trade

Represents the Great Future Market for American Goods

Manufacturers that cultivate the field **NOW** are assured of the largest share of this trade in the future.

Our service, the greatest single power in Export Trade, enables manufacturers to get their products prominently before the trade abroad. An efficient service, covering all export markets at minimum of expense.

The aim of the **American Exporter** is and has always been the up-building of a world-wide demand for American machinery and goods. Issued in two editions each month, one in English, and other in Spanish **(Exportador Americano.)** The two together cover all countries that import American goods.

It is the only journal of foreign circulation which regularly publishes its exact circulation every month in its editorial pages.

Stronger evidence of the AMERICAN EXPORTER'S strength in its chosen field could not be brought forward than the phenomenal growth in its advertising pages during the past three years. The AMERICAN EXPORTER in net volume of advertising business carried three years ago 52 pages of net advertising; two years ago 88 pages; one year ago 116 pages; carries to-day 122 pages. Its number of regular advertisers three years ago was 325; two years ago 400; one year ago 550; and to-day 650. It is seen that notwithstanding a "panic," there is a growth in the last 12 months.

An increasingly important feature of the **American Exporter** is the Foreign Trade Service maintained on behalf of its advertisers. This service includes the sending of our representatives into foreign markets to study conditions in the interest of our clients, the furnishing of selected names of possible customers or agents in any country, commercial ratings on prospective foreign customers, translation of foreign correspondence from and into any and all languages resulting from or pertaining to the advertiser's announcements.

Representative space regularly in the **American Exporter** gives you all the export advertising you need, for this publication covers every foreign market for your goods. This publicity, coupled with our Foreign Trade Service, provides you with the necessary facilities for conducting intelligently an export trade.

May we send more particulars?

Business Men Discuss Business Principles

Associated Boards of Trade of Western Canada in Annual Convention—Many Resolutions Passed Relative to the Production of Better Trade Conditions Throughout the Prairie Provinces—Unselfish Spirit Displayed—Building up the West — The Predominant Theme.

(Staff Correspondent.)

Saskatoon, June 22.—The sixth annual convention of the Associated Boards of Trade of Western Canada, comprising a delegation from one hundred and twenty-five individual boards in cities, towns and municipalities in the provinces of Manitoba, Saskatchewan and Alberta, was held here on June 15 and 16. This was the first convention held by the asociation since Manitoba Boards of Trade affiliated with the other two provinces. As a consequence it was the largest convention ever held by the association, and the most important gathering of its kind ever held in Canada to discuss ways and means for the development of the growing industries of Western Canada.

The business of the convention was to discuss the various resolutions which had been submitted to the general secretary during the past year, from various boards throughout the country. This year resolutions had been sent in by boards from Calgary, Lethbridge, Edmonton, Medicine Hat, Moose Jaw, Swift Current, Prince Albert, Raymond and Wolseley, and these occupied the time of the convention. These resolutions were all printed in pamphlet form and distributed to each member of each Board of Trade, some weeks before the convention, in order that the members might be prepared to intelligently discuss the questions when they were introduced.

On Tuesday morning, June 15th, the meeting was called to order by President K. W. Mackenzie of Edmonton. He expressed regret that all the delegates had not arrived, and after naming a resolutions committee of nine delegates present, and a credential committee of three members, the meeting was adjourned until the afternoon.

Tuesday Afternoon Session.

An address of welcome was read from Mayor Hopkins, of Saskatoon, who was not able to be present. He assured the delegates of the hearty sympathy and encouragement they would receive in their deliberations for the public good.

After M. Isbister, president of the Saskatoon Board of Trade had welcomed the delegates and invited them to the entertainments, which had been prepared for them, and which were enthusiastically taken advantage of by all, President Mackenzie rose to deliver the annual address, which was as follows:—

"Gentlemen: As retiring president of this association I have now the honor to present to you my annual address, and in doing so desire again to express my keen appreciation of the honor you conferred on me a year ago, when you asked me to preside over your deliberations, and of the unfailing courtesy extended to me in the discharge of my duties in that connection.

"I am gratified to find so large a number of delegates assembled at this the sixth annual convention of the Associated Boards of Trade and take it as evidence of a sustained interest in the work. By a resolution of the convention held at Medicine Hat a year ago Manitoba boards are now entitled to representation in the annual convention on the same basis as those of Saskatchewan and Alberta, and on behalf of the older members of the association I now welcome them to this fuller participation in our work.

WILLIAM COUSINS, MEDICINE HAT,

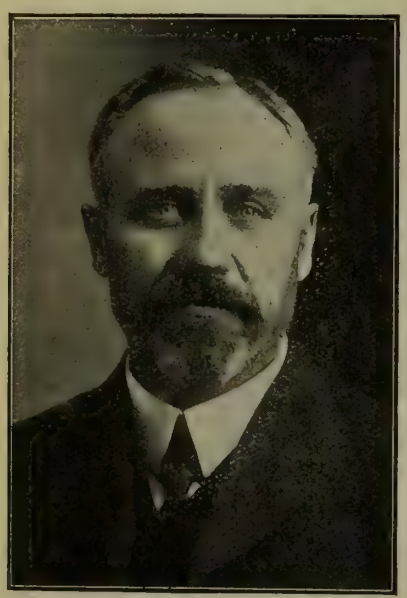
President-Elect of The Western Board of Trade.

"The problems we have to face in these three provinces are similar, if not the same; our interests are inseparable, if not common, and though under three distinct govenments our welfares are so bound together that almost every pulsation that affects the one is felt by the other. It is hoped therefore that by well directed and concerted action we shall derive the largest measure of a common benefit.

"During the past two years our western provinces have felt with the rest of the world the strain resulting from the financial stringency, but recently there are many indications that this condition is passing away and that the onward march of general progress and development has been resumed.

"It is satisfactory to note that during the past year a distinct impetus was given to the settlement of the west by the Dominion Lands Act of 1908, which permitted the taking up of a homstead and pre-emption within a certain area and made available for homesteading all undisposed of odd numbered sections. It is also gratifying to note improvement in the class of settlers seeking homes in our midst.

"Following instructions given at last year's convention your executive on the 19th of December last apointed John T. Hall, of Medicine Hat, as permanent secretary of the Associated Board, who under their instructions inaugurated a very satisfactory follow-up system. For the purpose of interesting every Board of Trade in the work of the association, invitations were extended to thirty-one Boards of Trade in Manitoba, forty-eight in Saskatchewan and forty in the Province of Alberta, and for the purpose of giving the fullest, possible effect to the resolutions of the convention there were forwarded to the proper authorities and were followed up with a persistent correspondence impressing upon the various bodies to whom they were referred, the fact that these resolutions had received the most mature thought and careful consideration of the association before being presented to them, and endeavoring to see that so far as practicable action shouldbe taken in connection with each of them.



"The machinery of this system is not yet in full perfect running order, but we believe that the foundation has been laid for very effective work along the lines proposed. I beg to refer you to pages 54 and 58 of the report of the last convention, where you will find a brief synopsis, of the year's work. I beg also to refer you to the mass of correspondece which now lies upon the secretary's desk, and to invite your inspection of same, or of such parts of it as may interest you. One of the resolutions to be presented to this convention suggests a further extension of this work. I am of the opinion that the association has now reached that point in its existence when it has become a strong factor in the upbuilding of Western Canada.

"It is with regret that I have on this occasion to refer to the death of an estimable member of our association, R. S. Cook, of Prince Albert, who took so prominent a part in the work of the association during the past two years. I am sure that those who were privileged to visit Prince Albert when the convention was held there two years ago will long remember his genial hospitality.

"In closing, I wish to express my appreciation of the able and effective services rendered by John H. Hall, as secretary for this association. He has brought into the work a large fund of practical experience and has applied himself with commendable energy."

The financial report submitted by Secretary, J. T. Hall was encouraging in every way, and a substantial balance was left on hand.

The election of officers for the ensuing year was the next item of business, and

K. W. MACKENZIE, EDMONTON,

Retiring President of Associated Boards of Trade of Western Canada.

resulted in the election of William Cousins, of Medicine Hat, as president; E. W. Saunders, Moose Jaw, vice-president; John Hanbury, Brandon, second vice-president.

President Cousins was called to the chair and warmly thanked the convention for the honor they had done him.

Townsite Supervision.

The discussion of the resolutions was then taken up, and A. E. Cross, of Calgary, introduced the resolution regarding the government supervision of the location of townsites. He stated several complaints had been made from citizens in the smaller towns that the railways exercised no care in the selection of suitable or healthy points, which were surveyed as townsites. The question was chiefly a sanitary one, and this was enlarged upon by William Georgeson (Calgary), who seconded the resolution.

Several towns were mentioned which were selected in extremely unhealthy places and without regard to the people who will have to live there. He thought the Government should compel the railways to select sites in suitable places. The resolution was favorably considered by a few other speakers and carried.

Extension of Trade.

The Canadian trade agencies in other countries, was the next question introduced by the Calgary delegates. The resolution aimed at the appointing of agents from Canada in other countries, and more particularly in Mexico for the purpose of extending the export trade of Canada. It was pointed out by A. C. Fraser, of Brandon, that the Dominion Government had a commissioner in Mexico, whose business it was to serve the country in the way the resolution indicated.

Disatisfaction was expressed by other speakers of the lack of information, which they had received as to the trade conditions with other countries, and it was moved and carried that the resolution be re-drafted and submitted next year.

Bulk Sales Act.

The next resolution as moved by W. Georgeson (Calgary), is as follows:

"Whereas there is at present in existence in Manitoba and British Columbia an act governing the purchase, sale and transfer of goods in bulk, known as The Bulk Sales Act, the result of which has been beneficial to trade.

"Therefore it is resolved by this convention of the Associated Boards of Trade of Western Canada that the governments of Alberta and Saskatchewan be requested to enact without delay similar legislation in the respective provinces."

He stated that the general trade had suffered in Western Canada because merchants were allowed to sell out their stock in bulk at so much on the dollar and leave the wholesaler without any opportunity to exact any returns. It is only fair that the wholesaler should have the stock that is left, and that it should not be sold in bulk. There are many states in the union, he said, where this act was declared Constitutional. The older United States wholesale houses have felt for many years the absolute necessity of the protection of this Act. It is a reasonable request of the creditor, he claimed, to restrict, the debtor who sells goods in the assets of which he has no interest.

H. D. Gordon (Winnipeg), seconded the resolution, which carried.

Conservation of Natural Resources.

H. M. E. Evans (Edmonton), made an appeal for the preservation and development of the resources of the country, citing several instances in United States and Canada, where splendid service has been and can be rendered.

C. N. Bell called the attention of the delegates to the association originated in the United States, which had for its objects the ideals embodied in the resolution, stating that any Canadian could become a member for a fee of five dollars and have the privilege of receiving ten volumes of literature on the subject of conservation of natural resources.

"It behooves us," he said, "to show as much enthusiasm as the Americans in this endeavor."

The resolution was heartily supported.

The convention approved of the idea of the resolution to have land holders set aside a reasonable area of land in every ten acres, being sub-divided into lots, for parks and breathing spaces. Mr. Smith, of Regina, was the chief supporter of the question.

Fraud Under Exemption Ordinance.

The first warm debate of the session came when the following resolution was under discussion.

"Resolved that in view of the frauds which have been practiced by traders under the cloak of the Exemption Ordin-

J. T. HALL, MEDICINE HAT,

The Board of Trade Secretary.

ance in force in the Provinces of Alberta and Saskatchewan, legislation should, in the opinion of this association, be passed in these provinces making that ordinance inapplicable to any property included by any trader in any statment upon the faith of which he obtains credit, or such extension of time for the payment of his debts, unless in such statement the property claimed as exempt is distinguished as such."

The mover was Mr. Smith, of Edmonton, and the seconder Mr. Georgeson, of Calgary. In his address Mr. Georgeson said he regretted very much that he had not had time to prepare any particular material on this question, but he would say that the exemption law as it stands gives entirely too much advantage to the debtor. The act provides a great exemption in the case of homesteaders, and houses in cities are exempt to $2,500. It also exempts all tools and implements of trade, and further provision to farmers

to assist them against executions but does not provide for traders. In the case of a debtor it leaves him all food and other things sufficient for six months. The creditors are under the obligation of leaving their goods under depreciating influences while the debtor goes free. The act was certainly wide in its provisions in favor of the debtor. There seemed to be no restriction of the amount which a debtor should claim. He quite agreed with Mr. Smith that it was time the creditor should not be asked to do more than he has done in supplying the goods to the debtor. There had been a number of decisions in Manitoba courts where the debtor got every favor rather than the creditor. The act should be amended so that the creditor should be protected.

The discussion was continued by E. A. Mott (Winnipeg), Hugh Aird (Saskatoon, and H. D. Gordon (Winnipeg), when the Hon. T. H. Maguire, of Prince Albert said that as the poor debtor did not appear to be represented there, he would take his part. One would almost be convinced that the meeting was approving of the principle of the resolution, but if he was the only one to voice an objection, he would voice it. Surely every business man and particularly every wholesaler knows what is the record of the man he gives credit to.

Discourage Credit System.

"Why," said the speaker, "was the law passed at all that there should be any exemptions? Surely for the obvious reason that in this country we do not want to have people thrown upon the municipality or the Government for their support by having their stoves, beds and other household goods taken from them. If such were done they would be paupers and the country taxed to support them. This is why this exemption law was placed on the statute books. I would like to see every trader discourage the credit system. It is not in the interests of the merchant, retail or wholesale, nor in the interests of the country to extend the principle of credit. You should extend the principle of cash. If you wipe out this exemption then dealers will be more reckless in obtaining credit. It would be a calamity if we encouraged people to come here without the protection the exemption law gives to honest people."

W. Georgeson replied by stating that it was against the dishonest dealer that the creditor wished to protect himself.

"The creditor should be allowed to mortgage the farm or property of a dealer who wilfully neglects his duties. And if the debtor is bound to be a chage upon some one, why should it not be the community as well as the wholesaler?"

J. A. Aiken, Saskatoon, stated that it was for the purpose of bringing to time the dishonest retailer or debtor that the resolution was framed. The creditor believes in the debtor's business and it is their own business they want to develop and get returns from and not the property and effects of a debtor.

The resolution was referred back to the committee.

Wednesday Morning Session.

Letters were received and read by Secretary Hall from the premiers of the three provinces from which the delegates were assembled, and from Lieut.-Gov. Bulyea, of Saskatchewan, expressing regrets that they were unable to be present on account of parliamentary duties.

E. M. Saunders, Moose Jaw, moved that the Dominion Government be memoralized to embody in the Railway Act, a clause compelling railway companies to settle claims within a fixed period from the date of filing such claims. Several towns and villages had requested the Moose Jaw board to inquire into the question which had been a vexatious one for some time. Hugh McKellar, Moose Jaw, in seconding the motion stated that conditions of freight traffic were much better in places where there was competition between railway companies. Not only was there a delay in the payment

F. M. SCLANDERS,

Secretary of the Saskatoon Board of Trade.

of claims on the part of the company but the general freight transportation was unsatisfactory in points where there was no railway competition. He pointed out further that Montreal and Winnipeg had remedied the difficulties somewhat by appointing a superintendent of the shippers' department of the Board of Trade, but all towns in the west were not able to support such an official.

W. B. Lanigan, Western Freight Traffic Manager of the C. P. R. was present, and took part in the discussion. He said, "No railway can afford to be arbitrary in any work of transportation. The railway company is a business firm selling transportation, and the good-will of its customers cannot be sacrificed. The question of claims was an intricate one, but was receiving attention at the present time by the C. P. R. officials."

F. W. Peters, assistant to the first vice-president of the C. P. R. was also present, and assured the convention that the company were glad to hear them on the question of defective transportation, and delay in claims settlement. He stated that often the railway agents were incompetent and dishonest and were responsible for delays and losses in shipments, but the company was always willing to pay claims under two hundred dollars.

George H. Shaw, western traffic manager of the C. P. R., stated that they always sought to dispose of claims within three months after being filed.

T. W. Green (Moose Jaw) stated that the rural merchant did not receive the same recognition which the city merchant received.

The resolution was carried.

Exorbitant Freight Rates.

A resolution to the effect that the Western Boards of Trade consider that the time had come for a general reduction on freight rates, brought out a very full discussion on the question. In moving the adoption of the resolution, Thos. Millar, editor of the Moose Jaw Times, based his remarks on the fact that Moose Jaw was charged an exhorbitant rate on coal from Lethbridge to Moose Jaw and from Regina to the same point. At the end of the long haul in each case a rate of three cents per mile per ton was charged, which was actually higher than the passenger rate.

The motion was seconded after a lengthy discussion in which delegates from Lethbridge, Brandon, Edmonton and Saskatoon took part. It was further resolved not to approach the Railway Commission but deal directly with the railway companies. Messrs. Lanigan and Peters of the C. P. R. denied some of the statistical reports which some of the speakers made use of, regarding the rate on coal in different parts of the west. F. W. Peters also strongly resented the intimation that the C. P. R. owned the Bankhead mine, and that special rates were issued from it.

The delegates retired to the Canadian Club luncheon where brief speeches, eulogistic of the Town of Saskatoon and the country generally were made by A. C. Fraser, of Brandon, and W. B. Lanigan, Winnipeg.

Wednesday Afternoon Session.

The meeting opened with a discussion as to where the next convention should be held. Invitations were extended by delegates from Brandon, Lethbridge and Moose Jaw. By a unanimous vote Brandon proved the choice of the convention.

The Selkirk Centennial.

In view of the opportunity which would be presented to exhibit the resources of the western country, and in view of the advertising which would be given to the various resources in reports which would be published the world over, the associated boards heartily endorsed the Centennial for 1912. They further recommended that the Dominion Gov-

ernment give a cash grant toward it; and that the railways be asked to give special rates and privileges to the visitors

Judge Maguire (Prince Albert) introduced a very important measure relating to the opening of one of the largest rivers in the west for navigation, which, it was affirmed, would greatly facilitate transportation in Western Canada. Ex-President Mackenzie supported the resolution because of the opportunity it would afford Edmonton to distribute her coal throughout the West. The resolution was a request to the government for two snag-boats to clear out all obstacles from the river. These boats would cost about $4,500. The resolution was briefly discussed and carried.

Coal Miners' Strikes.

This resolution, which emanated from Moose Jaw, read as follows:

"Whereas the supply of coal from the mines in the western provinces is always limited to a few weeks, often a few days consumption; and

"Whereas, the prairies now dotted with farm homes depend entirely upon the coal supply for fuel; and

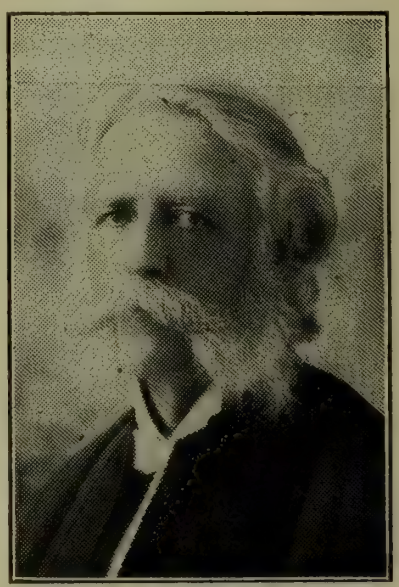
"Whereas any stoppage in the supply may occasion serious deprivations and possibly loss of life to those who are innocent and helpless;

"We urge upon the Dominion government the importance of further action in preventing miners' strikes. To further insure an adequate supply we further recommend that railways be asked to give a low rate on coal during the slack season before the grain movement commences, in order to encourage dealers and consumers purchasing their winter supply early."

Hugh McKellar (Moose Jaw) introduced the motion and said that the question had been so thoroughly discussed that nothing new could be said. It was regrettable that such conditions exist as is the case in Canada to-day. He was not going to discuss the Lemieux Act, further than to say that it seems to fail in its object in stopping coal mine strikes. It was serious that not only settlers generally may be left without fuel, but that railways might be tied up for want of coal.

The motion was seconded by T. Millar (Moose Jaw) who said it was necessary that the matter should be brought before the Dominion Government. He objected to our natural resources being retained by foreigners as was the case when the miners' strike was at the command of the American Federation of Miners.

After a discussion in which many took part, the resolution was amended to read: "That this convention urge upon the Dominion Government the importance of further action to ensure an adequate and continuous coal supply."



A resolution was introduced relative to the difficulty experienced in many places in securing a through ticket from the C. N. R. to points where a transfer was necessary to the C. P. R. or other lines.

This resolution was carried.

Sam. Moore (Swift Current) brought in the motion that the Boards of Trade urge upon the Government of Saskatchewan the necessity of penalizing all debtors who remove goods which are under lien notes or chattel mortgages. The object of the resolution was to have these people advise the holders of the lien when they removed to another district. The motion was criticized by several speakers and finally withdrawn.

Wednesday Evening Session

It was decided by the convention that the various Boards of Trade should sympathise with any individual board in any special grievance. This was brought out in the case of Raymond, Alberta, whose board complained of the excessive ex-

JUDGE T. H. MAGUIRE, K.C.,LL.D.,

Prince Albert Delegate Who Defended The Retailer in the Debtor and Creditor Discussion.

press charges on the Alberta Railway and Irrigation Company's Line. A. M. McDuffee, of Raymond, claimed that they paid a 4 cent rate while other railways paid a 3 cent rate. The motion that the association request the railway commission to investigate the conditions and if possible have the rates reduced was carried.

James McGeorge (Edmonton) moved, seconded by M. Isbister, (Saskatoon) that the railway companies be required to provide traffic facilities on their bridges across all streams and rivers, the additional cost to be borne by the municipalities in which they are constructed. This was carried.

Wrong Use of Name.

K. W. Mackenzie (Edmonton) said the name "Board of Trade" was used more freely than it was intended. A statute of the Dominion clearly outlined what a Board of Trade should be, and many boards did not meet the requirements. The statute stated that only manufacturers, merchants, traders, brokers and bankers could be members of a Board of Trade, and in many instances, men in other callings of life were members. He also pointed out that other organizations such as the "Printers Board of Trade" in Winnipeg were using the name without being authorized to do so. The motion was lost owing largely to the fact that there were lawyers and printers present in the convention.

At the conclusion of the above discussion President Cousins declared the convention closed to meet in Brandon next year.

Those Who Were There.

The following is the official list of delegates in attendance as submitted by the credential committee to the secretary, J. F. Hall:

Abernathy, Sask., D. B. Campbell.

Brandon, Man., J. Cornell, W. Warner, J. W. Fleming, A. C. Fraser, J. J. Hanbury.

Calgary, Alta., A. E. Cross, C. H. Webster, W. Georgeson.

Davidson, Sask., J. F. Cairns.

Edmonton, Alta., K. W. McKenzie.

Virden, Man., D. McDonald, E. Evans, W. McAdams.

Milestone, Sask., T. A. Hill.

Medicine Hat, Alta., William Cousins, John T. Hall.

Regina Sask., J. W. Smith, W. J. Taylor, H. G. Lawson, J. N. Young, A. Hunter.

Raymond, Alta., A. M. McDuffee.

Strathcona, Alta., J. N. Douglas, S. Blackwood.

Saskatoon, Sask., M. Isbister, H. Acheson, John Phelan, Hugh Aird, J. A. Aikin.

Winnipeg, Man., H. D. Gordon, E. A. Mott, G. N. Jackson, John Fleming, C. N. Bell.

Wynyard, Sask., Gerald Willoughby.

Aberdeen, Sask., H. Schoeder, J. Heinricks.

Battleford, Sask., J. T. Torrey.

Elgin., Man., S. Marshall, T. J. Moffat, Chas. Dunnett, Thos. Marshall, Robert Andrews.

Lethbridge, Alta., J. W. McNichol, W. A. Buckingham, M.L.

Moose Jaw, Sask., Hugh McKellar, H. Dorrell, T. W. Green, E. M. Saunders, Thos. Millar.

Yorkton, Sask., J. B. Gibson, Dr. E. L. Cash.

Langham, Sask., F. M. Sclanders.

Medicine Hat, Alta., Fred. Pringle.

Milestone, Sask., Dr. M. Cook.

North Battleford, Sask., J. W. Norton, J. A. Gregory.

Prince Albert, Sask., Judge McGuire, N. W. Morton, H. C. Beatty.

Swift Current, Sask., S. L. Moore.

Wolseley, Sask., R. A. Magee.

Watrous, Sask., A. H. Harrison.

Vonda, Sask., J. H. Currie.

A group photo of the delegates who attended the convention was received too late for publication this week and will be reproduced in next week's issue.

HARDWARE TRADE GOSSIP

Ontario.

Frank Goodwin, tinsmith and plumber, Sarnia, has assigned.

Chas. Soules, Richmond Hill, is advertising his hardware business for sale.

Padget & Hay, Unionville, intend opening a branch haedware store at Agincourt.

Wm. H. Wilson and A. Charlton, hardwaremen, Haileybury, have dissolved partnership.

W. R. G. Higgins, of the Higgins Hardware Co., Peterboro, who was confined to his home for a few days through illness, has returned to business.

Edward Higginbotham, of Higginbotham & Co., plumbers, Fort William, is in Toronto this week. Mr. Higginbotham is one of the ten plumbers who formed a co-operative plumbing firm in Fort William recently.

The Fife Hardware Co., Kenora and Nepigon, has purchased a building site at Fort William. Arrangements have been completed by J. A. Fife for the erection of one of the largest wholesale heavy hardware storage houses between Toronto and Winnipeg. Just what the building will cost and the number of men that will be engaged by the firm Mr. Fife is unable at present to say.

The Arcade hardware store, Forest, had a large float advertising hardware and wall paper in a 24th of May celebration and parade in that town. They also had a novel ad. in connection with the "Old Boys" celebration, Martin Senour 100 per cent. pure paint, being featured on the "Arcade Hardware Baseball score board.

Messrs. Ahrens, Torrance, Myler and Dawes, directors of the Standard Sanitary Mfg. Co., Pittsburg, with Mr. Collins, that company's Montreal representative, are in Toronto this week. Several meetings have been held and a definite decision as to the policy the company will pursue is expected to be arrived at before the directors return to Pittsburg.

K. M. Trigge, who for many years has been a traveler for the Allith Mfg. Co., Hamilton, covering eastern territory, has made a change. He has joined the selling staff of the Reddaway Belting Co., and will cover the States of Vermont, New Hampshire and Maine as well as the Asbestos districts of Quebec province and the Maritime Provinces. Mr. Trigge will be familiar with this trade having been with the Reddaway company for years formerly. He made many friends in his own field and no doubt will prove an acquisition to his old firm.

Kent, Garvin & Co., have purchased the Hamilton branch of the Canada Glass, Mantels and Tiles, Ltd., and will make a speciality of builders' hardware, fire-places, etc. Both members of the new firm are graduates of the old F. Hamilton Hardware Co. business, Mr. Kent having spent a couple of years in Chicago, studying builders' hardware, and Mr. Garvin, a similar period in New York, in the fire door and window fixture business. The two gentlemen have more recently been connected with the Brooks Sanford Hardware Co. and Canada Glass Mantles and Tiles businesses at Hamilton, Mr. Kent, as manager. Alteration are being made in the store building and a very handsome display room for fireplaces is being arranged.

Quebec.

Louis Blouin, plumber and tinsmith, Quebec, has assigned.

A. Trudeau, of Windsor Mills, Que., has been staying in Montreal.

A. P. Gosselin, of St. Alexandre, Que., has been on a visit to Montreal.

The Canadian Thermos Bottle Co.'s premises at Montreal were damaged by fire last week.

James Trees, of S. Trees & Co., saddlery hardware, Toronto, has been on a visit to Montreal.

M. J. McLaughlin, of the United States Steel Products Export Co., Montreal, has been attending an important convention in Detroit.

C. M. Strange of Lewis Bros. has been thanked by the secretary of the Y.M.C.A., Montreal, for his efforts in getting subscriptions for the building exteasion.

W. S. Leslie of A. C. Leslie & Co., Montreal, Drummond McCall & Co., Montreal, and D. K. McLaren Co., Montreal, contributed $1,000 each to the building fund of the Montreal Y.M.C.A.

Much gratification is felt in shooting circles at the announcement that the Ross rifle is not barred from the forthcoming Bisley meeting. Good rifles are always given a chance in the Old Country.

J. Woodsworth, formerly prominently connected with the retail hardware trade in Toronto, passed through Montreal on his way to the Old Country and the continent. Mr. Woodsworth was accompanied by Mrs. Woodsworth.

H. H. Clarke, of Lennoxville, who has represented Lewis Bros., Montreal, for 15 years in this territory has left for England on a two months' trip. During his absence R. F. Warren of the sales department of Lewis Bros., will attend to his customers.

J. W. Harbord, the official metallurgist for India in London, has been on a visit to Montreal. Mr. Harbord was one of the experts retained during the preliminary trial of the litigation between the Dominion Iron and Steel and the Dominion Coal Companies.

D. Lorne McGibbon, managing director of the Canadian Rubber Co., Montreal, presented $10,000 to the Y.M.C.A. Building Fund. It is also announced that Mr. McGibbon is helping to defray the cost, somewhere around $100,000, of a splendidly equipped sanitorium for the treatment of consumptives. The building is to be erected in the vicity of Ste. Agathe, Que.

Owing to a fire which occurred last week at 459 St. Paul Street, Montreal, Coulson & Blaikie, manufacturers' agents, who were located in the building, suffered some loss through smoke and water. There was no interruption to business however, and a prompt move was made to more convenient and commodious premises at 454 St. Paul Street, where the firm will in future be

Western Canada.

Peart Bros. Hardware Co.'s new building at Regina will be erected by McGregor & Black, of that city.

McKenzie Bros., hardwaremen and implement dealers, Wadena, Man., have sold their implement business to P. McNichol.

W. B. Marshall, head of the W. B. Marshall Hardware Co.. Medicine Hat, was married to Miss Gertrude White last week. They will spend their honeymoon in Europe. Mr. Maeshall is erecting a residence at Medicine Hat which they will occupy on their ceturn.

The Sherwin-Williams Co. have opened a warehouse at 827 Powell St., Vancouver, to take care of the business originating in British Columbia. This is a result of the recent visit of managing-director C. C. Ballantyne, Montreal, and Mr. Fallis, Winnipeg, to the coast.

OLD GANVANIZED ROOFING.

A galvanized iron roof laid on the store owned by Thomas Fitton about 35 years ago is reported as being in splendid condition and good for use for probably a score of years yet.

Readers of Hardware and Metal are invited to send particulars of tin or galvanized roofing laid on buildings more than 25 years ago. Can anyone tell of metal roofs laid over half a century ago and still in good condition?

MARITIME BOARD OF TRADE.

The fifteenth annual meeting of the Maritime Board of Trade will open at Charlottetown, P.E.I., on Wednesday, August 18th. Secretary Chas. M. Creed is already busy making arrangements for the meeting. He has sent out calls to subordinate boards of trade throughout the three provinces for subjects to be discussed.

The meeting was held last year in Halifax, when 109 delegates were present. The influence of the board is gradually extending and it is to be hoped that the meeting at Charlottetown will be even larger than that at Halifax.

That a great deal of good to the business interests of the Maritime Provinces has been accomplished by the Maritime Board of Trade is beyond question. Bye-and-bye boards of trade in other parts of Canada may be wise enough to follow in the footsteps of the Maritime Board of Trade and form provincial organizations.

CANADA'S NEW WATERWAY.

Great interest is being taken by United States citizens in the proposed Georgian Bay Canal which, while it has apparently been given a set back until next year, has every indication of becoming an accomplished fact before many years.

In Chicago, for instance, the municipal authorities are planning to make their port second only in tonnage to London and a charter has been given a corporation to build a sea wall about a mile out in the lake, the inner side to be covered with warehouses and sawtoothed with wharves. Incorporated in the plans is a tunnel running under the lake to the city and making connections not only with the freight tunnel already constructed but also with every railway entering Chicago. Harriman, the railway magnate, is said to be the man behind the new harbor corporation having in hand the working out of these plans. It is claimed that the lakes to gulf waterways will, in conjunction with the Panama canal make Chicago nearer the Orient than New York, while the new Georgian Bay canal will bring Chicago almost as close to London as New York, while Chicago will have a deep waterway for the full route and New York will have only the comparatively-shallow Erie canal and its railway connections.

The Georgian Bay canal, if it will do so much for Chicago, ought to do as much or more for Port Arthur and Fort William. It is designed to be a 22 foot canal throughout, the route being via the Georgian Bay, French and Pickerel Rivers, Lake Nipissing, and the Ottawa River, the total distance being 440 miles. Although there will be a total of twenty-seven locks, it is estimated that there will be a saving of a day or more in time over the present route for steamships through the lakes. The saving in distance on the route via the canal from Lake Superior to London, as compared with the route via the New York barge canal, will be 806 miles. The topographical features along the canal are such that 332 miles of the distance will consist of natural waterways, upon which no work of excavation need be done. Of the remaining 108 miles, 80 miles will consist of submerged channels, on which there will be only a limited amount of excavation in the removal of rocks and shoals. This leaves about 28 miles of canal in which the full prism must be excavated in cuts that vary from 200 to 300 feet in width. The summit level will be 99 feet above Georgian Bay and 659 feet above Montreal. The estimated total cost of the canal is about $100,000,000, and the estimated time to complete the work is about ten years.

It would be fatuous to close our eyes to the important bearing which this scheme has upon the Erie Canal from Lake Erie to the Hudson, says the Scientific American. The one, with its limited draft, can take nothing larger than a 1,000-ton barge; the other, with its minimum draft of twenty-two feet, will be able to pass ocean-going freight steamships from ports on the lakes to the Atlantic. The advantages of carrying freight in large bulk and without rehandling are well understood. There is a saving both of time and cost. On the other hand, the opening of a ship canal from the lakes to the ocean would not render the whole fleet of lake steamers available for coastwise traffic between the lakes and the ports on the Atlantic seaboard, or service in the transatlantic trade. It is urged by the commercial interests which would be affected that the average lake steamer is not suitable for deep-sea service; the type of ship that is adapted for service on the lakes being in some respects unsuited for oversea voyages. This may be true of some of the smaller craft; but we doubt if it would apply to the ships of larger displacement, which constitute the bulk of the more modern lake fleets. After all is said and done, it is certain that, with the completion of the Georgian Bay Canal, vessels suitable for combined lake and ocean voyages will be constructed.

GOOD THING FOR BUSINESS MEN.

Business men, and particularly those directly interested, will not look askance at the decision of the Great Northern Railway to build a railway from the United States boundary line to Winnipeg.

The fact that it is to be an air line will reduce the time considerably between Winnipeg and Minneapolis, is hardly of the first importance. What makes the matter of first importance is the fact that it will increase the competition in the railways in freight and passenger service. Competition in railways usually means a great deal for the business man.

Where there is no competition, consideration for the business man is usually at zero. Business men know this to their sorrow. When an isolated town becomes a competitive point by reason of the advent of another railway the lot of the business man is as a rule much happier. Freight rates are lower and the railways more obliging, and if a shipper has a grievance it is more politely listened to and more readily attended to.

Business men and other shippers in the west are doubtless praying that the proposed new railway will be constructed as promised by September 1st and that it will ultimately be extended farther into the Great West beyond Winnipeg.

The more pronounced a town becomes as a competitive point the more assiduously do the railways court the good will of the business men.

THE CLERK WHO SUCCEEDS.

The hardwareman who ultimately becomes a partner or proprietor of the store which he has entered as a clerk, is seldom one of the kind that lives in constant fear of doing more than he is told. In weighing out a pound of nails, sound business principles demand full weight, but little or no overweight. In weighing out one's services to his em-

ployer, on the contrary, it is well to give freely and loyally of time, ability and enthusiasm.

Most employers have a better appreciation of the interest which their clerks take in the success of the business than the clerks give them credit for. It really doesn't require much personal investigation on the part of the proprietor to distinguish between the mere time server and the young man who is constantly doing more than is required of him. Such a clerk is developing his own individual capacity and skill in the same degree that he is serving his employer's interests; and in those comparatively rare cases where such work is not recognized there's a good job waiting for him elsewhere.

An exchange truly says that the greatest lack in the business world today is the lack of men—able, progressive, dependable men—to fill positions of trust and responsiblity.

ENJOY YOUR BUSINESS.

Merchants who feel no pleasure in their business should learn what they would rather do and go about it. Too much is heard from the man who thinks the occupation he pursues is the last one on earth. His every action becomes distasteful to those who enter his store.

Goods seldom sell themselves. There must be a salesman behind the counter and in order to become one, a merchant must enjoy his business and enjoy talking about the goods he has for sale. They have to be properly presented and the personality of the salesman counts for much.

Too frequently merchants complain. Everything seems to go wrong with them and their tempers and attitudes are reflected in their faces when purchasers come into their places of business.

To succeed in your business you must enjoy it. You must realize that your business is the source of all your pleasure and you will soon make a pleasure out of your business.

THE MERCHANT AS BENEFACTOR.

In these times when retail merchants have to compete with the large departmental stores continually receiving favors from public officials and with the co-operative stores trying to push their way to the front, there is every reason for an educational campaign among the farmers and mechanics.

In former years when the country was in its younger days, when the pioneers were hewing houses from the standing forests and planting grain among the stumps, the merchants were their mainstay. Such is yet the case particularly in the northern districts which settlers have just begun to populate. One of the first men on the scene is the retail merchant. He supplied in the olden times and now supplies in these districts the necessities of life.

For years the retail merchant has carried the farmer and mechanic. Whenever a year of depression came and the farmer through failure of the crops had little money to spend he went to the merchant for credit. This is true in the present as well as in the past. If the grain yield this season should by any mischance become a failure merchants everywhere would again have to carry thousands of farmers. During the recent trade depressions many would have starved had it not been for the help of the retailers.

The retailer is the go-between, the money lender who gets no security on his loans. People to whom the bank or ordinary money lender refuses to lend, obtain credit from the merchant. He is the charity institution on the street corner. Yet when these same people have a little money they send it to the mail order houses leaving their benefactors in times of trouble and depression to obtain what they need to meet their accounts, the best way they can.

These same people will, when any co-operative store promoter comes along, spend their cash in taking stock expecting impossible dividends.

Unfair as this appears, yet it is actually the case and the only remedy lies in the merchant himself. Some have tried and triumphed. Every retailer has got to boom his own business by thoroughly acquainting the public with the quality and assortment of his goods. He must watch the competitor in the big city instead of the one across the road. He can educate by quiet talks where he knows the seed will fall on fertile ground. He has some splendid talking points and must make the best of them all.

In these days of competition he has got to be on the alert.

RAILWAY EXPANSION.

The vast amount of construction work contemplated or in progress by Canada's railway companies is another evidence of the rapid development of the Dominion. It is estimated that $85,000,000 is to be spent during the current year in railway extensions, this sum being divided among the Canadian Pacific, the Great Northern, the Canadian Northern and the Grand Trunk Pacific.

This enterprise indicates the healthy condition of the country, and if it were not for its wonderful resources the fact that so much money should be spent in a single year might be somewhat alarming. There is probably no greater evidence of the growth of a country and the expansion of its resources than railway development. There can, therefore, be little foundation for business men entertaining pessimistic forebodings that the present year will be different from earlier predictions. New railways stretching out into new districts mean increase of population, better times and better conditions among the retail merchants, and hence an increase in manufacturing establishments and a more wealthy country.

ALUMINUM TO BE CHEAPER.

The Bradley patents covering a process of manufacture which reduced the price of aluminum from $12 a pound to less than one dollar, expire during the present year according to Popular Mechanics, and it is a certainty that present prices will never again be maintained. The materials most used in its production are bauxite and cryolite, which are very widely distributed in America. Aluminum was discovered in 1827; it began to be used in 1850 in a small way, but as late as 1884 aluminum was produced for the most part only in scientific laboratories as a curiosity.

The application of electric heat to large retorts reduced the cost of manufacture in Germany to about 15 cents a pound, hence the present market price of 32 cents may be expected to suffer a heavy decline before the close of the year. This will at once largely expand its use as it will then be available for the manufacture of many articles which the present price makes prohibitive.

Under ordinary conditions aluminum is as little affected by air and water as gold; it is easily melted and cast or rolled; is lighter than glass; has a much higher tensile strength than copper and is an excellent conductor of electricity. Since 1895 the public has come to connect it chiefly with cooking utensils and more recently in the construction of submarines, and for other purposes where extreme lightness of construction is desirable. It will shortly enter into the manufacture of hundreds of articles of common use, and what in 1857 sold for $32 a pound can be had for about 20 cents.

Perseverence is the price of prosperity in business.

The man who thinks to work through all his waking hours will some day be unable to work through any of them.

CANADIAN METAL MARKETS

See Itemized Market Quotations on Page 74.

MARKETS IN BRIEF.

Montreal.

Tin—No change.
Copper—Same quotations.
Turpentine—Up 3c.

THE MARKET SITUATION.

Fluctuating movements have characterised the primary markets. Tin has gained and lost ground, and it cannot be said that the speculative movement in London has inspired confidence. Consuming conditions in America are not favorable to a staple market, and it all depends upon the bull operators in London whether tin keeps up. The speculative copper movement in the Old Country is not helping New York quotations, and the weakness apparent in London has caused figures to decline across the border. Consumption is on the dull side, and the larger interests seem to be well provided with metal for the time being. Lead has been on the quiet side with a tendency to weakness. There is plenty of metal on the market. Spelter is still very firm both in London and St. Louis. Consumption is good, and heavy Continental business is reported. Heavy shipments of galvanized sheets from the Old Country to South America and other places have taken place. The iron and steel markets in the Old Country are reported to be somewhat more active. Cleveland warrants are quoted at 48 shillings and threepence. Production in iron and steel in the States continues to increase steadily. A lot of the material is going into stocks, but there is no doubt as to the improving consumption. Prices generally are firm, with an advancing tendency.

MONTREAL.

June 25.—The improvement noted all through the month continues, and the tone of the market is very bright. Buying has been general, and it is evident that users are not only busy but that they are putting aside no stocks. As one jobber remarked: "we are very pleased with the way things are shaping. Conditions look very healthy, and with no stocks in users' hands we feel any improvement in the consumption for the finished article right away. We cannot grumble with the month of June."

There has been no change in the jobbing prices of metals. Tin and copper have sold very well, and there has been a good inquiry. Some of the larger consumers are off the market for a while, as they are pretty well supplied. The unstaple state of the primary markets is reacting against things here, and there is no doubt that trade would be heavier if a strengthening of the markets caused users to consider their probable requirements more thoroughly than they are doing at present. Pig iron and steel seem in a very healthy condition. The good tone to the U. S. markets is helping the situation a lot.

PIG IRON—There is no change in the situation. Orders are coming in steadily, while contracts are being freely placed for future delivery. Supplies are keeping up well, large consignments arriving regularly from the Old Country. Canadian furnaces which are in the open markets are doing good business at the steady figure of $19 to $19.50 for high grade ore. The tone of the market generally is good, the condition in the States helping matters. The firming of prices, and the improvement in consumption across the border are bound to have a good iofluence here. Greater activity is reported in iron and steel in the Old Country, and somewhat advanced prices are anticipated in the fall. We continue to quote: Imported pig, Clarence, $16.75 to $17; Middlesboro No. 3, $16.50 to $16.75; Summerlee No. 1, $19 to $19.25; No. 2, $18.50 to $18.75.

TIN—Active trading is reported in tin. The jobbking price of 33c has been unchanged, but the weakness in the primary markets had the effect of inducing some shading for larger sized lots. Inquires are good, but there is no doubt they would be better if tin would become more staple. Consumption conditions in the States do not seem to be particularly healthy, and what with threatened strikes in the tin plate mills, and general poor legitimate buying tin will have to be held strongly in London to maintain its position.

COPPER — No price changes have been announced, and the jobbing figure of 14¼c still obtains. Orders have come in freely during the week, while inquiries have been good. The weakness noticed in New York has not helped matters here and but for good local trading, quotations might have been shaded. Copper is in a very unsatisfactory state in the primary markets. A break in London caused New York prices to decline, and the market showed greater weakness than for some time past. Figures showing a big increase in English stocks were probably the reason for the decline in London. Consumption in New York is reported on the dull side. Orders are going through freely but they are not of the proportion that they should be at this time. The large producing interests are keeping out of the market while producing just as heavily as ever.

SPELTER—Good trading is announced in spelter at the unchanged price of $5.75. Inquiries also keep up well, and further heavy business seems assured. There is a good demand for galvanized sheets at firm prices. The primary markets keep very steady. Good trading is reported in the Old Country, and in fact in Europe generally. Supplies are held in strong hands, and prices well maintained. The St. Louis market despite the tariff trouble is also in good shape with a fair consuming demand.

LEAD—Lead is unchanged at $3.60 with trail at $3.50. Trade is moving along at a fair volume, and the market is in a firm condition. The English market has been fluctuating. The demand there is without character and supplies are ample.

TORONTO.

June 25.—The metal market shows a little more strength this week and business has been slightly more active. The whole situation seems to be clouded, however, by speculation, and this to some extent has hindered trading. Prices are unchanged and if anything are firmer, especially in iron and steel. Stocks are fairly large. One Toronto house imported a shipload of 2,000 tons of Middlesbro pig iron this week. In manufactured metals there is a firmness and strength more than usual. Babbitt metal prices have been revised. Instead of quotations being given with a trade discount, the prices have been put at the straight 0gures.

PIG IRON—A quiet but improving demand exists. Stocks are pretty fair in size and production is increasing. Some dealers are talking higher prices, and it may be that these will go up in the fall. At present, however, the old quotations continue to rule. Canadian foundry is at $19; No. 3 Middlesbro, $19.25, and Cleveland, $20.

COPPER—The red metal has recovered itself somewhat and while quotations are still at 14½c the local situation is much stronger than last week. Sales while none too many are fair in size.

TIN—Yet a little bit irregular, sales of tin are quiet, and jobbers are holding their own. The local price is yet 32½c, and no change is anticipated.

LEAD—Like tin lead is quiet, but shows a more satisfactory outlook than it did ten days ago. Prices are maintained, the local quotation being $3.65 per hundred.

SPELTER—Still at $5.75. Spelter is little better than it was last week. Sales are few and the movement rather slow.

OLD MATERIALS—But little better than last week, except that prices are being maintained, old materials are piling up in stock rather than figuring in sales. A little better trading has been done the past few days.

METAL NOTES.

The world's output of pig iron which is 60,000,000 tons per annum, is likely to increase to 100,000,000 in 1950, says a U. S. metal authority.

In consumption of spelter the United States leads the world, using in 1907 228,509 tons out of a total of 796,855 tons, or nearly 30 per cent.

The orders for rails were the feature of last week's trade in steel in the United States. The Carnegie Co. alone booked 24,000 tons of rails.

Twelve thousand men employed by the Cambria (Pa.) Steel Co. are to have their wages advanced, the higher rate to go into effect on July 1.

It is estimated that the railroads of the North American continent are in the market for approximately 250,000 tons of rails, valued at $7,000,000.

The Calumet & Hecla Mining Co. was organized in 1871. It stands alone as the only mining company of any kind that has paid in dividends more than $100,000,000, or more than $1,000 a share.

A plant for dressing tin ore has just been completed at Groenfontein in the Transvaal, and it is claimed it is one of the most up-to-date in existence. The plant has a capacity of 1,000 tons of tin per month.

HARDWARE MARKETS

MONTREAL.

June 25.—There is a good tone to the markets just at present. Trade has continued to improve all through the month, and seems to be culminating into strong and steady summer business. Buying is very general and of a good assorted character. Travelers report that stocks in dealers' hands are very light, and that the condition everywhere is very healthy. Farmers are in a very happy frame of mind, especially in the Northwest, and when the success of the crop is assured, there should be a very strong consuming demand. The farmers have been economizing for a long time, and household stocks must be very low. Money likewise is much easier than it was.

Harvest tools are in very strong demand, and good orders are coming in from all directions. Harpoon forks are moving especially well. Builders' hardware continues in good steady demand. Some little delay is being caused by some makers being behind hand in their delivery. Preserving utensils are moving well, not only for future, but immediate delivery. The dry weather has helped the sale of hose, and repeat orders have been very active. Bolts and nuts continue in good demand, and it is evident that plenty of construction work is going on, especially as dealers do not seem to be increasing their stocks to any great extent. Miners supplies continue slow, but wire is a good seller.

No important change in prices is announced. The markets are firm and in a very healthy condition. June has turned out a very fine month indeed, and if the progress is continued there will be busy times ahead.

BUILDERS' HARDWARE. — Builders hardware is still a strong mover, and good assorted orders are coming in freely. These lines have been most prominently in demand all through. Some of the makers are reported as being backward in their delivery of goods. No change in prices is reported, and we quote: Door sets and escutcheons, 50 and 10; escutcheon pins, steel 50; brass 55; spring hinges No. 20, $9 per gross.

HARVEST TOOLS.—These lines are now very prominent. Good orders are coming in, while goods booked some time back are being delivered. Farmers generally are in much more confident state, and the healthy condition of the crops has, of course, stimulated the sale of tools. No change in prices is reported, and we quote. Hay fork pulleys, $1.60 to $8.50 a dozen; hay carriers, $3.50 and up; harpoon forks, $1.25 and up; hay rakes, etc., 55 off.

SUMMER LINES.—The dry weather has helped to keep up the movement of hose and good sorting up orders have come in. Lawn mowers are also in active sorting up demand. Refrigerators are not quite so active as they were, but are in steady call. Household utensils are in very good request, and it is evident that dealers are not overburdened with stocks. A good demand is springing up for fruit preserving utensils such as presses, cherry stoners, apple parers, fruit jars, jar rings, and maslin kettles. In some cases delivery is wanted at once. Bokings are also increasing in cow ties, lanterns, and other early fall lines.

MINERS' SUPPLIES.—Surface mining tools are in fairly good demand, but generally miners' supplies are on the slow side. We continue to quote: Miners' picks 17c a pound; prospectors' hammers, 20c; pick handles, $1.85 a dozen; drilling hammers, 6c a pound; crowbars, 3½c; drill steel, 8c.

BOLTS AND NUTS.—These lines continue in very steady demand. There is plenty of construction work going on, and with stocks on the low side dealers have been very steady buyers. We continue to quote: Discounts on carriage bolts, ⅜ and smaller, 70; machine bolts ⅜ and less 60, 10 and 10; coach screws 75; stove bolts, 80 and 7½.

SCREWS.—A very active demand continues in all size screws, and with stocks on the low side, dealers should be ordering freely for some time. We quote: 85 and 10 off for flat and round head, bright; 75 and 10 off for flat head, brass and 70 and 10 for round head, brass.

SPORTING GOODS.—A very good demand is noticed in sporting lines. Most of the sporting catalogues have been distributed, and dealers report a very good consuming demand. Fishing tackle, camping outfits, baseball and lacrosse accesories, and yachting supplies have all been selling well. Guns and ammunition are in very good demand.

WIRE.—Orders are coming in freely, and there is a good tone to the market. There is less delay in shipping, and stocks in dealers' hands are now in better shape. No change in prices is announced and we quote: Barb wire car lots and mixed, $2.50; small lots, $2.55; plain twist, car lots, $2.80; small, $2.85. Galvanized wire No. 9, $2.25 in straight and mixed car lots, and $2.30 small lots, f.o.b. Montreal. Coiled spring fencing $2.45; straight and mixed car lots, and $2.55 small lots. Plain wire, bright, annealed and annealed and oiled, $2.25 base. Other lines $2.30 f.o.b. Montreal.

TORONTO.

June 25.—Hardware trading is still active, though the rush of the past few weeks has eased up a little. No new developments have come over the market, although the goods asked for are undergoing a change. Haying forks and harvest tools are in demand, and good buying of wire fencing and wire nails is passing. Prices hold firm, all quotations being at last week's figures.

Retailers say business has greatly improved since last summer and manufacturers report good business with big orders.

SEASONABLE GOODS—The passing early summer season has been a particularly good one in the sale of lawn mowers and lawn goods; and even yet some fair and satisfactory repeat orders are coming in for mowers and hose. Haying forks and early harvest tools are now to the front and good demand is felt for fencing wire of all kinds. Screens, express wagons, roofing paper and tinware are going out in fairly large quantities. Prices hold firm and unchanged.

BUILDERS' HARDWARE—A great variety of novelties are being shown and some fine sales have been made. Door pulls, checks and pegs are selling almost as well as the necessities; and even in door knobs, hinges, locks and bolts the designs are out of the ordinary. In almost every line of builders' hardware there is a splendid showing of samples, neat and elaborate to suit all tastes. Tools are fairly active, and screws are in normal demand.

HEAVY GOODS—Iron bars and rods are again in brisk demand. Stocks are high, but jobbers say it pays to keep a good stock, as some first-class sales of different grades of iron bars have recently been made. Nails, while they have not increased in shipments over last week are still particularly active. Pipe, too, is a good seller with building at the top notch.

SPORTING GOODS—Camping supplies and fishing outfits have had a run this week, and a slight improvement is noted in the sales of guns and ammunition. Some cricket bats and balls have come along to help baseball and lacrosse goods move better, although all outdoor games appear to be more popular this season than for some time past.

STEEL AT THE SOO.

This week at Sault Ste. Marie, the new "No. 3" open hearth furnace at the Lake Superior Corporation's plant turned out its first steel. To Hardware and Metal, C. D. Warren, president of the Corporation, said that No. 3 blast furnace is not yet ready, but is under construction. There is much other work going on, principally a new structural mill, but as to definite details Mr. Warren was unable to speak at present. He had been in New York and had not the information at hand.

The making of steel is understood to be the first improvement made since English capital was introduced into the concern. Mr. Franz, manager at the Soo, said it would be a year before the blast furnace was ready, and seven months before the structural steel mill would be in operation.

The president of the British Board of Trade states that the total value of exports of tin plate from the United Kingdom from 1904 to 1908 was $103,623,669, the highest figure for one year being $24,737,509 in 1905.

U. S. IRON TRADE.

Cleveland, O., June 24.—The Iron Trade Review says: The revival of activity in the iron and steel trade is holding up with unabated strength. Generally the movement continues to be progressive, and tonnage being entered for nearby shipment is gradually mounting toward normal proportions. Since January, the volume of orders to some very important steel interests in some districts has practically doubled.

While the month of May was the best since the depression, and was replete with evidence of returning prosperity in the industry, the elapsed period of June has more than held its own. Steel bar orders the first half of the present month are in excess of May, and in semi-finished steel a marked increase has been noted by the large producers. This is a favorable reflection of the increased consumption by manufacturing interests which are buyers of their steel. Price advances are being made with caution, as great care is being exercised not to place any possible obstacles in the path of the recurring activity.

The labor situation growing out of the open shop declaration of the American Sheet and Tin Plate Co., owing to the determination of the Amalgamated Association of Iron, Steel and Tin Workers to resist this order, has not not produced any outward developments in the week. No conciliatory move has been made by either party, and, rather, preparations have been made to meet the exigencies arising from a strike condition. The American Sheet & Tin Plate Co. has put its idle non-union plants in shape for operation, while the workmen are laying their plans to carry their fight into the unorganized mills of the company. A conference with the independent sheet and tin plate companies which usually adopt the union scales arranged with the American Sheet and Tin Plate Co., will shortly be held by the Amalgamated Association to determine the position of these plants in the pending controversy. This week a second conference is being held by the Amalgamated Association with representatives of the Western Bar Iron Association in an effort to fix the new bar iron scale, effective July 1. The first meeting this year between the manufacturers and the men failed to bring about an agreement, the former requesting a reduction from the present scale.

A FRANCO-CANADIAN TREATY.

Montreal, June 23.—"Sentiment in France is quite in favor of the commercial treaty with Canada," said M. Chevalier, president of the Chambre de Commerce Francaise, who has just returned from a trip to Paris, and other French centres.

"What appears to be retarding definite action," he continued, "is the uncertainty which prevails in France as to the stand Canada would take were the former country to go ahead and finally approve of the treaty. If France accepted the treaty and Canada did not immediately ratify it, the pride of the nation would suffer, and many who are now lukewarm in their support of the measure would quickly do all in their power to bring it to a head were they given definite assurance that acceptance of the treaty would be mutual.

"As a matter of fact should not Canada make the advances? Consider our amount of importations from France every year—ten millions of dollars worth of goods. Then compare what France imports from us—merchandise to the value of but two millions of dollars.

"But I hardly think this is the light in which the people of France are looking at the matter. The treaty would be of mutual benefit and I am sure that definite action will be taken when the Chamber of Deputies meets again, after the holidays in October, and when our Canadian Parliament also gets down to business again.

"Hon. Mr. Fielding is at present in France, and any little matters about which doubt exists can be profitably discussed so as to allow each Government to know just how it stands with the other when the time comes for action."

TORONTO NOTES.

The Toronto warerooms of Wood, Vallance & Co., Hamilton, are undergoing some slight but necessary repairs.

Ed. Turbayne, who up to the beginning of the year represented Lewis Bros., Montreal, on the road in the Georgian Bay district, and who obtained leave of absence owing to ill-health, has gone into the warehouse at Montreal. He will look after the cutlery department there.

The steamship "Keyport" arrived in Toronto last Sunday with 2,000 tons of pig iron direct from Middlesbro, consigned to Samuel, Benjamin & Co. This is the first direct shipload of iron that this firm has imported in two years. In 1907 Samuel, Benjamin & Co. brought in three shiploads of pig iron.

Chas. Boeckh, vice-president of Boeckh Bros., brush manufacturers, Toronto, dropped dead on Wednesday evening as he was playing a game of bowls at the Granite Club. Mr. Boeckh was well known in hardware business circles throughout Canada. He was about 50 years of age. After leaving school he went into business with his father, the founder of the present company. Emil C. Boeckh, Toronto, and August Boeckh Montreal, are brothers.

Wm. C. McFarland, hardwareman, 391 Parliament Street, met with an accident early this week that will keep him in bed for some few days. He was cleaning out an oil tank in which some linseed oil had been stored with gasoline when an explosion occurred, which burned Mr. McFarland severely, though happily not seriously. A similar accident some days ago happened at Noden & Hallit's hardware store at Toronto Junction, when Sam Dray, one of the clerks, was slightly burned.

WASHING MADE EASY.

The "Excello" water power washing machine is one of those inventions, which has greatly lessened the labor about the home; done away with some of the worry of washday, and made the conditions more sanitary. It is made by the Excello Specialty Co., Berlin, Ont., who state that neither time nor expense has been spared to make this machine perfect in operation. In the construction of the motor, ideas are incorporated which are new and novel, and different from any construction heretofore used. The motor is placed exactly central over the load and the cylinder moves instead of the piston, which is the reverse motion commonly used. Both inlet and exhaust hose remain stationary, and the gear rack is securely bolted along the side of the cylinder. The piston rods are fastened securely to the motor bed, making a rigid construction form. All the working parts that come in contact with the water are made of the best grade of brass, and every part of the machine is interchangeable. The gear and gear rack are made of a hard bronze mixture, which has great tensile strength and long-wearing qualities, thus securing a smooth-running motor. The motor is operated by pressure from the city mains, and it is connected to the faucet by means of a hose. Another hose conveys the exhaust water back to the sink. The tub is made of cypress wood of good wearing quality, is well built and nicely finished. Every machine is thoroughly tested before leaving the factory, and each "Excello" motor is guaranteed for one year against all defects in material and workmanship. To operate this machine it is but necessary to make the connections and turn on the water tap.

GIVE HIM THE HORSE LAUGH.

If you have anything in your system work it out. Don't be afraid to stand up like a man and tell your boss or the head of your department just how you feel, writes Mike Kenny, in the Gimlet.

But for goodness sake don't sulk—don't pout—don't throw things around—don't pull down the corners of your mouth. Don't get in a dark corner with the other fellow and tell him all about it. That's the way cowards act.

If you are not afraid, if you know your reasons are good, if you know you are right, then you should not hesitate to stand up and give your boss the "straight goods."

Generally when a fellow sneaks around and mumbles to himself he is in the wrong and he knows it, and when he tells a felow clerk his side of the story he does not tell it straight.

May the good Lord deliver us from grouchy people—from the man who beckons to you to come with him under the stairs and then whispers his troubles in your ears.

If there is a clerk of this kind in your store, when he gives you the secret signal to come into the dark corner, give him the horse laugh. Tell him you live out in the sunshine, near the front door, where customers come in and sales are made and you can make a good, big, round dollar for your firm.

Elements of Warm Air Furnace Heating

The great advantage of a warm air furnace, writes M. H. Smith, is that it supplies fresh warm air, and this single feature from a hygienic standpoint places the warm air furnace in a position superior to that of any other form or system for warming dwellings, and moreover the expense for installation, operation and subsequent care of the warm air system is less than that of any other plan.

The warm air furnace, to be effective, however, must be large enough. It is in fact a matter of economy to use a furnace one size larger than is actually required, and it must be borne in mind too that the relation of the air supply, the size of the piping and the size of the registers to the furnace and to the rooms to be warmed are important factors in the success of a warm air furnace heating system. The success of the system depends also upon the careful instalation of the furnace, the piping and registers.

Every System a Problem.

Every warm air furnace heating system is a problem in itself. There are certain rules entering in the science of heating and these rules cannot be ignored, nor can success be attained unless these rules be considered and applied to the problem with judgment. Even after the exercise of care and thoughful attention it sometimes occurs that a certain run of pipe or perhaps the entire system fails to realize the expectation of the owner and the heating contractor, and when this occurs it should be borne in mind that "every effect must have a cause." Search for the cause, remove it and the system will be successful. Minimize the chance of failure when planning a warm air furnace heating system by observing these facts; That warm air, following the law of nature flows upward, and, as the natural movement of the warm air is upward, it follows that the greater the elevation of the warm air pipe the more rapid will be flow of air.

That warm air flows toward the point of least resistance and the velocity of the air movement in a warm air pipe depends upon the excess of temperature of air in the pipe—depends upon the height of the outlet above the furnace—depends upon the absence of frictional resistance in the pipe, and depends also upon the absence of pressure resistance in the rooms to be warmed.

Warm air furnace heating to be successful should be considered in connection with ventilation. Circulation of the air is in the absence of scientific ventilation an acceptable substitute only because its adaptation in the absence of ventilation provides a means of lower temperature from rooms.

Determining Size of Furnace.

The success or failure of the warm air furnace heating system finally depends upon the smoke pipe—and the chimney, if the smoke pipe is not the proper size, and the chimney does not have sufficient capacity—and is not properly constructed it is useless to expect the successful and satisfactory operation of the furnace.

The first important factor in furnace installation is the determination by accurate rules the space to be warmed, then to determine by positive rules the size of furnace required, and these to be followed by a proper consideration of the piping, the risers, the registers, the smoke pipe and the chimney.

Manufacturers with but one exception so far as I know have referred to furnace capacity, as equal to twenty to thirty cubic feet, for instance, and, although this is a custom of long standing, it is incorrect, and frequently leads to the installation of a warm air furnace entirely too small for the work required of it. It is much the better plan to base the capacity of a furnace on some system that will consider both the wall and glass exposure, as well as the actual cubic feet in the rooms or dwelling, and these three elements—the actual cubic feet, the net wall exposure and the glass exposure—might be termed gross cubic feet.

The capacity of a furnace on the gross cubic feet plan can be determined by taking into consideration the average diameter of the firepot by a formula that considers, too, the consumption of a certain amount of fuel per square foot of grate surface per hour.

The size of piping and registers required to warm a certain gross cubic feet may also be determined by fixed and positive rules.

The limit of warm air piping that a furnace will carry with success can be determined; also the amount of air to be introduced to the base of the furnace should be sufficient to fill all the pipes; if this is not done the success of the system is endangered.

FURNACE AIR SUPPLY.

Mistakes are often made by hardware retailers, who handle heating appliances in attempting to install furnaces and hot water heating plants without possessing the necessary experience to do this work satisfactorily. There is no part of a hardware line which requires more exactness than placing these plants in residences and business houses so they will do their work with efficiency, and dealers who do not realize the importance of knowing how to accomplish this could profitably engage some expert during the busy season to do the work.

The rudiments are not difficult to understand, however, if the aspirant will study the matter over conscientiously and apply the principles he has learned, from instructions, to the practical part of the work. It is quite prevalent in some sections for dealers, although many of them have had no previous experience, to begin setting up a furnace without even consulting the accompanying plans. This evil could be eliminated, and to good advantage, because it would undoubtedly mean the overcoming of dissatisfaction among patrons and thus react in good to the general business.

Many hardware merchants fall down on installing warm air furnaces through lack of understanding the laws governing the circulation of air. In order to get good results it is necessary that the air in a warm air furnace be circulated on the same basis as water is circulated through the pipes of a hot water plant. It is possible to effect this by using an outside cold air supply and a proper ventilating system, or by securing the cold air supply from inside and thus produce a circulating back to the furnace. This latter arrangement is much more economical from the standpoint of consuming fuel. It is also more satisfactory, in general, because it produces a more even temperature with the air in the building than is possible when the outside air supply is used.

One difficulty in using a system of ventilation adequate to produce the proper air circulation in residences is that there is ordinarily no ventilating flue of sufficient size to cause a consistent mixture of the warm and the cold. This fault is not vital, however, and instructions accompanying the best hot air furnaces usually enumerate means by which it can be alleviated. If care is taken in conforming to the above necessary elements, and in using common sense, the undesirable consequences are not likely to result.

SEASONABLE ADVERTISING.

Seasonableness in advertising is an important thing. But do not be like a dealer who advertises only in the dull season. "I do not advertise at this time of the year, but in September when business picks up I will renew my advertising campaign." He thought that was a great advertising stroke, but it was a very short sighted policy.

Advertise your goods the whole year around, but advertise the particular line of goods which is apt to be most in demand. For instance, it is probable that the dealers who are advertising winter stoves at this unseasonable time would derive much more profit from their advertising if they devoted their space to gas or coal oil stoves or other summer cooking apparatus.

It is unwise, too, to put stoves and ranges altogether in the background during the summer months, as this is the season when many young couples are getting married and furnishing their homes. A small display of ranges pays even in the summer months.

There is one way to be sure of economy in buying rope, as in other commodities, and that is to take care to get the best brand. The price per pound is of no consequence. What really interests the purchaser is the cost of a certain length of rope, strong enough and durable enough to do the work required. Rope that is sold slightly cheaper than the best, may on being put to a practical test, show an actual value of only about one-third that of the best. Is there anv economy in buying such rope, even at a cent or two less per pound?

Trade Gossip from Canada's Eastern Provinces

Advanced Prices Reported at Halifax in Rope, Fishing Nets, Lead and Oil—Mineral Areas Being Developed in Nova Scotia —Dominion Iron & Steel Meeting at Montreal.

HALIFAX.

June 21.—Advances now appear to be the order of the day in many lines of hardware. Dealers report trade in good volume in most seasonable lines, and travelers now on the road are turning in good orders. Collections throughout the province are showing some improvement, and taking into consideration that large catches of mackerel are being made, and that the vessels of the banking fleet did well, the prospects for the autumn business are good.

The advances noted since the last report are in cotton duck, tarred cotton lines, seine twine, and net twine. There has also been some slight advance in the price of white lead, pig lead and sheet zinc. The United States Steel Products Co. have advanced prices on barbed and plain twist galvanized wire fencing, 22½c per hundred pounds, and all lines of wire are likely to be higher in the near future. In fact, buyers are looking for advances in all lines of rope, and at present manufacturers will only book orders ahead for a certain period.

Notwithstanding the fact that linseed oil has advanced four cents per gallon, the manufacturers claim that there will be a further advance before the autumn on account of the great shortage of seed. The linseed oil markets, both in the United States and England, are reported very firm at present.

H. H. Fuller & Co. have disposed of all their hardware stock that was damaged by fire, and last week the sales staff was discharged, which is taken as an indication that the firm will not resume business. Only the office staff has been retained.

J. S. Bryson, of New Westminster, B.C., is visiting his old home at Middle Musquodoboit. Mr. Bryson has been in the west 28 years, and this is the first visit that he has made to the scene of his birth in 17 years. He is engaged in the hardware business, and has associated with him his three sons, the firm doing business under the name of Bryson & Sons. Mr. Bryson will spend a couple of months in Nova Scotia.

The Sydney Gold Mining Co., composed largely of Cape Breton capitalists, recently received a brick of gold weighing about 125 ounces, from their mine at Guysboro. The gold is valued at $2,500.

Active development work on J. H. Brown's mineral areas at East Bay, C. B., were commenced this week, when a gang of men were put to work sinking three shafts.

The steamer Morien, which arrived here this week, brought 520 tons of cast iron pipe for the City of Halifax. The pipe is part of a purchase of $18,000 made in Scotland, and will be used for the extension of the water service.

The silver areas at Musquodoboit taken up by Miss Bessie Dunbrack, of that place, are to be developed immediately and at present a quantity of machinery and plant is being installed there. Senator Ewing, of the United States, who is a relative of Miss Dunbrack's, and some other American capitalists, are interesting themselves in the proposition.

The Royal Bank proposes enlarging its present quarters. The new building will cost in the vicinity of $125,000.

B. D.

NEWCASTLE.

June 22.—The Drummond Iron Mines Company have at last got down to business. They have in deference perhaps to a subsidy of $25,000 guaranteed them by Gloucester County Council, decided to build their railway from the mines to Black's Cut, four miles south of Bathurst, thus insuring Bathurst as the location of their permanent docks—if Bathurst harbor can, without costing too much for dredging, be made available for large ships. To make sure, however, of shipping facilities, the company has accepted Newcastle Board of Trade's offer of a free site, and promised last Saturday to begin the erection of docks here as soon as right of way was arranged for spur line from I. R. C. to river front. No docks will be built at Bathurst till a harbor is furnished. Good anchorage for fairly large vessels is in Newcastle already. The building railway to Bathurst month, while increasing I.R.C. haul to ready. The building of the railway to Bathurst saves a steel bridge across Nepisiguit river, and hastens construc- tions by six months, while increasing I.R.C. haul to Newcastle nnly nineteen miles.

H. H. S.

H. H. S.

MONTREAL.

June 23.—The annual general meeting of the Dominion Iron and Steel shareholders was held last week in Montreal. The president, J. H. Plummer, pointed out that although they had passes through a period of depression, when every other steel plant has been shut down for a time, their own plant had been kept going. While the outlook was more hopeful they must not expect an immediate return to former activity. The report of the directors showed that the earnings showed a net surplus of $1,571,412, and that improvements were being made to the plant in the shape, of additional coke ovens, blast furnace, and finishing mill, which would enable the works to produce a much larger tonnage of finished steel. In reference to the suit with the Dominion Coal Co., it was stated, that the Coal Company had paid $2,750,000 on account in the damage claim. The report was adopted, and the shareholders confirmed the issue of $20,000,000 consolidated mortgage bonds previously authorized. The retiring directors were re-elected.

David Yuile, one of Montreal's prominent business men, died in Baltimore on Monday morning where he had gone to undergo an operation at the Johns Hopkins Hospital. Mr. Yuile was born upwards of 60 years ago in Glasgow Scotland, and it was in that city he received his early education coming to Canada when a young man. For the greater part of his business career he was connected with the glass trade in Montreal, but he also turned his attention to other commercial interests, notably the textile industry, being president of the Dominion Textile Co. at the time of his death. Mr. Yuile was also interested in Warden King & Co. His wife was a daughter of the late Warden King. He was as well president of the Belleville, (Ont.) Iron and Horse Shoe Co.

Interesting Trade Items Gathered in Ontario

Veteran Hardwaremen at Kingston — Stove Travelers Foregather at London—Brantford Reports Furnace Trade Active —Chatham Hardwaremen Missing Business Opportunities— Cutting in Paris Green Prices at St. Thomas.

KINGSTON.

June 22.—Archibald Strachan, Kingston's veteran hardware dealer, who was recently appointed collector of customs, at Kingston, has sold his hardware business at the corner of Princess and Montreal streets, to H. W. Marshall, of this city. Mr. Marshall has been engaged in the electrical business for some time.

W. A. Mitchell has just completed twenty-five years in the hardware business, and is receiving the congratulations of his friends, and he has a host of them. He entered the retail department of the wholesale firm known as Muckleston & Co., and in 1889, accepted a position with the wholesale firm of Lewis Bros., Montreal, and canvassed the district between Pembroke and the coast. In 1894 he settled in the store where he is now established, purchasing the stock of E. W Cox. Mr. Mitchell is secretary of the Retail Merchants' Ass'n.

The latest in the line of building comes from the board of education. A two-storey building of stone and brick will be erected on the collegiate grounds, for gymnasium and manual training purposes, and at a cost of $6,128.

Automobile dealers report a brisk sale. Many Kingstonians have purchased cars,

A big car has been put on the stage route, between Kingston and Napanee, and is doing a good business.

E. G. B.

GALT.

June 16.—James Douglas, who for a number of years has been associated with W. J. McMurtry in the hardware business in Galt and St. Thomas, was seized with a paralytic stroke on Tuesday, and grave fears are entertained for his recovery.

Galt merchants have decided that there will be no half holiday during the summer months.

The Galt Art Metal Co. is exceedingly busy at present—in fact it has been so for some months past. Very recently it secured the contract for the metal work required for the addition to the Winter Fair buildings in Guelph, this amounting to $4,000. A few days ago Manager Hayhurst was the recipient of the contract for the ceilings, etc., of the new St. Jerome's College building in Berlin, necessitated by a recent fire. Night and day shifts are now employed and the company are taking advantage of every available minute.

New autos are coming to Galt at the rate of three a week, and those hardwaremen who deal in gasoline are naturally being proportionately benefited.

Allen & McKenzie report an increased demand for builders' supplies of all kinds.

The strike of masons and bricklayers is seriously interfering with building operations in Galt.

There is a revival of bicycling in Galt and many new wheels are to be seen on the streets.

B. A. C.

CHATHAM.

June 22.—Following the lead set by Chatham, Wallaceburg merchants have formed an association, and are inaugurating a collection system modeled upon that recently inaugurated here. The new scheme was agreed upon at a meeting last week, and E. Askunas was named as official collector. Owing to the fact that its two largest industries are continuously idle for several months in the year, Wallaceburg is a town where long credits prevail, and the merchants estimated the other day that they had over $30,000 on their books.

Hardware men here have experienced a revival in the roller skate business. Some time ago the rink was closed, but now there are any amount of youngsters coasting on the granolithic sidewalks. As the the rink rented skates and few were consequently bought, the new craze, which promises to grow, means a little bit for the hardware trade.

It is doubtful if hardwaremen make the most of their opportunities in connection with the garden trade. There is a market here for any amount of poultry netting and wire fencing and trellis work. For instance, the netting is just the thing for training sweet peas and other climbers. Many a gardener will spend hours "stringing" old pieces of twine for his climbers, and when a quarter's worth of poultry netting and a few staples would do the trick more neatly and more effectually in a few minutes. If the hardwaremen pointed out this fact to the average buyer when he secured flower seeds or garden tools, a sale possibly small, but yet worth while, would probably result. Of course, the hardwareman would do well to push the sale of the more expensive wire trellis, which is handsome and more durable, but the poultry netting is more nearly within the average purchaser's grasp. Again, though street fences have practically disappeared, there are many line fences of boards, ugly and dilapidated, which would be replaced by the trellis fence if the hardwareman laid the subject before property owners in the proper light. In fact a walk or drive around many residential streets would be apt to reveal to the enterprising hardwareman or watchful clerk, plenty of places where fencing, poultry netting, roofing, water meters, garden hose and other items could be sold. A suitable circular letter to street and number would probably pave the way to doing business.

The contracts for the Chatham collegiate institute addition have been let to Hugh Gallager & Son, for $16 343. Park Bros. have received the contract for a larger boiler to replace the present one in connection with the heating system. The board of education decided to instal the Gurney ventilating system, involving an extra cost of $335.

The machine and implement shop of Jas. Cox, Blenheim, was totally destroyed by fire on Thursday morning.

Jas. Smith, the Wallaceburg hardwareman, is having his store repainted throughout, and is making other improvements.

H. L. Binder, manager of the Alvinston Flax Co., states that the outlook is decidedly blue for the flax crop this season wet weather having prevented seeding.

The ammunition trade is rather quiet just now throughout the country. Quite a few people have taken out permits to shoot blackbirds, which helps a little.

V. L.

BRANTFORD.

June 22.—The intermittent showers and warm weather of the past two weeks has shown wonderful effects on the crops in this neighborhood, and the farmers state that everything is coming along fine. With prospects of wheat staying at the dollar mark, the local hardware dealers hope for a good share of the farmers' trade. With prospects of a bountiful harvest, the demand for binder twine is good. Oil cans, scythes, oil stones and such needed harvest material as forks, are in good demand.

A building permit has been issued to the Schultz Bros. Co., for the erection of a new three storey building on Dalhousie street, at a cost of $8 000.

Henry Yeigh, in speaking to your correspondent last week, in his capacity as president of the Telephone City Stoves Co., said that the furnace trade has been especially good this year. More high-class furnaces have been installed this year up to June 1, than during the whole of the previous year. Since acepting the agency for the Martin-Senour paints, the company sold as much in May as in the whole of the previous three years.

J. B. Wood, of Norwich, has purchased a car from the Batty Hardware Co., Norwich, who have the agency for the Mclaughlin line of automobiles. This is an opening that an energetic hardware merchant can boom, and get a considerable side-line profit on.

All stores in Waterford will be closed on Thursday evenings during July and August.

A fire broke out in McCrae's foundry, Tillsonburg, and did some damage, but no stoppage will be caused.

The foundation has been commenced for an addition to the Maple Leaf Tool Works, Tillsonburg, for the manufacture of handles. Other extensions are contemplated.

Building notes from Welland include the erection of a two storey brick block on Division Street, the erection of a new $17,000 four-room addition to the central school and an addition to the northward school.

Application will be made in a few days by Raymond and Spencer for the incorporation of the Welland Glass Mfg. Co., for the establishment of a plant for the manufacture of all kinds of window glass, including plate glass.

G. C. Mason has secured the contract for the erection of the new transformer house of the Falls Power Co., at Welland.

Watt and Squire have received the contract for all hardware for the new post-office being erected at Simcoe, at a cost of $30,000.

LONDON.

June 22.—The hardware trade continues fair and the prospects bright.

The probability is that the McClary Mfg. Co. will erect a warehouse at Saskatoon this summer. Col. Gartshore, vice-president and manager, says some property has been bought there by the company, but tenders are not yet received for the building. It is understood that a temporary warehouse will be erected at once, and a more substantial building in the near future. John J. Foote, the western business manager for the firm, is at present in Saskatoon looking after the erection of the building.

The annual picnic of the employes of the George White & Sons Co., at Springbank Park, on Saturday, was a most enjoyable affair. The attendance was large, the weather perfect and the programme of games, etc., was carried out with much enthusiasm.

It is said the C.P.R. contemplate the erection of a new round-house here.

Building continues to boom, and it is more than probable that the month of June will show $150,000 worth of building. As a matter of fact, 75 permits

for a total of $93,109 have been issued by City Engineer Graydon so far, and at least $60,000 worth more should be taken out before Dominion Day. The number of permits issued last June was 22, with a value of $61,000, so that a trifle over half the month shows an increase of 50 per cent.

The McClary Mfg. Co. held their annual travelers' convention this week. About 40 representatives were in attendance. Among them were A. A. Browne, Montreal; John Arthur, Calgary; Mr. Galloway, Vancouver; Messrs. Lawrence, Anderson and Murray, Winnipeg; Screaton, Jeffries and Long, Toronto; Owens, Montreal; Geo. Bishop, St. John; Main, Thompson and Quinn, Hamilton; Chalmers, Grenfell, McKellar, Thorpe, Ward, McKenzie and Hogge, London; Brodeur, Montreal; Ritchie, Montreal; Weston, Hamilton. The chief object of the convention was to bring the representatives together, and thresh out the problems and difficulties so frequent in the life of a salesman. Tuesday afternoon and evening were devoted to a discussion on "Profitable Salesmanship," Wednesday afternoon and evening, "Practical Demonstrations." Thursday afternoon was spent in going through the factory, while Thursday night and Friday addresses were read on the art of selling.

The new men's dining room in connection with the McClary factory was opened last Saturday. It is a fine, airy place, about 100 feet square, where the men are provided with hot water and towels for cleaning their hands, and in addition are provided with tea, coffee and the necessary dishes without cost to themselves. The dishes are thoroughly sterilized after each meal. To the other inducements are added a large number of current periodicals and playing cards for those who feel so disposed, while those more athletically inclined are provided with a quoiting ground. This move is an effort to improve the health conditions of the men. F. T. Y.

ST. THOMAS.

June 22.—Trade among the farming people has brightened up the past week as all seeding is through. The demand for Paris green is now heard. The price in force at present is 25c per lb., although 50-lb. lots are selling as low as 18½c. There are several sections where consumers have banded together and bought quantities and are selling it out at 19c per lb. As the local dealers will meet this action, it is likely that a price of 18c will be offered.

Ingram & Davey secured the contract for steel for the septic tanks, also for the different county bridges that will be erected.

The Board of Trade are negotiating with an American gun manufacturing company to establish a Canadian branch here.

The employes of Ingram & Davey have organized a baseball club to play any local trade club.

Col. Stacey, who was at the head of the Stacey Hardware Co., and now residing in Australia, is here on a short visit.

The building and grounds committee of the Board of Education have awarded to the James Smart Co., of Brockville, through Meecham & Co., the contract to instal four No. 30 Kelsey furnaces in the Wellington Street school. The system is hot air, and although the tender was second highest, the committee took into consideration the work of the same furnaces in Balaklava Street school, which are giving first-class satisfaction. The bids were: Hamilton & Stott, 4 No. 70 Improved Economy furnaces, $1,025; G. D. Stewart, 4 Sunshine furnaces, $1,175; Meecham & Co., 4 No. 30 Kelsey furnaces, $1,121; Ingram & Davey, 4 No. 28 Leader furnaces, $625. As there was an apparent error in the latter figures their tender was not considered, although Mr. Davey says the firm would be willing to carry out their tender. F.

News from the Prairies and British Columbia

Summer Hardware Selling Well at Saskatoon—Victoria Hardwareman Celebrates Anniversary — Industrial Activity at Comox—New B. C. Powder Plant—Building Activity at Vancouver Keeps Rushing Ahead.

VICTORIA.

June 17.—Trade for the past week has kept up very well and the tourist traffic has improved very much with the advent of fine warm weather. The A. Y. P. exposition at Seattle is having the effect of bringing a very desirable class of travel to the coast, and through the use of judicious advertising Victoria is getting a good number of visitors, some of whom will ultimately make this "City of Homes" their dwelling place.

Preparations are being made by the Esquimalt Waterworks Co. to lay a a large pipe from Goldstream to Esquimalt. The capacity of the new pipe line is a very large one—15,000,000 gallons per day. Victoria's present supply is only 3,000,000 gallons. T. Lubbe, manager of the company, says his corporation have in view the object of supplying water for industrial concerns, which, it is felt, will be located on the harbor, which is one of the finest in the world. This large capacity will afford an opportunity for Victoria to get a supply in case of necessity.

The Westholme Lumber Co. have been awarded the contract for building the new provincial hospital for the insane at New Westminster. The amount of the contract is $369,000. Work is to commence at once.

The addition to the electric light station, in which will be placed the pumps for the salt water system, is almost completed. The turbine pumps, which have been manufactured by the D'Olier Co., of Philadelphia, are expected here this week. There are two of them, one is to be operated by electric power, the other by steam. All the mains are laid and hydrants installed, so that when the pumps are in and in working order the additional fire protection will be an actual fact.

To-day Alexander Wilson, senior partner of the hardware and plumbing business of A. & W. Wilson, will celebrate the fiftieth anniversary of his arrival in Victoria, of which place he has been a resident ever since. Mr. Wilson has always taken an active part in public affairs, having been alderman for several years. He has seen Victoria grow from its infancy and has always been a firm believer in the future of the city. Congratulations are being extended to Mr. Wilson by his many friends.

The School Board have decided to purchase a site for another school in the east end of the city. Separate tenders are being called for the Moss St. school.

The B. C. Electric Railway are enlarging their present power house and are calling for tenders for excavating for and building of concrete foundations for steam engines and boilers.

Extensive alterations are being made to the upper floor of the city hall for the purpose of giving larger accommodations to the city engineer's department. The alterations will cost about $4,000.

Development work is going ahead rapidly at Comox. The Fraser Lumber Co. is pushing on the railroad construction and material is arriving daily.

The Denman Island Stone Co. expects to begin shipping stone this week to fill a large order for the B. C. Electric in Vancouver. Hoisting machinery has been installed with a capacoity of about 30 tons.

W. B. C.

SASKATOON.

June 18.—Local hardwaremen are displaying various lines of warm weather goods now in demand. Refrigerators, ice cream frezers, screen doors and windows, hammocks and camping outfits, are amongst the goods finding a ready sale.

Many of the local merchants attended the Board of Trade convention just brought to a close.

The Hub Roofing and Cornice Works have been awarded the contracts for the roofing and metal work on the new Bank of Montreal, the Baldwin block and residences for C. Wentz, N. Benolkin, J. F. Johnson, A. H. Hanson and A. McDonald. The same firm will also put a new roof on the Clinkskill block and the Young block. Another big contract received by them is that of making 100 galvanized iron garbage tanks for the city. This is only the first instalment of the number required. The city health department retails them to citizens practi-

MISCELLANEOUS

ADDING TYPEWRITERS write, add or subtract in one operation. Elliott Fisher, Limited, 129 Bay Street, Toronto.

A MARKET OF BUYERS, backed up by money to spend, is open to you in the Busy Man's Magazine. Every territory in Canada is represented. If you have something to sell, want to buy something, a condensed advertisement in the Busy Man's Magazine will put you in touch with the classes you wish to reach. Four cents per word will carry your message from Atlantic to Pacific. Send copy of your advertisement along with order to cover cost of insertion before 10th of month preceding date of publication. Your announcement will appear under a special heading. BUSY MAN'S MAGAZINE, Montreal, Toronto, Winnipeg.

MISCELLANEOUS

CUT DOWN YOUR PRINTING BILLS one half, by installing a "Writerpress." Your office girl or boy can with it print your circulars, price lists, etc., at the rate of 1500 to 2000 copies per hour. Best machine ever made for printing facsimile typewritten letters. Prints from printers' type, half-tones, etc. Retail stores could greatly increase their business by using a WRITERPRESS to run off circulars and letters, sending them out to their customers and probable customers announcing special sales, etc. Send for illustrated catalogue and samples. The Canadian Writerpress Company, 33 John St. South, Hamilton, Ontario.

DICTATING to the Dictaphone saves 50 per cent. We will prove it to you if you will send us a post card for full particulars. Toronto Phonograph Co., Limited, Dictaphone Dept., 40 Melinda Street, Toronto, Canada. (tf)

HIGH CLASS COLOR WORK; Commercial Stationery, Posters. The Hough Lithographing Co. Limited, Office—No. 3 Jarvis St., Toronto, Telephone, Main 1576. Art, Good Workmanship; Business Methods.

60,000 Shrewd merchants all over the world have paid $60,000,000 for 650,000 National Cash Registers. They've saved more than that. The National Cash Register Co., F. E. Mutton, Canadian Manager, cor. Yonge St. and Wilton Ave., Toronto.

KEEP AN ACCURATE ACCOUNT of your employes' time. The Bundy Autograph Time Recorder is the ideal Time Recorder for retail merchants. It is the only machine where one employe cannot register for another, as each employe signs his name and the employer knows the signatures of his men. Whether you employ a few or hundreds of hands, we can supply you with a machine suited to your requirements. Write for illustrated catalog. International Time Recording Co. of Canada, Limited. Office and factory, 11 Alice Street, Toronto.

SAVE 50% OF THE COST OF HANDLING merchandise by installing a Beath System of Overhead Carriers. Saves valuable floor space because the trackage is on the ceiling and greatly facilitates the loading of cars, drays, etc., and for handling goods in and about the warehouse and factory reduces the cost of labor because far less warehouse help is required. Systems for all kinds of businesses, large or small. Write us for illustrated catalog. W. D. Beath & Son, 193 Terauley St., Toronto. (tf)

YOUR CHEQUE CAN'T BE RAISED to any amount above that which you intend it to cover if you use the PROTECTOGRAPH. This device stamps a line such as "Not over ten dollars, $10," with acid proof, indelible ink, which penetrates right through the fibre of the paper. This device is being used by 90% of the Banks of Canada and the United States, as well as the treasuries of both countries. Write for full particulars and price. W. E. Parker & Co., Sole Canadian Agents, 37 Yonge Arcade, Toronto, Ontario. (tf)

A FIRM in South Wales, which proposes to establish a factory in Toronto, wishes to get in communication with Canadian Malleable Iron Founders in a position to supply castings. Address Box 858, HARDWARE AND METAL, Toronto. (tf)

LIVE BUSINESS MEN insist that their business correspondence be typewritten. Keen, progressive merchants find personal typewritten letters bring the best advertising results. They are secret, individual, powerful business getters. The Light Touch MONARCH is especially attractive to the merchant. Write for interesting literature. The Monarch Typewriter Company, Limited, 98 King St. West, Toronto, Ont.

Good financial standing and business connection a strong recommendation. Just the position for a retired business man for his spare time. The MacLean Publishing Company, Limited, Toronto.

Notice of Sale

H. H. DRYDEN, LIMITED, IN LIQUIDATION

Sealed tenders addressed to the undersigned, Sussex, N.B. will be received up to twelve o'clock Saturday, the 17th day of July, 1909, for the Real Estate, Buildings, Plant, Machinery, Tools, Stock in Trade and Office Furniture of the above named Company. Tender may be either en bloc or for separate portions.

Full statement and description of the property to be sold can be seen at the office of the company, Sussex, N.B. or at the office of Messrs. Weldon & McLean, 42 Princess Street, St. John, N.B.

The highest or any tender not necessarily accepted.

H. B. CHADBURN,
D. GEORGE CLARK,
Liquidators

cally at cost. The by-law provides that householders furnish themselves with a proper garbage receptacle.

The plans of Storey & Van Egmond, Regina and Saskatoon, have been accepted by the high school board for the new collegiate institute to be built here this year. The estimated cost of the building is $90,000, which with site and equipment will total $125 000. The competition between the architects was a very keen one and the plans chosen are on a very satisfactory scale. The plans show the big school to have a frontage of 152 feet by 82 feet deep. It will contain all the class rooms, laboratories and equipment, gymnasiums, bath rooms and recreation rooms, which are necesary in a high educational institution. Tenders are to be called for as soon as specifications can be got out.

The contract for the erection of a five suite apartment block for J. A. McRae has been let to F. H. Webb. The building is a two storey one. The contract price is $18,000.

The City Council have withdrawn their objection to the location of the new C. N.R. station on First Avenue. A space of twelve feet is to be left between the building and the street line. The contract has been let to Sam Brown, of Winnipeg, and work is likely to proceed at once.

Thomson and Homer, sanitary heating and ventilating engineers, of Winnipeg have opened a branch in Saskatoon. J. E. L. Homer is in charge. Premises have been secured on 21st Street. A show room will be fitted up with plumbing fixtures and other goods handled by the company. Mr. Homer sees a good opening here for this class of business and is confident that the city has a prosperous year before it. A good trade is anticipated right from the start, as the building program this year is a big one and includes many large contracts.

D.G.R.

HUMBOLT, SASK.

June 21.—Ritz & Yoerger's store, shown in the accompanying illustration, is 24 by fifty feet in size and two stories in height, there also being a 24 by 60-foot warehouse and 16 by 24 tinshop in connection. It is neat in appearance with modern shelving and silent salesman, and has a metal ceiling unlittered with the odds and ends often stored on the ceiling by many dealers. A special line shown is cream separators for which there is a good sale in this district. Stoves and tinware are also shown to good advantage with a sliding ladder for convenience in getting at the stock. Harvest tools are also kept neatly on a rack at the rear.

The firm have been taking Hardware and Metal for nine years and Mr. Yoerger says it is eagerly read by every one connected with the firm.

W. W.

Interior of Ritz & Yoerger's Store at Humboldt, Sask.

VANCOUVER.

June 19.—Business generally is so good in this city that several new enterprises are in prospect which have a direct connection with the trade. J. C. and A. J. Macdonald, proprietors of the Grand Forks Machine and Structural Iron Works, of Grand Forks, B.C., are in the city this week, looking over the situation with a view to starting an establishment here. They have received much encouragement from individuals prominently connected with the building trade. The firm has two plants in the Boundary district, where the mines brought considerable business, but with the relaxing of the activity of this industry it is proposed to move the larger to either Spokane, Vancouver or Prince Rupert. At present, Vancouver is the choice, though the Messrs. Macdonald will visit Prince Rupert before eventually deciding.

Another new proposition is the erection of a mill for the manufacture of black powder at Ruskin by the Giant Powder Co. Ruskin is located 30 miles from Vancouver on the main line of the C.P.R., on the Fraser river. This concern already has a dynamite plant at Telegraph Bay, near Victoria, on Vancouver Island. C. C. Bemis, of San Francisco, president of the company, has been here in connection with the matter, and now that the site has been secured, he says that work on the plant will be started without delay. The total investment will be $60,000. As the product is used mostly in clearing timbered land, there is a market all about.

Building permits for the past week totalled $119,800 in value, nearly all for dwellings, with two principal exceptions. These were for a school in Grandview to cost $40,000, and an $11,000 addition to A. C. Flumerfelt's new brick warehouse on Railway Street. A frame residence for N. S. Logan, on Victoria Street, will cost $9,000.

It is expected that with the sale of Prince Rupert lots completed, the construction of permanent buildings on the townsite will now be proceeded with. Up to the present, most of the places put up were of a temporary character, since the townsite was being laid out, and the people were there only on the suffrance of the railway company.

Premier McBride, who was present to officially open the two new steel bridges in North Vancouver municipality on Tuesday, made a significant statement, when he announced that he expected within three years to see the big bridge across the second narrows of Burrard Inlet to connect North Vancouver with Vancouver proper. This project has been talked of for a long time past, and with the proposed construction of the V.W. & Y. to the north, hope was entertained that the municipalities and the government would join with the railway company to make the bridge a joint vehicular and railway structure. It is thought that this will be the final outcome, but it is too large for action to be taken without lengthy consideration and negotiation.

Local hardware companies are taking advantage of the eccentric and diverse patterns in hats to attract attention to display windows by creations of hardware goods which strike the eye of the passers-by as highly original. They are an attractive feature, and one naturally halts to see how a cooking tin or some other article has been inverted, and with rope, dusters, etc., with awls and such like for pins, made to look much better in the window than many of the unique shapes which daily appear on ladies' heads. The North Vancouver Hardware Co. had an original design, while three ornamented the window of McLachlan Bros., on Hastings St., this week. The trimming would have done credit to a Paris designer.

Aldermen Morton, McMillan and Crowe, three of the practical members of the Board of Works, have been appointed a committee to go to Portland to inspect the Hassam method of pavement, which is in use there. A civic delegation from New Westminster, that went down to Portland, has returned and reports that it found the pavement very satisfactory.

The city engineer has approved the paving of Howe Street for two blocks from Robson to Nelson, with asphalt on the local improvement plan, to cost $11,692. This work has been looked after by an agent of the Barber Asphalt Co., Toronto.

BUILDING PAPER—Plain, 58c per roll; tarred, 78c per roll.

LINSEED OIL—Boiled, 80c; raw, 77c per gal. in barrel lots.

Your rival in business may have an especially good man in his employ who can be secured to your business by the offer of a higher salary. but will it pay you to pay him the price and bring him in over good men who have been loyal to you for years? Will not such a course put you in the position of hinting to all of your old employes that the loyalty of any salaried man belongs to the highest bidder for his immediate services, and induce him to figure with your rivals at the same time he is working for you?

Safeguarding Quality

IT'S on account of the exceptional quality of Sherwin-Williams Products that we have been able to establish such a large demand for them. The people want S-W. Paints and Varnishes, because they know they can depend upon getting satisfactory results from their use. We take every precaution to safeguard the manufacture of

SHERWIN-WILLIAMS PAINTS AND VARNISHES

We control the source of supply of practically all of the important raw materials we use. We have our own mines and smelters for the mining and preparation of white lead and zinc. We make our own dry colors and linseed oil. Our paints are ground in mills of our own design. We have aging capacity for 1,000,000 gallons of varnish at one time.

Quality should be of as much importance to the dealer who sells the goods as it is to the purchaser who uses them, for a business cannot continue to grow and endure for long unless its customers get satisfaction from the goods they buy.

S-W. Products will uphold and help build your reputation as a reliable merchant. Write us today for full particulars and prices.

BUILDING AND INDUSTRIAL NEWS

For additional items see the correspondence pages. Information is solicited regarding building and industrial news, the incorporation of companies, establishment or enlargement of mills, factories or foundries, municipal waterworks and sewerage systems, railway or mining news, etc.

Industrial Activity.

A farmers' elevator is to be erected at Carlyle, Sask.

Elevators are to be built at Kamsack and Tessier, Sask.

The Acheson Graphite Co. will enlarge their plant at Niagara Falls.

O. H. Waug, Sons & Co., Buffalo, will erect a factory at Port Arthur.

The Alberta Pacific Co. will enlarge their elevator at Red Deer, Alta.

The Imperial Extract Co., Toronto, will erect a new factory to cost $18,000.

O. K. Wilson secured the contract to build a 30,000-bushel elevetor at Corinne, Sask.

Mr. Enge, of the Aberdeen Flour Mills, will erect a mill to cost $25,000 at Humbolt, Sask.

The J. Y. Griffin Co. will spend $20,000 in extending and enlarging their premises at Nelson.

Kelowna, B.C., has secured a new industry, in the shape of a factory for the manufacture of wooden pipe.

The Fort William Manufacturers Agency have made arrangements for the erection of a suitable building.

The visit of Sir Robert Perks to St. John has revived the talk of a dry dock there. British capitalists are interested.

The New Prague Milling Co. who are building a flour mill at Moose Jaw, are negotiating for a millsite at Saskatoon.

The Imperial Elevator Co. will put up an elevator at Carstairs, Alta. The Alberta Grain Co. will also erect an elevator.

B. Dawson, of Campbellford, Ont., is arranging preliminaries for the location of a large bridge building works at Port Arthur.

J. H. Sutherland, J. R. Sutherland and John S. Blanchard have formed the United Glass Mfg. Co., and will erect a big glass factory and warehouse adjoining the G.T.P. shops at Winnipeg.

Definite announcement has been made that the new Ogilvie elevator at Fort William will be commenced immediately. It will be of 500,000 bushels capacity and built close to the present elevator.

Cook and Vanstone intend to expend $35,000 on the erection of a flour mill and a thirty thousand bushel elevator at Regina, as well as making provision for ample extension of the enterprise should it justify the outlay.

Mayor May, of North Vancouver, stated that it was proposed to locate a foundry and boilerworks in that city provided the city granted them exemption from taxation and provided free water for a number of years.

The headquarters of the Crescent Lumber Co., which recently took over the Moose Jaw Lumber and Supply Co., will be located in Moose Jaw. The company have five yards at present, and expect to be operating in the neighborhood of twelve to fifteen yards before fall.

The smelter at Boundary Falls and the mines of the Dominion Copper Co., in Deadwood and Phoenix camps, Boundary district, B.C., recently sold at public auction in Vancouver to the New York bondholders, will resume operations as soon as the work of reorganization can be rushed to completion.

Municipal Undertakings.

Wingham's proposed waterworks system is estimated to cost $5,865.

Additional sewers and flush tanks will be installed at St. Catharines shortly.

Tenders will be received for sections of Chapleau's proposed water works system.

It is proposed to raise $20,000 additional for waterworks extension at Kamloops, B.C.

The Toronto City Engineer will shortly call for tenders for eight miles of water mains.

Orillia ratepayers have approved of a by-law to spend $55,000 for sewerage disposal works.

Claresholm, Alta., ratepayers have carried a by-law to issue debentures for $56,00 for a water system.

Rosthern, Sask., ratepayers will on July 5 vote on a by-law to spend $6,000 on a fire protection system.

The Vancouver Board of Works have adopted the scheme for the Mount Pleasant sewerage system. Estimated cost, $133,000.

By-laws amounting to $313,600 in all have been carried by Regina ratepayers, of which $148,000 is for waterworks, and $9,000 for sewerage.

By-laws for the construction of nine miles of 18-inch and 12-inch water mains will be voted on by the London ratepayers on July 20.

The Toronto City Engineer has recommended the construction of sewers in the recently annexed district of Braccondale, at an approximate cost of $102,590.

The work on the temporary pumping plant to be erected at Thames and Horton Streets, London, to pump the water from the artesian wells into the mains, is going ahead rapidly, and it is expected that it will be in proper running order by July 1.

By July next year, the Esquimalt Waterworks Co. expect to be in a position to deliver 15,000,000 gallons of water at Esquimalt from Goldstream. Already preliminary preparations have commenced on the work and within a short time active operations will commence.

Tenders will be received until June 29 for the following sections of Clinton's, Ont., proposed waterworks system: "A," labor pipe laying; "B," pump house; "C," water tower; "D," cast iron pipes; "E," hydrants, valves, etc.; "G," pumping machinery; "H," producer gas plant; "I," receiving basin.

General Building Notes.

A. Ruzzuto, Fernie, B.C., will erect a new hotel there.

C. J. McMurray will build a $5,500 house at Winnipeg.

G. Ritchie, Hamilton, Ont., will build a $2,500 brick house.

D. J. Ross, Winnipeg, will build five houses to cost $17,000.

Plans have been prepared to erect an apartment block at Winnipeg.

W. H. Gardner will erect a store and office building to cost $45,000.

Campbell & Lucas, Melville, Sask., will have a business block erected.

D. Abramovitch, architect, Winnipeg is erecting seventeen houses.

G. E. Hutchinson, of Regina, is preparing plans for the Lumsden hotel.

R. H. Lear, plumber, will have an apartment block erected at Winnipeg.

The Bank of Montreal have plans ready for a $250,000 hotel at Port Arthur.

The Kinmore Apartment Co. will erect a $200,000 apartment building at Winnipeg.

The Union Bank are getting plans ready for a new bank building at Wilkie, Sask.

T. R. Fenton has plans for the new Imperial Bank building at Prince Albert.

Architect J. E. Wize, Edmonton, has plans for a three storey store and office block.

W. Hargraves, jr., and R. H. Corbett will erect residences this season at Kamloops.

A couple of Morden, Man., citizens will build a $30,000 business block at Prince Albert.

Chas. Hall, Brandon, has the contract for a new block. Estimated cost $12,000.

Wm. Ferguson, Brandon, will have a brick block put up at once. Cost over $10,000.

The Knechtel Furniture Co., of Hanover, Ont., are excavating for a $25,000 warehouse.

J. N. Pomerlean, of the Richelieu hotel, Edmonton, will build a new hotel in Melville.

Shaw & McNeil, architects, want tenders for several cottages to go up in Fort Rouge.

Edward Brown, of Portage la Prairie, will erect a $30,000 residence at Armstrong's Point.

Boyle & Crozier, Brandon, will have a three storey solid brick hotel erected at Carnduff, Sask.

Copping Bros., Winnipeg, Man., have the contract to build two residences there costing $8,500.

The Reformed Baptist Alliance proposes to erect a new hotel at Beulah, near St. John, N. B.

Mrs. Mary E. Looby, Edmonton, is to have a two-storey office and store block erected at a cost of $16,000.

Logan & Black, Yorkton, Sask., have been awarded the contract to erect four houses costing over $10,000.

Architect Matthews, Winnipeg, recently took tenders for erection of apartment block for W. G. Willoughby.

Geo. H. Archibald & Co., Winnipeg, have the contract to erect a six-storey building for W. R. Hull, at Calgary.

Darling & Pearson, are preparing plans for a Canadian Bank of Commerce branch building to go up in Fort Rouge, Winnipeg.

The Imperial Realty Co., Ottawa, took out a permit for its new apartment building there. The cost is to be $225,000.

R. Vancamp, Edmonton, has taken out a permit to build a $3,500 house.

E. J. Taylor will build a $5,500 brick residence.

Architect Atchison has plans nearly completed for an office building at Winnipeg to cost $50,000. Work will be begun at once.

Western Travelers Seek Lower Railway Rates

Several Reforms to be Requested by the British Columbia Knights of the Grip—Baggage Rates, Hotel Accomodation, Including Fire Escapes, Discussed and Resolutions Passed.

Vancouver, B. C., June 11.—This was commercial travelers' week, the first time that the wholesale houses have given their men seven days off at the same time. It was inaugurated on Monday with a luncheon tendered by the wholesale men and returned with a smoker by the travelers, at which many matters of mutual interest were discussed. On Thursday, nearly all the travelers and many others took the steamer Makura to Seattle to attend the Fair, returning on Sunday.

H. A. Stone, of Gault Bros., Limited, President of the Board of Trade, occupied the chair at the luncheon, when about 150 were present. Speaking as an employer, he stated that the Commercial Travelers' Association had done much good for the wholesale men. The cause of the traveling men in nearly every case became the cause of the wholesalers, and when unity was effected, strength came also.

R. E. Jamieson, of the Canadian Rubber Company, introduced the first resolution, calling for the appointment of a committee to secure lower transportation charges for British Columbia travelers. He pointed out that Toronto travelers coming westward could go through to Victoria at two cents per mile, ordinary tariff, while the British Columbia man had to pay three cents. On a trip of 6,000 miles, the Ontario traveler had a $60 advantage over the Coast drummer, the Manitoba man $45, and the Alberta and Saskatchewan traveler, $30. Taking into consideration the fact that there were 1,000 travelers doing business in British Columbia towns, this meant a large financial difference. Moreover, in six months of the year, the Eastern man had a special advantage in the tourist rates and could travel at 1¼ to 1½ cents per mile. Besides, he had full stop-over privileges, an added advantage over the Coast traveler, who is without this benefit. A. R. Macfarlane seconded the resolution.

The question of excess baggage rates was brought up by E. B. McMaster, of McMaster & Sons, wholesale clothiers. This also threw the eastern and western men into comparison, much to the advantage of the former. Mr. McMaster stated that the excess rate on baggage was 12½ per cent. on a first-class fare, that is to say the Eastern man pays 12½ per cent. on a two cent rate, while their western confreres are assessed the same percentage on a four cent rate. His resolution was to the effect that the wholesale men be asked to lay the question before the Railway Commission, in conjunction with the Vancouver Board of Trade. F. J. Lumsden, was seconder.

Hotel Accommodation.

E. F. Gerster proposed that the Association name a committee to draw up a progressive policy regarding hotel rates and accommodation. The objection in this case was that in some of the outlying towns third-class accommodation was given, but the rates were for first-class or even higher. This committee could receive the complaints from the men affected and then deal with the hotels. He hoped the wholesalers, who were also affected, would assist.

In seconding the resolution, E. J. Stollard dealt with the fire escape question, showing that, while the licence act expressely called for their instalment, in very few cases was it obeyed. Fire escapes were made compulsory in Saskatchewan and Alberta, and he would like to see the same done in British Columbia.

Livery and transfer charges were handled by A. R. Macfarlane, who moved a resolution calling for action by a committee with a view to remedying the evil. J. R. McIntosh was seconder. Mr. Macfarlane gave instances of excessive charges in Greenwood, where a charge of $7.50 was made for a drive of four miles to Phoenix, and $5 for a trip down the hill. In Cariboo, $10 a day was charged for a single rig, and in Ashcroft $1 was charged for taking a trunk across the street and back.

These resolutions went over to the evening session, when they were unanimously adopted after short discussions, and will be handled by the following joint committee: W. J. McMillan, wholesale grocer; R. P. McLennan, wholesale hardware; Henry A. Stone, wholesale dry goods; travelers, William Burke, H. M. Burritt, E. B. McMaster and R. E. Jamieson.

The smoker proved enjoyable, among the items on the programme being: comic songs, T. Jones; recitation, H. McKelvie; song, J. Collins; costume song, E. Dwyer; blindfold boxing, A. R. Kelly and R. Douglas; song, H. M. Burritt; Chinese monologue, H. McKelvie. A bread race, participated in by several of the travelers, was a feature of the evening. At the conclusion of the smoker, supper was served to the hundred odd present.

A LOSING GAME.

Investigating Wall Street, Gov. Hughes' committee found plenty of difference of opinion about remedies, and even about facts, but some of the testimoney to which they listened has a decided general interest for the country. A Stock Exchange member of 40 years' standing stated that every one who enters Wall Street, except as a broker, loses. In a partnership contract to preclude a junior's speculating, this man made a bona fide offer of $5,000 for the name and address of every verified wining customer of any Wall Street house—provided only that the customer had so traded for two years as to make his account an "active" one. Another, for 12 years a member of a prominent brokerage house, stated that in all this time, after very broad operations, not a single customer ever took out a dollar of net winnings. An ex-broker stated that a 10-year search covering scores of trading friends and acquaintances, as well as the records of five brokerage houses and one bucket shop, failed to find a single net winner. Most brokers estimate that betweent 90 and 98 per cent. of customers lose. As practically every marginal trader loses, every bucket-shop and Wall Street house has a complete new list of customers in from three to five years.—Collier's Weekly.

Catalogues and Booklets

Manufacturers or jobbers sending printed matter for review, should draw attention to the new lines listed; and retailers sending for catalogues or other matter, should write on their regular printed letterhead and mention this paper to make clear that they are in the trade.

The 1909 Iron Age Directory—The Iron Age, New York, have just issued the thirteenth annual edition of their directory, which contains a classified index of goods manufactured by advertisers in the Iron Age. The directory contains 377 pages of names of manufacturers of metal goods from "Abrasives" to "Zinc Tubing."

TINWARE AND HOUSE FURNISHINGS—E. T. Wright & Co., Hamilton, makers of hardware specialties and tinsmiths' supplies, have issued in their "Catalogue No. 18," a volume of 400 pages replete with illustrations and descriptive matter of the various lines made by them. The catalogue deals with lanterns of all kinds and sizes; bird cages, household utensils, mouse traps, pressed, pieced and Japanned tinware, tools, stove pipe and stove specialties, lunch boxes, and many other articles of this class of goods. In fact deals with almost every article required in the tinware and housefurnishing business.

The various articles are grouped in departments and they may be readily got at by a number of thumb stubs on the edge of the book, which are a decided novelty in a catalogue. As well a complete index enumerates concisely the articles manufactured and a memo page at the end of the book might prove useful to interested parties. The company is sending out this complete catalogue to the trade and also issuing a supplementary catalogue devoted exclusively to lanterns, bird cages and household specialties.

AGENTS FOR LYNN FILTERS.

John Burns & Co., Craig St., Montreal, have been appointed Canadian agents for the Lynn Filter Mfg. Co., Cincinnati, who construct a wide range of filters suitable for all needs from the 200 gallons per hour one, to the handy faucet filter. These filters contain a special filtering medium—the exclusive product of the company's own pottery. The medium is, of course the vital point of a filter, it must be neither too hard nor too soft—it must be one that will allow the water to pass through rapidly and deliver it in a clear sparkling state. The various Lynn filters are easily cleaned and installed, and are of moderate cost.

Promote the good man and discharge the poor one. The manager of a business who lives up to this plan of action will soon gather around him a bunch of people who will be loyal and can be depended upon no matter how great the pinch may be.

The Retail Paint Trade

THE PROPERTY OWNER.

There is no doubt as to the good results to be obtained from a determined follow-up of the property owner. We have often times before shown how the most obstinate property owner can be made to see the advantages of paint if he is gone after successfully. No man is blind to his own interest, and if you can show to him that his property, by the use of paint, is not only preserved against deterioration but is enhanced in value as a selling proposition, he is not going to turn you down because of a few dollars expense. But he must first of all be convinced. It is of no use telling him about the advantages of paint, if he does not believe in the statements. But if convincing arguments are used then there will be no hesitation.

If possible the dealer should have examples to back up his arguments. Collect the statements that appear in print as to the value of paint and get them inserted in the circulars. Seize hold of any customer who is willing to give an instance where the using of paint had saved him money, and give the case wide circulation. Then, again, when paint has been sold to a property owner, and it is going up on the house, call the attention of the whole community to it. Advise them to watch the difference betwen the house before and after painting. Ask them if the house is not worth many dollars more, besides being a credit to the owner and to the district. Tell the community to watch how the paint wears, and it is on this point that the dealer who has confidence in his goods can score such a strong point. If the store is carrying a reputable line then the dealer can regard the result with equanimity, but if he has no confidence in his goods and has put his paint to the test, his outlook will be very gloomy. A test of paint in this way could not have greater force with a property owner.

Another good idea is to select a house which is in need of painting and to send the owner a selection of shades. This often has a good effect, but all these things are not of much avail unless they are persistently followed up. Half hearted efforts are of no use. They are simply a waste of time. You have to convince a man as to the necessity for paint, and when you have once done this, he will always be a convert.

The smaller the town the more frequently paint window displays should be changed. In a small town the crowd does not change much. The same people pass and repass the store day after day. If a window display is left in too long it will cease to attract their attention. Frequent changes will serve to attract their attention every time they pass. They will always be looking for something new.

Tiger  Brand

WHITE LEAD

To specify "TIGER" when ordering White Lead is to be assured of getting an article that has given satisfaction to Painters for over 30 years, and has never been found wanting in those qualities that go to the making of a perfect White Lead.

It is made from absolutely pure White Lead and pure Linseed Oil, and, subjected to our process of grinding and seasoning, the result is an article giving universal satisfaction.

White Lead Association's guarantee label on every package.

The Montreal Rolling Mills Co.

Paint and Oil Markets

MONTREAL.

June 25.—A good feeling is noted in almost all lines of decorating material and shipments are reported to be very heavy, especially for staples such as linseed oil, white lead, turpentine, and cheaper grades of varnish. Ready mixed paints are also swinging out well, and although there is no great rush there is little time to spare in the shipping departments. No price changes are announced, and the markets for the time being seem firm.

TNRPENTINE. — Turpentine is now steady. There is a strong consuming demand. The absence of price fluctuations has tended to make buyers purchase with more confidence. We continue to quote 57c for single barrels net 30 days.

LINSEED OIL.—Linseed oil is experiencing a healthy demand. Some heavy orders have come in, and the market at present seems in a very strong position. No prices changes are announced, and we quote: Raw, 1 to 4 barrels, 63c.; 5 to 9 barrels, 62c.; boiled, 1 to 4 barrels, 66c.; 5 to 9 barrels, 65c.; strictly net 30 days.

GROUND WHITE LEAD.—A capital inquiry is apparent from all parts of the Dominion and supplies are not allowed to accumulate. The slightly advanced prices seem to have the effect of inducing many people to stock up more freely than for some time past. We quote: Strictly pure, $5.60 to $6.10, acording to brand, and No. 1, $5.10 to $5.60, f.o.b., Montreal.

RED LEAD.—An absence of large orders are noticeable, and the requisitions seem to point to a hand-to-mouth policy on the part of buyers. No price changes are reported, and we quote: Genuine red lead in casks, $4.50; in 100-lb. kegs $5; less quantities at $6 per 100 lbs.; No. 1 red lead, casks, $4; kegs, $4.50, and smaller quantities, $5.50.

WHITE ZINC.—White enamels, which are used for what is called colonial effects, continue to be in good demand. In fact the trade generally has much improved. We continue to quote: Dry V. M. Red Seal, 7½.; Red Seal, 7c.; French V.M., 6c.; Lehigh, 5c.; white zinc, ground in oil, pure 8½c.; No. 1, 7c.; No. 2, 5¾c.

PARIS GREEN.—There has been an improvement in the demand, and the present weather should improve matters. We continue to quote: 1-lb. cartons, 18c.; 1-lb. tins 19c; 50-lb drums, 17c.

PUTTY.—Putty is in good demand. A strong call now exists for putty in 100-lb drums, and 25-lb. drums. These are handy forms for carrying putty preventing, as they do loss by the absorption of the linseed oil. The market is firm, and we quote: Standard putty, 880 lbs., in casks, $1.65; in 100-lb. drums, $1.90; bladder putty, 400 lbs., in barrels, $1.90; in 100-lb. cases, $2.05; in 25-lb drums, $2; 25-lb. tins, $2.05; 12½-lb tins,, $2.25 f.o.b. Montreal.

TORONTO.

June 25.—The paint business is still active, but there are signs and indications apparent that the rush season is past. Not so much ready mixed paints have been moving this week, and the very hot weather is not provocative of painting by the householder. White lead is going out in considerable volume, however, and all paint lines are firm. Turpentine has gone up 3c for single barrels.

The fall promises to see a revival in business. No doubt much of the painting postponed because of unseasonable weather this spring will be pushed in the autumn. This, together with the new building work should put the paint trade at the top notch.

TURPENTINE—Savannah has advanced "turps" 3 cents. This has led to a corresponding higher price here. The quotation is placed at 62 cents. The market, however, is irregular, for two houses are quoting low prices, one at 60c and the other at 58c for single barrels. This makes the situation unsettled. Very little turpentine is moving just now.

LINSEED OIL—Unchanged in price, though still firm, is linseed oil this week. Some fair orders have been placed, but trading on the whole is none too active, buyers taking only such oil as they need, hoping for better prices for next season. The prices are 63c and 66c for raw and boiled, single barrels.

WHITE LEAD—The most active line of the week has been white lead. Prices are unchanged, but are firm at the recent advance. Quotations range all the way from $5.50 to $6.35 for the various grades. In red lead the market is unchanged in condition and price. Casks are $4.50.

GLASS AND PUTTY—Some improvement is noticeable in the movement of window glass, though the volume of business is not great. Prices hold good for both glass and putty. The latter is not so active as during the past couple of weeks.

STAINS AND VARNISHES—The market is quiet this week and unchanged prices prevail. Ready mixed paints, too, have dropped off in sales quite a little.

PETROLEUM—All lines are at the prices prevailing for the past six weeks. Benzine and gasoline are yet the favorite lines. There is a tendency to easier prices in gasoline and it may be that by next week a slight decline will be noted. Business is good.

HINTS TO BE REMEMBERED.

The following valuable hints which should be remembered by dealers in giving advice to customers, are being printed by the Bureau of Promotion and Development of the Paint Manufactur-

The Painter Knows

That's Why He Asks For

"ENGLISH"

LIQUID PAINT

He knows that the shades are clean, clear and perfect.

He knows that the guarantee formula appears on the can.

He knows that the white base is

70% Pure White Lead
30% Pure White Zinc

thinned with pure linseed oil, turpentine and dryer.

It suits him. This is only one of the reasons why progressive dealers are taking up the agency.

ers' Association of the United States: Moisture is the foe of paint. It is safer to have water in the paint than under the paint. Durable work cannot be done on a moist surface with a pure oil paint. On such a surface an emulsion paint capable of absorbing moisture stands a better chance; though its protective value is small.

Most woods absorb moisture very readily. They will absorb the moisture from a foggy or humid atmosphere juite as readily as from rain. Incidentally, they will also absorb moisture from green plaster, so that undried plaster on the interior of a house is likely to cause as much trouble to the paint on the outside as a foggy day.

The remedy is to paint only on well dried wood, preferably after a "spell" of dry weather—the fall season, after a dry summer, is a time very favorable to successful painting.

Cold weather is also bad painting weather. It chills and thickens the oil so that there is a temptation for the painter to add too much thinner in order to get easy working. Moreover, cold retards drying, and this further tempts the painter to ruin the paint with too much dryer. Extremely hot weather, especially when the wood is not absolutely dry, is likely to cause blisters, which, while they may disappear as the paint dries, nevertheless detach the paint from the wood and cause peeling at a later date.

No paint is "ready for use" for all purposes. Conditions of surface vary, and each condition requires some variation in the consistency of the paint. Each coat should also vary somewhat in consistency and composition. All manufacturers carefully indicate these differences in their "instructions for use." The intelligent painter understands the requirements and makes additions accordingly. BUT—let us spell the word with capitals—BUT any paint, whether white lead and oil, prepared paint, or enamel, can be and very often is absolutely ruined by improper or excessive admixtures.

Leaving out of consideration the damage that a dishonest painter can do by adding cheapening adulterations, the ignorant painter's bad judgment can cause equal injury.

It is the easiest thing in the world to burn up a coat of paint with an excess of dryers, even if they contain no benzine and no rosin. Too much dryer does to the paint in a short time what the air does to it in a long time—it wears out its life by oxidation. Some painters think that the more dryer there is in a paint the quicker it will dry. This is not true. After a certain limit has been reached the addition of more dryer will retard drying. There is a chemical reason for this which it is not necessary to set forth—the important point to remember is that it is a fact.

So we see that here, as elsewhere, we may easily have too much of a good thing.

Ordinarily there is enough dryer in a prepared paint to make it dry properly and the addition of more is at the user's risk.

In getting paint to dry it is a wise rule to hasten slowly. The oxygen of the air is the best possible dryer. Other dryers are to paint what stimulants are to a man—they produce prompt results, but they take it out of the constitution later. Better wait a week between coats than have to repaint a year sooner.

RIBBON LEAD.

In several of the quick process methods for making white lead, the metallic lead is first reduced to the form of ribbons, in which condition it is obviously much more amenable to the action of the reacting vapors by reason of the much larger surface exposed to the action of these. In one of the chamber processes the lead is first cast into cylindrical masses 12 to 15 inches in diameter and 3 or 4 feet long. These cylinders are then mounted in a sort of turning lathe, and by means of a suitably pointed graving tool a continuous ribbon of the lead is removed. the cylinedr traveling along the bed of the lathe in the usual well-known manner.

It is interesting to note, that recently a series of patents have been taken out for producing ribbons not only of lead but of other metals in a very much simpler and what appears to be an exceedingly economical manner. The process is remarkably simple. The metal is first melted. and is then caused to flow through one or more nozzles in a thin stream and to impinge on the peripherv of a rapidly rotating drum which is water cooled. The metal instantaneously solidifies, and is thrown off the surface of the drum in the form of long continuous ribbons. It is claimed that the width of the ribbons is dependent upon the diameter of the nozzle, and that the thickness varies inversely as the speed of rotation of the drum. The patentees are of opinion that provided ribbon lead can be utilized in white lead manufacture this process provides the means of producing it at a cost which has never been approached before.

PAINT NOTES.

Ed. Dallyn, St. Thomas, has the contract for painting the registry office there. It is worth $150.

A fire which raged in an Ottawa business block last week damaged the premises and stock of W. S. Howe, painter.

If you wanted sand in your sugar you could put it in yourself. You don't care to pay the grocer sugar price for sand. It's cheaper to pay a little more for pure sugar and get your sand elsewhere. Neither should you pay for clay or grease when you buy rope, and the fact that these "weighting" substances actually injure the fiber gives this all the more force. Better pay more for pure fiber rope, whether you use little or much and get your clay and grease some other way.

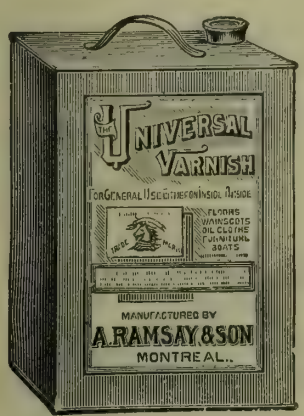
THE C. P. CO.

Ramsay's Varnishes



One of the greatest lines for profit in the business is the Varnish Line.

Study this line carefully. You ought to have the profit.

Varnishes in tin provide the best profit, because it is quick and no waste.

The Ramsay lines of Varnishes are leading everywhere, because they have the greatest value for the smallest price. They are favorites.

Here is one of them.

Ramsay's Universal Varnish is the big leader to-day. It has been out, tried and proved for years.

It is in general use for Counters, Doors, Carriages, Sleighs, Floors, Desks, Boats, Wainscots, Oilcloths, Etc.

Have Ramsay's Universal and you have a varnish for all.

Drop us a card and we will tell you more about it.

A. RAMSAY & SON CO.
MONTREAL

Est'd 1842 Varnish Makers

Clean, Clear and Perfect

That is the kind of paint a customer expects, and if you hope to retain the confidence and patronage of the painting trade, that is the sort of color you must sell.

New Era Paint

is the kind that measures up to such requirements. There is no doubt about it being durable, lustrous and honestly made from pigments that are well ground. New Era is a paint that in quality is uniform throughout. Here is its composition: Pure White Lead; Oxide of Zinc; Pure Linseed Oil; Turpentine and Turpentine Japan Dryers.

Both Right

As you know, you can't afford to take a chance with your customers by carrying in stock poor fillers or finishes. Some dealers are particular about their stock of finishes, but neglect the fillers—hence some paint makers slight the fillers in the making.

Martin-Senour FILLERS and FINISHES

are both right. The same care is taken in making our fillers as in making our finishes. A poor filler makes a poor job that a good finish don't always save. Only the very finest ingredients known for producing satisfactory results are used in our factories. Our fillers are famed for their showing up any wood at its very best—and our finishes are unsurpassed for beauty and wear—yes, our fillers and finishes are ***both*** right. An order will prove it.
